

# TRIANGLE WARNING KITS

PROUDLY MADE IN THE U.S.A. 

## WARNING KITS

The Cortina Triangle Reflector Warning Kits meet or exceed all DOT FMVSS125 requirements, thus ensuring that your fleet and the motoring public have the finest product available. The triangle's wire form support guarantees tilt compliance of 40 mph wind test. Opaque container protects fluorescent color from UV deterioration. The unique living hinge box, wire support, and tabs are available ONLY by Cortina. The living hinge box ensures that the lid won't separate from the box. A heavier weighted base ensures that triangles won't move by wind gusts caused by passing traffic. Furthermore, it guarantees compliance to Federal Specifications. Air flow louvers allow for lower wind resistance. Cortina Triangle Reflector Warning Kits meet and exceed all DOT standards and requirements of FMVSS 125. The unique One-Piece living hinge box allows for thousands of openings and closings and eliminates all hinge problems that the industry has faced for years.

## E | DISTRESS ALERT TRIANGLES

Using the same technology found in truck triangles, the patented Distress Alert provides a quick, efficient and inexpensive tool to inform other motorists of your presence on the roadway. Our unique, patented window hook allows the triangle to mount on any car window in the universally recognized upright position. No tools required! Simply unfold and hang on your window.

DONT GET ON THE ROAD WITHOUT ONE!
