

The logo features the word "GERSON" in a bold, red, sans-serif font. A blue swoosh underline starts under the 'G', goes under the 'O', and ends under the 'N'. A small blue dot is positioned on the 'O'. A registered trademark symbol (®) is located to the upper right of the 'N'. The background consists of a light gray globe with a grid of latitude and longitude lines, and a faint world map silhouette.

Gerson®-brand products are well known and trusted throughout the world

From air-purifying respirators, to liquid filters for cleaning paints and solvents, to adhesively-treated cleaning or tack cloths for removal of surface particulates, each Gerson® product has been engineered and manufactured to provide top performance and deliver user value.

Gerson is a prime manufacturer of its principle products, assuring that each product is produced to our unique and exacting specifications. For example, melt-blown filter material for particulate filtration, manufactured in Middleboro, Massachusetts, provides outstanding filtration characteristics for our filtering facepiece respirators and “prefilters” for chemical cartridges.

To assure the highest quality and purity of products as well as user value, all manufacturing in our USA facility is automated, utilizing proprietary equipment of our own design and manufacture. We also utilize overseas assembly operations, again using Gerson-owned and designed equipment, to remain globally competitive in certain product categories.

The Gerson spirit of over 50 years of manufacturing and product innovation remains strong. Continually developing new technologies to keep us on the cutting edge of progressive product development and innovation, Gerson is ready to serve your needs.
