

## Affordable Value . . . Radical Performance!

### Boxxer 318

You don't have to put up with barely adequate performance to get an affordable machine. The **Boxxer 318** has always been the machine perfect for operators who want to tackle residential and light commercial cleaning. Now with the new **HydraClutch**, it is ready to put extra dollars in your pocket through water extraction and flood damage restoration. The **Boxxer 318's** heat and pressure pack a big punch and you can rely on it to continue running for a long, long time. It's an ideal marriage of high performance with an affordable price.

**NEW!**

Now Comes Standard

**HydraClutch™**  
Perfect for Water Damage  
Restoration

The new **HydraClutch™** pump clutch allows the solution pressure side of the machine to be turned off while performing flood and water extraction with your truckmount which reduces wear and protects components. The primary advantage is the machine does not require a water source to be connected to the machine to keep operating. With the pump turned off the machine will not add water to the recovery tank, as it no longer is required to pump high pressure water to maintain internal temperatures. This allows for an increased capacity in the recovery tank, maximizing your time in extracting water. This also enables the machine to be operated in any location as it is not necessary to be near a fresh water source.

## HydraMaster warranty service is rated #1 by distributor mechanics!

- **HydraMaster reliability, durability, and dependability** - The numbers demonstrate that the Boxxer Series of truckmounts rank as the most dependable slide-ins we have ever designed.
- **Uncompromising Performance** - Clean faster, clean deeper, and dry faster to help you make more money. Best in class performance at every level.
- **Hassle-Free Warranty Service** - on the rare occasion something goes wrong outside of regular maintenance.

We've Got Your Back

## BOXXER 318HP

The **Boxxer 318HP** is equipped with several exclusive features which make it ideal for dedicated hard surface cleaning. First, the chemical solution pump is constructed of stainless steel (Most truckmount chemical solution pumps are brass) with an integrated shut-off valve to deal with the higher pressures typically associated with hard surface cleaning. Secondly, a specially engineered heater coil is used to withstand the rigors of constant high pressure cleaning applications (up to 1500psi.) Finally, keeping the hot water flowing (180-210°F) even at higher pressures allows you to take advantage of the cleaning power of hot water to reduce chemical usage.

### Key Features

**NEW!**  
Now Comes Standard  
**HydraClutch™**  
Perfect for Water Damage  
Restoration

- Hard surface cleaning at 1,500 PSI
- RX-15H Rotary Hard Surface Cleaning Wand - INCLUDED!
- Easy to operate and maintain with high reliability
- Quiet operation
- Reliable, fuel-efficient Briggs & Stratton® 18HP Vanguard™ engine
- Competitor® SL 3006 Blower
- High Pressure Pump with HydraClutch™, pressure from 0-1,500 PSI, 3.5 GPM capacity

## The Boxxer 318 Series comes with everything you need to start cleaning!

### Standard Equipment:

- Solution pressure adjustment
- Pre-wired pump-in switch
- Pre-wired APO Switch
- Water system drain valve
- Electrical circuit protection
- Solution temperature control selector
- 65 gallon MaxxAir™ recovery tank
- Battery box
- **Boxxer 318** - 100' of high performance solution and vacuum hose with stainless steel truckmount wand
- **Boxxer 318HP** - 100' of high pressure rated solution and vacuum hose with RX-15H Rotary Hard Surface Cleaning Wand.
- Van installation kit
- Operation & maintenance manual
- Embroidered HydraMaster jacket

### Optional Equipment:

- Dura-Flow™ APO (auto pump-out) is externally mounted for easy service, no filters required
- RX-20™ rotary jet extraction cleaning wand
- DriMaster™ 3 upholstery tool
- Submount 70 gallon fresh water tank
- Thru-floor exhaust kit

Available with an  
optional 100 gallon  
MaxxAir™ recovery tank

- ✓ Do more jobs
- ✓ Less dumping
- ✓ Longer running times

### Machine Specifications:

- Dimensions: 24"W x 31"H x 36"D
- Weight: 570 lbs
- Ignition: Electric key start
- Chemical System: last-step chemical injection, meter controlled
- Wand Capacity: Single
- Fuel Consumption: 1.0 GPH
- Uses: Residential, Light Commercial and Restoration
