SPOTTING EXTRACTORS

OPTIONS MAKE THINGS EASY

The 3 gal capacity insures plenty of water to clean several pieces of upholstery, multiple spots or an entire staircase! These machines work wonders when used with the Water Claw Spot Lifter to deal with all kinds of stain and odor jobs! Like our other Nautilus and Olympus portables, you will find features that make it easy to transport, easy to use and easy to repair should the need arise. A fresh water drain makes it easy to empty when the job is done. 4" ball bearing wheels and a pull out handle let you transport the unit by pulling it like a suitcase! Nautilus models include front casters as well.
