

Removes Deep Set In Stains Leaving No Residue

CST10QT

RTU pH = 7.0

Insufficiently sealed and very porous stones can easily have their appearance adversely affected by spilled oil based materials, as well as by spilled colored beverages and food. Spinergy StainAbsorb for Stone is an activated absorbent system that is easy-to-use and highly effective. When this product is properly utilized, it can pull out deep, set in stains without discoloring stone. Spinergy StainAbsorb for Stone can eliminate water-born stains such as coffee, soda, tea, wine, juices etc For oil-born stains such as salad dressing, cooking oil, animal fat, etc. the poultice action is even more important. StainAbsorb for Stone can be used on natural stone such as marble, granite, limestone, travertine, slate and sandstone. It also works on grout for ceramic & porcelain tile, as well as masonry and concrete. Simply pour StainAbsorb for Stone onto the stained area, let it dry, and then sweep it away. StainAbsorb for Stone is a solvent free, voc free product that contains biodegradable surfactants.

- Activated liquid poultice absorbs oil based stains from stone surfaces
- Simply apply. Let dry. Sweep up residue. Simple & effective
- Effective against many water based stains
- No messy powder poultice to deal with
- Perfect for natural stone that is very porous or insufficiently sealed

STAIN REMOVAL

Directions:

Pre-application Procedures

Read entire label before using. Use only as directed. Always test in a small inconspicuous area to determine that the desired results will be achieved. Make sure surface is clean, dry, and free of waxes and coatings. Ensure that area is well-ventilated. Keep children and pets away from the area during application and until surface is dry.

For oil-based stains

1. Pour the StainAbsorb for stone onto the stained area.
2. Cover the oil stain remover with the mixture up to ¼" thick. Extend coverage approximately 1" around the stain.
3. Allow the solution to completely dry.
4. Sweep or vacuum away the poultice.
5. For severe and older deposits you may need to repeat the procedure.
6. Following spot removal, apply Spinergy Duraprotect Impregnating Sealer or Solidrock Premium Stone and Grout Sealer.

Organic Stains

Stains caused by Wine, Coffee, Tea, Catsup, Mustard, other common household food and beverage spills.

1. Pour the StainAbsorb for Stone onto the stained area.
2. Cover the stain and an area extending one inch around the mixture. Poultice should be at least 1/4 inch thick.
3. Allow the solution to completely dry.
4. Vacuum or sweep away poultice powder.
5. If discoloration remains, consider the application of Bridgepoint StainZone stain removing solution. Test stone surface for colorfastness before applying StainZone. Apply StainZone to discoloration and allow to dry.
6. Following spot removal, apply Spinergy Duraprotect Impregnating Sealer or Solidrock Premium Stone and Grout Sealer.
