Industry Leader for Historic Restoration and Lead Abatement

PEEL AWAY® 1 has been the **#1 Choice of Professionals** who perform Historic Restoration and Lead Paint Abatement for over 25 years. The **PEEL AWAY® 1** System is an environmentally safe method for removing up to 30 coats of oil-based lead paints in a single application. By keeping the lead paint in a wet state, no airborne lead dust is generated. Furthermore, the product contains lime which has a stabilizing effect on lead and can reduce waste transportation and disposal costs. It is formulated without flammable solvents and has no toxic fumes so only minimal ventilation is required. **PEEL AWAY® 1** is also excellent for removing old coatings from intricate, carved or molded surfaces.

The Original Paint Removal System - Since 1981

The **PEEL AWAY® 1** system includes an alkaline paste that is spread over the surface to be stripped. The paste is then covered with our patented **PEEL AWAY® Paper** to control evaporation. Allow paste to dwell on the coatings for 12-48 hours depending upon the number of coats and types of coatings being removed. After appropriate dwell time, the paste and softened paint can be removed onto the **Paper** using a scraper. Any remaining residue can be removed with a sponge and water or a power washer. Finally, the stripped surface must be neutralized using **PEEL AWAY® Citri-Lize™**
