

Multi-Chamber Decontamination Systems

NEW Multi-Chamber Decontamination Systems create a quick, yet rugged jobsite solution, with the additional economical and disposable benefit that abatement, restoration and remediation contractors seek.

Current offering includes a complete 3-Chamber (Dirty/Shower/Clean) System in both a standard dual-layer 6-mil poly, or Fire-Retardant film. For additional flexibility, a 2-Chamber (Dirty/Clean) System is designed to be utilized in conjunction with many of the aluminum showers that are available in the market today. 2-Piece Support Poles are packaged as a complete set for each individual chamber. Reusable shower fixtures and drain water removal components available separately.

- ▶ **Elevated flooring keeps workers out of waste water.**
- ▶ **Openings in bottom of shower chamber allow for installation and routing of plumbing and drainage hardware.**
- ▶ **Recessed cutouts in corners quickly identify pole placement locations.**
- ▶ **White poly provides privacy while clear poly at top of chamber maximizes allowance of penetrable light.**
- ▶ **Pole sets use friction connections to provide flexible tension chamber supports.**
- ▶ **Easy to follow assembly instructions on the outside of the chamber system box**

NEW!

▶ **37" L x 37" W x 77" H**
