NEGATIVE AIR – AIR FILTRATION MACHINES – Models 1000 & 2000

Model 1000

- Roto-molded polyethylene construction
- Powerful, thermally protected motor generates consistent flow rate and utilizes all filter media area
- 2 speed motor: 1000 cfm (high speed) & 500 cfm (low speed)
- 8 point motor / cage mounting prevents motor and cage shifting even under the harshest conditions
- Seamless construction guarantees leak proof operation
- Lightweight design with incorporated skids allows for easy and safe transport
- Positive lock filter prevents filter movement for uninterrupted filtration
- Uses standard 16" x 16" x 11.5" HEPA filters
- General purpose filters and audible alarms available
- Custom controls and features available on request

Front Control Panel
Includes Minihelic pressure gauge & circuit breaker; available with audible & visual alarm

Model 2000

- Roto-molded polyethylene construction
- Powerful, thermally protected motor generates consistent flow rate and utilizes all filter media area
- 2 speed motor provides true air flow of 2000 cfm (high speed) & 1200 cfm (low speed) with filters in place
- 8 point motor / cage mounting prevents motor and cage shifting even under the harshest conditions
- Seamless construction guarantees leak proof operation
- Lightweight 2000 cfm unit easily transported by 2 operators
- Positive lock filter prevents filter movement for uninterrupted filtration
- Uses standard 24" x 24" x 11.5" HEPA filters
- General purpose filters and audible alarms available
- Custom controls and features available on request
