

## Phoenix Dry Max

### Ultra Compact Design, Big Performance

#### Ultra-Compact, Large Category, Integrated Handle and Wheels

The Phoenix Dry Max is 6% smaller than the closest dehumidifier and yet it still has an integrated handle and wheels as well as onboard storage for the power cord and condensate hose! The all-new Phoenix Micro-Channel condenser allows us to pack so much performance into such a small dehumidifier.

The feedback on the stacking of the AirMax was so positive we made sure to build superior stacking into the Phoenix Dry Max.

We've also added a new four line display which provides you with all the information you need to take readings directly from the home screen.

A new Status Bar is located at the top of the new control panel to give you instant feedback about the dehumidifier from across the room.

Remove only four fasteners and you have easy access to service the unit.

The new Phoenix Dry Max pairs perfectly with our industry leading AirMax. Together you have a compact, portable, stackable, rugged drying system.

Phoenix  
now offers  
this unit in both Red and Blue

Intertek  
**Xactimate Code:**  
**WTRDHM>**

#### Features

- Ultra-Compact Design
- Slide Out Handle with Wheels for Transportation
- New Four Line Control Panel with Status Bar
- Superior Stacking
- Micro-Channel Condenser
- Easy Access for Service
- Removes 80 pints per day at AHAM (80°F/60% RH)
- Draws only 5.7 amps
- 170 CFM
- Heavy-Duty Condensate Pump
- Pleated 9" x 12" x 1" MERV-10 Media Air Filter
