

This three sided plastic dust barrier was put up by one person in less than five minutes.

No tape, no ladders, no marred ceiling!

Invented by a contractor, the ZipWall® System was the result of a long search for a way to put up a dust barrier quickly, without using tape, nails, or other materials that are slow and damaging to walls and ceilings. ZipWall® products are currently sold worldwide and are also used in hospitals, museums, airports, industrial clean-rooms, etc.

- ▶ Plastic thickness of up to 8 mils can be used with the ZipWall® system.
- ▶ Also works with light canvas tarps or cotton fabrics.
- ▶ Poles are available in two styles:
SLP - Spring-Loaded Poles (left).
Extends from 4' 7" to 12'.
Packed two per box. **Item #SLP2**
20' POLES - with Classic Jacks.
Extends from 6' 9" to approximately 21'.
Item #KT-20

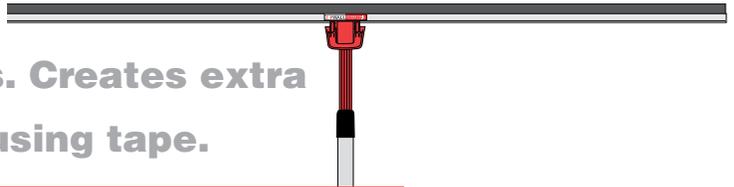

Note: Classic Jacks (right), used in earlier models, are now much stronger, virtually unbreakable. **Item #ZWJ1.**

ZipWall® LLC has obtained U.S. Patents: 5924469, 6209615, 6321823, 6508295, 6942004, 6953076, 7108040, 65645, and 7073758 as well as a number of foreign patents. Other U.S. and foreign patents are pending.

TIGHT-SEAL™
accessories

For ZipWall® barriers. Creates extra tight seals without using tape.

FOAM RAILS™

For a tight ceiling seal: Use the Foam Rail™, a 5 foot cross bar with a soft, spongy edge that attaches to the top of the ZipWall® Pole and presses the plastic sheeting firmly against the ceiling.

SIDE CLAMPS™

For a tight side-wall seal: Use the Side Clamp™. This device attaches to the Foam Rail™ and presses the plastic sheeting firmly against the side wall.

These Tight Seal™ Accessories are sold separately:

Foam Rail™: Packed two per box. **Item #FR2**

Side Clamp™: Packed two per box. **Item #SC2**

Now available:

The **Side Pack** has every thing you need to seal both ends of your ZipWall® barrier. It comes with 6 special three foot Foam Rail™ cross bars, six Side Clamp™ wall mounts and a bag specifically for carrying these items. To seal the end of the barrier, attach the Foam Rails™ to the Side Clamps™ and then latch them to the poles next to the wall. The Foam Rails will push the plastic against the wall creating a tight seal. Installing all three on each wall, and overlapping them, enables you to completely seal any wall up to nine feet high.

Contains six special 3' Foam Rail™ cross bars, six Side Clamp™ wall mounts and one custom bag. **Item #SDPK**

CAUTION TAPE™

REEL

Set up a neat barricade quickly

without the need to tie caution tape to chairs, doorknobs, or heavy stanchions.

- Professional looking, the tape stays flat and upright - always displaying its message.
- When your project ends, reel in the caution tape like a fishing line to use over and over again.
- Use on lightweight ZipWall® Poles in any configuration with or without plastic barriers.
- Reel holds caution tape rolls of all sizes up to 1,000'.

Caution Tape Reel™ Pack comes with 300' of caution tape and 6 Tape Clips to attach tape to poles. **Item #RLPK**

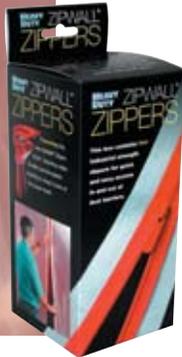

Also available: Facility Pack containing Caution Tape Reel™, a 300' roll of caution tape, 6 Tape Clips, 6 ZipWall® Spring Loaded Poles, and a Carrying Bag. Total weight: 12 lbs.

Item #RLFP

HEAVY DUTY ZIPWALL[®]

ZIPPERS

Heavy Duty ZipWall[®] Zippers provide quick and easy access in and out of dust barriers. Each box of 2 zippers comes with the innovative ZipWall[®] Zipper Knife, which double cuts the sheeting to keep it from jamming. Patent pending.
