

TEXTILE RINSE

TEXTILES

TEXTILE RINSE

Textile Rinse is a powerful extraction emulsifier that also neutralizes after cleaning and uses encapsulating polymer technology to help prevent resoiling! This is a cutting edge technology that allows you to get carpets cleaner and help them stay cleaner longer—a major benefit to your customers.

Textile Rinse's powerful surfactants emulsify tough soils including sand and other particulates. Textile Rinse then neutralizes carpet to a slightly acid pH and its polymer technology helps prevent browning, wicking and resoiling.

- **Excellent acid side cleaner and rinse extraction**
- **Holds soil in suspension**
- **Uses encapsulating polymer technology to help prevent resoiling**
- **Added surfactants emulsify tough soils and particulates**
- **Corrosion inhibitors protect your equipment**
- **Stabilizes color, prevents browning and leaves carpets soft & refreshed**

Part Number: PURC044GL / 1650-2647

4.5 - 5.0 RTU pH

Dilution Ratio: 2-4 oz./gal.

Contents: One U.S. Gallon (3.79 Litres)

Available in Gallons and 4 x 1 gallon cases

DIRECTIONS

Oriental rugs and carpet:

For carpet cleaner/extractor add 1 ounce (1:128 dilution) to each gallon of plain water to rinse as the final step to wet cleaning. For truck mount equipment add 1 quart per 5 gallons of water.

Upholstery:

For the upholstery and drapery machine add 1 ounce to each gallon of plain water to rinse the fabric as the final step in the wet cleaning process.
