

Preparedness, Readiness, Response

BactiBarrier Detergent/Disinfectant is an EPA registered quat detergent and disinfectant which is effective as a bactericide, virucide, and fungicide and is authorized for use in food preparation areas. Each gallon makes 65 ready-to-use gallons, making it an extremely affordable disinfectant and cleaner for restoration and cleaning jobs.

The Detergent/Disinfectant is EPA approved to disinfect surfaces contaminated with Human coronavirus, Escherichia coli, Pseudomonas aeruginosa, Shigella dysenteriae, Methicillin resistant Staphylococcus aureus (MRSA), Influenza, HIV, Norovirus, Aspergillus niger and much more.

Due to the present COVID-19 crisis, we are reintroducing BactiBarrier Detergent and Disinfectant on a temporary basis to supplement the high demand from our contractors in need of products to use in deep cleaning situations. This product is on the EPA's "List N: Products with Emerging Viral Pathogens AND Human Coronavirus claims for use against SARS-CoV-2." The BactiBarrier EPA Registration Number is 10324-59-89067. The Master EPA Registration Number for this product is 10324-59. By searching that number, you will see the following:

List N: Products with Emerging Viral Pathogens AND Human Coronavirus claims for use against SARS-CoV-2

EPA Registration Number	Active Ingredient(s)	Product Name	Company	Follow the disinfection directions and preparation for the following virus	Contact Time (in minutes)	Formulation Type	Surface Types for Use	Use Site	Emerging Viral Pathogen Claim?	Date Added to List N
10324-59	Quaternary ammonium	Maquat 64	Mason Chemical Company	Human coronavirus	10	Dilutable	Hard nonporous	Healthcare; Institutional; Residential	No	03/19/2020

• As with many EPA Registration Numbers, you may find an alternate name that you may not be as familiar with. This IS the BactiBarrier product.

• Remember to follow the directions on the label.
