

## RESPIRATORY PROTECTION

**Product Name: Industrial Safety Respiratory Protection**

**Brand/Model: North by Honeywell**

**Series / Product Number: CF2007 for Half-face and Full Face piece Mask**

**Product Image:**

**Brief Specification:** Convert your North half mask or full facepiece to continuous flow with the CF2007. This breathing tube attaches to North facepiece cartridge connectors, eliminating the need for special adapters or tools. NIOSH approved for use with North 5500, 7700, 5400 and 7600 Series including full facepieces with welding front. Facepieces, hoses and couplers sold separately.

**Approval and Certification:** NIOSH Approved; CE Marked

### Features:

- Threads onto North cartridge connectors - Adapts to North 5500 & 7700 half masks and 5400 & 7600 full facepieces. Choose the right facepiece for your work environment and budget. Provides flexibility for different worksite protection levels. No additional fit testing.
- Breathing tube hoses are located on worker's back - Hoses are out of the way of the work zone. Even weight distribution. Hose will not pull down on facepiece. Will not interfere with tasks at hand. Less worker fatigue. More secure fit.
- Low profile connections - When used with half mask, fits under welding helmets and faceshields. Add additional eye and face protection for welding, grinding and other applications.
- NIOSH approved for use with 5400 and 7600 with welding adapter - May be used for welding applications. Provide welders with the increased respiratory protection of a full facepiece.
- 360 degree swivel on facepiece connection - Allows full movement of breathing tube without loosening the connection. Extra secure and safe - will not come off even during the most strenuous movements.
- Soft flexible hoses at top, next to worker's face and neck - More comfortable and moves with worker. Increased worker acceptance. Improved productivity, workers are not restricted.
- Choice of two hose I.D. and three brands of couplers - Assures breathing air couplers are incompatible with other gases. 1/2" or 3/8" I.D. hoses. Safer. You stay in compliance with OSHA. Select the right hose I.D. for your worksite.

**Technical Specification:**

<b>Material of Construction</b>	Soft Silicone Blend
<b>Assigned Protection Factor (APF)</b>	1000

**Options & Combination:**

			
<b>5500 Series</b>	<b>7700 Series</b>	<b>5400 Series</b>	<b>7600 Series</b>
<b>IN COMBINATION WITH</b>			
<p><b>CF Breathing Tube, Valve &amp; Belt Assembly</b></p>  <p style="text-align: center;"><b>Air Supply System, CF2007 (Complete)</b></p>			
<b>INLET AND REGULATOR CONNECTION OPTIONS</b>
