Item #: 1691-5441

Available in quarts and 12x1 quart cases

Groom Solutions Red Eraser is a one part, highly effective, food and beverage synthetic dye stain removal process that is designed to alter the structure of stains by removing or making them invisible. This product is safe and effective on virtually any synthetic stain caused by a common household food or beverage spill. This product is for use with synthetic carpet or fabrics only. Not recommended for natural fabrics.

### Effective on:

- red stains
- synthetic dyes
- kids drinks (Kool-Aid®)
- sports drinks
- decaffeinated coffee

### DIRECTIONS

1. Clean stained area prior to application of product. Towel or vacuum carpet to make it as dry as possible.
2. Always pretest process in an inconspicuous area to ensure colorfastness.
3. Apply solution liberally to the stained area. In some situations you can apply solution prior to cleaning
4. Many stains will be removed after this first application. If residual coloration remains, do not extract solutions, proceed to accelerate with heat. If color disappears, thoroughly extract with clear water.
5. Apply heat as accelerator. If using a low pressure, high volume steam generator such as a wallpaper remover, simply allow steam wand to sit on treated area. Check area periodically every 20-30 seconds. If using a steam iron, cover stained area with a wet, white, cotton towel. Apply steam heat from an iron set at the lowest steam temperature. Lift and move the iron every 20-30 seconds and check area.
6. When the stain has completely disappeared or has light yellow discoloration, completely extract the area with water. Color loss and/or fiber damage can be caused by excessive heat or by not rinsing spot immediately after acceleration by heat. For problematic carpet fibers, dilute Red Eraser with equal parts water.
