

ADVANCED LGR PERFORMANCE

LGR 7000XLi

BEATS OTHER COMPETITIVE UNITS. PERIOD.

Breaking the performance barriers as the new category leader, the LGR 7000XLi removes more water than any other dehumidifier in its category!

To achieve the 7000's amazing performance, Dri-Eaz engineers developed the Advanced Crossflow Technology to maximize energy utilization. At the same time, the unit's built-in sensors constantly monitor real time performance data to automatically calculate ideal operating parameters – such as fan speed and cycle duration – in real-time.

The result is **XL category-busting performance** in a unit the size of an Evolution and weighing only 107 pounds! With its outstanding performance at AHAM and saturation, plus **40% better low-grain performance than competitive units**, the 7000XLi is truly the top performer.

The LGR 7000XLi control panel **displays inlet and outlet temp and RH in real time**. No obscure codes are used here! Plain English text (and three other languages) provides clear operational information.

The unit's design also **greatly simplifies cleaning and maintenance**. Simply remove four bolts and the cover easily lifts off to fully expose the coils and the heat exchange block for easy cleaning.

The 7000XLi also includes a **built-in humidistat** for set-and-forget humidity level control.

- » **ADVANCED CROSSFLOW TECHNOLOGY** maximizes efficiency even in low grain environments. Ensures best performance across range.
- » **SELF-MONITORING SYSTEM.** Built-in sensors monitor performance parameters allowing for automatic fan speed adjustments.
- » **BUILT-IN HUMIDISTAT** and plain-language control panel messages

- » **SEALED LARGE-CAPACITY PUMP BASIN** - large enough to handle the water from an unintentional defrost after a power outage or other unexpected shut-down.
- » **ERGONOMIC DESIGN.** Taller handle for easier use on stairs, folds down for storage. Integrated cord and hose storage.
- » **VERSATILE APPLICATION** - standard 12 in. ductable outlet.
- » **LEGENDARY ROTOMOLDED HOUSING** - practically indestructible - resists dents and dings - stackable for storage - saves room in warehouse.

- » **BEST PERFORMER**
- » **SMART CONTROLS**
- » **TRUE TESTED LGR**
- » **RUGGED BUILD**
- » **EASY CLEANING**

MODEL	F412
POWER	8.3 AMPS, 115V
WATER REMOVAL AHAM (80°F/60%RH)	130 PINTS 61.5 LITERS / DAY
WATER REMOVAL MAX (MAX. AT SATURATION)	235 PINTS 111 LITERS / DAY
LGR WATER REMOVAL (80°F/20%RH)	40% MORE THAN COMPETITIVE UNITS
PROCESS AIR (MAX.)	325 CFM, FLOOR-LEVEL OUTLET
DIMENSIONS	33.5 × 20 × 20 IN. 85 × 51 × 51 CM
USE WEIGHT	107 LBS. 49 KG
DRAIN HOSE	40 FT. 12.2 M
POWER CORD	25 FT. 7.6 M
CONSTRUCTION	ROTOMOLDED POLYETHYLENE SHELL. PUMP BASIN IS INFUSED WITH MICROBAN® ANTIMICROBIAL PRODUCT PROTECTION TO INHIBIT THE GROWTH OF STAIN- AND ODOR-CAUSING BACTERIA, MOLD AND MILDEW.
