

WHAT'S NEW IN

Eye & Face PROTECTION

North Adaptec™

One style. Three sizes.
Customized fit and performance.

Setting out with a new approach to safety eyewear, we wanted to create a product that would fit everyone – no matter their gender, ethnicity, or facial features. After completing a landmark eyewear research study, we poured everything we learned into the development of the North Adaptec Protective Eyewear System. The result? An adjustable eyewear system that can be worn by the widest range of workers and still deliver excellent protection, superior comfort, customized adjustability, premium optics, and a stylish look.

Engineered to meet the demands of today's most diverse workplaces, the North Adaptec Protective Eyewear System offers a stylish, comfortable and secure fit utilizing all-new adjustable fit tools built into each piece of eyewear.

North Adaptec Protective Eyewear System is designed in three scientifically determined sizes (Regular, Narrow, and Wide) to meet the unique eyewear fitting requirements of every individual.

One style means simplicity of stocking and ordering as well as consistent usage by workers.

Three sizes means the right protection, improved performance and optical clarity for everyone in your workplace.

Customized fit and performance means personalized comfort for each wearer, ensuring all-day protection and compliance with safety requirements.
