

2008–2009 SAFETY EQUIPMENT CATALOG

volume 12 | number 1

MSA
The Safety Company

90+ Years of Products, Service and Expertise

MSA offers more than safety

Helping first responders is part of our history

Mine Safety Appliances Company was founded in 1914 by two mining engineers who designed or improved safety, rescue and protective gear. MSA has continued to help protect people from hazards great and small, and today helps protect millions of workers in many industries worldwide. MSA has sold gas masks for military use since World War I. We have always understood the demands placed on crucial protective equipment in extremely hazardous conditions. MSA

historically and steadfastly has helped first responders before, during, and after emergencies, from small house fires to multiple explosions at chemical plants, from hazardous materials spills to hurricanes.

MSA makes and markets respiratory protection, gas-and-flame-detection instruments, head, eye, face, and hearing protection, fire and police helmets, fall protection, thermal imaging cameras, ballistic protection, and mining, emergency, and specialty equipment via a national network of trained distributors, product specialists and knowledgeable contacts. MSA has been a global company for decades, protecting millions of people around the world. What have we done for YOU lately?

MSA offers more than safety on the job

Great Products

MSA began making high-quality safety products in 1914. Technology enhances our innovation in product development, with computer-aided design and stereo lithography, a technology which produces prototypes rapidly. MSA responds quickly as your needs change. Within most product groups is a wide selection of models, sizes, colors, materials, options, accessories and prices. Many components of MSA products are formulated, machined, tooled or molded in-house from raw materials, allowing for greater manufacturing control as well as quality assurance. MSA processes are certified as meeting ISO 9001-2000 quality assurance requirements of the International Standard Organization (ISO).

Great Plans for the Future

MSA continues to enhance our operations and expand/improve our product lines by acquiring companies and/or new capabilities to better serve our customers. In 2002, MSA began manufacturing specialized helmets for military and law-enforcement use, and in 2004 added passive and electronic hearing protection. In 2005, MSA created a new ballistic protection product line, offering ballistic vests to protect law enforcement personnel.

Great People

Your personalized MSA service starts with a trained MSA-authorized distributor near you and the largest team of field representatives in the safety industry. They understand your hazards and the regulations with which you must comply, and will help to analyze your safety requirements and recommend solutions. MSA-authorized distributors are knowledgeable, well-trained and proficient at providing the services you need and also can assist in training your in-house trainer. Training your employees properly in the use, care and maintenance of our products is easy with MSA-produced VHS or DVD presentations. See page 186 for a list of available programs.

MSA's website includes on-line product information offering the basics of most products in this printed catalog, plus links to .pdf versions of printed literature and other materials that you can print yourself. Go to **www.MSAnet.com**. To send us an e-mail message, use **info@MSAnet.com**. Most MSA literature is also available via FAX, fast! Just dial 1-800-672-9010 for our

QuickLit™ Information Service. Follow recorded instructions and enter your literature request and your FAX machine number. Outside the U.S. dial (+1) 412-967-3446.

Award-Winning Customer Service

Every customer wants it. Every good business has it.

Our multiple-award-winning Customer Service Center (CSC) proves that MSA strives for continuous improvement in customer satisfaction. MSA is proud of the service provided to our North American customers via our Customer Service Center. Every year brings positive changes: better-trained representatives with more advanced computer programs, resulting in improved service and faster solutions. Each Customer Service Rep's computer workstation can simultaneously handle a variety of applications, and an automated call distributor monitors and routes call flow to ensure peak performance. The CSC continues to look for ways to improve our relationship with customers via input from sales personnel and field customers themselves. We're aiming for TOTAL customer satisfaction!

Ask us the name of your nearest authorized MSA distributor, who can:

- Place your orders
- Obtain prices and quotes
- Provide product information and technical assistance
- Check delivery and expedite shipments
- Order catalogs and product literature
- Obtain return authorizations

Great International Sales

MSA's international sales capabilities start with MSA Sales Representatives who assist in choosing the right products for your applications and local approvals. Our extensive network of distributors, representatives and MSA-affiliate companies covers most major cities worldwide. Highly-trained international customer service representatives guide your export orders from placement to delivery. MSA uses all major air and ocean freight forwarders and courier services due to their ability to consolidate multiple orders and minimize freight expenses. Our CSRs understand international inspections, certifications, licensing and other customs issues necessary for successful importation.

To contact MSA International or to find the MSA affiliate company or distributor nearest you, please contact MSA International:

Toll-free in the U.S.: 1-800-MSA-7777
Outside the U.S.: (+1) 412-967-3354

P.O. Box 426
Pittsburgh, PA 15230-0426

Respirators: APR & SAR

Key Elements of a Sound Respiratory Protection Program

The fundamental goal of any respiratory protection program is to control occupational diseases caused by breathing air contaminated with harmful dusts, fogs, fumes, mists, gases, smokes, sprays, and/or vapors. The defense against these contaminants is simple: Keep them out of the air that workers breathe. Always implement engineering and/or administrative controls first. If contaminants still present a hazard, you must provide appropriate respiratory protection for every employee who might be exposed to them.

MSA can help you take a comprehensive approach to sound Respiratory Protection practices. This guide will help you understand the need for respirators, how they work, and what their limitations are.

OSHA (the Occupational Safety and Health Administration) and NIOSH (the National Institute of Safety and Health) regulations define all the specific requirements which must be followed, including the capabilities of appropriate respiratory protection. Employers must follow the requirements of these governmental regulations, both the general regulations which apply to all workplaces and the specific regulations for exposures in their particular industry, such as lead, silica dust, asbestos, and benzene.

A Written Respiratory Protection Program

1

Administration

The first step in a respiratory protection program is to establish written standard operating procedures governing the selection and use of respirators. Regular inspection and evaluation of the program will ensure its continued effectiveness.

According to OSHA, a written program will help employers, employees, and compliance officers gauge the adequacy of a given program. When developing your written respiratory protection program, be sure to include the following elements, designated by 29 CFR Part 1910.134:

- Procedures for selecting respirators for use in the workplace
- Fit-testing procedures for tightfitting respirators (including a signed copy of employees' fit-test records)
- Procedures for proper use of respirators in routine and emergency situations
- Procedures and schedules for cleaning, disinfecting, storing, inspecting, and repairing respirators
- Procedures to ensure adequate air quality, quantity, and flow of breathing air for atmospheresupplying respirators
- Medical evaluations of employees required to wear respirators

Employers must:

- Submit a written respiratory protection program unless the choice of voluntary respiratory protection is a filtering facepiece (dust mask)
- Provide voluntary respirator users with Appendix D (p. 1284) of the Standard
- Ensure that employees using a respirator voluntarily have medical clearance

Employees must clean, store, and maintain the respirator so that its use does not present a health hazard.

Voluntary Respirator Use

An employer must provide respiratory protection for employees who ask for it or let employees use their own respiratory protection, if such respirator use will not create a hazard. Fit testing is not required for voluntary use.

If possible, one person should administer these procedures, to ensure consistent coordination and direction and optimum results. The actual respiratory protection program itself for each workplace depends upon many factors, and may require input from specialists such as safety personnel, industrial hygienists, health physicists and physicians.

Respiratory Hazards

Before a respiratory protection program is initiated, it is important to first understand the types of respiratory hazards inherent to your industry. Of the three normally recognized ways toxic materials can enter the body—through the (1) gastrointestinal tract, (2) skin, and (3) lungs—the respiratory system presents the quickest and most direct avenue of entry. This is because of the respiratory system's direct relationship with the circulatory system and the constant need to oxygenate tissue cells to sustain life.

The three basic classifications of respiratory hazards are:

- oxygen-deficient air
- particulate contaminants;
- gas and vapor contaminants.

The 7 Key Elements

Chances are that you are already familiar with the need for and use of respirators in your workplace, but as with anything else, it doesn't hurt to review your current program against standard operating procedures governing the selection and use of respirators. According to program details in OSHA's Respiratory Protection Standard (29 CFR 1910.134), the seven key elements that every respiratory protection program should contain are:

1. A **written plan** detailing how the program will be administered
2. A **complete assessment** and knowledge of respiratory hazards that will be encountered in the workplace
3. **Procedures and equipment** to control respiratory hazards, including the use of engineering controls and work practices designed to limit or reduce employee exposures to such hazards
4. Guidelines for the **proper selection** of appropriate respiratory protective equipment
5. An **employee training program** covering hazard recognition, the dangers associated with respiratory hazards, and proper care and use of respiratory protective equipment
6. **Inspection, maintenance, and repair** of respiratory protective equipment
7. **Medical surveillance** of employees

Oxygen Deficiency

Normal ambient air contains an oxygen concentration of 20.8% by volume. When the oxygen level dips below 19.5%, the air is considered oxygen-deficient. Oxygen

concentrations below 16% are considered unsafe for human exposure because of harmful effects on bodily functions, mental processes, and coordination.

It is important to note that life-supporting oxygen can be further displaced by other gases, such as carbon dioxide. When this occurs, the result is often an atmosphere that can be dangerous or fatal when inhaled. Oxygen deficiency also can be caused by rust, corrosion, fermentation, or other forms of oxidation which consume oxygen. The impact of oxygen-deficiency can be gradual or sudden.

Particulate Contaminates

Particulate contaminants can be classified according to their physical and chemical characteristics and their physiological effect on the body. The particle diameter in microns (1 micron = 1/25,400 inch) is of utmost importance. Particulates below 10 microns in diameter have a greater chance to enter the respiratory system, and particles below 5 microns in diameter are more apt to reach the deep lung or alveolar spaces.

In healthy lungs, particles from 5 to 10 microns in diameter are generally removed from the respiratory system by a constant cleansing action that takes place in the upper respiratory tract. However, with excessive "dust" exposures or a diseased respiratory system, the efficiency of the cleansing action can be significantly reduced.

The various types of airborne particulate contaminants can be classified as follows:

Fumes—An aerosol created when solid material is vaporized at high temperatures and then cooled. As it cools, it condenses into extremely small particles—generally less than 1 micron in diameter. Fumes can result from operations such as welding, cutting, smelting, or casting molten metals.

Dusts—An aerosol consisting of mechanically produced solid particles derived from the breaking up of larger particles. Dusts generally have a larger particle size when compared to fumes. Operations such as sanding, grinding, crushing, drilling, machining, or sand blasting are the worst dust producers. Dust particles are often found in the harmful size range of 0.5 to 10 microns.

Mists—An aerosol formed by liquids, which are atomized and/or condensed. Mists can be created by such operations as spraying, plating, or boiling, and by mixing or cleaning jobs. Particles are usually in the size range of 5 to 100 microns.

Gas and Vapor Contaminants

Gas and vapor contaminants can be classified according to their chemical characteristics. True gaseous contaminants are similar to air in that they possess the same ability to diffuse freely within an area or container. Nitrogen, chlorine, carbon monoxide, carbon dioxide, and sulfur dioxide are examples.

In terms of chemical characteristics, gaseous contaminants may be classified as follows:

Inert Gases—These include such true gases as helium, argon, neon, etc. Although they do not metabolize in the body, these gases represent a hazard, because they can produce an oxygen deficiency by displacement of air.

Acidic Gases—Often highly toxic, acidic gases exist as acids or produce acids by reaction with water. Sulfur dioxide, hydrogen sulfide and hydrogen chloride are examples.

Alkaline Gases—These gases exist as alkalis or produce alkalis by reaction with water. Ammonia and phosphine are two examples.

Vapors are the gaseous state of substances that are liquids or solids at room temperature. They are formed when the solid or liquid evaporates.

In terms of chemical characteristics, vaporous contaminants may be classified as follows:

Organic Compounds—Contaminants in this category can exist as true gases or vapors produced from organic liquids. Gasoline, solvents, and paint thinners are examples.

Organometallic Compounds—These are generally comprised of metals attached to organic groups. Tetraethyllead and organic phosphates are examples.

Hazard Assessment

2

Proper assessment of your specific hazard(s) is the first important step to protection. This requires a thorough knowledge of processes, equipment, raw materials, end-products, and by-products that can create an exposure hazard. First, you must make an initial determination of workplace conditions. This simple calculation of exposures does not require sampling of the environment. Factor in workplace size, ventilation, the amount of the regulated substance present, the type of operation, and the proximity of the workers to the source of emissions.

According to OSHA, personal exposure monitoring is the "gold standard" for determining employee exposure. It is the most reliable approach for assessing the level and type of respiratory protection required. Sampling which uses methods appropriate for contaminants(s) should represent the worst-case exposures or enough shifts and operations to determine the accurate range(s) of exposure.

To determine an atmosphere's oxygen content or concentration levels of particulate and/or gaseous contaminants, air samples must be taken with proper sampling instruments during all conditions of operation. The sampling device and the type and frequency of sampling (spot testing or continuous monitoring) will be dictated by the exposure and operating conditions.

Breathing zone samples are recommended and sampling frequency should be sufficient to assess the average exposure under the variable operating and exposure conditions.

Should contaminant concentrations exceed exposure limits recommended by the American Conference of Governmental Industrial Hygienists (ACGIH), OSHA, or NIOSH, hazard control procedures must be implemented promptly.

OSHA emphasizes that, because workplaces differ, each respirator program must be tailored to the specific conditions of the workplace. The recently revised OSHA standard serves as

a "building block standard", because it consolidates respiratory protection provisions that previously were included in sections dealing with specific chemical substances.

The employer is required to evaluate respiratory hazards in the workplace, identify relevant workplace and use factors, and base respirator selection on these factors.

Exposure Monitoring

Exposure monitoring plays a critical role in the respirator selection process. The results from such testing will help you determine whether respiratory protection is needed and, if it is, the type of respirator that is required. Generally, respirator selection is based on three factors:

- The results of your atmospheric monitoring or sampling program
- The accepted ACGIH, OSHA, or NIOSH exposure limits for the substance(s) present
- The maximum use concentration (of a substance) for which a respirator can be used

Exposure limits include:

ACGIH Threshold Limit Values (TLVs)

OSHA Permissible Exposure Limits (PELs)

NIOSH-Recommended Exposure Levels (RELs)

AIHA Workplace Environmental Exposure Levels (WEELs) These values are guides for exposure concentrations that healthy individuals can normally tolerate for eight hours a day, five days a week, without harmful effects. Unless otherwise noted, exposure limits are eight-hour, time-weighted-average (TWA) concentrations.

In general, gas and vapor exposure limits are expressed in ppm by volume (parts of contaminant per million parts of air), while particulate concentrations are expressed as mg/m³ (milligrams of concentrations per cubic meter of air). For substances that can exist in

Respirators: APR & SAR

more than one form (particulate or gaseous), concentrations are expressed in both values.

IDLH (Immediately Dangerous to Life or Health) characterizes an atmosphere that poses an immediate threat to life, would cause irreversible adverse health effects, or would impair an individual's ability to escape from a dangerous atmosphere.

It is important to note that exposure limits and other exposure standards are constantly changing as more data is gathered about specific chemicals and substances. As such, you must be certain that you are using the most recent data when determining allowable exposure levels for employees.

Hazard Control

3

Hazard control should start at the process, equipment, and plant design levels where contaminants can be controlled effectively at the outset. With operating processes, the problem becomes more difficult. In all cases, however, attention should be given to the use of effective engineering controls to eliminate and/or reduce exposures to respiratory hazards. This includes consideration of process encapsulation or isolation; use of less toxic materials in the process' and suitable exhaust ventilation, filters, and scrubbers to control the effluents.

Because it is sometimes not practical to maintain engineering controls that eliminate all airborne concentrations of contaminants, proper respiratory protective devices should be used whenever such protection is required.

Respirator Selection

4

All respirators in use must be NIOSH-approved (NIOSH 42 CFR Part 84). Selecting respirators entails knowing what level of respiratory protection employees need, as well as which size respirator is right for any face and facial contours.

Respiratory protective devices vary in design, application, and protective capability. Thus, the user must assess the inhalation hazard and understand the specific use limitations of available equipment to assure proper selection.

If your calculation shows that exposure concentrations exceed recommended limits and engineering/administrative controls do not reduce exposure below the permissible limit, tailor your respiratory protection program to your specific conditions based on:

- Toxicity (TLV or TWA)
- Maximum Expected Concentration
- Oxygen level

- IDLH concentration
- Warning properties (adequate or not)
- Sorbent limitations
- Facepiece fit
- Mobility requirements
- Type of use (routine, escape, or emergency entry)

Types of Respirators

Respirators fall under two classifications: **air-purifying** and **air-supplied**. Air-purifying respirators are used against particulates, gases, and vapors. These are categorized as negative-pressure respirators that use chemical cartridges and/or filters; gas masks; and positive-pressure units such as powered air-purifying respirators (PAPRs). Air-supplied devices rely on a primary air source to deliver a steady flow of respirable air to the user's facepiece. These consist of Self-Contained Breathing Apparatus (SCBA) and air-line devices.

Air-Purifying Respirators (APRs) range from simple disposable cup masks to low-maintenance halfmask facepieces with cartridges and/or filters to the more complex PAPRs with full-facepieces, or hoods.

- APRs for particulates use filters to capture dusts, mists, and fumes. Filters do not protect against gases or vapors, and generally become less effective as particles accumulate on the filter and plug spaces between the fibers. Filtering APRs require filter replacement when the user finds it difficult to breathe through them.
- Gas and vapor APRs employ chemical cartridges or canisters to remove hazardous gases or vapors from the air. They do not protect against airborne particles. Made to protect against specific gases or vapors, they provide protection only as long as the cartridge's absorbing capacity is not depleted.

The service life of a chemical cartridge depends upon many factors and can be estimated in various ways. Cartridges and canisters require an end-of-service-life indicator (ESLI) or a change

schedule, based on objective information or data that will ensure that canisters and cartridges are changed before the end of their useful life. In the respirator program, the employer must describe the information and data relied upon and the basis for the canister and cartridge change schedule as well as the basis for reliance on the data.

- Combination APRs, fitted with both particulate filters and gas/vapor cartridges, are worn in atmospheres that contain hazards of both particulates and gases.

Supplied-Air Respirators (SARs), comprise air-line respirators, SCBA, and combination (supplied-air) respirators.

- Air-Line Respirators are used for extended periods in non-IDLH atmospheres. They use an air-line hose to deliver clean breathing air from a stationary source of compressed air for prolonged periods of time. Although comparatively lightweight, air-line respirators can limit users' mobility because of the air-line hose that must be attached.
- Self-Contained Breathing Apparatus (SCBA) have an open-circuit design that provides air rated for 30 to 60 minutes. They consist of a wearable, clean-air supply and a tight-fitting facepiece, and are used for short duration entrance or escape from atmospheres that are or may be IDLH. They offer relatively unrestricted movement.
- Combination SARs are air-line devices used for extended work periods in atmospheres that are or may be IDLH. They have an auxiliary self-contained air cylinder that can be used if the primary air supply fails. The air cylinder can also be used for entry into or escape from IDLH atmospheres, such as confined spaces.

Employers are required to provide employees using SARs with breathing gases of high purity, and ensure that compressed air, compressed oxygen, liquid air, and liquid oxygen used for respiration is in accordance with the specifications of OSHA Standard 1910.134(i).

Training

5

For proper use of any respiratory protection device, it is essential that the user be properly instructed in its selection, use, and maintenance. Both supervisors and workers must be so instructed by competent persons.

Minimum training must include:

- Methods of recognizing respiratory hazards
- Instruction in the hazards and an honest appraisal of what could happen if the proper respiratory protection device is not used
- Explanation of why more positive control is not immediately feasible. This must include recognition that every reasonable effort is first being made to reduce or eliminate the need for respiratory protection
- A discussion of why various types of respiratory protection devices are suitable for particular purposes

- A discussion of the device's capabilities and limitations
- Instruction and training in actual use of respiratory protection equipment, and definite and frequent supervision to assure that it continues to be properly used
- Classroom and field training to recognize and cope with emergency situations

Before an employee may be required to use any respirator with a negative- or positive-pressure tight-fitting facepiece, the employee must be fit tested with the same make, model, style, and size of respirator that will be used.

Training should provide personnel with an opportunity to handle the device, have it fitted properly, test its face-to-facepiece seal, wear it in normal air for a long familiarity period, and, finally, wear it in a test atmosphere. OSHA requires fit tests to ensure proper fit for workers who use respirators.

Fit Testing

OSHA requires fit testing for any face mask (full or half) designed to have a tight seal along the face, whether it is used in a positive- or negative-pressure mode, and whether it is disposable or not.

Qualitative fit test methods are subjective in nature and rely on the judgment of the test subject. They are essentially a pass/fail fit test to assess the adequacy of respirator fit.

Quantitative testing methods rely on objective data to determine a proper fit. An assessment of the adequacy of respirator fit is determined by numerically measuring the amount of leakage into the respirator.

If the required fit factor is greater than 100, i.e., when higher levels of respiratory protection are needed, quantitative fit-testing must be conducted. Most experts agree that quantitative fit-testing provides the most accurate information, because it uses actual test data, rather than depending on the respirator wearer's sense of smell and taste (subjective responses).

OSHA requires these eight exercises for both qualitative and quantitative fit testing:

- 1—normal breathing
- 2—deep breathing
- 3—head side to side
- 4—head up and down
- 5—talking out loud
- 6—grimacing (quantitative only)
- 7—bending
- 8—normal breathing

Respirator Care

6

Proper inspection, maintenance, and repair of respiratory protective equipment are mandatory to ensure success of any respiratory protection program. The goal is to maintain the equipment in a condition that provides the same effectiveness as it had when it was first manufactured.

All equipment must be inspected before and after each use. A record of all inspections by date must be kept, with the results tabulated. It is important to follow the recommendations of the manufacturer precisely.

All non-disposable respiratory protective equipment must be cleaned and decontaminated after each use. Disposable respirators and accessories should be discarded after each use, and replaced with identical new respirators.

Replacement of other than disposable parts must be done only by personnel with adequate training to ensure that the equipment is functioning properly after the work is accomplished. Only parts supplied by the manufacturer for the product being repaired must be used.

Medical Surveillance

7

According to OSHA, "using a respirator may place a physiological burden on employees that varies with the type of respirator worn, the job and workplace conditions in which the respirator is used, and the medical status of the employee." Employers must determine an employee's ability to use a respirator.

Workers should never be assigned to any operation requiring respiratory protection until a physician has determined that they are capable—physically and psychologically—to perform the work using the respiratory protective equipment.

Program Evaluation

Employers are required to conduct periodic evaluations of the workplace to ensure that the written respiratory protection program is being properly implemented, and to consult employees to ensure that they are using the respirators properly. The employer must regularly consult employees required to use respirators to assess the employees' views on program effectiveness and to identify any problems. Any problems that are identified during this assessment must be corrected.

Factors to be assessed include, but are not limited to:

- Respirator fit (including the ability to use the respirator without interfering with effective workplace performance)
- Appropriate respirator selection for the hazards to which the employee is exposed
- Proper respirator use under the workplace conditions the employee encounters
- Proper respirator maintenance

Record Keeping

Employers must retain written information regarding medical evaluations, fit testing, and the respirator program. This information will facilitate employee involvement in the respirator program, assist the employer in auditing the adequacy of the program, and provide a record for compliance determinations by OSHA.

- Records must be kept on:
- Medical evaluation
- Qualitative and Quantitative Fit Tests, which are retained until the next fit test is administered
- Employee identity
- Make, model, style, and size of respirator tested
- Date of test
- Results
- Written copy of the current respirator program

Although instituting a sound respiratory protection program will take effort and financial investment, the objective of a such a program is sound—ensuring that every worker is protected against potentially fatal diseases.

Important

This article is intended to help employers understand the respiratory protection requirements of OSHA and NIOSH government standards, and is not intended to be the sole guide for complying with 29 CFR Part 1920.134 (OSHA) and 42 CFR Part 84 (NIOSH). These government documents may be found in their entirety on the Internet at: www.osha.gov www.cdc.gov/niosh/part84

Air-Purifying Respirators: Industrial

Advantage® 200 LS Respirators

Advantage 200 LS Respirator with combination chemical cartridges

The Advantage 200 LS Respirator's lighter and softer facepiece is made from a clear blue formulation of thermoplastic rubber to give workers more comfort and stability than ever.

Extensive anthropometric research led to the Advantage Respirator's unique design. MSA's engineers examined facial form data of over 8,000 people and, with CAD technology, developed the AnthroCurve™ Sealing Surface, which instantly conforms to each wearer's unique facial characteristics.

The unmatched fit and comfort start with a soft, pliable combination of rubber and plastic that provide a virtually customized fit. These are key components in the patented MultiFlex® System that equalizes pressure on the face seal area, while delivering exceptional stability, so the respirator will not collapse during wear.

For more information, see Bulletin 1012-10.

Advantage 200LS Respirator with Flexi-Filter Pads

Note: See p. 11 for selection of low-profile Flexi-Filter® Pads.

Advantage® 3000 Respirators

The Advantage 3000 Full-Face Respirator incorporates MSA's global engineering expertise and is designed to meet NIOSH and EN standards.

The respirator features a wraparound lens combined with a soft, pliable silicone facepiece that provides a total solution to your air-purifying respirator needs.

Its fit technology is based on the proven faceseal of the Ultra Elite Facepiece, which was based on facial measurements from more than 8,000 people.

For the utmost in convenience, the Advantage 3000 uses the same cartridges and filters as the Advantage 200 LS Respirator.

The Advantage 3000 Respirator enhances worker performance through a new design that allows even lower breathing resistance and includes a standard nose cup that reduces fogging in low temperatures or high humidity conditions.

In addition, the facepiece lens has a scratch resistant coating and has been engineered to be optically correct, giving you superior visibility and peripheral vision. The Advantage 3000 Respirator meets all performance requirements of ANSI Z87.1.2003 (protective eye and face protection).

Donning the mask is made easier with pre-adjustable rubber straps. With the Advantage 3000 Respirator, you can set the position of the upper straps to receive a consistent fit, time after time. In addition, the preset upper straps prevent uncomfortable snags during donning and doffing, and also provide a tighter, more secure seal. Wearers also can choose the new European-style Advantage harness, which dons like a catcher's mask.

For more information, see Bulletin 1012-10.

Air-Purifying Respirators: Industrial

Advantage® 4000 Respirators

The new Advantage 4000 Twin Port Full-Face Respirator raises the performance of industrial full-facepiece respirators to a new level. Based on the Advantage 3000 Facepiece, the respirator features a wraparound lens combined with a soft, pliable Hycar or silicone facepiece that provides a total solution to your air-purifying needs.

Its fit technology is based on the proven face seal of the Ultra Elite Facepiece. For the utmost in convenience, the Advantage 4000 uses the same cartridges and filters as the Advantage 200 LS and Advantage 3000 Respirator.

In addition, the facepiece lens has scratch-resistant coating and has been engineered to be optically correct, giving you superior visibility and peripheral vision. The Advantage 4200 Respirator also meets the performance requirements of ANSI Z87.1.2003.

The Advantage 4000 Respirator enhances worker performance through a new design that allows low breathing resistance and includes a standard nose cup that reduces fogging in low temperatures or high humidity conditions.

Options include spectacle kits for corrective lenses, cover lens and welders adapter.

Donning the mask is made easier with a comfortable net-type harness with a four-point adjustable suspension. Wearers also can choose pre-adjustable rubber straps.

Advantage 4000 Respirator with Welder's Adapter, Filter Plate and Flexi-Filter Pads

Advantage® 1000 Respirators

The Advantage 1000 Full-Face Respirator features a wraparound flexible lens that offers excellent fit and comfort with increased vision. It weighs 40% less than conventional full-face respirators and uses the same cartridges as the Advantage Family Respirators.

The Advantage 1000 Respirator is constructed of super-soft Hycar™ rubber that provides the feel and comfort of silicone but has better permeation resistance. The facepiece, which is available in three sizes, has a unique turned lip seal that provides an exceptional seal against a wide range of facial contours. The Advantage 1000 facepiece also features a distinctive, flexible urethane lens that is integrally bonded to the facepiece, eliminating the need for rigid lens retainers that can cause unwanted pressure points.

Standard equipment includes a speaking diaphragm, for clear, short-range communications, and a nose cup, to reduce lens fogging in low temperatures or high-humidity conditions.

Air-Purifying Respirators: Industrial

Comfo Classic® and Comfo Elite® Respirators

The **Comfo Classic Respirator** features SoftFeel® facepiece material, which is an MSA-exclusive formulation that improves pliability and softness. Like earlier Comfo respirator models, the Comfo Classic Respirator features a unique face seal design that gives wearers an exceptional fit.

The **Comfo Elite Respirator** provides protection against a variety of respiratory hazards. The Comfo Elite Respirator, available in black silicone, has a unique sealing surface designed to reduce facepiece slippage. The Comfo Elite Respirator comes in small, medium, and large sizes. NIOSH-certified.

Comfo Classic Respirator

Material	Color	Small	Medium	Large
SoftFeel Hycar	Black	808075	808074	808076
SoftFeel silicone	Black	808072	808071	808073

Comfo Elite Respirator

Material	Color	Small	Medium	Large
Silicone	Black	490492	490491	490493

Ultra-Twin® Respirators

The **Ultra-Twin Full-Facepiece Respirator** has an inturred lip around the edge for a secure, comfortable seal against the face. A large chin cup makes it easy to position. Five suspension headstraps and roller buckles hold the facepiece in place while minimizing hair entanglement. The wide polycarbonate lens is coated to resist scratching and chemical attack. The lens is held in place by a two-piece lens ring which is color-coded to indicate the size of the facepiece. Uses the full line of Comfo Cartridges and Filters.†

Standard equipment includes a speaking diaphragm for clear, short-range communications and a nose cup, to reduce lens fogging in low temperatures or high-humidity conditions.

Ultra-Twin Respirator

Material	Color	Small	Medium	Large
Hycar	Black	471298	471286	471310
Silicone	Black	480263	480259	480267

Ultra Elite® Twin-Cartridge Respirators

The demand version of the **Ultra Elite Facepiece** from MSA can be used as a twin-cartridge air-purifying respirator for full-face respiratory protection. The unique lens design provides a high level of peripheral and downward vision. It is available in three sizes and has large adjustment tabs for easy donning and doffing. Choose one of two facepiece materials—SoftFeel® Hycar rubber or silicone—to enhance wearer comfort. A speaking diaphragm in front of the wearer's mouth improves communication so that speech is not blocked. A nose cup reduces lens fogging in low temperatures or high-humidity conditions.

†See page 14 for threaded Comfo filters and cartridges.

⚠ WARNING

An appropriate cartridge change-out schedule must be developed by a qualified professional, unless the cartridge/canister utilizes an end-of-service-life indicator. The change-out schedule must take into account all factors that may influence respiratory protection including specific work practices and other conditions unique to the worker's environment. If using against substances having poor warning properties, there is no secondary means of knowing when to replace the cartridges/canister. In such cases, take appropriate additional precautions to prevent overexposure, which may include a more conservative change-out schedule or using an air-supplied respirator or SCBA. Failure to follow this warning can result in serious personal injury or death. As a reference, below is a partial list of substances having poor warning properties:

Acrolein	Hydrogen cyanide	Nitric acid	Phosphorus trichloride
Aniline	Hydrogen selenide	Nitro compounds	Stibine
Arsine	Methanol	Nitrogen oxides	Sulfur chloride
Bromine	Methyl bromide	Nitroglycerin	Urethane or other diisocyanate-containing paints
Carbon monoxide	Methyl chloride	Nitromethane	Vinyl chloride
Diisocyanates	Methylene chloride	Phosgene	
Dimethyl sulfate	Nickel carbonyl	Phosphine	

Ultra Filter® Respirators

Ultra Filter Respirators are full-face, single-cartridge respirators designed for protection against particulate hazards, especially in the nuclear and abatement industries. The Ultra Filter Respirator uses a compact round filter cartridge that has a large effective filter area to provide low breathing resistance and high loading capacity. The Round Ultra Filter Cartridge has a P100 classification for high-efficiency protection against oil- and non-oil-containing hazards or hazard-specific standards requiring HEPA filters, such as the Lead and Asbestos Standards.

Air-Purifying Respirators: Industrial

Air-Purifying Respirator Accessories

Spectacle Kits for Full-Facepiece Respirators

For use by workers who must wear corrective lenses, the Spectacle Kit can be easily inserted into the facepiece. The kit includes a wire support, rubber guide, and pair of metal-frame spectacles. Desired adjustment is obtained by moving the spectacles in and out of the rubber guide and up and down the wire support. The Advantage 1000 and the Ultravue/Ultra-Twin kits (S-7 shape, 44-mm lens size) and the Ultra Elite kit (S-7 shape, 48-mm lens size) fit Universal Bridge Corrective Lenses that can be obtained from local sources. The Spectacle Kit can be used with a nosecup. There are two kits for the Ultra Elite facepiece; one uses a side wire support to hold the lenses in the facepiece, while the other uses a center support to position the unit (spectacle adjustments are similar).

Side Support Spectacle Kit for Ultra Elite Facepiece

MSA Confidence Plus® Germicidal Cleaner

Mix with warm water for a germicidal cleaner that is effective against various micro-organisms including immunodeficiency virus Type 1 (HIV-1, associated with AIDS). EPA-approved for use on safety equipment.

Personal Safety Equipment Towelettes

Provides an excellent method for wiping and refreshing respirators, hardhats, and other safety equipment between full cleaning periods.

Cleaning Accessories

Canister with 220 towelettes, 4-1/4" x 6"	697382
Box of 100 individually wrapped towelettes, 7-1/4" x 5"	697383
"The Big Ones," Box of 50 individually wrapped towelettes, 8" x 11"	10022871
MSA Confidence Plus Germicidal Cleaner, in 32 oz. bottle	10009971

Nosecup (to reduce fogging)

Molded from a soft rubber compound that is resistant to facial oils, the optional nosecup helps reduce lens fogging. The nosecup is particularly effective under conditions of high-humidity and/or low temperatures by inhibiting contact between moist exhalation and the facepiece lens. A nosecup can be easily affixed to the facepiece without tools, and any size nosecup may be installed in any size MSA facepiece, resulting in a customized facepiece for more comfortable use.

Nosecups for Ultravue/Ultra-Twin

Nosecups for Advantage 1000

Welder's Adapter for Full-Facepiece Respirators

MSA Welder's Adapters are molded of polycarbonate plastic, which has high resistance to impact, heat, and welding splatter. The clip-on adapter attaches to the facepiece by molded-in clips. The integral adapter is attached by removing the facepiece lens and replacing it with the adapter. A large vision area—4-1/2" x 5-1/4"—provides an unobstructed view of work. The Welder's Adapter is supplied with an impact-resistant cover lens; the desired filter plate is ordered separately. Rayfoe™ Filter Plates are available in four standard shades—6, 10, 12, 14.

Welder's Adapter with AutoChange Lens

The AutoChange Electronic Welding Lens is for use with MSA Welders Adapters. The solar-powered AutoChange Welding Lens is an automatic-darkening welding filter. The welding lens is in the light state (semi-transparent) before welding and darkens within 0.4 milliseconds after an arc is struck.

Welder's Hood with AutoChange Lens

The heat-resistant Welder's Hood is designed to protect the welder's head, neck, and shoulders from welding splatter and sparks. The Kevlar hood has a rubber seal which fits snugly over the Welder's Adapter. The hood also helps protect cartridges when an air-purifying respirator is used in welding operations.

Probed Respirator Facepieces

Probed Advantage Respirator

Probed Comfo Classic Respirator

Probed Comfo Elite Respirator

All Models Available

To make it easy for you to perform quantitative fit tests, MSA offers a full line of specially modified facepiece assemblies. Each probed facepiece is equipped with a built-in probe assembly, sampling line, and clothing clip to hold the sampling line. The probes are made of solid brass. In all MSA half-facepiece models, the probe is attached to the body of the respirator. Full-facepiece respirators are probed through the lens and sealed with a neoprene washer and brass fittings.

MSA also offers probed lenses for use with existing Ultravue facepieces. These lenses come completely assembled with the same brass probe, sealing hardware, and sampling line as the probed full-facepieces. All respirators use standard MSA high-efficiency filters for tests.

Air-Purifying Respirators: Industrial

Air-Purifying Respirator Fit-Test Accessories

QuikChek® I Adapter

Designed especially for use with MSA respirators equipped with demand-style exhalation valves, the QuikChek I Adapter allows quantitative fit testing without the need for a special probed facepiece.

QuikChek® II Adapter

The QuikChek II Fit Test Adapter allows quantitative fit testing of any Comfo® II, Comfo Classic®, Comfo Elite®, Duo-Twin™ or Ultra-Twin® Respirator. Preassembled, the adapter attaches quickly to the facepiece by threading it into the cartridge receptacle of these twin-cartridge respirators.

QuikChek® III Adapter

The QuikChek III Adapter is specially designed for respirators equipped with Ultra Elite® Full Facepieces. The QuikChek III model threads directly into the facepiece inlet. For completion of a quantitative fit test, an OptiFilter® XL Cartridge must then be threaded into the QuikChek III Adapter.

QuikChek® IV Adapter

Adapter allows qualitative fit-testing and is specially designed for Ultra Elite and Ultravue Full-Facepieces with quarter-turn quick disconnect. Fit-test kit includes a Type H Cartridge.

QuikChek Adapters

QuikChek I Fit-Test Adapter	802710
Replacement Kit with 25 ft of sampling tubing and 25 connectors, clips, and suction cups	803196
QuikChek II Fit-Test Adapter	812022
Replacement Kit with 25 feet of sampling tubing and 25 connectors, clips and suction cups	803196
QuikChek III Fit Test Adapter	805078
Replacement Kit with 25 ft of sampling tubing, 25 connectors, clip and suction cups	803196
OptiFilter XL Cartridge (box of 6)	496081

Type H OptiFilter Cartridge (box of 6)	491010
QuikChek Adapter for Adv 1000	10006227
Advantage Fit Test Adapter (200 LS and 3200)	10056424

QuikChek® Adapter for Advantage 1000 Facepiece

QuikChek Adapter converts a standard Advantage 1000 Facepiece to a probed respirator by replacing the speaking diaphragm.

Advantage Fit Test Adapter

For Advantage 200LS and 3000 models.

Easy to use!

Online Response® Respirator Selector

Available on the internet at www.MSAnet.com/response

- Helps identify the proper respirator you need
- Has broadest range of respiratory protective devices available
- Recommends respirators for more than 700 chemical hazards
- Has nearly 3,000 chemical synonyms
- Lists up to 27 categories of respirators, with MUCs
- Is generic in nature

Cartridge Life Expectancy Calculator

Available on the internet at www.MSAnet.com/msanorthamerica

Drag your mouse onto Resources, then Tools, then Cartridge Life Calculator

MSA's interactive web pages help users determine the life expectancy of specific respirator cartridges in various hazardous situations. This information provides guidance for how long a cartridge should be used before it must be replaced.

Powered Respirators (PAPRs): Industrial

OptimAir® TL PAPR

The OptimAir TL PAPR is designed for loose-fitting hoods to protect against particulates, toxic gases and vapors, or a combination. "Smart" features set flow rates automatically through built-in sensors. Unit offers audible and visual alarms for added worker safety. Audible alarms travel up the breathing tube close to the user's ear.

MSA's OptimAir TL PAPR incorporates a sleek, low-profile design for user comfort never before offered in a PAPR. All components including the motor blower, cartridges and battery are packaged in a single hip-hugging housing. Improved motor blower electronics allow for optimum air flow and filter resistance while the compact and ergonomic battery pack affords lightweight comfort and fit. Flow control sensors are activated by insertion of the cartridges and breathing hose to the blower housing. The unit automatically adjusts for altitude via an internal pressure switch.

Superior design features permit fast, accurate changeout of cartridges, hoods and batteries. Slim, curved PAPR housing helps to minimize fatigue and permits work in tight confined areas. Standard OptimAir TL PAPR kit includes motor blower, smart charger, standard battery, and decon belt.

NIOSH-Approved

A variety of hood materials, styles and configurations are all NIOSH-approved, including DuPont Tychem SL and QC with single and double bib. A choice of hose connection is also available. Unit has an APF of 1,000 (Assigned Protection Factor).

Smart Design Features

- Crush proof breathing tube
- Automatic setting of flow rates
- Audible and visual alarms for low flow indication and low battery voltage
- Less bulk and better weight distribution improves worker efficiency
- Every cartridge has its own sealing gasket

Cartridges and Accessory Options

- P100
- Acid gas/organic vapor plus P100
- Acid gas/ammonia/formaldehyde plus 100
- Smart charger
- Decon or comfort waist belt
- Extended life battery
- Shoulder strap

Powered Respirators (PAPRs): Industrial

OptimAir® 6A PAPR with OptiFilter® Cartridges

The OptimAir 6A Powered Air-Purifying Respirator (PAPR) provides respiratory protection by filtering contaminants from ambient air and providing a constant flow to either a facepiece or hood. It can be used with a family of filters and chemical cartridges for protection against particulates, toxic gases and vapors, or a combination of these hazards.

The OptimAir 6A includes a motor/blower module and rechargeable NiCad battery and is designed to operate for a full shift. It uses only two filters. The unit is available with full or half-mask facepieces, or a hood. Hooded OptimAir 6A PAPRs are only approved for use with the OptiFilter Type HE Cartridges only.

Applications include hazardous materials cleanup, asbestos and lead paint abatement, chemical processing, foundry, smelter and coke oven applications, and nuclear facilities work.

For more information, see Data Sheet 10-00-09.

Notes

- 1 Cannot be used w/ PreFilter/Cover Assembly P/N 497098.
- 2 Do not use in atmospheres containing less than 19.5 percent oxygen, or in atmospheres immediately dangerous to life or health.
- 3 Do not wear for protection against organic vapors with poor warning properties or those which generate high heats of reaction with the sorbent material in the cartridge.
- 4 Cannot be used on PAPRs equipped with Tyvek Hood.
- 5 99.97 percent efficient against 0.3 micron DOP.

⚠ WARNING

An appropriate cartridge change-out schedule must be developed by a qualified professional, unless the cartridge/canister utilizes an end-of-service-life indicator. The change-out schedule must take into account all factors that may influence respiratory protection including specific work practices and other conditions unique to the workers' environment. If using against substances having poor warning properties, there is no secondary means of knowing when to replace the cartridges/canister. In such cases, take appropriate additional precautions to prevent overexposure, which may include a more conservative change-out schedule or using an air-supplied respirator or SCBA. Failure to follow this warning can result in serious personal injury or death. As a reference, at right is a partial list of substances having poor warning properties:

Acrolein	Diisocyanates	Methyl bromide	Nitro compounds	Phosphine	Urethane or other
Aniline	Dimethyl sulfate	Methyl chloride	Nitrogen oxides	Phosphorus trichloride	diisocyanate-
Arsine	Hydrogen cyanide	Methylene chloride	Nitroglycerin	Stibine	containing paints
Bromine	Hydrogen selenide	Nickel carbonyl	Nitromethane	Sulfur chloride	Vinyl chloride
Carbon monoxide	Methanol	Nitric acid	Phosgene		

OptimAir 6A PAPR with Ultravue Facepiece

Support Belts for PAPRs

A polyurethane-coated nylon support belt is the standard belt with the OptimAir 6A PAPR. In addition, MSA offers a clear PVC support belt. Both belts are easy to decontaminate. If decontamination is not a factor, users may opt for an uncoated nylon web belt. Optional shoulder support strap may be used with any of these PAPR belts.

PVC Support Belt	473902
Web Support Belt, uncoated	9961
Shoulder Support Strap	803903

Powered Respirators (PAPRs): Industrial

OptimAir® MM 2K PAPR with Type HE OptiFilter® XL Filter

The OptimAir MM 2K Powered Air-Purifying Respirator (PAPR) is designed for abatement, nuclear, lead and other hazardous particulate environments. The PAPR filters particulates from ambient air and provides a constant flow of respirable air to the Advantage 3000, Ultravue or Ultra Elite Facepiece. The mask-mounted motor/blower with HEPA filter has a low profile design that enhances user maneuverability and simplifies decontamination.

OptimAir MM 2K PAPR with Advantage 3000 Facepiece

The PAPR includes a small, lightweight, water-resistant nickel metal hydride (NiMH) battery pack that will operate for eight hours of continuous use. Weighing only 12.5 oz., it measures only 3"x 5"x 1". The low-profile unit fits close to the wearer's body. The sealed battery pack is water-resistant for easy shower decontamination. Another advantage: NiMH batteries do not have the "memory effect" associated with NiCad batteries. The standard Dual-Rate Battery Charger will recharge a fully discharged battery in less than three hours.

Chin-Type Gas Masks

The Chin-Type Gas Mask is a protective system consisting of a full facepiece and canister. The small, round plastic canister attaches directly to the facepiece. The system is designed to permit downward head movement.

The Chin-Type Gas Mask is designed for respiratory protection against a specific gas or group of gases as indicated by canister identification. See the canister table for specific canister approvals. From a practical standpoint, gas masks are generally suitable for ventilated areas with relatively stable contaminant concentration levels. They should never be used in confined spaces or where oxygen deficiency and high gaseous concentrations may occur. Gas masks may also be used for escape only from atmospheres in which the contaminant concentration does not exceed the maximum use condition of the gas mask.

Facepieces

**Advantage
Facepiece**

**3100 Ultravue
Facepiece**

**Ultra Elite
Facepiece**

Whether you choose the Advantage 3100, Ultravue or Ultra Elite facepiece, all three are available in three sizes to accommodate a wide range of users. The Advantage 3100 facepiece has a silicone rubber facepiece, while the Ultravue and Ultra Elite facepieces are available in a choice of silicone or Hycar rubber. All have a scratch-resistant polycarbonate lens that provides a wide field of vision. Optional lens cover accessories provide even greater scratch resistance. All three facepieces feature a nose cup that helps reduce lens fogging in low temperature conditions or in high-humidity conditions.

*Canister contains a P100-Particulate Filter (99.97% filter efficiency level) effective against all particulate aerosols.

Belt-Mounted Version

The belt-mounted version of the Chin-Type Gas Mask allows the wearer to mount the chin-style canister on a support belt. This shifts the weight of the canister to the hip, providing greater comfort for some wearers. The belt-mounted version is also recommended for welding or grinding operations, as the canister can be positioned away from sparks or molten metal. An optional spark cover is available to protect canister from spark damage.

The additional parts needed are listed below. See page 16 for Welders Adapters, lenses and protective hood.

Air-Purifying Respirators: Industrial

Industrial-Size and Super-Size Gas Masks

The Super-Size and Industrial-Size Gas Masks are a protective system consisting of a facepiece, breathing tube, harness, and chemical-sorbent canister. A large, oval-shaped aluminum canister attaches to the facepiece with a corrugated breathing tube. The canister is supported on the wearer's chest with a nylon carrying harness.

The Industrial and Super-Size Gas Masks are designed for respiratory protection against a specific gas or group of gases as indicated by canister identification. See the table for specific canister approvals. From a practical standpoint, gas masks are generally suitable for ventilated areas with relatively stable contaminant concentration levels. They should never be used in confined spaces or where oxygen deficiency and high gaseous concentrations may occur. Gas masks may also be used for escape only from atmospheres in which the contaminant concentration does not exceed the maximum use condition of the gas mask.

The Super-Size Gas Masks have a Window-Cator Canister, which contains an indicator to show the effectiveness of the canister against certain contaminants. The small round window in the front of the canister is an end-of-service-life indicator (ESLI). When the shade of the ESLI changes from its "Starting" color to the "Time-To-Change" color, the canister is beginning to lose its effectiveness and must be replaced.

For more complete information, see Data Sheet 05-00-01.

Air-Purifying Respirators: First Responder/First Receiver

Respirators for Riot Control

The Millennium Riot Control Mask and the Advantage 10000 Riot Control Masks are NIOSH-approved for protection against CN and CS Riot Control Agents, and P100 particulate efficiency level.

Millennium® Riot Control Gas Mask

A Hycar version of the reliable military-style gas mask (MCU-2/P Mask, used by the U.S. Air Force in Desert Storm) that combines high performance, customized fit, comfort, and cost efficiency.

- Flexible, 1-piece polyurethane lens with wide field of vision is bonded to durable Hycar rubber facepiece
- Dual-canister mount (NATO 40mm thread) allows weapon sighting from either shoulder
- Drinking tube provides connection for fluid ingestion in contaminated atmospheres
- Fully elastic, 6-point head harness promotes easy on/off, easy adjustment, no hair pulling
- Internal nose cup with 2 check valves deflects air from the lens, reduces fogging
- Standard mechanical speaking diaphragm included, or add MSA's optional ESP® II Communications System
- NIOSH-approved (No. TC-14G-0254) for protection against chloroacetophenone (CN), chlorobenzylidene (CS), P100 particulate efficiency level, and particulates

Advantage® 1000 Riot Control Gas Mask

A clean, simplified respirator with Hycar facepiece (based on a proven facepiece design developed for the U.S. Armed Forces) that's up to 40% lighter than conventional full-face respirators and gives high performance, customized fit, comfort, economy, and user acceptance.

- Flexible, 1-piece polyurethane lens with wide field of vision is bonded to durable Hycar rubber facepiece
- Dual-canister mount (bayonet mount) allows weapon sighting from either shoulder
- Fully elastic, 6-point head harness promotes easy on/off, easy adjustment, no hair pulling
- Standard nose cup helps eliminate lens fogging
- Standard mechanical speaking diaphragm included, or add MSA's optional ESP II Communications System
- NIOSH-approved (No. TC-14G-0235) for protection against chloroacetophenone (CN), chlorobenzylidene (CS), P100 particulate efficiency level, and particulates

Air-Purifying Respirators: First Responder/First Receiver

Respirators for Homeland Security

Millennium® CBRN Gas Mask

The new NIOSH government CBRN standard for full-facepiece gas masks was issued on March 7, 2003. After extensive testing to that standard, MSA's Millennium CBRN Gas Mask was first to receive NIOSH certification as "compliant against CBRN".

A Hycar version of the reliable military-style gas mask (MCU-2/P Mask, used by U.S. Air Force in Desert Storm) that combines high performance, customized fit, comfort and cost efficiency.

- Flexible, 1-piece polyurethane lens with wide field of vision is bonded to durable Hycar rubber facepiece.
- Dual-canister mount allows weapon sighting from either shoulder
- Drinking tube provides connection for fluid ingestion in contaminated atmospheres
- Fully elastic, 6-point head harness promotes easy on/off and adjustment, with no hair pulling
- Internal nose cup with 2 check valves, deflects air from the lens, reduces fogging
- CBRN canister containing chemical sorbents and a P100 filter to attract, retain and neutralize contaminants
- Standard mechanical speaking diaphragm included, or add MSA's optional ESP® II Communications System
- Optional butyl-coated nylon hood for total head protection
- NIOSH-approved (No. TC-14G-0270) for protection at a CBRN Cap 1 rating

For Millennium Gas Mask accessories, see p. 14.

Ultra Elite® CBRN Gas Mask

Safety

- Super-soft black Hycar rubber exceeds the CBRN permeation requirements
- Large lens with 83% unimpeded vision
- Centrally located inlet port for secure, comfortable fit and feel
- Centrally located mechanical speaking diaphragm for clear communications
- Optional ClearCommand® Amplifier for increased communication capabilities

Simplicity

- Available with a 5-point rubber or Speed-ON® head harness
- Identical sealing surfaces for both SCBA and Gas Mask facepieces—eliminating the need for redundant fit testing
- Simplified respiratory protection training program

Reliability

- The Ultra Elite facepiece is fire-service proven, with over a decade of trusted use
- MSA has been making gas masks since World War I
- Largest supplier of gas masks to the law enforcement market

Air-Purifying Respirators: First Responder/First Receiver

Responder™ CBRN PAPR (Powered Air-Purifying Respirator)

A belt-mounted powered air-purifying respirator with choice of 2 proven tight-fitting facepieces in 3 sizes. The motor/blower provides constant air flow of a minimum 115 lpm to the facepiece via the breathing tube. Can be used with CBRN cartridge or with the OptiFilter XL or PAPR GME Multigas HE cartridge for tactical operations.

- Protects wearers for up to 8 hours under many hazardous conditions
- First CBRN-approved PAPR with a tight-fitting facepiece
- Choice of 2 proven positive-pressure facepieces, the MSA Millennium and the MSA Ultra Elite
- Choice of CBRN cartridge or multi-gas / particulate chemical cartridges for non-CBRN use

MSA's Responder CBRN PAPR system is ideal for military and special operations personnel who need non-IDLH respiratory protection for an extended period of time.

Industry trusted, with over 50,000 C420's fielded in various U.S. military programs, the C420 Motor-Blower is ideal for filtering contaminants from ambient air and providing a constant airflow of at least 115 lpm to the user's facepiece, providing a twenty times greater OSHA assigned protection factor than APR, due to positive pressure in the mask.

The C420 is available with 2 batteries that have the ability to be "hot-swapped" during warm environment use. The Lithium-Sulfur Dioxide mission battery has an 8 hour run-time. The Nickel Metal Hydride rechargeable battery has a 4 hour run-time. The motor / blower will not interfere with radio communications as it is EMI shielded to MIL-STD-461C.

The C420 comes complete with the motor-blower, belt, airflow indicator and breathing tube.

Responder CBRN PAPR Complete Systems

About the new CBRN PAPR Standard

NIOSH released a CBRN standard for powered air-purifying respirators (PAPRs) in October 2006. NIOSH conducted product testing and issued approvals to MSA's Responder PAPR, which was the first PAPR with a tight-fitting facepiece to pass the NIOSH requirements.

Air-Purifying Respirators: First Responder/First Receiver

OptimAir® 6HC PAPR

The OptimAir 6HC PAPR (Health Care Powered Air-Purifying Respirator) from MSA is specifically designed to protect health care professionals from residual Chemical/Biological/Radiological Agents, when they are performing First Responder duties during Homeland Security or terrorist situations.

The system features a lightweight, chemical-resistant Tychem SL Hood and belt-mounted blower with two HC Cartridges. The canisters contain a pleated high-efficiency (P100) filter to remove aerosols, radionuclides, and solid particulates; and an impregnated activated carbon bed to adsorb (filter out) gases and vapors. The carbon bed is the same as used in military canisters and is effective against mustard (HD), Sarin (GB), DMMP (a Sarin simulant), HCN, and CK.

For more information, see Bulletin 1010-13-MC.

- Designed specifically for use by ER and other health care providers during Homeland Security situations.
- Continuous air flow meets or exceeds NIOSH standard
- Entire lightweight PAPR weighs under 6 pounds
- Available with Tychem SL Hood or Advantage 3100 Facepiece.
- Tychem SL hood weighs only 8 ounces.
- Hood is compatibly worn with facial hair and glasses
- No fit testing necessary when using hood
- Design allows freedom of movement plus optimum protection
- Tychem SL hood and Advantage 3100 facepiece are comfortable, easy to don and use
- Lithium battery provides 10-year shelf life, 4 hours of wear time
- Approved for High Efficiency, Chlorine, Sulfur Dioxide, Hydrogen Chloride, Hydrogen Fluoride, Hydrogen Sulfide (escape only)
- NIOSH approval TC-23C-2201 with Tychem Hood
- NIOSH approval TC-23C-2209 with Advantage 3100 Facepiece

Safe Escape™ CBRN 15-minute Escape Respirator

When escaping from CBRN agents, every second counts. Depend on the Safe Escape Hood from MSA. The hood gives your employees the protection they need to escape from a terrorist situation safely, quickly and easily — whether they work in high-profile office environments, for government agencies or embassies, or as law enforcement or first responders. The MSA Safe Escape Hood is the equipment of choice for today's diverse workforce.

Engineered for Maximum Performance

Manufactured with a high-performance laminate material, the hood is designed to provide you with the latest in head and neck coverage with respiratory protection against CBRN agents. The soft, high-stretch rubber neck seal conforms to irregular neck contours, allowing a secure fit on a wide variety of users. Its unique sized nosecup helps reduce lens fogging and carbon dioxide buildup by directing airflow inside the hood.

The Safe Escape Hood canister features a high-efficiency particulate filter and activated carbon to combat aerosols, gasses and vapors. In fact, the canister used in the hood contains 50% more carbon than similar canisters used by the U.S. military. Furthermore, MSA has performed extensive testing on the Safe Escape Hood against both simulated and live chemical agents beyond what is tested by NIOSH.

Designed for Comfort

In addition to designing the hood for maximum protection, MSA also took into account the comfort factor. A user who is potentially under stress requires ease of donning and use. The large lens and translucent hood allow better visibility, face recognition and help reduce claustrophobia. The nose cup allows communication superior to that of conventional devices, which require wearers to breathe through a mouth bit. With the integrated nose cup, wearers can breathe and speak normally to provide potentially life-saving communications. The hood also features cradle-type self-adjusting head straps that allow for quick, no assistance donning in the event of an emergency.

For more information, see Bulletin 0514-02.

Safe Escape Respirator in Hextreme Case

Air-Line Respirators: Industrial

A Guide to Air-Line Systems

Description

Type C Supplied-Air Respirators, more commonly referred to as air-line respirators, are designed to provide long-duration respiratory protection.

They generally consist of a full-facepiece or half-mask facepiece connected by an air-supply hose to an air source (either a compressor or bank of large air cylinders). When connected to the air source, the respirator delivers a supply of respirable air to the user.

Accessory equipment, such as pressure regulators, pressure relief valves, carbon monoxide monitors and filters for air compressors, may be necessary to ensure that the air is at the proper pressure and quality for breathing. Air quality must be Quality Verification Level Grade D or better as defined in ANSI Standard Z-86.1-1973 (Compressed Gas Association Specification G-7.1 Commodity Specification for Air).

Current air-line systems fall into two categories:

Pressure-Demand and **Constant Flow**. The difference between the two is how the air is supplied.

Pressure-demand systems deliver air only when the user necessitates it. Thus, pressure-demand devices afford greater breathing efficiency.

In contrast, with a constant flow device, air flow to the respirator is continuous. However, because the air flow is continuous, constant flow air-line systems are generally used only with a compressor for a virtually unlimited air supply.

Type C Supplied-Air Respirators are approved by the National Institute for Occupational Safety and Health (NIOSH) for use in atmospheres not immediately dangerous to life and health (IDLH) or from which the wearer can escape without wearing the respirator.

“Not immediately dangerous to life and health” means any hazardous atmosphere which may produce physical discomfort immediately, chronic poisoning after repeated exposure, or acute adverse physiological symptoms after prolonged exposure. (42 CFR, Part 84 subpart A, 84.2(x)).

This limitation is necessary because the air-line respirator depends entirely on an air supply not carried by the wearer. Therefore, if the air hose were severed or crimped, or the air compressor failed, the air supply to the wearer would be shut off.

The wearer would be without respiratory protection and might not be able to safely escape from an IDLH atmosphere.

Another limitation of air-line respirators is that the air-supply hose limits the wearer to a fixed distance from the air source. As an air-line respirator user, it is your responsibility to supply the respirator with breathable air—Grade D or better. The following pages show complete hook-ups of various air-line systems, both pressure-demand and constant flow, from the air source to the respirator. The following information is a guide designed to aid you in hooking up your own air-line system.

Pressure-Demand Air-Line Respirators

Pressure-Demand Air-Line Respirators are designed to maintain a slight positive pressure of air inside the facepiece whether the wearer is inhaling or exhaling. This helps prevent contaminants from seeping in around the facepiece, even if there should be small breaks in the face-to-facepiece seal.

Pressure-Demand Air-Line Respirators are designed specifically for non-IDLH toxic atmospheres. The exception is if the respirator is equipped with an egress cylinder of air to use during escape.

Pressure-Demand Air-Line Units require an air supply from an uncontaminated compressed-air source as stipulated in General Industry Safety and Health Regulations, Part 1910.134 (OSHA) with the delivered air conforming to at least Grade D of ANSI Standard Z86.1.

A common air source for pressure-demand systems is a single cylinder of air which can be set up in remote sites that might otherwise be impossible to reach with a large stationary compressor.

Another air source option for pressure-demand respirators is a cylinder cascade system. A cascade system consists of several air cylinders joined together in a bank by means of coupler tees. Generally, the banks consist of three or more cylinders of either 244 cubic-feet or 330 cubic-feet-capacity. One or more workers can breathe from a cascade system.

If using a compressed air or a compressor system, each respirator generally requires 1.5 cfm per person and needs to maintain the inlet (working) pressure specified in the respirator instruction manual.

At a normal rate of consumption, a three-cylinder bank used with a pressure-demand unit will provide between 12 to 16.5 man-hours of air, depending on cylinder capacity.

MSA Pressure-Demand Air-Line Units Include:

PremAire® Air-Line Respirator System:

- with Escape Cylinder (for egress from IDLH atmospheres)
- with Vortex Tube (for suit-cooling applications)
- with Dual-Supply (to eliminate additional hose lengths)

PremAire® Cadet Respirator

PremAire® Cadet Escape Respirator

- with Escape Cylinder (for egress from IDLH atmospheres)

Abrasi-Blast™ Supplied-Air Respirator

Constant Flow Air-Line Respirators

Constant Flow Air-Line Respirators also maintain a slight positive pressure of air inside the facepiece whether the wearer is inhaling or exhaling. This helps prevent contaminants from seeping in around the facepiece, even if there should be small breaks in the face-to-facepiece seal.

Constant Flow Air-Line Respirators maintain air flow at all times, rather than only on demand. Because of this, constant flow units almost always use a compressor as their air source. A constant flow unit would quickly exhaust the air from a cylinder or cascade system.

There are two types of Constant Flow Air-Line Respirators: one uses a tight-fitting facepiece; the other, a loose-fitting hood or helmet. Inlet air pressure must be able to maintain at least 4 cfm for a tight-fitting facepiece and 6 cfm for a loose-fitting hood.

The inlet pressure for Constant Flow Air-Line Respirators varies between 10-15 psig for low pressure systems and 35-40 psig for high pressure systems.

For Constant Flow Air-Line Hoods, the inlet pressure usually ranges between 10-15 psig and 85-100 psig, depending on the type. Also, depending on the inlet pressure, the length of approved air-supply hose for these systems is usually between 8-50 feet for low-pressure systems and 8-300 feet for high-pressure systems. Consult the instruction manual for your respirator to determine the specific inlet pressure and hose length.

MSA Constant Flow Respirators with Loose-Fitting Hoods Include:

- Versa-Hood™ Air-Supplied Hood

MSA Constant Flow Respirators with Tight-Fitting Facepieces Include:

- Constant Flow Air-Line Respirator
- Constant Flow Direct-Connect Air-Line Respirator
- Constant Flow Duo-Twin™ Air-Line Respirator
- Constant Flow Duo-Flo™ Air-Line Respirator
- Abrasi-Blast™ Supplied-Air Respirator

PremAire® Supplied-Air Respirator System

The PremAire Supplied-Air Respirator System is one of the most advanced air-line respirators available. Designed to provide the utmost in versatility, the modular system allows users to order the respirator configured for their specific application.

A lightweight mask-mounted regulator provides high air flow and responds quickly to changing breathing requirements.

The basic PremAire Respirator includes the patented manifold and can be upgraded with any of the three following options:

1. an Escape Cylinder that permits emergency escape from Immediately Dangerous to Life and Health (IDLH) atmospheres. (Please see Note 2 below ordering information.)
2. a Dual-Supply option that lets workers connect from one pressurized continuous air source to another without losing continuity of air flow.
3. a Vortex Tube option that delivers whole-body temperature control for added worker comfort.

The PremAire Respirator is a full-face, pressure-demand, Type-C supplied-air respirator with a patented waist-mounted manifold.

In addition to the flexibility offered by the manifold, the PremAire Supplied Air Respirator System is available with the Firehawk® Mask-Mounted regulator (MMR). This revolutionary 2nd-stage regulator, offered in push-to-connect (PTC) and slide-to-connect (STC) versions, combines user-friendly connections and unbeatable care and maintenance. The Firehawk MMR, originally designed for the rigorous conditions of the fire service, is a solid cover regulator for use with the Ultra Elite facepiece, considered best-in-class with over 94% field of vision with the MMR engaged. For more information, please reference Bulletin 0114-20 or call MSA Customer Service at 1-800-MSA-2222.

PremAire System User's Guide

The PremAire System User's Guide provides a comprehensive core instruction manual covering the basic PremAire Supplied-Air Respirator, plus four sub-manuals covering each of the PremAire System options (escape cylinder, Duo-Twin, dual-supply and (vortex tube.) The User's Guide also includes an illustrated parts list, a quick-reference chart showing the various PremAire Respirator configurations available, and a hard-cover binder with tab pages to house and organize these materials.

All these manuals are available on our website: www.MSAnet.com

Fully Configured PremAire Manifold

Traditional MSA Part Numbers

See the following page for Assemble-To-Order information. For customers who require faster delivery, the most popular PremAire system combinations can still be ordered with a traditional MSA part number. These units are always stocked in our warehouse and are ready to ship upon receipt of order. These assemblies come with a medium Hycar Ultra Elite Facepiece and noseclip with rubber harness. For these assemblies, Quick-Disconnects must be ordered separately (see p. 41; you need a male plug with female 1/4" NPT (column 2), and a female socket assembly (column 5).

Complete Assemblies with Firehawk PTC Regulator

Air-Line Respirators: Industrial

The Assemble-To-Order System

MSA offers more PremAire System Respirator choices than ever before. Thousands of possible combinations let workers select just the right PremAire Respirator for the job.

MSA's Assemble-To-Order System (ATO) makes ordering the right unit easier and faster than ever. Instead of choosing from a handful of complete PremAire assemblies, users can order a custom-made unit with every option exactly as desired. The ATO System works by allowing users to create their own part numbers. Each digit of an ATO part number will represent a specific component, so that the entire part number represents a finished respirator built exactly to the desired specifications.

Using the ATO System below is easy. The user selects the number or letter that corresponds to the choice of components and fills in the

appropriate box. A number or letter from each category must be selected. For example, to order a PremAire System respirator with nylon belt assembly; right-hip 10-minute carbon fiber escape cylinder; dual-supply option with 8-inch hose; Firehawk PTC 30" solid cover; non-NFPA Ultra Elite medium hycar Facepiece with noseclip and EZ-DON harness; Foster steel quick-disconnect; and a hard case, use this ATO part number: C-PS151G-11M13-G-1.

Advantages of the ATO System include:

- You get the exact model of PremAire you need
- No special orders, because all orders are customized
- Fresher cylinders from our continually rotated inventory
- Simplified ordering process
- Timely delivery

PremAire® Cadet Supplied-Air Respirator

The PremAire Cadet Respirator is a pressure-demand, Type-C, supplied-air respirator with a mask-mounted regulator that responds quickly to wearer's changing breathing requirements. The respirator can serve as a basic air-supplied device, or it can be easily upgraded to the versatile, state-of-the-art PremAire System. Designed for a variety of applications, PremAire Cadet Respirators can be used in non-IDLH (Immediately Dangerous to Life or Health) environments only. Operating inlet pressure is 60-100 psig. NIOSH approved. For more complete information, see Data Sheet 01-01-04.

Complete Assemblies

All listed configurations include: Ultra Elite facepiece (medium Hycar), rubber head harness and nylon belt assembly.

Hose	Fittings	Push-To-Connect Firehawk MMR		Slide-To-Connect Firehawk MMR	
		With Case	Less Case	With Case	Less Case

Note: See page 40 to order quick-disconnects for use with the PremAire and PremAire Cadet Systems (column 2 for the plug and column 5 for the socket assembly).

Air-Line Respirators: Industrial

PremAire Cadet Escape Respirator— Combination Supplied Air Respirator with Escape Cylinder

Size, Simplicity, and Economy

The PremAire Cadet Escape Respirator is designed to be versatile, comfortable, and affordable. A streamlined new design offers a first-stage regulator and cylinder valve within one assembly, creating a very small size and profile that is less likely to snag when working in tight places.

Low-profile escape cylinders can be worn on either the right or left hip. The Ultra Elite Pressure-Demand Facepiece or Advantage 4000 Facepiece with APR conversion capability offer choice of sizes and nose cups. The Firehawk® MMR Regulator let users choose from Push-To-Connect (PTC) or Slide-To-Connect (STC) attachments. All regulators feature a bypass and a choice of solid cover or purge.

The economical PremAire Cadet Supplied-Air Respirator with Escape Cylinder is a cost-effective respiratory protection solution for many industries. For ordering ease and flexibility, these systems will be sold as part-numbered kits or through MSA's Assemble-To-Order (ATO) System. The PremAire Cadet Supplied-Air Respirator with Escape Cylinder is NIOSH-approved as a combination supplied-air respirator and self-contained breathing apparatus.

Features and Benefits

- New one-piece first-stage regulator and cylinder valve;
 - *Combination cylinder valve and first stage pressure reducer*
 - *Very small size and profile*
 - *Regulator uses many of same parts as MSA FireHawk SCBA*
- Regulator body protects cylinder gauge – no need for rubber gauge guard, reduces size!
- Choice of cylinder hip placement allows workers freedom and versatility
- Two harness materials:
 - *Standard Nylon-ideal for chemical resistance*
 - *Kevlar-ideal in high heat environments or in areas with potential for sparks*
- Two attachments for keeping cylinder secure on belt
 - *Sturdy metal cylinder support bands*
 - *Nylon or Kevlar cylinder bags available for carbon fiber cylinders*
- Shoulder support strap incorporates hose keeper; regulator hose stays in place close to body, reduces chance of snagging
- Bracket/holder for second stage pressure regulator

Applications

- Chemical and petrochemical
- Hazardous materials
- Confined space entry
- Firefighting operations

Duo-Twin™ Respirators and Duo-Flo™ Respirators

Duo-Twin Respirator

The Duo-Twin Respirator comes in a Constant-Flow version; Constant-Flow respirators are normally used where an ample air supply is available, such as that provided by an air compressor. The MSA Duo-Twin Respirator features an air-purifying cartridges, which also protect against a variety of contaminants. If the air supply should ever fail on the Constant-Flow unit, the user is automatically protected by the air-purifying cartridge.

Duo-Twin Respirator

This product is popular in the pharmaceutical, chemical, petrochemical, and nuclear industries. This MSA respirator should not be used in atmospheres containing less than 19.5% oxygen.

NIOSH approved.

Duo-Flo Respirator

The Duo-Flo Respirator comes in a Constant-Flow version; Constant-Flow Respirators are normally used where an ample air supply is available, such as that provided by an air compressor. Duo-Flo Respirators use the MSA Ultra Filter, a compact round filter cartridge that has a large effective filter area to provide low-breathing resisting. This cartridge has a P100 classification. Duo-Flo Respirators are popular in the pharmaceutical, chemical, petrochemical, and nuclear industries. This MSA respirator should not be used in atmospheres containing less than 19.5% oxygen. NIOSH approved.

Air-Line Respirators: Industrial

Abrasi-Blast™ Supplied-Air Respirator

The Abrasi-Blast Respirator provides respiratory and upper body protection for workers in shipbuilding, the construction industry, utilities, and other applications where blasting with abrasives is performed.

A complete Abrasi-Blast Respirator is made up of a hood, facepiece with lens housing, breathing tube, cover lens cartridge assembly, flow-control device, approved air-supply hose, and support belt.

During blasting operations, the lens of the Abrasi-Blast Respirator is protected by 2 to 4 flat glass cover lenses mounted in a special foam material. Each cover lens is removed by integral pull tabs when it becomes so abraded that vision is reduced. There is no need to stop to change lenses, as is necessary with most conventional blasting hoods. Approved by NIOSH.

For more complete information, see Bulletin 0112-37.

Complete Assemblies with Hypalon Hood

Includes one lens cartridge consisting of four 0.06-inch untempered glass cover lenses, flow control device, Snap-Tite aluminum quick-disconnect fitting, adjustable valve-connector body, facepiece (medium) with dual exhalation valves and lens housing, breathing tube, web belt, and air-hose connector.

	Hypalon Hood with Collar	
Inlet Pressure Range	Waist-Length	Shoulder-Length
10-15 psi	468716	468720
35-40 psi	468718	468722
Abrasi-Blast Duo-Flo	478116	478117

Lens Cartridges (contains 12 cartridges per carton)

Description	Recommended use	Part No.
0.06-in thick, untempered lens (4 lenses in each cartridge)	light blasting	473238
0.06-in thick, tempered lens (4 lenses in each cartridge)	light blasting plus added protection against glass breakage	473240
0.09-in thick, untempered lens (3 lenses in each cartridge)	medium blasting	473798
0.09-in thick, tempered lens (3 lenses in each cartridge)	medium blasting plus added protection against glass breakage	473800
0.12-in thick, untempered lens (two layers laminated) (2 lenses in each cartridge)	heavy blasting	473802
0.12-in thick, untempered lens (two layers laminated) (3 lenses in each cartridge)	heavy blasting	481742

Chest-length	—	480699	—	—
Shoulder-length	468725	—	486304	486329

Note: The Abrasi-Blast Respirator is available with a duo-flow option. Please call MSA Technical Support for complete ordering information.

Note: Assemblies can be specially ordered with different options.

Constant Flow Air-Line Respirator

Constant Flow Air-Line Respirator with Ultravue Facepiece

Constant Flow Air-Line Respirator with Ultra Elite Facepiece

Constant Flow Air-Line Respirator with Comfo Facepiece

Constant Flow Air-Line Respirator with Welder's Comfo Facepiece

Constant Flow Air-Line Respirators are designed to maintain a slight positive pressure of air inside the facepiece, whether the wearer is inhaling or exhaling. This helps to prevent contaminants from seeping in around the facepiece, even if there should be small breaks in the face-to-facepiece seal. The complete respirator assembly is available with Ultravue or Ultra Elite Full Facepiece, Comfo Half-Mask Facepiece, or Comfo Welder's Facepiece; breathing tube; web support belt; and air-flow control valve with quick-disconnect assembly. The Constant Flow Respirator is used in non-IDLH environments. NIOSH approved. For more complete information, see Bulletin 0112-38.

Complete Assemblies

Choose facepiece, control valve, and quick-disconnect assembly. Comes with breathing tube and a web support belt. For optional PVC belt, see Accessories on page 44.

† Available by special order only. High-pressure control valves are also available with the following special order quick-disconnects: Snap-Tite brass or stainless steel, Foster brass, and Hansen brass, or stainless steel. Low-pressure control valves also available with: Snap-Tite brass or stainless steel, Foster brass, Hansen brass, and Duff-Norton brass. Please call your nearest MSA distributor for complete ordering information.

Note: Facepieces can also be ordered in silicone instead of Hycar rubber. Three sizes of facepieces are available. For belts, MSA Air-Supply Hose and other accessories, see pages 43–44. For separate quick-disconnect plugs and sockets, see page 42. See page 41 for typical Pressure Demand Air-Line and Constant Flow Air-Line Systems setup.

Air-Line Respirators: Industrial

Versa-Hood™ Air-Supplied Hood

The Versa-Hood Air-Supplied Hood is an inexpensive hood respirator which may be used anywhere a Type-C air-supplied hood is required. This versatile hood is available in two lengths (shoulder- and waist-length) and two materials (Tyvek and Saranex). All Versa-Hood respirators can be used with either a plant air system or personal air compressor.

When head protection is needed, a special three-point Velcro system secures the hood to an MSA V-Gard Cap. The hood suspensions (basic or ratchet versions) are easily adjustable and stable, minimizing the need for a chin strap. The hood is designed to be disposable, thus eliminating the need for cleaning, and a twin-lens system extends the life of the hood. MSA also offers a package of ten replacement lenses. An air-distribution system keeps the lens fog-free. NIOSH certified. For more complete information, see Data Sheet 01-02-01.

Versa-Hood Assembly and 3/8-inch Hose System with Direct Connectors

Cool only vortex, less Quick-Disconnect (requires 15 cfm at an inlet pressure between 75 to 90 psi)	494392

Portable Air-Supply Systems

The TransportAire™ System

Low-Pressure Configuration

The TransportAire System is available in two versions: one for high-pressure cylinders and one for low-pressure cylinders. Both versions consist of an impact-resistant handle with urethane-coated nylon straps that fit around a standard MSA SCBA air cylinder (purchased separately), a regulator, and a regulator-to-hose adapter. An Audi-Larm device is provided standard on the high-pressure system and is available as an option for the low-pressure system. Both systems are designed for use with MSA supplied-air respirators equipped with a dual-supply option.

A major advantage of the dual-supply option is improved mobility; workers need not remain tethered to a single air-supply hose throughout a work period.

For more complete information, see Bulletin 0114-21.

The PortAire® System

The PortAire System holds two standard SCBA air cylinders to provide firefighters, industrial personnel, confined-space workers, and others with a portable, compressed-air source any time an air-line device is required.

Designed for use with MSA pressure-demand supplied-air respirators, including dual-purpose self-contained breathing apparatus (SCBA), the PortAire System consists of a compact air-pressure regulating system housed in a lightweight, yet durable, anodized aluminum frame.

For more complete information, see Bulletin 0114-21.

Air-Line Respirators: Industrial

TransAire® 5, TransAire® 10, and Custom Air V® Escape Respirators

Quick Escape from IDLH Atmospheres

When you need to bail out quickly, the TransAire 5 and TransAire 10 Escape Respirators deliver a consistent air supply at 40 lpm (liters per minute). This standard-flow rate makes for a smooth escape in normal aerobic escape applications. The TransAire 10 Escape Respirator is pressurized to 3000 psig, and the TransAire 5 Escape Respirator is pressurized to 2216 psig. The compact units employ aluminum cylinders that can withstand exposure to temperatures from 0° to 160°F. Despite their durability, the units are extremely lightweight.

The Custom Air V Escape Respirator is designed with a high flow rate and meets stringent air flow requirements for extremely aerobic escape applications. It provides a five-minute, constant air flow at 72 lpm and is available with either an aluminum or a carbon fiber cylinder.

Single unit carrying case

Typical Air-Line Systems

Pressure-Demand System

Note: DO NOT use teflon sealing tape on straight threaded connections with O-ring seals.

Note: Cascade cylinders are not normally used with a constant-flow system due to excessive air usage—one large (300 cu ft) cylinder would last one working person only about 15 minutes. Therefore, using cascade cylinders with a pressure-demand system is recommended.

Air-Line Respirators: Industrial

Quick-Disconnects for Air-Line Respirators and Air-Supplied Hoods

Quick-disconnect assemblies connect air-supply hoses to the manifold and to the air source. If you want to use a quick-disconnect to interconnect lengths of air supply hose, you must use a locking-type quick disconnect—

specifically, the locking quick disconnects listed in the yellow box at the bottom of this page. For more complete information, see the Pocket Guide to Air-Line Systems (Bulletin 0114-14-MC).

Hose Reel - 50 feet (includes 50 ft of 3/8" neoprene hose P/N 455022)						72444

* Recommended usable length, 4-25 ft.

Cascade System Accessories

The following components are used to assemble a 2400 psi cascade system, which consists of a bank of respirable-air cylinders (user-supplied) that supply a flow of air to dual-purpose air masks, or other pressure-demand air-supplied respirators. Air-supply hoses are listed separately at right.

Cascade System Accessories

Audi-Larm™ Warning Device, low-pressure (CGA 346), 0-3000 psig	85078
Audi-Larm™ Warning Device, high-pressure (CGA 347), 0-5500 psig	492307
Air Coupler Tee - low-pressure CGA 346, 0-3000 psig	68850
Air Pigtail - low-pressure CGA 346, 0-3000 psig	68851
Air Cylinder Pressure Regulator, dual-gauge, 0-3000 psig	68858
High-Pressure Air Cylinder Regulator, dual-gauge, 0-5500 psig	633352
Male Air-supply Hose Adapter for Foster Quick-Disconnects (for PVC hose)	55716
Union Adapter (required to attach male plug)	69542

Breathing Air Distribution System

This system filters, regulates and distributes plant air to as many as four air-line respirator users. A sealed, rugged, stainless steel case prevents contamination of interior components. External controls allow water condensation to be drained from the filter bowl and the manifold pressure to be adjusted. Caution: The system does not remove carbon monoxide. Only Grade D quality air should be used as input.

Breathing Air Distribution System

Breathing Air Distribution System, less quick-disconnects (must be ordered separately)	488113
"Toolbox" Carrying Handle Bar	488118

Portable Air Filter and Regulator ("Black Box")

This system contains an airline filter, pressure regulator and a 4-outlet manifold in a lightweight aluminum case. For use with inlet pressures up to 125 psig. The outlet pressure is adjustable from 10 to 125 psig. The manifold comes with Snap-Tite (AL) quick-disconnects.

Portable Air Filter and Regulator

Portable Air Filter and Regulator	92760
-----------------------------------	-------

Manifolds

Required when using multiple (2-4) respirators from a single air source; some of these manifolds have quick-disconnect assemblies with automatic shut-off outlets. Note: Gauge required when greater than 10' between airline point of connection and the regulator.

Manifolds

No. of Outlets	Foster Quick-Disconnect	less Quick Disconnect
4	47370	488914
2	84416	84418

Inlet Pressure Gauge

MSA offers an inlet pressure gauge that enables a user to check pressure at the inlet of the MSA Air-Supply Hose, thereby assuring that air pressure is within the certified range. The gauge is supplied with Quick-Disconnect fittings.

Inlet Pressure Gauge

Inlet Pressure Gauge w/ Snap-Tite fitting	476734
Inlet Pressure Gauge w/ Foster or Schrader fitting	476735
Inlet Pressure Gauge w/ Duff-Norton fitting	476736
Inlet Pressure Gauge w/ Hansen fitting	476737
Inlet Pressure Gauge less Quick-Disconnect**	492586

**See Column 4 plug and Column 3 union on page 40.

Air-line Filter

The MSA air-line filter removes a minimum of 99% of 0.3 micron and larger particulates, including dusts, mists, fumes, smoke, and petroleum vapors. Caution: It does not remove carbon monoxide. The air-line filter can be used at inlet pressures up to 125 psig. The pressure drop is one psig at a maximum rated air flow of 25 cfm.

Air-Line Filter

Air-line Filter - with 1/2" NPT female inlet and outlet	81857
Air-line Filter - with 3/4"-16 straight threads	488041
Replacement Filter Kit	484923

Air-Line Respirators: Industrial

Pressure Regulator

MSA's pressure regulator is used with a plant air compressor system to reduce compressor pressure to the desired operating pressure. The regulator maintains pressure on the outlet side until readjusted for use with inlet pressure of up to 125 psig.

Pressure Regulator

Pressure Regulator

66716

Nosecups

Molded from a soft rubber compound resistant to facial oils, the nosecup helps reduce the possibility of lens fogging. The nosecup is particularly effective under conditions of high humidity and/or low temperatures by inhibiting contact of the moist exhalation with the facepiece lens. A nosecup can be easily affixed to the facepiece without tools, and any size nosecup may be installed in any size Ultravue or Ultra Elite Facepiece resulting in a customized facepiece for more comfortable use.

Nosecups for Ultra Elite Facepieces

Nosecups

	Small	Medium	Large
Ultra Elite	—	810412	810413
Ultravue	813138	813139	813140

Spectacle Kits for Full-Facepiece Respirators

For use by workers who must wear corrective lenses, the Spectacle Kit can be easily inserted into the facepiece. The kit includes a wire support, rubber guide, and pair of metal-frame

Side Support Spectacle Kit for Ultra Elite Facepiece

Center Support Spectacle Kit for Ultra Elite

spectacles. Desired adjustment is obtained by moving the spectacles in and out of the rubber guide and up and down the wire support. The Ultra Elite spectacle frame has an S-7 shape and a 48-mm lens size. The Ultravue spectacle also has an S-7 shape, but has a 44-mm lens size. Universal Bridge Corrective Lenses can be obtained from local sources. The Spectacle Kit can be used in conjunction with a nosecup. There are two kits for the Ultra Elite facepiece; one uses a side wire support, while the other uses a center support to position the unit (spectacle adjustments are similar).

Spectacle Kits

Ultra Elite Spectacle Kit (side wire support)	804638
Ultra Elite Spectacle Kit (center support)	493581
Ultravue Facepiece Spectacle Kit	454819

Cover Lens

Protects the facepiece lens from scratches during storage, handling, and use.

Cover Lens

Clear cover lens, pkg of 25	491500	456975
Smoke-tinted cover lens, pkg of 25	805456	480326

Welder's Adapter and Welder's Hood

For eye protection in welding applications where respiratory protection is required, a welder's adapter can be easily installed over a facepiece lens. The clip-on style adapter can be easily removed if needed, whereas the integral adapter model is used in place of the facepiece lens. Both models are made of polycarbonate and feature a flip-up lens with large 4 1/2-inch x 5 1/4-inch (11.4 cm x 13.3 cm) vision area.

The Kevlar Welder's Hood fits over the Welder's Adapter to protect the head, neck, and shoulders from sparks.

Welder's Accessories

Welder's Adapters come complete with cover lens, less filter plate

Clip-On Welder's Adapter for Ultra Elite Facepiece	472859
Clip-On Welder's Adapter for Ultravue Facepiece	470786
Integral Welder's Adapter for Ultra Elite Facepiece	806482

Rayfoe Filter Plate, shade 14, heat-treated	38348
Welder's Hood	486328

Support Belts

MSA PVC belts are easy to decontaminate. If decontamination is not a factor, users may opt for an uncoated nylon web belt.

Support Belts

Polyurethane-coated Nylon Support Belt, black	492827
PVC Support Belt, clear	473902
Web Support Belt (uncoated)	9961

MSA Confidence Plus® Germicidal Cleaner

Mix with warm water for a germicidal cleaner that is effective against various micro-organisms including immunodeficiency virus Type 1 (HIV-1, associated with AIDS). EPA-approved for use on safety equipment.

Cleaner

MSA Confidence Plus Germicidal Cleaner, in 32 oz. bottle	10009971
--	----------

A Pocket Guide to Air-Line Systems

This pocket-size booklet shows complete hook-ups of the various MSA air-line systems, both constant flow and pressure demand, from the air source to the respirator connection. Below each illustration, the individual parts of the system are identified by title and part number. The reader is then referred to other pages in the guide for more information about the specific MSA components. To order your copy, request Bulletin 0114-14-MC.

FireHawk M7 Air Mask

Through the NFPA, firefighters have strived to improve the durability and performance of SCBA and PASS devices.

To this end, the new NFPA 2007-edition standards for self-contained breathing apparatus and personal alert safety systems call for a PASS alarm that performs at 500° F, electronics that remain waterproof after six immersion cycles at 1½ meters depth of water and a 350°F heat exposure, and electronics that function after a rigorous 3-hour tumble test. They also raised the bar on voice communication capability, now requiring a minimum score of 85% at a 10-ft distance (allowing an electronic or mechanical system). (Previously this was 72% at 5 feet.)

MSA's new **FireHawk M7 Air Mask** represents a true technological achievement in critical personal protection. As firefighters determined the safety requirements that would be needed to meet the new NFPA 1981 and 1982–2007-edition standards, MSA's engineering teams began designing the solutions.

The new FireHawk M7 Air Mask emerged with seven **life-safety** design components built on a **modular** Air Mask platform, developed to **exceed the new NFPA 2007** requirements and provide firefighters with the highest-quality SCBA currently available.

Self-Contained Breathing Apparatus

1. TAKING THE HEAT

Although MSA PASS alarms have performed in extreme temperatures for more than a decade, a top priority was to design an alarm that could **really take the heat!** The new M7 alarm (*patent pending*) was developed in cooperation with prominent university acoustic experts, resulting in an emitter that exceeds 95 decibels with solid performance at the NFPA 500F test! Once again, giving you that lifesaving edge in the face of danger.

2. VIRTUALLY "BULLET-PROOF" ELECTRONICS

Like an armor shield, the M7 HUD, Power Module, and Control Module are encased in a proprietary high-temperature impact-grade polymer, providing the highest possible protection against impact and water ingress. -

Electronics enclosures are permanently sonically **welded** to a hermetic standard and use a high-pressure O-ring to ensure a consistent water-tight seal. The new M7 electronics are virtually "**bullet-proof**" against fire-ground hazards.

3. STRAIGHT-TALK COMMUNICATIONS

We've got you covered with communications, starting with a **high-performance mechanical speech diaphragm**, performing so well that it may likely serve as a stand-alone solution to meet the latest NFPA communications requirements! Backing the mechanical diaphragm is an **electronic amplifier** with an internal facepiece microphone for ultimate clarity, a digital signal processor to eliminate feedback even when shouting, three volume levels, and an auto-off feature after 20 minutes of no-use to save batteries. The new Air Mask speaks loud and clear when it comes to communications.

4. FIREGROUND MANAGEMENT

Firefighter accountability systems have never before been as practical, complete, and user-friendly as the **MSA M7 Accountability System**. It's based on the ICM® TxR Unit introduced in mid-2006, which has thousands of systems deployed in virtually every type of fire department, and they're performing phenomenally! It displays a full array of visual and audible information for up to 100 firefighters within a one-mile-line-of-site – exactly what incident commanders wanted. Record keeping is also made easy by downloading reports. This crown jewel is available only from MSA!

5. EXTENDED PROTECTION

The new FireHawk M7 Air Mask is not your typical SCBA. Firefighters need to be prepared for the unexpected, and emergency egress from a 2nd-floor or higher can be impossible without the right safety equipment. That's why the new M7 Air Mask offers an NFPA- compliant integrated rappelling system, called the Rescue Belt, providing firefighters with one more lifesaving option in the face of danger.

"Above and beyond" protection is also provided with the CBRN FireHawk MMR. The CBRN FireHawk includes a positive-protection Tetraplex™ shield, to prevent contact between chemical warfare agents and the most vulnerable component of regulators, their thin elastomeric diaphragm. Other "air-wash" approaches may pass in laboratory conditions. The shield provides positive protection against all potential conditions.

External hazards are bad enough without having concerns of spreading illness among firefighters through shared-use SCBA. The Ultra Elite® facepiece protects you against user cross-contamination with MSA's inhalation check-valve: a "**must have**" in modern safety equipment.

Self-Contained Breathing Apparatus

**Designed to meet the new NFPA 2007–edition standard.
Determined to exceed your
safety equipment expectations!**

6. LIGHTWEIGHT AND EASY TO USE

Firefighters already have enough weight to carry and gear to maintain, so MSA engineers set out to lighten the load of components, reduce parts counts, **simplify maintenance**, maximize user comfort, and **modularize** the design. The FireHawk M7 Air Mask has a lightweight polymer backplate, with quick-release harness straps, an error-proof cam-lock cylinder attachment, fast change-out electronic components, a large swiveling lumbar pad, and regulators that will fit in the palm of your hand (**less than 30 parts** for the MMR and 14 for the 1st stage). Our time-tested Ultra Elite facepiece has unbeatable comfort, visibility, communications, cross-contamination protection, fit, and seal.

7. PLATFORM FOR THE FUTURE

The FireHawk M7 Air Mask is designed to accept **future technology upgrades**. Included in every M7 electronics ensemble is a 2.4GHz **personal wireless network**, a network that transmits and receives encrypted information over a short-range on a firefighter's body.

This new wireless feature provides the capability to add on future technology that can provide additional information back to incident command through the FireHawk M7 Accountability System. Software can also be upgraded wirelessly in the field, through the M7 wireless network. You never have to worry about radio interference either – we have you covered with a thoroughly-tested RFI shield design that protects against all fireground radio signals. The new FireHawk M7 Air Mask provides you with the best technology today and positions you for well into the future.

FireHAWK[®] M7 Air Mask

Self-Contained Breathing Apparatus

Industrial SCBA

AirHawk® MMR Air Mask

Based on the highly successful MSA FireHawk Air Mask which sees duty in the harshest environment—firefighting—MSA's Airhawk MMR Air Mask incorporates the latest technologies available for industrial, agricultural, HazMat and HVAC work.

What sets the Airhawk SCBA apart from the rest of the field is the long list of options that let you customize the apparatus for your specific needs.

- The Advantage 4000 Facepiece that can be configured to air-purifying, supplied-air and SCBA usage via MSA's unique adapter design.
- The Airhawk SCBA is available in low-pressure (2216 psig) or high-pressure (4500 psig) versions
- Three different 30-minute rated low-pressure cylinder types—aluminum, hoop-wound or carbon-fiber—let you choose low weight or low-cost
- High-pressure Carbon Fiber-wrapped Composite cylinders are available in 30-, 45- or 60-minute rated durations
- The innovative Firehawk PTC (Push-To-Connect) Regulator easily and securely attaches to your facepiece
- The industry leading Ultra Elite® Facepiece offers the choice of three sizes in either SoftFeel® Hycar rubber or silicone
- Dual-purpose options allow the connection of an air-line. Five different quick-disconnect fittings are available
- The harness assembly is available in Nylon or flame-and-heat-resistant (FHR)Kevlar material. A chest strap, lumbar pad and shoulder pads can also be added, making this the most comfortable industrial Air Mask on the market today

Designed with the industrial user in mind, employing the latest in engineering advancements, the Airhawk MMR Air Mask will perform wherever firefighting compliance to NFPA 1981 is not required. See p. 54 for AirHawk ATO ordering information.

AirHawk® MMR Air Mask with Advantage 4000 Facepiece

Tactical Air Masks

BlackHawk® Tactical Air Mask

The BlackHawk Tactical Air Mask is especially designed for tactical situations. Certain BlackHawk features eliminate reflections and/or audible sounds that would compromise concealment—in other words, it is black, sleek and silent.

Ultra Elite® Facepiece

- All-black Ultra Elite facepiece, available in Hycar or silicone rubber
- Three sizes of facepiece with two sizes of black nose cups
- HUD System mounting bracket
- Speed-ON® Kevlar Head Harness

Mask-Mounted Regulator

- Firehawk® Regulator with Push-to-Connect feature
- Neoprene intermediate pressure hose
- Variable flow bypass system

EOSTI / Gauge

- Nightfighter Heads-Up Display functions silently as the low pressure warning device and the cylinder pressure gauge*
- System consists of a transmitter mounted on the gauge line and a receiver that mounts on the facepiece
- A series of LEDs provides the user with cylinder volume information
- LEDs function in an intermittent mode and can be refreshed by depressing the refresh button on the transmitter

* There is no audible low-pressure warning device on this unit.

See p. 54 for BlackHawk ATO ordering information.

Harness and Carrier

- Composite backplate reinforced with glass fibers
- Large side handles on the backplate for pulling the wearer to safety
- Waistbelt, shoulder straps and pull strap are all made of flame and heat-resistant (FHR) Kevlar material
- Optional FHR shoulder pads and lumbar pad (solid or swiveling)
- Optional FHR chest strap
- Adjustable Kevlar cylinder retention strap with over-center latching system
- Cylinder shroud that encompasses the cylinder and Air Mask pneumatics. Shroud is made of Advance FHR material

Cylinders

- The Blackhawk Air Mask is available in both low-pressure (2216 psi) and high-pressure (4500 psi) operating systems
- Carbon-fiber cylinders available for use are: L-30 Stealth, H-30 Stealth, H-45 Low-Profile Stealth, H-60 Stealth

Quick-Fill® System Option

- A shoulder-mounted Quick-Fill System option is offered

Workline Accessory

- For extended-use applications, an air-line accessory is available with your choice of five different types of fittings

Rescue Belt

- Emergency egress system integral to the SCBA waist belt
- Includes Kevlar line and rappelling hardware

BlackHawk® Tactical Air Mask

Carrying Case

- A hard case or soft case are offered for storage purposes

CBRN Protection

- Optional CBRN hardened facepiece and regulator assembly
- Positive protection from CBRN agents
- Same CBRN components as the very popular FireHawk Air Mask

Self-Contained Breathing Apparatus

SCBA Key Components

Facepiece Assemblies for FireHawk M7 Air Masks

Ultra Elite® Facepiece

The MSA Ultra Elite Facepiece offers an effective combination of comfort and performance.

Designed to provide exceptional peripheral and downward vision, the Ultra Elite Facepiece features a super-soft facepiece texture for a smooth and comfortable fit. It also resists chemical attack and temperature extremes, and withstands rugged day-to-day use without tearing and ripping.

The design of the Ultra Elite Facepiece is based on extensive anthropometric studies of the face-length, temple-width and chin-width data from more than 8,000 individuals. The result is a facepiece that provides improved seals against a wide range of facial contours. To provide a secure, comfortable fit, the facepiece utilizes five adjustable straps with stainless steel, field-replaceable buckles that resist chemical attack. The straps also feature slightly larger adjustment tabs that are easier to manipulate, even with gloves on.

For slip-on convenience, the Ultra Elite Facepiece can be equipped with the Speed-ON® Facepiece Harness. Made of flame- and heat-resistant Kevlar Fabric, the harness features a hair-net type, five-point suspension that can be easily and securely adjusted at each point.

Lenses on MSA full facepieces are molded from polycarbonate, and a special super hardcoating provides a tough, durable facepiece lens to resist scratching.

Firehawk® MMR

The Firehawk MMR, MSA's mask-mounted regulator assembly, is available with two different attachment systems, the Firehawk MMR truly redefines ease-of-use and ease-of-maintenance, combined with outstanding performance.

The Firehawk second-stage regulator features a unique Slide-To-Connect (STC) attachment system that allows firefighters to hang the regulator on the facepiece in the "ready position," then simply push it into the facepiece when SCBA air is needed. Doffing of the regulator, while wearing gloves, is also easy with two large release buttons that automatically turn-off the flow of air as the regulator is doffed. A dual-swivel feature on the pressure hose provides maximum freedom-of-head movement and the silicone hose material ensures hose flexibility even at very cold temperatures.

In addition to the STC system, MSA also offers a second connection option for the Firehawk Regulator, the Push-to-Connect (PTC). The PTC's

Ultra Elite Facepiece

Adapter self-centers the Firehawk regulator and the loud dual sound of the regulator engaging onto the facepiece provides you with confidence that the Firehawk PTC is securely attached to your facepiece—an action that takes just seconds, when seconds count!

Maintenance is also a breeze, considering the Firehawk design requires no tools, adhesives, or sealants, and has approximately 70% fewer parts as compared to other regulators on the market. Additionally, there are no internal adjustments required. Any adjustments to the regulator may be accomplished at a single adjustment point through the outlet port of the regulator.

Ease of use and maintenance, combined with outstanding performance, makes the Firehawk MMR clearly the product of choice.

Heads-Up Display (HUD)

When you open your Air Mask's cylinder valve, the HUD automatically activates, displaying the cylinder pressure reading in 25% increments.

ClearCommand Communications System

MSA's ClearCommand Communications System is designed specifically to meet the modern communications needs of firefighters. It features an internally mounted microphone coupled with a large-diameter (50mm) amplifier speaker for optimal clarity and volume. Using a proprietary circuit design, the system delivers more than twice the volume of a facepiece alone. Mounted in an "out-of-the-way" position, the ClearCommand System doesn't block vision or mechanical communication. The Ultra Elite's mechanical voicemitter is still fully functional, even with the system installed.

Ultra Elite M7 Facepiece, Speed-ON Head Harness, Nosecup and M7 HUD Bracket

Self-Contained Breathing Apparatus

Emergency Egress System

Rescue Belt

In a continuation of MSA's pursuit of firefighter safety, the Rescue Belt is being introduced to the fire service. This is an NFPA-compliant emergency egress system that is unique to MSA. The belt can be integrated into the carrier and harness assembly of the MSA Vulcan or Airframe Carrier and Harness assemblies. A 50 foot or 75 foot Kevlar line with a descender and carabiner is weaved into the belt to allow a trapped fire fighter to escape to either the ground or to a floor below the fire.

The belt is available in three lengths, standard (56 inches), mid-size (66 inches) and long (76 inches).

Rescue Belt

10052766	50' Standard Rescue Belt
10071003	50' Mid-Size Rescue Belt
10052767	50' Long Rescue Belt
10052768	75' Standard Rescue Belt
10071004	75' Mid-Size Rescue Belt
10052769	75' Long Rescue Belt

Carrier & Harness Assembly

FireHawk M7 Carrier and Harness Assembly

The one component of any SCBA that has the most impact on firefighter comfort is the carrier and harness assembly. MSA is introducing a new carrier and harness assembly that places an emphasis on firefighter comfort while maintaining the robustness and reliability that is expected in the fire service. The carrier and harness comes standard with large side handles and a central attachment point for pulling firefighters to safety in rescue scenarios. The swiveling lumbar pad provides maximum freedom of movement and comfort when crawling or climbing.

The assembly utilizes the proven pieces from previous generations of Air Masks such as the tunneled shoulder straps for hose containment, and tri-bar slides for easy removal/installation of the waist belt and shoulder straps.

All units are equipped with double-pull waist belts and an optional chest strap is available.

Cylinders

Carbon-Wrapped Cylinders

Carbon-wrapped Cylinders are the lightest SCBA air cylinders ever developed by MSA. They feature a unique outerwrap made of lightweight, high-performance carbon fibers, which reduces cylinder weight by two to six pounds when compared to fiberglass-wrapped cylinders and as much as ten pounds when compared to aluminum cylinders. They are available in five models to accommodate a wide range of applications.

Cylinders for SCBA

Part No.	Cylinder Type (Cylinder & Valve)	NIOSH Service Rating Life	Pressure	Weight* (empty)
807586	L-30	30'	2216 psig	7 lb – 9 oz.
816115	L-30+	30'	3000 psig	9 lb – 14 oz.

807588	H-60	60'	4500 psig	12 lb – 11 oz.

*All weights shown are approximate figures.

For more information see Bulletin 0108-11-MC. See Bulletin 0108-13-MC for information on Custom-Logoed cylinders for your MSA Air Mask.

MSA Accountability System

Accountability is key to every firefighter's safety on a fire scene. MSA's new optional Accountability System revolutionizes fireground safety by combining the latest computer software with a high-performance radio module and the field-proven technology of MSA's ICM TxR Integrated PASS.

A new way to monitor vital information

- Each MSA base station can monitor up to 50 firefighters, and you can use multiple base stations on a single computer.
- The FireHawk M7 Air Mask with telemetry transmits to incident command the firefighter's name, team assignment, cylinder pressure, service-time remaining, PASS alarms (motion or manual), thermal alarms, battery status, radio connectivity, and evacuation acknowledgement.

A fireground management system

- Personalized ID tags for each firefighter tell incident command exactly who is on scene.
- An integrated PAR (personnel accountability report) timer helps manage radio calls to each team.
- Incident command can manually add firefighters who are not wearing an SCBA or mutual aid firefighters, so all personnel can be accounted for.

Intuitive and easy to use

- Assign firefighters to teams by clicking on a firefighter's icon and dragging it to another team.
- A volume of critical information is available at a glance of the screen, due to the large number of firefighters that can be displayed and the pictorial format of the information.
- Receive both audible and visual indications of critical events such as PASS alarms or low-pressure alarms.

A two-way evacuation feature

- Incident command is assured that firefighters receive all evacuation messages. When incident command transmits the alarm through the FireHawk M7 Air Mask, they'll know the firefighter received it, because the unit automatically sends a confirmation message to the base station.
- By simply pressing a button on his/her own control module, a firefighter can send a manual confirmation to acknowledge that they have received and understand the critically important evacuation message.
- Firefighters will hear the evacuation alarm on their own personal PASS device. Also, visual indications in the HUD and an icon on the control module will alert the firefighter that it is time to evacuate.
- An individual firefighter, a team of firefighters, or all firefighters can be evacuated with the click of a button.
- Although certain concrete and steel commercial structures can challenge any radio signal, MSA's Accountability System coverage with radio technology provides highly reliable performance for a 1-mile line-of-sight range.
- Due to the spread-spectrum design, it does not interfere with other high-band radio frequency equipment.
- For additional safety, both base station and firefighter modules have an icon message to inform users if a firefighter falls out of radio signal range, so that alternate accountability measures, such as voice radio contact with teammates, can be taken.

Accountability System

MSA's new M7 Accountability System revolutionizes fireground safety by combining the latest computer software with a high-performance radio module and the field-proven technology of MSA's ICM TxR Integrated PASS.

Self-Contained Breathing Apparatus

Emergency Breathing Systems

The Quick-Fill® System

The patented Quick-Fill System lets MSA Air Mask users refill and transfill air cylinders while the SCBA is worn, without removing the air cylinder—even in IDLH atmospheres. Use this MSA-exclusive option to:

- Fill an SCBA cylinder from a mobile compressor or cascade system in less than a minute.
- Transfill between two cylinders, providing an Emergency Breathing System.
- Extend the air supply over longer durations, using a remote compressed-air source.

Because performance is not affected, MSA Air Masks retain NIOSH certification during use of the Quick-Fill System.

Air Masks compliant to recent NFPA standard have the Quick-Fill URC fitting located at the Audi-Larm warning device. A Quick-Fill hose with a quick-disconnect connects the air source to the adapter for air transfer. See Bulletin 0105-92-MC for a Question & Answer overview of Quick-Fill Systems.

The Quick-Fill System

Replacement Parts for the Quick-Fill System

485366	EBS hose package, includes 3-foot emergency transfill hose in Kevlar pouch
485331	Emergency transfill hose, less Kevlar pouch
485390	Kevlar pouch
485391	Male stainless steel quick-disconnect with SAE-10 thread, complete with dust cover (also for use as a fitting for customized refilling systems)
485392	Female quick-disconnect with SAE-4 thread, complete with dust cover

Quick-Fill Hoses

25-ft lengths are stocked; other "custom lengths" are available on a special material basis. All SAE Fittings are for high-pressure service. Female quick-disconnect fittings have dust covers.

RescueAire™ II Portable Air-Supply System

The RescueAire II Portable Air Supply System is designed to meet the needs of Rapid Intervention Teams (RITs). The system consists of a lightweight Carbon-Wrapped cylinder, Quick-Fill® emergency breathing system, ExtendAire™ emergency breathing system, and an MMR regulator, supported by a flame- and heat-resistant harness. The RescueAire is a complete system that can provide emergency breathing air for most any victim.

The RescueAire II System is available in both low-pressure (2216 psig) and high-pressure (4500 psig) versions. An optional-use shoulder strap is also provided for hands-free carrying.

How to Order SCBA: Get the Exact Model You Need

The Assemble-To-Order System

MSA's Assemble-To-Order System (ATO) will make ordering the right mask easier and faster than ever. Instead of choosing from a handful of complete Air Mask assemblies, users can order a custom-made Air Mask with every option exactly as desired. Contact MSA Customer Service Center for details.

Self-Contained Breathing Apparatus

ClearCommand® HCS Helmet Communication System

The Helmet Communication System from MSA is a state-of-the-art radio interface device which significantly improves the user's ability to receive and send messages even in loud ambient-noise environments. It goes wherever you go. The system consists of a helmet-mounted microphone and ear speaker assembly that weighs 5.3 ounces and easily snaps onto the user's fire helmet or industrial-style helmet's ratchet suspension. The helmet mic/ear speaker assembly connects to a lapel microphone or optional stand-alone PTT (push-to-talk) unit. The lapel microphone and PTT are permanently fitted with a connector for attachment to the specific radio of choice. The Helmet Communication System also offers a plug-in truck communication adapter that can be used by firefighters, along with their helmet microphone assembly, on the way to a fire scene or other incident. Once the firefighter arrives at the scene, the truck system cable is unplugged from the helmet microphone, and the helmet microphone cable end is connected to the user's lapel mic or PTT.

The user of the Helmet Communication System has uninterrupted communication from the time the alarm sounds until the incident is over.

For more complete information, see Bulletin 3639-01-MC.

Features & Benefits

- Incorporates a "noise-eliminating" bone-conduction voice transmitter that virtually eliminates high ambient noise levels.
- Custom user-fitted ear speaker brings all incoming communication directly to the user's ear. No need to lift your lapel mic up to your ear to hear transmission.
- Easily snaps onto the ratchet suspension of fire helmets or industrial-style helmets. The unit can be easily transferred to other users, and no tools are required for removal.
- Can be used over the top of facepiece head harnesses, hoods and liners without losing the quality of the transmission.
- The bone-conduction microphone is made of soft silicone material, which makes it comfortable to wear, with no pressure points.
- The helmet microphone assembly can be reversed on the helmet suspension to position the ear speaker on either ear.
- The helmet mic system, when used with the lapel mic or PTT, is powered by the battery from the radio. No need to replace or re-charge dry cells.
- Special connectors suitable for most common radios are available for the lapel microphone and PTT, which allows users to adapt the system to their existing radios.
- The helmet mic is NFPA-certified which allows its use while fighting fires.
- Intrinsic safety approvals allow the use of the Helmet Communication System in hazardous environments.
- The stand-alone PTT unit is designed for use under hazardous material suits. The large button makes it easy for the user to depress and communicate.
- The helmet mic incorporates a cable keeper which allows for storage of the cable when it's not connected to the lapel mic or PTT.

Self-Contained Breathing Apparatus

ClearCommand® Communications System for Ultra Elite® Facepieces

MSA's ClearCommand Communications System is designed specifically to meet the modern communications needs of firefighters.

Because it's available in two versions, amplifier and amplifier with radio interface, firefighting teams can be properly fitted for the job at hand. Also, the systems are designed for "shared-use" of the amplifier with a unique "bus-bar" arrangement, so individual issue is not required.

The ClearCommand systems feature an internally mounted microphone coupled with a large-diameter (50mm) amplifier speaker for optimal clarity and volume. Using a proprietary circuit design, the system delivers more than twice the volume of a facepiece alone. Mounted in an "out-of-the-way" position, the ClearCommand System doesn't block vision or mechanical communication. The Ultra Elite's mechanical voicemitter is still fully functional, even with the system installed.

The radio interface version features the same amplifier as the amp-only version, combined with an ear-speaker for incoming radio messages and a lapel mic assembly for interface with over 100 radios. The lapel mic can be used as a component of the ClearCommand system or as a stand-alone hand mic.

Both the amplifier and radio interface models are intrinsically safe, and meet the applicable requirements of NIOSH and NFPA 1981, 2002 edition.

Field Maintenance and Repair

MSA offers a complete program for maintenance and repair of MSA Air Masks.

The program is supported with personalized training tailored to customers' needs and taught in the field by

MSA-authorized personnel.

User maintenance covers procedures necessary to conduct general cleaning, inspection, and limited maintenance in accordance with the Occupational Safety and Health Administration (OSHA), National Fire Protection Association (NFPA), and the American National Standards Institute (ANSI) standards.

C.A.R.E. Certified Air Mask Repair Education covers all maintenance for both low- and high-pressure SCBA. Air Mask inspection and maintenance can be performed by MSA or a factory-authorized service center. Or, individuals can obtain training for C.A.R.E. certification from MSA. By having a C.A.R.E.-certified technician on staff, fire departments and other facilities with a large number of Air Masks can perform all inspection and maintenance in-house.

- All repairs and maintenance can be done in the field.
- A selection of overhaul kits, spare parts, and tool kits is available.
- Users may conduct periodic performance testing using an authorized MSA regulator tester.

SCBA Accessories

APR Adapter

MSA's APR adapter provides firefighters with the versatility they need to perform all tasks at the fire ground with one common facepiece. From fire-fighting to overhaul to homeland security, firefighters can switch from a positive-pressure facepiece to a negative-pressure air-purifying respirator simply by engaging the APR Adapter. The APR Adapter uses MSA's comprehensive family line of air-purifying cartridges; select from the Advantage cartridges or our CBA/RCA canisters to protect against a multitude of airborne contaminants.

The APR Adapter is designed for use in non-IDLH environments and is NIOSH-approved. Contact MSA for more information.

Spectacle Kit for Full-Facepiece Respirators

For use by workers who must wear corrective lenses, the Spectacle Kit can be easily inserted into the facepiece. The kit includes a wire support, rubber guide, and pair of metal-frame spectacles. There are two kits for the Ultra Elite facepiece; one uses a side wire support to hold the lenses in the facepiece, while the other uses a center support to position the unit. Desired adjustment is obtained by moving the spectacles in and out of the rubber guide and up and down the wire support. One size of spectacle frame is used (S-7 shape, 48-mm lens size) with Universal Bridge Corrective Lenses that can be obtained from local sources. The Spectacle Kit can be used with a nosecup.

Side-Support Spectacle Kit for Ultra Elite® Facepiece

Center-Support Spectacle Kit for Ultra Elite® Facepiece

Nosecups

Molded from a soft rubber compound that is resistant to facial oils, the optional nosecup helps reduce the possibility of lens fogging. The nosecup is particularly effective under conditions of high humidity and/or low temperatures by inhibiting contact of moist exhaled air with the facepiece lens. A nosecup can be easily affixed to the facepiece without tools. Any size nosecup may be installed in any size Ultra Elite Facepiece for a customized, more comfortable fit.

High-Pressure Filling Hose

Provides a convenient means to connect and charge high-pressure air into a high-pressure 4500 psig cylinder.

Shop Online for MSA Gear

MSA FireSlayer and Be Ready promotional items are available to anyone via MSA's Internet site. Sporting appropriate logos are shirts, duffels, caps, golf items, mugs, money clips, lighters and more. The Fireslayer logo helps promote our products to the fire-fighting market, while the Be Ready logo is aimed at Homeland Security. Look for the "MSA Gear" link in the Resources & Info area after selecting MSA North America; MSA United States from the MSA homepage at MSA.net.com.

After making your selections, complete the shipping information and furnish a credit card number. Your order will be processed, and you should receive it within a week. Express service is also available.

Fire Service Helmets

Cairns® Fire Helmets: Quality Craftsmanship Since 1836

Since 1836, Cairns has been the original manufacturer of leather firefighting helmets. Today, Cairns leather helmets retain the same authentic look and quality that generation after generation of firefighters have relied upon. And now, these helmets are also made with the added protection necessary for today's standards of safety in the firefighting industry.

Cairns also applies the same tradition of excellence to its newer lines of firefighting helmets. Both traditional and modern designs feature the very best in contemporary high-tech materials, such as

lightweight but durable fiberglass/Kevlar composites. The versatile Structural Helmet is made of tough high-temperature thermoplastic.

All helmets are available with many options, depending on the specific helmet model, such as a choice of colors, brim size, chinstraps, liner material, etc. Also, a variety of accessories is available to complement Cairns fire helmets. Faceshields, goggles, ear/neck protection, and fronts can all be selected to configure the exact helmet you need.

Leather Helmets

The original leather helmet, individually hand-crafted to meet today's OSHA and NFPA standards with over 165 years of dependable performance.

Leather Helmet Features & Benefits

- Hand-crafted, 100% leather shell.
- Insurance against fireground damage with Cairns' 5-year shell replacement warranty.
- Non-corroding, high-temperature, glass-filled polymer faceshield/goggle hardware.
- Faceshield wing protectors for extra faceshield reinforcement.
- Nomex chinstrap with one-hand quick release buckle and postman slide allows quick and easy adjustment.
- Choice of Nomex or PBI/Kevlar earlap for increased neck/ear coverage and protection.
- High-temperature foam cap increases thermal and impact protection.

- High-temperature impact cap liner resists distortion at high temperatures.
- Comfortable fit for all head sizes between 6-3/8 inches and 8-3/8 inches.
- Large diameter helmet hanger fits on larger hooks and racks.

*N5A New Yorker
(OSHA approved)*

*N6A Houston
(NFPA approved)*

For ordering information, replacement parts and accessories, see the 2007 Fire Helmets Catalog (Bulletin 3600-01-MC) or contact your MSA Fire Service Distributor.

Traditional Helmets

Traditional style combined with high-tech performance.

Traditional Helmet Features & Benefits

- Market-leading 5-year shell replacement warranty.
- Non-corroding, high-temperature-resistant, faceshield/goggle hardware.
- Rugged, high-temperature edge will not melt or drip.
- Easy front headband adjustment for proper SCBA mask fit.
- Simple rear ratchet height adjustment to fit all head sizes.
- Headband fits a wide variety of head sizes.
- Durable helmet hanger fits on large hooks and resists bending.
- Minimal parts for lower service cost and easier maintenance.
- Exclusive shell release system for an extra margin of safety (except 880).
- Unique tube-lock system absorbs the shock of an impact.

Classic™ 1000

Cairns® 10144

Cairns® 1010

880 Tradition

For ordering information, replacement parts and accessories, see the 2007 Fire Helmets Catalog (Bulletin 3600-01-MC) or contact your MSA Fire Service Distributor.

Defender® Visor for Cairns 1010 and 1044 Helmets

The new Defender® Visor for MSA Cairns 1010 and 1044 Traditional Helmets offers eye protection from dust, dirt, and grit. Sleek and attractive construction allows fast, easy raising and lowering of your visor even with gloved hands. This visor's exclusive integral design is retractable for the ultimate in compact convenience. Standard clear and amber Tuffshield visor options are NFPA-compliant.

New Cairns 1010 and 1044 helmet assemblies incorporating the Defender Visor may be ordered through the Traditional Helmets Assemble-To-Order Matrix. A user-installable upgrade kit (includes new impact cap)

lets you install the Defender Visor in existing Cairns 1010 or 1044 Helmets yourself.

If you're in the market for a new Cairns 1010 or 1044 Helmet or if you've thought about replacing your existing impact cap, consider the streamlined advantage of the new NFPA-compliant MSA Defender Visor. Cairns 1010 and 1044 Traditional Helmets offer the perfect combination of durability and performance in a lightweight, high-performance design. Cairns HELMETS once again has incorporated the latest technological advances that firefighters come to expect from the leader.

New!

Standard 1010 Defender Configurations

1010DS	Includes Standard Flannel Cushion Liner, Yellow Nomex Earlap, Silk-Screened 6" Eagle Front Holder and Clear Defender Visor
1010DD	Includes Leather Cushion Liner, Flannel Crown Pad, PBI/Kevlar Earlap, Carved 6" Eagle Front Holder and Clear Defender Visor
1010TS	Includes Standard Flannel Cushion Liner, Yellow Nomex Earlap, Silk-Screened 6" Eagle Front Holder and Tuffshield Defender Visor
1010TD	Includes Leather Cushion Liner, Flannel Crown Pad, PBI/Kevlar Earlap, Carved 6" Eagle Front Holder and Tuffshield Defender Visor

Standard 1044 Defender Configurations

1044DS	Includes Standard Flannel Cushion Liner, Yellow Nomex Earlap, Silk-Screened 6" Eagle Front Holder and Clear Defender Visor
1044DD	Includes Leather Cushion Liner, Flannel Crown Pad, PBI/Kevlar Earlap, Carved 6" Eagle Front Holder and Clear Defender Visor
1044TS	Includes Standard Flannel Cushion Liner, Yellow Nomex Earlap, Silk-Screened 6" Eagle Front Holder and Tuffshield Defender Visor
1044TD	Includes Leather Cushion Liner, Flannel Crown Pad, PBI/Kevlar Earlap, Carved 6" Eagle Front Holder and Tuffshield Defender Visor

Features and Benefits

- Available on both the Cairns 1010 and Cairns 1044 Fire Helmets
- Retractable eyewear system that's ready when you need it
- Available with a new helmet or as user-upgrade kit
- Quick-disconnect for fast lens change-out without the use of tools
- Never lose or misplace your goggles again
- Optically correct lens eliminates peripheral distortion

Modern Helmets

Different models for applications such as structural firefighting, EMS/rescue and wildland firefighting.

Modern Helmet Features & Benefits

- Market-leading 5-year shell replacement warranty.
- Non-corroding, high-temperature-resistant, faceshield/goggle hardware.
- Rugged, high-temperature edge will not melt or drip.
- Easy front headband adjustment for proper SCBA mask fit.
- Simple rear ratchet height adjustment to fit all head sizes.
- Headband (6 3/8 to 8 3/8) fits a wide variety of head sizes.
- Durable helmet hanger fits on large hooks and resists bending.
- Minimal parts for lower service cost and easier maintenance.
- Exclusive shell release system for an extra margin of safety (except 360S and HP3).
- Unique tube-lock system absorbs the shock of an impact (except 360S).

Standard Fronts

Made with your choice of high-gloss patent leather or dull-finish genuine leather reinforced with a high-temperature, shrink-resistant back layer and sewn with high-temperature, fire-retardant Nomex thread.

The Choice Is Yours!

Standard fronts offer over 27 million possible configurations! Design your own standard front by choosing from the options and then indicating your preferences by calling 1-877-MSA-FIRE to place your order.

Crash Fire Rescue (CFR) Proximity System

- Easy to don and doff, this CFR System is compliant with NFPA 1976–2000.
- Designed and approved for use with the Metro 660C, Invader 664, Cairns 1010 and Cairns 1044 Fire Helmets, it will not interfere with the SCBA while in use.
- Components consist of an aluminized PBI/Kevlar layer, vapor barrier and inner layer.

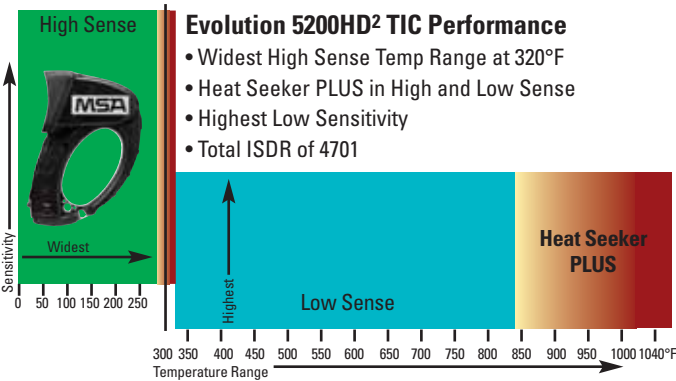

Evolution® Thermal Imaging Cameras (TICs)

Comparison of Fire Service TIC Performance*

High and Low Sensitivity

Most TICs generate thermal images in either High Sense or Low Sense modes, depending on the temperature of the scene. High Sense mode delivers the best image quality – but has a limited temperature range. Low Sense mode trades image quality for a wider temp range to keep the TIC working in high heat.

Durability: MSA designs, manufactures and tests to existing standards that include:

- Water/Dust IngressInternational Standard CEI, IEC 529, IP 67 Classification
- Direct Flame/Heat ExposureSimulated NFPA 1981-2002 Edition, NFPA 1982-1998
- VibrationEdition MIL-STD-810E Category 1 Loose Cargo
- Radio Frequency InterferenceTransport CE/EN50081-2:1992, EN 50082-2:1992, FCC
- Rollover (Truck Charger)Part 15 Simulated NFPA 1901-12, 1.7

* For additional information on TIC performance, see MSA's series of *Emergency Responder Thermal Imaging Magazines*, Bulletins 3400-55, 3400-56, 3400-57 and 3400-58.

Evolution 5200 TIC Performance

Only MSA delivers High Sense image quality up to 320°F, the range that 80% of the time matches the temperature range in most structural fires. In addition, only MSA delivers increased sensitivity in Low Sense mode with better high temperature image quality. The shaded color in both High and Low Sense indicates the Evolution 5200's Heat Seeker PLUS.

Evolution 5200HD² TIC Performance

Most TICs sacrifice high-sense imagery to make sure they perform in higher temperatures. With the widest range of high sense mode and the highest sensitivity in low sense mode, the Evolution 5200HD² gives you both high quality imagery and wide temperature ranges—there's no sacrifice, just performance! The Heat Seeker PLUS provides image detail shading.

Evolution 5600 TIC Performance

The Evolution 5600 TIC offers the widest high sense operating range of any Fire Service TIC in high heat conditions. The Heat Seeker indicator allows the user to easily locate hot spots and the seat of the fire, and is effective in High and Low Sensitivity. In fact, this TIC has the highest SENSITIVITY in Low Sensitivity mode of any fire service TIC, which extends the dynamic range for better image distinction at higher scene temperatures. The Evolution 5600 TIC's indigo 120 x 120 vanadium oxide microbolometer provides excellent image quality in a small format TIC.

Competitive Performance

The limited High Sense temperature range on competitive TICs means that better image quality is lost sooner. Low Sense then becomes the standard operating mode, using only a fraction of the total available sensitivity. In addition, competitive TICs lack Heat Seeking color in High Sense mode, an important tool to determine the presence and direction of the fire.

Low Cost – High Value

As Fire Service TICs become more affordable, MSA again takes the lead by adding new features and increasing performance—while lowering both initial and lifetime costs. Only MSA offers a 2-year sensor warranty—twice the coverage of competitive TICs! The increased value of MSA TICs is realized through expanded TIC uses, time saved and SAFETY—every day!

Also – Only From MSA:

- Instant On
- Warnings on all Shut Downs
- Temp Bar and Digital Temp
- Instant Mode Switching
- Shutter Indicator
- 15% Low Sense Activation

Thermal Imaging

Evolution® 5200 TIC

It's an Evolution – and It's All About SAFETY!

Introducing the new Evolution 5200 Fire Service Thermal Imaging Camera – with Next Generation Performance and New Exclusive Features available only from MSA!

High Performance Safety

- 320°F High Sense Mode Range – gives high image definition over the widest temperature range of any Fire Service TIC
- Twice the Low Sensitivity in the 320° to +1000°F range, compared to all other Fire Service TICs – for great imaging!

It all adds up to the highest **ISDR*** of any Fire Service TIC – with clearer, sharper, more detailed images over the entire temp range.

***I**ntermediate **S**cene **D**ynamic **R**ange is the combined value of a sensor's sensitivity and temperature range to determine the number of temperature differences that can be seen at any given instant.

Evolution 5200 TIC Configurations

10063768	Evolution 5200 TIC with 110-220V charger and one battery
10063767	Evolution 5200 TIC with 110-220V charger, Quick-Temp, Heat Seeker, 2 batteries, wrist strap, carrying case and reflective trim kit
10063766	Evolution 5200 TIC with truck-mounted charger, Quick-Temp, Heat Seeker, 2 batteries and wrist strap
10063765	Evolution 5200 TIC with 110-220V charger, Quick-Temp, Heat Seeker, 2 batteries, Retractable Lanyard, carrying case and reflective trim kit

Assemble-to-Order (ATO) System: You Make the Choices

The ATO System makes it easy to “custom order” the Evolution 5200 TIC, configured exactly the way you want it. See Bulletin 3400-50-MC for more information.

Features	Benefits
Widest High Sense Operating Range on any Fire Service TIC conditions	Provides better performance in high heat.
Highest Low Sensitivity Mode of any Fire Service TIC	Extends the dynamic range for better image distinction at higher scene temperatures.
Quick-Temp Temperature Measurement	Gives users a digital temperature measurement along with a temperature scale measurement to determine advancing heat.
Heat Seeker PLUS Indicator	Allows the user to easily locate hot spots and the seat of the fire. Effective in High and Low Sensitivity.
New Internal Mounting Foam	60% increase in heat tolerance. Protects system electronics from rough handling. Insulates sensor and electronics.
Microbolometer technology (vanadium oxide)	Extremely sharp image.
3-1/2-inch display	Team of users gets full view of the action.
Revolutionary ergonomic design	Easy handling and integration.
Reflective ID label kit	Allows user to personalize the TIC to a specific station/department with a choice of different color labels.
Unique high-impact bumper protection system	Drop protection from any angle—outstanding durability.

Evolution® 5200HD2 TIC

New!

Assemble-to-Order (ATO) System: You Make the Choices

The ATO System makes it easy to “custom order” the Evolution 5200HD2 TIC, configured exactly the way you want it. See Bulletin 3400-50-MC for more information.

Proven handheld thermal imaging camera with a high ISDR* for the Fire Service. Best-in-class image quality provides clearer, sharper, larger, more detailed images in all temperatures. With nominal image resolution of 80,000 pixels; 4 times the picture elements of other TICs; 38µ pixel pitch; 3.5” display. Optional 2X digital zoom, Heat Seeker, and Quick Temp features.

- Gives you the best unparalleled image in firefighting
- Shows the highest image definition over the widest temperature range of any Fire Service TIC
- Offers optional highly functional 2X Digital Zoom for enhanced picture imagery in Fire Service applications like search and rescue
- Combines today's most advanced technology with a comfortable, time-proven, easy-to-use design

Evolution® 5600 TIC

MSA thermal imaging cameras are used by many of North America's largest fire departments. For big city performance with value-driven features, choose MSA's Evolution 5600 Thermal Imaging Camera with high resolution and detailed image quality. This versatile TIC provides detailed images (with a focal plane array of 120 x 120, nominal 15,000 pixels) over a wide temperature range, in addition to safety and other exclusive offerings of MSA's Evolution Series cameras.

MSA's highly functional Heat Seeker and Quick Temp functions deliver unmatched performance and superior image quality at all temperatures, employing an easy-to-use, time-tested design. User-friendly features and enhanced TIC performance help to maintain low lifetime costs. Most TICs trade image quality for a wider temperature range to keep the camera operating in high heat environments. However, the Evolution 5600 TIC provides refined image quality over comparable competitive TICs in Low Sensitivity mode.

Only MSA thermal imaging cameras deliver High Sense image quality at up to 320° F, the temperature range that most often matches that of structural fires.

In addition, only MSA offers Heat Seeker color images in both High and Low Sense modes. The affordable Evolution 5600 TIC offers high and low sensitivity, lightweight ergonomic design, Quick-Temp feature, and provides excellent image detail over a wide temperature range.

- Heat Seeker (provides colorization for hot objects)
- Instant on
- Instant mode switching
- Warnings on all shutdowns
- Shutter indicator
- Temperature bar and digital temperature

Thermal Imaging

Evolution® 5000 Series Video Capture System

Principles of Operation

MSA's Video Capture is a video recording system for Evolution 5000 Series Thermal Imaging Cameras. It offers fast and simple video recording of the original screen for documentation and training purposes. The small and easy-to-use stand-alone unit can be mounted and removed on any Evolution 5000 Series Thermal Imaging Camera within seconds. A new camera is not required to use this feature.

The system conveniently uses a standard flash memory card [RS-MMC]. With a card reader, the video clips can be downloaded to a computer, stored, viewed and followed up for documentation. The system offers up to 2 hours recording capability, providing a complete overview of the environment and incident in which the camera was used.

The Video Capture System features the same housing as the Evolution Transmitter, offering the same high durability, as well as the same lithium ion rechargeable battery and charger used in the whole Evolution 5000 Series of Thermal Imaging Cameras.

Product Information

The Video Capture System (VCS) records the complete scene that the TIC sees. The system is capable of recording up to two hours of video, virtually eliminating the risk of a user missing critical information. The VCS is ideal for training and documentation purposes. A standard card reader stores the information and simply connects to a PC/laptop to download the recorded video. Still pictures can be captured from the video footage using available software programs like "Print Screen."

Evolution 5000 Series Video Capture System

10071750	Video Capture Kit, complete with Video recorder, RS-MMC 512MB Storage Card, Card Reader, Instruction Manual, Battery and Carrying Case
10069792	RS-MMC Memory Card (512MB)

Remote Wireless Video Transmission

MSA's Remote Wireless Video Transmission Systems are modular high-performance systems which allow transmission of video signals from the Evolution TICs to fully contained receiving stations.

State-of-the-art 2.4 GHz technology and electronic and imaging components ensure that the Remote Wireless Video Transmission System provides optimum performance for the firefighter. The systems operate at one of two user-selectable frequencies and have been integrally designed to allow for maximum user flexibility.

Remote Wireless Video Transmission

10048135	Deluxe Receiver Kit – Includes receiving station and integrated 12" display, magnetic-mounted omni-directional antenna, wall-type and cigarette lighter power supplies, and BNC to RCA adapters in a hard-sided Pelican case
10048134	Mini Receiver Kit – Includes receiver, magnetic-mounted omni-directional antenna, wall-type and cigarette lighter power supplies, connection cable for external monitor, and BNC to RCA adapters in a soft-sided, easily transported case
10019650	Optional High Gain directional antenna with tripod mount
10020290	10-ft video BNC cable
10047573	Evolution 5000 External Transmitter

Thermal Imaging is a valuable tool for the fire service, but should not be relied upon as a sole means of navigation and should not be used in place of standard firefighting practices. It is recommended that you obtain specialized fireground training prior to using any TIC in an actual fire or emergency situation. Training can be obtained through local or state fire training academies, several private training entities, or fire service distributors.

Instrumentation

Understanding Environmental Surveillance

Battery-powered, direct-reading instruments are classified as two groups—single-gas instruments or multiple-gas instruments—typically monitoring one or a combination of the following atmospheric conditions:

1. oxygen deficiency or enrichment;
2. the presence of combustible gas; and
3. the presence of certain toxic gases.

Depending on the capabilities of the instrument, monitoring can be conducted simultaneously for oxygen and combustible gas, or for oxygen, combustible gas and toxic gases. These devices are commonly referred to as 2-in-1, 3-in-1, 4-in-1 or 5-in-1 alarms.

No matter which type of instrument is used to check environmental gas concentrations, regular monitoring should be performed because a contaminant's level of combustibility or toxicity might increase even if it initially appears to be low or non-existent. In addition, oxygen deficiency can occur unexpectedly.

Atmospheric Composition

To determine the composition of an atmosphere, reliable instruments should be used to draw air samples. If possible, do not open the entry portal to the confined space before this step has been completed. Sudden changes in atmospheric composition within the confined space could cause violent reactions, or dilute the contaminants in the confined space, giving a false low initial gas concentration.

When testing permit-required spaces for acceptable entry conditions, always test in the following order:

1. oxygen content
2. flammable gases and vapors
3. potential toxic air contaminants

Figure 1

Comprehensive testing should be conducted in various locations within the work area. Some gases are heavier than air, and tend to collect at the bottom of a confined space. Others are lighter, and are usually in higher concentrations near the top of the confined space. Still others are the same molecular weight as air, so they can be found in varying concentrations throughout the space. This is why test samples should be drawn at the top, middle and bottom of the space to pinpoint varying concentrations of gases or vapors (see **Figure 1**). The results of the

atmospheric testing will have a direct impact on the selection of protective equipment necessary for the tasks in the area. It may also dictate the duration of worker exposure to the environment of the space, or whether an entry will be made at all. Substance-specific detectors should be used whenever actual contaminants have been identified.

Figure 2

Figure 3

Combustible Gases

In order for combustion to occur, there must be three elements:

1. fuel
2. oxygen to support combustion
3. heat or a source of ignition

This is known as the fire triangle, but if you remove any one of the legs, combustion will not occur (see **Figure 2**).

The percentage of combustible gas in the air is important, too. For example, a manhole filled with fresh air is gradually filled by a leak of combustible gas such as methane or natural gas, mixing with the fresh air. As the ratio of gas to air changes, the sample passes through three ranges: lean, explosive and rich (see **Figure 3**). In the lean range, there isn't enough gas in the air to burn. On the other hand, the rich range has too much gas and not enough air. However, the explosive range has just the right combination of gas and air to form an explosive mixture. Care must be taken, however, when a mixture is too rich, because dilution with fresh air could bring the mixture into the flammable or explosive range. An analogy is the automobile that won't start on a cold morning (a lean atmosphere because the liquid gasoline has not vaporized sufficiently), but can be flooded with too much gasoline (a rich atmosphere with too much vaporization). Eventually, when the right mixture of gas and air finally exists (explosive), the car starts.

How Combustible Gas Monitors Work

To understand how portable combustible gas detection instruments work, it is first important to understand what is meant by the Lower Explosive Limit (LEL) and Upper Explosive Limit (UEL). When certain proportions of combustible vapors are mixed with air and a source of ignition is present, an explosion can occur. The range of concentrations over which this reaction can occur is called the explosive range. This range includes all concentrations in which a flash will occur or a flame will travel if the mixture is ignited (see **Figure 3**). The lowest percentage at which this can happen is the LEL; the highest percentage is the UEL.

Most combustible instruments display gas concentrations as a percentage of the LEL. Some models have gas readouts as a percentage by volume and others display both percent of LEL and percent combustible gas by volume. What's the difference? For example, the LEL of methane (the major component in natural gas) is 5 percent by volume, and the UEL is 15 percent by volume. If we slowly fill a room with methane, when the concentration reaches 2.5 percent by volume, it is 50 percent of the LEL; at 5 percent by volume it is 100 percent of the LEL. Between 5 and 15 percent by volume, a spark could set off an explosion.

Figure 4

Different gases need different percent by volume concentrations to reach 100 percent of the LEL (see **Figure 4**). Pentane, for example, has an LEL of 1.5 percent. Instruments that measure in percent of the LEL are easy to use because, regardless of the gas, you are most concerned with how close the concentration is to the LEL.

Single-Gas Monitors for Oxygen Deficiency

Oxygen indicators measure atmospheric concentrations of oxygen. Concentrations are generally measured over a range of 0 to 25 percent oxygen in air, with readings being displayed on either digital readout or an analog meter.

Oxygen indicators are calibrated with uncontaminated fresh air containing a minimum of 20.8 percent oxygen. With some models, an alarm is activated when oxygen levels drop below 19.5 percent.

Single-Gas Monitors for Combustible Gases

Figure 5

Single-gas instruments for monitoring combustible gases and vapors are generally calibrated on pentane and are designed for general-purpose monitoring of hydrocarbon vapors. Such instruments operate by the catalytic action of a heated platinum filament in contact with combustible gases (see **Figure 5**). The filament is heated to operating temperature by an electric current. When the gas sample contacts the heated filament, combustion on its surface raises the temperature in proportion to the quantity of combustibles in the sample. A Wheatstone bridge circuit, incorporating the filament as one arm, measures the change in electrical resistance due to the temperature increases. This change indicates the percentage of combustible gas present in the sample.

Single-Gas Monitors for Toxic Gases

Compact, battery-powered devices can be used to measure levels of such gases as carbon monoxide (CO) or hydrogen sulfide (H₂S), depending on the model selected. Toxic gas monitors use electrochemical cells (see **Figure 6**). If the gas of interest enters the cell, the reaction produces a current output proportional to the amount of gas in the sample. With these instruments, audible and visible alarms sound if the gas concentration exceeds a preset level. These devices are well suited for use in confined spaces containing motors or engines, which can generate large quantities of CO, as well as in sewers, waste treatment plants and "sour crude" processing stations which tend to have hazardous volumes of H₂S.

Figure 6

Multiple-Gas Monitors for Oxygen and Combustible Gas

In applications where it is necessary to determine oxygen and combustible gas levels simultaneously, 2-in-1 diffusion-type devices can be used. Sensors measure 0 to 100 percent of the LEL and oxygen from 0 to 25 percent. Remote sampling requires either a pump module or an aspirator bulb adapter.

Multiple-Gas Monitors for Oxygen, Combustible and Toxic Gases

Toxic gases and vapors, which can be inhaled or absorbed through the skin, are frequently found in confined spaces. Sometimes, these atmospheric hazards can also displace oxygen and may incapacitate the body's ability to maintain respiration. Some toxic gases and vapors can also cause long-term physical damage to the body in cases of repeated exposure.

A number of instruments are available to assist in detecting toxic gas. Pocket-size monitors operate by diffusion or an aspirator bulb. Larger instruments with built-in pumps draw samples from the immediate area or from outside the confined space work area when used with sampling lines.

Diffusion-type instruments are available for simultaneously measuring the LEL of combustible gases, oxygen levels and toxic levels (in parts per million) of H₂S, CO and other toxic gases. Alarms also alert the user to low and high oxygen levels. Remote sampling pump adapters are available to convert these diffusion-type instruments into pump-style instruments.

Figure 7

Photoionization Devices for Toxic Gases and Vapors

A photoionization detector, featuring microprocessor technology, uses ultraviolet light to ionize molecules of chemical substances in a gaseous or vaporous state (see **Figure 7**). A real-time digital readout allows the user to make an immediate determination of gas and vapor concentrations. Depending upon calibration input, gas and vapors are measured over a 0.1 to 10,000 ppm scale. Some instruments automatically compensate for signal loss due to humidity, which is inherent in all PID detectors.

Detector Tube Sampling Systems

Detector tube-type devices are recommended for conducting quick evaluations of potential hazards that cannot otherwise be measured. With detector tubes, a known volume of air is drawn through the tube, using a manually operated or battery-powered sampling pump. If gas or vapor is present in the air, chemically treated granules in the tube are stained a different color. By measuring the length of the color stain within the tube, users can determine concentration levels.

Most tubes available today are made of glass, have break-off tips, and are filled with treated chemical granules. They generally have a shelf life of 24 to 30 months.

One type of pump frequently used with a detector tube is a compact, bellows-type device. Accurate and repeatable sample flows can be assured by a shaft that guides the bellows during compression. Some models feature an end-of-stroke indicator that lets the user know when a full air sample has been drawn. Models with an integral stroke counter eliminate the tedious recording of multiple pump strokes.

Personal Sampling

Personal sampling is used to determine the concentration of airborne contaminants. Personal sampling pumps are designed to measure individual workers' exposures, so they typically are lightweight, belt-mounted, battery-powered devices.

The process of sampling entails drawing a predetermined volume of air through a filter designed to trap contaminants. The filter is contained in a plastic cassette, which is attached by plastic tubing to a sampling pump calibrated to draw a specific, known volume of air into the filter. After air samples are drawn, the filters are sent to a laboratory where they are examined to determine the level of exposure.

Personal sampling determines the concentration found in the "breathing zone" or the area near the worker's face, which is usually measured at or near the collar or lapel.

Calibration

To ensure the accuracy of all monitoring and detection equipment, calibration should be performed regularly. If the instrument reading differs significantly from the values of the known standard, the instrument should not be used until it has been adjusted or, if necessary, repaired.

Instrumentation

Solaris® Multigas Detectors

The Solaris Multigas Detector is an affordable, durable, reliable, easy-to-use portable instrument for detecting the presence of O₂, H₂S, CO and combustible gas. The Solaris Detector is designed to withstand rough handling in harsh environments. Best of all, it delivers MSA's commitment to quality at the smallest size and, even smaller price.

Features

- **Ergonomic Design**—For maximum comfort.
- **Alarm System**—World-class triple alarm system with 100+ decibel audible alarm, multiple high-intensity visual alarm and strong vibrating alarm.
- **Display Features**—Superior display features simultaneous gas concentration display, backlighting for easy reading and alphanumeric message bar for easy use.
- **Lightweight**—Under 8 oz., compact size that makes it easy to wear.
- **Durable**—Case with rubberized armor provides superior protection against liquid and dust ingress (IP 65 rated).
- **Long-life Battery**—Rechargeable lithium ion battery provides 14+ hours of continuous run time and delivers best-in-class performance in extreme conditions.
- **Galaxy Compatible**—Compatibility for computer automated calibration and record-keeping.
- **Sampling Pump Option**—Optional powered sampling pump with extensive contaminant filtering system.
- **Warranty**—Outstanding 2-year, all-inclusive warranty.

Solaris and Solaris FX Kits

Standard Kits (includes datalogging option)*

	Solaris Part No.
4-Gas Instrument	10048147
3-Gas (LEL, O ₂ , CO)	10048149
2-Gas (LEL, O ₂)	10048214

Deluxe Kits (includes Econo-cal calibration kit, datalogging & sampling pump)*

	Solaris Part No.
4-Gas Instrument	10049297
3-Gas (LEL, O ₂ , CO)	10049298
2-Gas (LEL, O ₂)	10049300

All of the above kits include a UL approved Solaris, battery charger, calibration cap assembly and instruction manual in CD-rom.

* To download the Solaris data the MSA data docking module (P/N 710946) must also be purchased—see p. 80.

Assemble-to-Order (ATO) System: You Make the Choices

The ATO System makes it easy to "custom order" the Solaris Detector, configured exactly the way you want it. You can choose from an extensive line of base instrument components and accessories. See the ATO chart on the following page to make your selections.

For accessories, please refer to page 80.

See pages 98–103 for calibration accessories.

Solaris® and Solaris FX Multigas Detector Assemble-to-Order (ATO) Options

- To create your instrument configuration, select the instrument option code and mark them in the boxes to the right.

A. Datalog Options	The datalog option enables the Solaris Multigas Detector to store exposure data for easy retrieval at a later time. To download the Solaris data the MSA datalog kit (p/n 710946) must also be purchased. Datalog option is now standard.	Datalog Options Standard rechargeable instrument (includes Datalogging) Standard Alkaline instrument (includes Datalogging)	Code D B	Selection <input type="text"/> <input type="text"/>
B. Combustible Sensor Options	If a combustible gas sensor is desired, two options are available: 0-100% LEL or 0-5% CH ₄ .	Combustible Sensor Options None 0-100% LEL 0-5% CH ₄	Code 0 L M	Selection <input type="text"/> <input type="text"/>
C. Oxygen Sensor Options	To choose to have an oxygen sensor installed in your new Solaris Multigas Detector, choose selection 1. For no oxygen sensor, enter a "0".	Oxygen Sensor Options None O ₂ Sensor	Code 0 1	Selection <input type="text"/> <input type="text"/>
D. Toxic Sensor 1 Options	To choose to have a carbon monoxide sensor installed in your new Solaris Multigas Detector, choose selection 1. For no oxygen sensor, enter a "0".	Toxic Sensor 1 Options None CO Sensor	Code 0 1	Selection <input type="text"/> <input type="text"/>
E. Toxic Sensor 2 Options	To choose to have a hydrogen sulfide sensor installed in your new Solaris Multigas Detector, choose selection 1. For no hydrogen sulfide sensor, enter a "0". To choose to have a NO ₂ sensor installed, choose 3. For no NO ₂ sensor, choose 2.	Toxic Sensor 2 Options None (H ₂ S Sensor not installed) H ₂ S Sensor None (NO ₂ Sensor not installed) NO ₂ Sensor	Code 0 1 2 3	Selection <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/>
F. Battery Charging Options	A Solaris-specific battery charger must be used to recharge the batteries in the Solaris unit. Global battery charger comes with several international plug outlet configurations for countries outside of North America. For the Solaris with alkaline batteries, choose option "0".	Battery Charging Options None North American outlet-compatible Global outlet-compatible	Code 0 N G	Selection <input type="text"/> <input type="text"/> <input type="text"/>
G. Instrument Approvals	It is now possible to select the specific type of approval that a Solaris instrument possesses. The Solaris UL approval is recommended for the United States and Mexico. The Solaris CSA approval label is recommended for Canada. For the Solaris with alkaline batteries, choose option "A" for United States, Canada and Mexico.	Instrument Approvals Underwriters Laboratory (UL) CSA CSA/US (Alkaline Version)	Code U C A	Selection <input type="text"/> <input type="text"/> <input type="text"/>
H. Sampling Pump	It is now possible to combine the sampling pump and probe for the Solaris unit into one easy-to-use accessory. The pump probe is very versatile and can be attached to the Solaris instrument in seconds. The built-in Water Stop filter helps to ensure the sampling system is not contaminated with dirt and debris during use.	Sampling Pump None Universal pump probe	Code 0 1	Selection <input type="text"/> <input type="text"/>
I. Calibration Kits	MSA provides two options for performing instrument calibration. The cost-effective Econo-Cal (34 liter) cylinder and fixed flow regulator provides an economical means to calibrate the Solaris instrument. The Model RP calibration kit also has a fixed flow 0.25 lpm regulator and provides the user with a larger capacity (58 liter) calibration gas cylinder.	Calibration Kit Options None Econo-Cal Calibration Kit Model RP Calibration Kit	Code 0 1 2	Selection <input type="text"/> <input type="text"/> <input type="text"/>

Your Model Part Number

Instrumentation

Sirius® PID Multigas Detector

The Sirius Multigas Detector unit with PID Sensor gives users all they are looking for in a reliable, easy-to-use, durable package to detect volatile organic compounds, while measuring for combustible, toxic and oxygen deficient atmospheres.

Tremendous Flexibility—One PID and four gases in one instrument allows for detection of hundreds of chemicals.

Reliable PID Performance—MSA's own proprietary PID sensor design (patent-pending) provides users with excellent PID performance including humidity resistance, stable zero readings, and fast response and clear times to enable users to get their jobs done dependably.

User-Friendly Software—Easy-to-use software allows users to focus on their tasks at hand!

Superior, Proprietary PID Sensor Design—Reduces maintenance time and cost.

Flexible Configurations—This design combines two instruments into one the Sirius unit can be used with or without the PID sensor mode.

Loud, Attention-Grabbing Alarm—The Sirius Multigas Detector provides outstanding alarms to clearly warn users of a hazardous situation. A piercing alarm horn, resonating through a specially designed horn chamber, is designed into the Sirius unit to give users an audible warning in the event of an alarm condition. Multidirectional bright LED lights give users visible warning of alarm conditions that can be easily seen from any direction the Sirius unit is facing. A "Safe LED" light gives users confidence the unit is actively detecting gas by flashing every 15 seconds.

Interchangeable Lithium-ion and Alkaline Battery Packs—Allows for quick battery turn to keep users continually charged and ready to take action.

Easy Calibration and Compatibility with Galaxy Automated Test System—One-button calibration makes calibration simple for any user. Intelligent software frees users from complicated calibration adjustments.

Long-Term Storage Kit—Provides all the tools necessary to keep the Sirius Multigas Detector running if the unit has not been frequently used.

For accessories, please refer to page 80.

See pages 98–103 for calibration accessories.

Sirius® PID Multigas Detector Assemble-to-Order (ATO) Options

- To create your instrument configuration, select the instrument option code and mark them in the boxes to the right.

A. Photoionization Detector Lamp Option	To choose the standard 10.6 eV lamp for most VOC's, choose selection A. For the low energy 9.8 eV lamp with the most VOC discrimination, enter selection B.	PID Lamp None PID with 10.6 eV Lamp(0-2000 ppm) PID with 9.8 eV Lamp	Code 0 A B	Selection <input type="text"/>
B. Combustible Sensor Option	To choose to have your MSA 20L combustible sensor reading set to be displayed as 0-100% LEL, enter selection "L". For a display of 0-5% methane, enter an "M".	Combustible Sensor None 0-100% LEL 0-5% Methane	Code 0 L M	Selection <input type="text"/>
C. Oxygen Sensor Options	To choose to have an oxygen sensor installed in your new Sirius Multigas Detector, enter selection 1. For no oxygen sensor, enter a "0".	Oxygen Sensor None Oxygen (0-25%)	Code 0 1	Selection <input type="text"/>
D. Carbon Monoxide Sensor Option	To choose to have a carbon monoxide sensor installed in your new Sirius Multigas Detector, enter selection 1. For no carbon monoxide sensor, enter a "0".	Carbon Monoxide Sensor None Carbon Monoxide (0-500 ppm)	Code 0 1	Selection <input type="text"/>
E. Hydrogen Sulfide Sensor Option	To choose to have a hydrogen sulfide sensor installed in your new Sirius Multigas Detector, enter selection 1. For no hydrogen sulfide sensor, enter a "0".	Hydrogen Sulfide Sensor None Hydrogen Sulfide (0-100 ppm)	Code 0 1	Selection <input type="text"/>
F. Battery Pack & Charger Options	You may choose between MSA's lithium ion battery pack which includes a standard lithium ion battery charger, or the convenience of an alkaline battery pack. You may also choose to have both battery pack types included with your new Sirius Multigas Detector.	Battery Pack/Charger None Lithium ion, includes charger & cord Replaceable alkaline Both Lithium ion and replaceable alkaline battery packs	Code 0 A B C	Selection <input type="text"/>
G. Vehicle Charger Option	If you would like to order the vehicle charger for your new Sirius Multigas Detector, enter selection 1.	Vehicle Charger None Vehicle Charger	Code 0 1	Selection <input type="text"/>
H. Sampling Lines	MSA's Quick-Connect sampling lines are of the highest quality materials, guaranteed to provide accurate sampling concentrations. Sirius Multigas Detector sampling lines all includes a Quick-Connect air-line fitting for easy attachment and tight seal. For sampling jet fuel, enter selection 3 for the 10' teflon sampling line option, or selection 4 for the 25' sampling line option.	Sampling Lines None 10-foot polyurethane 25-foot polyurethane 10-foot teflon (for jet fuel sampling) 25-foot teflon (for jet fuel sampling) 3-foot polyurethane coiled	Code 0 1 2 3 4 5	Selection <input type="text"/>
I. Sampling Probes	MSA's sampling probes are durable & comfortable to use. The built in Water-Stop filter ensures that your sampling system is not contaminated with dirt and debris if the probe tip is dipped in water. You must order a probe if you order a sampling line, as we strongly recommend that you operate the instrument with this filter in place.	Sampling Probes None 1-foot Probe 3-foot Probe 8-inch Probe	Code 0 1 2 3	Selection <input type="text"/>
J. Carrying Attachments	While a high-strength stainless steel D-Ring is offered with this instrument at no extra charge, there are three other options for handling the instrument: the retractable carrying line for use with the D-Ring, the shoulder harness and the wrist harness to be used on the user's arm with a Level A suit.	Carrying Attachments None Retractable Carrying Line with Belt Clip Shoulder Harness Wrist Harness	Code 0 1 2 3	Selection <input type="text"/>
K. Instrument Jackets and Boots	To offer the highest level of instrument protection, you may choose a protective black rubber boot and harness, or a cordura jacket. You may also order both options by choosing selection C.	Instrument Jacket/Boot None Black Boot with Harness Cordura Jacket with Harness Black Boot, Cordura Jacket and Harness	Code 0 B C D	Selection <input type="text"/>
L. Calibration Kits	You may choose one of two calibration options for your Sirius Multigas Detector. The fixed-flow .25 lpm regulator includes a multigas calibration cylinder and also an isobutylene calibration gas cylinder if a PID selection is chosen. You may also order just the isobutylene calibration kit with gas cylinder.	Calibration Kits None Econo-Cal Fixed-Flow Regulator Calibration Kit (includes multigas and isobutylene cylinders) Model RP Fixed-Flow Regulator Calibration Kit (includes multigas and isobutylene cylinders) Isobutylene Calibration Kit (includes gas cylinder)	Code 0 1 2 3	Selection <input type="text"/>
M. Data Communications Kit	If you need to track the readings and operations of your Sirius Multigas Detector, consider ordering the instrument with the optional built-in datalogging module. The option also provides TWA and STEL capabilities.	Data Communications None Data Link Module Data Link Module and Software Kit	Code 0 1 2	Selection <input type="text"/>
N. Packaging	Your new Sirius Multigas Detector may be protected by a standard black plastic case, or by a black premium field case. You may also choose the option of a long-term storage kit case for emergency response, large enough to hold the Sirius Multigas Detector, calibration cylinders, spare sensors, spare PID lamp and lithium ion battery pack with charger, spare alkaline battery pack, lamp cleaning kit and simple-to-read and understand refresher instructions.	Packaging Standard shipping carton Standard black PVC case Premium black field case Long-term storage kit case Long-term storage kit basic includes PID lamp, add \$180 each sensor	Code 0 1 2 4 5	Selection <input type="text"/>
O. PID Lamp Cap	The standard easy-access lamp cap is included with your Sirius Multigas Detector at no extra charge. You may also choose a tamper-proof lamp cap.	PID Lamp Cap None Standard easy-access lamp cap Alternative tamper-proof lamp cap	Code 0 S T	Selection <input type="text"/>

Instrumentation

Orion® Multigas Detector

The Orion Multigas Detectors is a low-cost, reliable, and easy-to-use portable instruments for detecting the presence of O₂, H₂S, CO and combustible gas. The Orion Multigas Detector features MSA's long-life 20L combustible sensor and will stand up to the roughest handling in even the toughest environments.

Features

- One-button calibration
- Long-life battery
- Carbon-filled nylon case
- Tough, durable construction
- Built-in pump
- Galaxy compatibility
- Large, easy-to-read display
- Durable sensors
- Link™ Software compatibility

Approvals

The Orion Multigas Detectors has been designed to meet intrinsic safety testing requirements in certain hazardous atmospheres. The Orion Multigas Detector has been approved by UL and cUL for use in Class I, Division I, Groups A, B, C, and D.

Assemble-to-Order (ATO) System: You Make the Choices

The ATO System makes it easy to "custom order" the Orion Multigas Detector or the Orion FX Multigas Detector, configured exactly the way you want it. You can choose from an extensive line of base instrument components and accessories. See the ATO chart on the following page to make your selections.

For accessories, please refer to page 81.

See pages 98–103 for calibration accessories.

Orion® Multigas Detector Assemble-to-Order (ATO) Options

- To create your instrument configuration, select the instrument option code and mark them in the boxes to the right.

A. Combustible Sensor Options	To choose to have MSA's own long-life 20L combustible sensor installed in your instrument (Orion Multigas Detector only), choose selection 1. For no combustible sensor, enter a "0."	Combustible Sensor None % LEL (Pentane, 0–100%) Orion Multigas Detector only	Code 0 1	Selection <div></div>
B. Oxygen Sensor Options	To choose to have an oxygen sensor installed in your new Orion Multigas Detector, choose selection 1. For no oxygen sensor, enter a "0."	Oxygen Sensor None Oxygen (0–25%)	Code 0 1	Selection <div></div>
C. Carbon Monoxide Sensor Options	To choose to have a carbon monoxide sensor installed in your new Orion Multigas Detector, choose selection 1. For no carbon monoxide sensor, enter a "0."	Carbon Monoxide Sensor None Carbon Monoxide (0–999 ppm)	Code 0 1	Selection <div></div>
D. Hydrogen Sulfide Sensor Options	To choose to have a hydrogen sulfide sensor installed in your new Orion Multigas Detector, choose selection 1. For no hydrogen sulfide sensor, enter a "0."	Hydrogen Sulfide Sensor None Hydrogen sulfide (0–200 ppm)	Code 0 1	Selection <div></div>
E. Battery Pack Options	You can choose between MSA's NiMH rechargeable batteries which will run your Orion Multigas Detector for up to 16 hours in pump mode and 20 hours in diffusion mode, or you can choose the convenience of alkaline batteries. For ultimate flexibility, choose "both!"	Battery Pack Standard NiCd Rechargeable (comes with standard AC charger) Replaceable alkaline Both NiMH and alkaline	Code A B C	Selection <div></div>
F. Battery Charger Options	If you order your Orion Multigas Detector with a rechargeable battery pack, the charger is included in the price. If you want the optional vehicular charger adapter, choose selection "1."	Battery Charger None/Standard AC charger Vehicular charger	Code 0 1	Selection <div></div>
G. Sampling Methods	The Orion Multigas Detector's patented Pulsecheck™ pump technology leads the industry. If you chose the built-in pump, operating directly off the instrument batteries, you are assured of an audible pump fault alarm and you do not need to maintain a second set of batteries. If you are ordering diffusion instruments, a calibration cap will be included to calibrate your instruments.	Sampling/Calibration Methods None Integral, Pulsecheck pump Manual aspirator model	Code 0 P A	Selection <div></div>
H. Sampling Lines	MSA's high-speed sampling lines are of the highest quality materials guaranteed to not alter sample concentration. Screw fittings with O-Ring couplings at each end ensure there are no leaks when the system is operating.	Sampling Lines None 3-foot coiled 5-foot coiled 10-foot 15-foot 25-foot	Code 0 1 2 3 4 5	Selection <div></div>
I. Sampling Probes	MSA's sampling probes are durable and comfortable to use. The built-in Water Stop filter ensures your sampling system is not contaminated with dirt and debris if the probe tip is dipped in water. You must order a probe if you order a sampling line as we strongly recommend you operate the instrument with this filter in place.	Sampling Probes None 1-foot straight 3-foot straight 3-foot, holes near tip 3-foot, holes near handle Hot-gas sampling probe	Code 0 1 2 3 4 5	Selection <div></div>
J. Carrying Attachments	While a high-strength, nylon clip is offered with the instrument at no extra charge, a swivel belt loop kit, which allows quick release from your belt with a half turn, is also available.	Belt Clip Standard nylon Swivel belt loop	Code 0 1	Selection <div></div>
K. Instrument Jacket	For the highest levels of environmental and rough handling protection, you can order from a variety of jackets and boots for your Orion Multigas Detector.	Instrument Jacket None Black rubber boot Black leather case Orange cordora jacket Black rubber boot/Orange cordora Red rubber boot	Code 0 B L C D R	Selection <div></div>
L. Calibration Kits	You can choose one of two calibration options for your Orion Multigas Detector. The flexible RP kit provides a constant flow regulator that is reused and provides the greatest accuracy. The squirt gas test kit provides a very economical means to verify instrument calibration.	Calibration Kit Options None RP Calibration Kit (includes gas) Squirt Gas Check Kit (includes gas)	<div>(Only available in AT0 for Combustible, O₂, CO, H₂S—other gases must be purchased separately.)</div> Code 0 1 2	Selection <div></div>
M. Data Communications Options	If you need to track the readings and operation of your Orion Multigas Detectors, consider ordering them with the optional built-in datalogging module. This option also provides STEL and TWA capabilities. This option required for Galaxy operation.	Data Communications None Orion link module Module and download software	Code 0 1 2	Selection <div></div>
N. Packaging Options and Carrying Cases	You can further protect your Orion Multigas Detector with optional carrying cases. For ease of transport and handling, these cases can be even be ordered to accommodate calibration accessories. With the premium cases, a simple-to-understand training videotape is included at no extra charge.	Packaging & Carrying Cases Standard shipping container only Black plastic case w/ space for cylinder, with video Heavy-duty case with video Large, heavy-duty case with video and space for 2 cylinders Orange plastic case w/ space for cylinder, with video	Code 0 1 2 3 4	Selection <div></div>

Instrumentation

Orion®*plus* Multigas Detectors

Compact. Durable. Ingenious. Versatile and rugged, the updated Orion plus IR Detector offers five gases with infrared and a wide range of sensor options. Our newly developed array of IR sensors will detect CO₂ or hydrocarbons in LEL range or up to 100% by volume. MSA's 20L catalytic combustion sensors are "best in class" silicon-resistant and will reliably detect up to 100% LEL. Available toxic sensors include ammonia, chlorine and many other choices. Simply choose your IR sensor, add two toxic sensors and finish your unit with an oxygen and an LEL sensor.

Features

- Large, fully-graphic back-lit display
- Data-logging standard using ORIONLINK® software
- Carbon-filled nylon case protects against RFI and corrosive gases
- Long-life battery with three-hour recharge
- Built-in pump with electrical PermaCheck™ function standard
- Two-year warranty on case, sensors, electronics and mechanical components

Updated!

Orion^{plus} Multigas Detector Kits

All kits are standard equipped with datalog, internal pump and comes with rechargeable battery pack, charger, protective rubber boot, PTFE sampling probe with 5ft line and software (p/n 655505 is needed to read data).

Assemble-to-Order (ATO) System: You Make the Choices

The ATO System makes it easy to custom order the Orion plus Multigas Detector configured exactly the way you want it. See the ATO chart on the following page to make your selections.

Orion^{plus} Multigas Detector for the Fire Service Assemble-to-Order (ATO) Options

A. Combustible Sensor Option Choose your sensor calibration with MSA's long-life 20L combustible sensor. Choose selection "L" for a pentane calibration or "M" for a methane calibration. For no combustible sensor, enter a "0".	Combustible Sensor without combustible sensor 0 0–100% LEL Pentane (1.4 vol%) L 0–100% LEL methane (5.0 vol%) M	G. Battery Charger Options If you order your Orion Multigas Detector with a rechargeable battery pack, the charger is included in the price. If you want the optional vehicular charger adapter, choose selection "1."	Vehicle Charger None/Standard AC charger 0 Vehicular charger 1
B. Oxygen Sensor Option To choose to have an oxygen sensor installed in your new Orion plus IR Detector, choose selection 1. For no oxygen sensor, enter a "0".	Oxygen Sensor without oxygen sensor 0 0–25% Vol. O ₂ 1	H. Sample Line MSA does not recommend sampling reactive gases; however if necessary, MSA's high-speed PTFE sampling line is of the highest quality material, guaranteed to minimize altering of the sample concentration.	Sample Line None 0 Customized 5' PTFE line for Orionplus 1
C. Toxic 1 Sensor Option Choose your first toxic gas sensor from this extensive list to configure your new Orion plus IR Detector for your application; for no toxic sensor, enter an "0".	Toxic 1 Sensor None 0 0–999 ppm carbon monoxide (CO) B 0–200 ppm hydrogen sulfide (H ₂ S) C 0–30 ppm hydrogen cyanide (HCN) E 0–10 ppm chlorine (Cl ₂) F 0–100 ppm ammonia (NH ₃) G 0–20 ppm sulfur dioxide (SO ₂) H 0–20 ppm nitrogen dioxide (NO ₂) I 0–1 ppm chlorine dioxide (ClO ₂) J 0–5 ppm phosphine (PH ₃) K 0–1 ppm ozone (O ₃) L 0–1 ppm phosgene (COCl ₂) M	I. Sample Probe A 1' PTFE sampling probe with built-in water-stop filter ensures that your sampling system is not contaminated with dirt and debris if the probe tip is dipped in water. You must order a probe if ordering a sampling line. We strongly recommend operating the instrument with this filter in place.	Carrying Attachments None 0 Sampling PTFE probe 1
D. Toxic 2 Sensor Option Choose your second toxic gas sensor from this list to configure your new Orion plus IR Detector for your application; for no toxic sensor, enter an "0".	Toxic 2 Sensor None 0 0–999 ppm carbon monoxide (CO) B 0–200 ppm hydrogen sulfide (H ₂ S) C 0–30 ppm hydrogen cyanide (HCN) E 0–10 ppm chlorine (Cl ₂) F 0–100 ppm ammonia (NH ₃) G 0–20 ppm sulfur dioxide (SO ₂) H 0–20 ppm nitrogen dioxide (NO ₂) I 0–1 ppm chlorine dioxide (ClO ₂) J 0–5 ppm phosphine (PH ₃) K 0–1 ppm ozone (O ₃) L 0–1 ppm phosgene (COCl ₂) M	J. Carrying Attachments While a high-strength, nylon clip is offered with the instrument at no charge, a swivel belt loop kit allowing quick release with a half turn, is also available.	Belt Clip Unbreakable nylon 0 Swivel belt loop 1
E. Advanced IR Sensor Options MSA offers a range of advanced IR options which will operate in the absence of background oxygen for inert applications. If your application require an IR sensor for %CO ₂ or inert %LEL, choose "H" for 0–100% vol methane. For general hydrocarbon monitoring (0–25% vol), choose "J". When no IR sensor is required, enter an "0". Contact MSA for other IR sensors options.	IR Sensor None 0 0–10 vol % carbon dioxide (CO ₂) C 0–50 vol % carbon dioxide (CO ₂) D 0–100 % LEL propane (C ₃ H ₈) E 0–100 % vol propane (C ₃ H ₈) F 0–100 % vol methane (CH ₄) H 0–25 % vol hydrocarbon (butane) J	K. Instrument Jacket For environmental and rough handling protection, a variety of jackets and boots is available for your Orionplus IR Detector.	Instrument Jacket None 0 Black rubber boot B Leather case L Orange cordura jacket C Red rubber boot R
F. Battery Pack Options You can choose between MSA's NiMH rechargeable batteries, or you can choose the convenience of alkaline batteries. For ultimate flexibility, choose both!	Battery Pack NiMH battery with PCBA & charger with cradle A Alkaline battery pack B NiMH & alkaline pack (A & B) C	L. Calibration Use a minimal length (1-2 ") of the PU tubing to connect to your designated regulators for reactive gases to your instrument.	Calibration 2-ft PU tubing 0
		M. Data Communications Kit To track readings and operation of your Orionplus IR Detector, this unit is standard-equipped with datalogging and STEL/TWA capabilities. To conveniently track stored records, order the IR Receiver, as software comes standard with each unit.	Data Communications None 0 IR receiver (JetEye) 1
		N. Packaging Options & Carrying Cases You can further protect your Orionplus IR Detector with optional carrying cases. For ease of transport and handling, these cases can be ordered to accommodate calibration accessories.	Packaging & Carrying Cases Standard carton 0 Economy plastic case 1 Hard plastic with space for 2 cylinders 2 Red economy plastic 3

Instrumentation

ALTAIR® 4 Multigas Detector

The ALTAIR 4 Multigas Detector for LEL, CO, H₂S, and O₂ is a super-durable, competitively-priced, personal multigas detector. The ALTAIR 4 Multigas Detector is the only portable gas detector with an optional MotionAlert™ feature if a user should become disabled due to unforeseen hazards. When enabled, the MotionAlert feature will activate if the instrument does not detect motion for 30 seconds, and is ideal for confined space entry applications. This unique gas detector function is easily turned off by the user if desired.

Features

- MotionAlert feature plus audible, visual, and vibrating alarms
- Most rugged instrument available
- Large buttons for easy operation
- 20-hour battery run time when fully charged
- Tested to IP67
- Galaxy® System compatible
- Global approvals
- Economically priced
- MSA Link™ Software-ready
- QuickCheck™ Test Station available for fast, easy bump testing

ALTAIR® 4 Multigas Detector

ALTAIR 4 Multigas Detector (UL approved), with data logging feature, charger, calibration cap and tubing, CD manual

ALTAIR® 4 Multigas Detector Assemble-to-Order (ATO) Options

• To create your instrument configuration, select the instrument option code and mark them in the boxes to the right.

1. Instrument Type	Choose your instrument type. For 'standard' choose "S". To have your Altair 4 equipped with the MotionAlert feature to indicate 'man-down' please choose "A".	Instrument Type Standard MotionAlert Feature	Code S A	Selection <input type="text"/>
2. Combustible Sensor Options	Choose your combustible sensor calibration. To select 0-100% LEL Pentane please choose "L"; for 0-5% Vol Methane choose "M". For no combustible sensor select "0" for none.	Combustible Sensor Options None LEL 0-100% Pentane 0-5% Vol Methane	Code 0 L M	Selection <input type="text"/>
3. Oxygen Sensor Options	To choose to have an oxygen sensor installed in your new Altair 4 Multigas Detector, please select "1". For no oxygen sensor please select "0".	Oxygen Sensor Options None 0-25% Vol	Code 0 1	Selection <input type="text"/>
4. Toxic Sensor Options	To configure your new Altair 4 Multigas Detector for your application choose "1" for both CO and H ₂ S sensors. For no toxic sensor, enter a "0".	Toxic Sensor Options None 0-999 ppm CO and 0-200 ppm H ₂ S 0-999 ppm CO 0-200 ppm H ₂ S	Code 0 1 2 3	Selection <input type="text"/>
5. Power Supply	Select your power supply for your region, and add an instrument cradle to firmly secure your instrument while charging on the shelf or in your Fire Truck.	Power Supply None North American North American w/cradle	Code 0 N M	Selection <input type="text"/>
6. Approval Label	Choose the applicable approval label for your area. For USA choose "U". For Canada choose "C".	Approval Label UL/CUL CSA	Code U C	Selection <input type="text"/>
7. Extended Warranty	MSA offers a 'back-to-back' full warranty. Choose "0" for the standard 2 year warranty. Choose "1" for an additional year warranty (3 years total) or "2" for 2 additional years warranty (4 years total), including case, electronics, batteries & sensor replacement.	Extended Warranty 2 years standard 3 years total 4 years total	Code 0 1 2	Selection <input type="text"/>
8. Packaging	To order a 10-unit bulk package, choose "1" (1 instrument version per package). To order the standard single unit carton choose "0".	Packaging Single carton 10-unit bulk package	Code 0 1	Selection <input type="text"/>

Coming Soon! ALTAIR® 5 Multigas Detector

The ALTAIR 5 Multigas Detector is MSA's latest portable instrument for detection of many toxic gases. This innovative unit offers these exclusive portable instrument features:

- Logo Express® Service option for customized instruments
- Standard MotionAlert™ feature to indicate "man-down"
- Great impact durability
- Excellent dust and water ingress protection
- Multilingual at no extra cost
- Standard graphical display
- Optional high-resolution color display
- Diffusion mode or internal pump
- Rechargeable or alkaline battery options

Contact MSA for more details and for ordering information.

Instrumentation

Watchman® Multigas Monitor

The Watchman Multigas Monitor is a durable, portable instrument used to detect and monitor combustible gases, oxygen, and toxic gases in workplace atmospheres, especially in confined spaces such as manholes, storage tanks, tank cars, vaults, mines, and sewers. Designed for rugged handling, the monitor incorporates the state-of-the-art technology in a strong aluminum housing. The Watchman Monitor is ideal for long jobs in heavy industrial environments, as the instrument will run up to 16 hours on a single charge.

For more complete information, see Data Sheet 08-02-39.

Approvals

The Watchman Multigas Monitor meets intrinsic safety testing requirements for use in Class I Division 1, Groups A, B, C and D; Class II Division 1, Groups E, F, G; and Class III hazardous locations.

Assemble-to-Order (ATO) System: You Make the Choices

The ATO System makes it easy to “custom order” the Watchman Multigas Monitor, configured exactly the way you want it. You can choose from an extensive line of base instrument components and accessories. See the ATO chart on the following page to make your selections.

For accessories, please refer to page 81.

See pages 98–103 for calibration accessories.

Watchman® Multigas Monitor Assemble-to-Order (ATO) Options

- To create your instrument configuration, select the instrument option code and mark them in the boxes to the right.
- To calculate your instrument price, write in the price for each option in the space provided to the right and add to the base price of \$1,339.88 below.

A. Electrochemical Sensor Configuration Options	<p>Please list the code number for the toxic gas sensors desired in the spaces to the right. In order to properly process your order, list them in descending numerical order. Use zeros to complete any of the four selections where no sensor is desired (e.g. 2100). Add the price of each sensor to obtain the sensor sub-total pricing.</p>	Sensors (Select 4) Sulfur Dioxide (0-100 ppm) Nitrogen Dioxide (0-100 ppm) Nitric Oxide (0-100 ppm) Hydrogen Sulfide (0-200 ppm) Carbon Monoxide (0-2000 ppm) Oxygen (0-25%) None	Code 6 5 4 3 2 1 0	Selection Toxic 1 <input type="text"/> Toxic 2 <input type="text"/> Toxic 3 <input type="text"/> Toxic 4 <input type="text"/>
B. Combustible Gas Sensor Options	<p>If a combustible gas sensor is desired, select type of display. There are two options available: 0-100% Lower Explosive Limit (%LEL Pentane) or 0-5% Methane (%CH₄).</p>	Sensors None 0-100% LEL Pentane 0-5% %CH ₄ Methane	Code 0 L M	Selection <input type="text"/>
C. Peak Page	<p>Allows user to view the peak gas readings for the entire time the instrument is running. The user can access this page by pressing simply the "PAGE" button on the tester keypad.</p>	Peak Display Page Not enabled Peak display enabled	Code 0 1	Selection <input type="text"/>
D. STEL Page	<p>Enables page and alarms for 15-minute-weighted-average gas exposures. To enable the STEL page, enter a "1" in the box to the right, otherwise, enter a "0".</p>	STEL Display Page Not enabled STEL display enabled	Code 0 1	Selection <input type="text"/>
E. TWA Page	<p>Enables page and alarms for 8-hour-weighted-average gas exposures. To enable the TWA page, enter a "1" in the box to the right, otherwise, enter a "0".</p>	TWA Display Page Not enabled TWA display enabled	Code 0 1	Selection <input type="text"/>
F. Datatagging Page	<p>Allows user to enter a text "tag" using the keypad to denote a location or note with a time stamp. To enable the datatagging page, enter a "1" in the box to the right, otherwise, enter a "0".</p>	Datatagging Entry Pages Not enabled Datatagging pages enabled	Code 0 1	Selection <input type="text"/>
G. Battery Charger Options	<p>From wall adapters to vehicular chargers, you can recharge your batteries wherever you need. Once recharged, your Watchman monitor is ready to provide you with up to 15 hours of continuous gas monitoring.</p>	Battery Charger None Vehicle, 8-24 VDC Single-unit 110V Single-unit 220V Five-unit, 110/220V	Code 0 1 2 3 5	Selection <input type="text"/>
H. Sampling Lines	<p>The Watchman Monitor's sampling lines are of the highest quality materials guaranteed to not alter sample concentration. The heavy-duty synthetic rubber material is ideally suited to industrial applications where heat and chemical resistance are crucial to instrument performance. Screw fittings with O-Ring couplings at each end help reduce the possibility of leaks when the monitor is operating.</p>	Sampling Lines None 5-foot 10-foot 15-foot 25-foot 50-foot	Code 0 1 2 3 4 5	Selection <input type="text"/>
I. Sampling Probes	<p>MSA's sampling probes are durable and easy to use. An assortment of probe types is available to suit your applications. You can select between heavy-duty nickel plated brass probes or phenolic plastic probes where electrical conductivity might be a concern.</p>	Sampling Probes None 18-inch plastic 3-foot brass 3-foot plastic 4-foot solid brass	Code 0 1 2 3 4	Selection <input type="text"/>
J. Line Traps	<p>The Watchman Monitor is offered with two types of sample line protection from water ingress: a water stop filter and a water trap. The convenient, easy-to-use in-line water stop filter is a membrane filter that will prevent liquids from being drawn into the instrument. The water trap provides a water collection bulb with a stop to automatically cut off the pump flow when the bulb fills. The water trap provides a visual indication you are drawing water into your sampling lines.</p>	Line Traps None Water Stop Assembly Line Trap Assembly Both	Code 0 1 2 3	Selection <input type="text"/>
K. Remote Alarms	<p>The Watchman Monitor's remote alarms provide an additional level of audible and visual alerts to your gas monitoring program. Available in low- and high-sound output and with an optional 15-foot extension cable, the remote alarms ensure your team is notified in high-noise areas.</p>	Remote Alarms None 90-dB horn / 3-foot cable 90-dB horn / 15-foot cable 105-dB horn / 3-foot cable 105-dB horn / 15-foot cable	Code 0 1 2 3 4	Selection <input type="text"/>
L. Packaging Options	<p>You can further protect your Watchman Monitor with a high-strength, weatherproof carrying case. For ease of transport and handling, the premium case accommodates the instrument along with its sampling and calibration accessories. A simple-to-understand training videotape is included at no extra charge.</p>	Packaging Options Standard Packaging Premium Field Case with compartments for calibration accessories and bonus training video	Code 0 1	Selection <input type="text"/>

Instrumentation

ALTAIR® Pro Single-Gas Detector

The ALTAIR Pro Single-Gas Detector has a wide range of features, including simple intuitive operation, small rugged design, and dependable technology that is there when you need it. These innovative toxic gas and oxygen detectors are based upon the design of the popular ALTAIR Single-Gas Detector, but with added features and functionality.

- Tough rubberized housing
- One-button operation
- Accurately measures the gas concentration or percent oxygen
- Displays information on a large, clear, backlit LCD.
- Superior dust and water protection (rated IP67 except O₂-R)
- Event-logging and data-logging
- Excellent impact resistance

- Versions available for CO, H₂S, O₂, NH₃, Cl₂, ClO₂, NO₂, SO₂, HCN and PH₃
- Great RFI performance
- Adjustable alarm set points are offered for LOW, HIGH, TWA and STEL
- Alarms are indicated by flashing LEDs, an audible alarm, and an internal vibrating alarm.
- Replaceable battery and sensor

The ALTAIR Pro Single-Gas Detector will provide worry-free performance and stand up to the roughest handling in even the toughest industrial environments. The sensors and battery can easily be replaced to keep the unit performing for years. The ALTAIR Pro Single-Gas Detector is designed and built with MSA's superior quality and is part of the MSA STELLAR® Series, which features a varied selection of single-gas and multigas instruments.

Some of the available ALTAIR Gas Detectors

ALTAIR Pro Single-Gas Detectors

Instrument Type	Part No.	Low Alarm	High Alarm	STEL	TWA

ALTAIR® Maintenance-Free Single-Gas Detector

The ALTAIR Single-Gas Detector features sensor options for carbon monoxide, hydrogen sulfide and oxygen and will operate for **over** two years maintenance free. This long lifespan, coupled with the unit's high performance, results in one of the most cost-effective single-gas detectors on the market. Advanced design offers superior dust and water protection and high resistance to RFI. Rubberized housing and one-button operation provide the durability and ease of use users expect from MSA instruments.

Alarm System

The triple-alarm system featuring two bright flashing LEDs, a piercing audible alarm, and a vibrating alarm ensures that no alarm condition goes unnoticed.

- 95 dB audible alarm (distinct sounds for High and Low alarms)
- Dual LEDs positioned to be seen from all angles
- Standard vibrating alarm and standard event logging

Durability Features

- Hard polycarbonate case, encapsulated in a thick rubberized shell
- Extremely resistant to drops and impacts
- Rated to IP67 protection levels for dust/water ingress

Warranty

Two years or 18 hours of alarm (1080 minutes)

Instrumentation

Combustible Gas Detectors

Titan® Combustible Gas Detector

The Titan Combustible Gas Detector is a hand-held instrument used for the detection of combustible gases and vapors in air. The unit is equipped with an 85 dB audible alarm and one of the biggest displays available. The intuitive one-button operation allows simplicity of use. Simply switch on, and the Titan warns you of the presence of dangerous levels of combustible gases or vapors. It will stand up to the roughest handling in even the toughest environments. And, it is part of the MSA Stellar series of portable gas detection instruments.

Gascope® Combustible Gas Indicators and Tankscope® Combustible Gas Indicator, Model 62T

Gascope Combustible Gas Indicators are portable instruments for use in detecting, measuring, and pinpointing leaks of combustible gases and vapors. Each unit is easily carried with integral neck and waist straps, leaving hands free for climbing, operating the instrument, or carrying additional equipment.

Three Gascope Combustible Gas Indicator models are available. The Model 60 is designed for use by gas utility companies in routine testing for methane-in-air concentrations in manholes, sewers, curb boxes, and other street openings. The Model 62S, also suitable for use by gas utility companies, is designed for reading 0–100% LEL methane-in-air and 0–100% by volume methane-in-air. The Model 62 is for general industrial use and is designed for reading 0–100% LEL pentane-in-air. For more complete information, see Data Sheet 08-01-04.

The Tankscope Combustible Gas Indicator, Model 62T, is a portable instrument specifically designed to detect combustible gas leaks in inerted shipboard oil holds. Based on the highly successful Gascope Combustible Gas Indicator, the portable Tankscope Indicator has an easy-to-read analog display and is very simple to use.

Approvals

Gascope Combustible Gas Indicators are listed by MET for use in Class I, Division 1, Groups C and D hazardous locations defined by the National Electric Code.

Explosimeter® Combustible Gas Indicator

The Explosimeter Combustible Gas Indicator detects and measures concentrations of combustible gases or vapors in the air. The instrument can be used in the immediate environment or, with sampling lines and probes, it can draw samples from remote areas. The unit is housed in a cast aluminum case. For more complete information, see Data Sheet 08-00-03.

Approvals

Model 2A is listed by Underwriters' Laboratories (UL) for use in hazardous locations as defined by the National Electrical Code. UL approval is for Class I, Group D, Divisions 1 and 2; and Class I, Groups A, B and C, Division 2 (Division 1 excluded), hazardous atmospheres.

Detector Tube Pumps

Toximeter™ II Automatic Detector Tube Pump

The Toximeter II Automatic Detector Tube Pump makes the sampling process easier, allowing the user to preset the number of pump strokes from 1 to 250. Intrinsically safe, the automatic pump works with all MSA detector tubes. It can also be used as a sampling pump.

Toximeter™ II Automatic Detector Tube Pump

655585	Toximeter II Automatic Detector Tube Pump
--------	---

Kwik-Draw® Detector Tube Pumps

MSA's Kwik-Draw and Kwik-Draw Deluxe Pumps can be used with an assortment of MSA's detector tubes to spot-test atmospheres for a wide variety of toxic substances. They are designed for one-hand operation and consistent delivery of a sample draw volume of 100 milliliters (ml).

Kwik-Draw Detector Tube Pumps

488543	Kwik-Draw Basic Pump, with remote sampling adapter and carrying pouch
487500	Kwik-Draw Deluxe Pump, with remote sampling adapter, carrying pouch and end-of-stroke indicator

Accessories

73067	Sampling line, 10 ft
73068	Sampling line, 25 ft
73069	Sampling line, 50 ft
87970	Remote Sampling Adapter, required for above sampling line
488780	Solvent-Resistant Sampling Line, 25 ft, with reel
488872	Tube Holder, required for 488780 line above
470321	Flue Gas Kit

Gas-Tester™ II H Detector Tube Pump

The Gas-Tester II H Pump is set for action by compressing the bellows. A pump stroke is started by pressing the release button. When the sample (100ml) is drawn through the tube, the end-of-stroke indicator changes color. An accurate measurement is obtained because the sample draw procedure itself is controlled only by the specifications of the pump and the flow resistance of the detector tube.

Chemical Warfare Agent Detector Tubes

Detect a wide range of nerve, blister, blood, and choking agents.

- Quick, simple to use, easy to interpret results
- "Go/No Go" style
- Can be used with MSA's full line of pumps
- All sold in boxes of 10 tubes
- Important: Sold only in the U.S.

Chemical Warfare Agent Detector Tubes

10007654	Nerve (Sarin, VX, GA, GD, etc.)
10007653	Blister (Mustard Gas)
10007650	Blister (Lewisite)
10007652	Blister (variety, including Mustard Gas)
10007651	Blood and Choking (CG, DP, AC, CK)

Chemical Warfare Agent Detector Tube Kits

Chemical Warfare Kits are available in a Single CWA Tube Sampler and a Multi CWA Tube Sampler. The Single CWA Tube Sampler will only sample one CWA tube at a time. The Multi CWA Tube Sampler allows the user to simultaneously sample up to four CWA tubes at the same time without making adjustments. The kit is supplied with an MSA Escort ELF pump, which maintains constant flow with a built-in "Run/Hold" feature that allows the user to start/stop the pump and still maintain an accurate sampling timer. The four-port manifold tube holder is pre-set for the proper flow rate for CWA tube sampling.

HAZMATCAD™ and HAZMATCAD Plus Hazardous Material Chemical Agent Detectors

HAZMATCAD Detector

The HAZMATCAD Hazardous Material Chemical Agent Detector is a handheld instrument that detects and classifies Chemical Warfare Agents (CWA). When compared to other technologies, the HAZMATCAD Detector offers more capabilities and greater reliability at a lower cost.

Features

- Compact, light-weight and portable
- Self-diagnostic check during rapid warm-up
- Alphanumeric display with LED alarms
- Dual-Mode SAW Operation—Fast or High Sensitivity
- Operates between 8 and 12 hours on rechargeable Li-Ion batteries
- Vapor-diffusion check source verifies system performance
- Unit can be hand-carried or worn on belt
- RS-232 and IrDA communication ports; stores up to 8 hours of data
- Inlet design protects against dust and particulates

HAZMATCAD Plus Detector

The HAZMATCAD Plus Detector detects for Chemical Warfare Agents (CWA) and selected Toxic Industrial Chemicals (TICs). It is a portable instrument designed for one-hand operation. It is very easy to operate and requires limited training for effective use.

Features

- Self-diagnostic check during rapid warm-up
- Alphanumeric display with LED alarms
- Dual-Mode SAW Operation – Fast or High Sensitivity
- Electrochemical Cells – Real time analysis
- Operates between 8 and 12 hours on rechargeable Li-Ion batteries
- Vapor-diffusion check source verifies system performance
- RS-232 and IrDA communication ports; stores up to 8 hours of data
- Inlet design protects against dust and particulates

HAZMATCAD Detector Kits

Kits include: HAZMATCAD Detector; battery charger; belt clip; two Sony rechargeable batteries; hard, water-resistant carrying case; operating manual; vapor check source

Part No.	Instrument	Chemical Agents Detected
10055094	HAZMATCAD Detector	Nerve and Blister
10055095	HAZMATCAD Detector	Nerve, Blister and Hydrogen Cyanide
10055096	HAZMATCAD Detector	Nerve, Blister and Phosgene
10055097	HAZMATCAD Plus Detector	Nerve and Blister agents and TICs (phosgene, hydrogen cyanide, halogen and hydride gas)

HazMat Response Kit

The HazMat Response Detector Tube Kit can be used by firefighters, HazMat Response Teams and other workers to help classify unknown chemical gases and vapors at accident or spill sites. A Quad-Port Sampler allows four chemical classes to be tested simultaneously. The portable kit contains 12 types of Detector Tubes (each with sufficient tubes for 10 complete tests), a Kwik-Draw Pump to draw the sample through the tubes, the multiple tube holder and a convenient, easy-to-follow interpretation guide.

HazMat Response Kit

807472	Includes 12 types of detector tubes, multiple tube holder, Kwik-Draw Pump and interpretation guide
485233	Extra Quad-Port Sampler

Features & Benefits

- Quickly classifies unknown chemical gases and vapors
- Quad-Port Sampler allows simultaneous testing with four detector tubes, meaning less time in IDLH atmosphere
- Flow-limiting orifices ensure even sample flow
- Portable and easy to handle
- Includes simple interpretation guide

Instrumentation

SafeSite® Multi-Threat Detection System

The SAFESITE Multi-Threat Detection System simultaneously monitors and wirelessly communicates six potential threats: CWAs, VOCs, TICs, gamma radiation, combustible gas and oxygen deficiency.

The SAFESITE System combines state-of-the-art detection technology with advanced wireless communication capabilities to provide superior preventative and counter-measure solutions for:

- Homeland Security
- Emergency Response
- Public Events
- Building Protection
- Mass Transportation Centers
- Perimeter Monitoring
- Hazardous Response
- Port Surveillance
- Confined Space Monitoring

SAFESITE System components consist of the SAFEMTX™ Multi-Threat Detector, the SAFECOM™ Command Center and the SAFECONNECT™ Belt-Bridge with Sirius wireless interface. The system can be installed permanently (wired or wireless) for continual monitoring or deployed as a portable system.

The SAFEMTX Multi-Threat Detector utilizes multi-sensing technologies to detect up to six potential threats; helping first responders, law enforcement and government agents reduce the risk of exposure and facilitate consequence management.

The SAFECOM™ Command Center receives mission-critical information from the SAFEMTX™ Detectors and permits this crucial and wide-ranging data to be converted quickly into practical information for rapid decision-making through an uncomplicated graphical user interface. The SAFECOM Command Center can manage up to four systems with 16 SAFEMTX Detectors per system, integrating SAFEMTX data, including:

- Gas readings
- Relative CWA threat level
- Radiation dose rate
- Alarm status
- GPS location
- Battery run time
- RF signal strength
- Fault conditions
- SAFEMTX min, max, and average values

Through the SAFECOM Command Center, alarms are identified with both visual and audible alarms. Alarms can then be acknowledged and silenced, detectors can be enabled and disabled, event logs and event log history can be viewed, plus units can be customized to suit the specific deployment scenario.

Wireless Technology

The SAFESITE® System provides up to two miles of wireless communication between any SAFEMTX Detector, SAFECONNECT Belt-Bridge and SAFECOM Command Center. SAFECONFIG™ Software works with the SAFECOM Command Center or SAFECONNECT Belt-Bridge, enabling configuration of any SAFEMTX Detector as a repeater. This added capability maximizes deployment range and ensures maximum signal strength and reliable deployment without the need to move units.

SAFEPAK™ Perimeter Area Command Kit

SAFESITE® SAFEPAK Perimeter Area Command Kit provides a basic kit for quick deployment and monitoring of an event or a location. The kit includes two Pelican cases with an internal battery charger, 4 SAFEMTX™ Multi-Threat Detectors, 1 SAFECOM™ Command Center, all necessary PC interface software, and 4 extra batteries. A laptop PC is also available as an option, or an existing PC can be used.

The SAFESITE Multi-Threat Detection System can be ordered using MSA's Assemble-To-Order System. Please refer to Bulletins 07-2114-MC and 07-2115-MC.

- 1 Threat Readings** – scrolling readings of up to 16 MTX Detectors per channel. Unit is identified by large icon to the left of the readings. In alarm condition, display snaps to unit in alarm.
- 2 MTX Icons** – identify number of units enabled in current network. Users may view specific unit reading by double-clicking on icon.
- 3 Map** – option for map view or uploaded image view.
- 4 Signal Strength** – communication status from SAFEMTX™ Detector to SAFECOM™ Command Center.
- 5 Power** – status of battery life of SAFEMTX Detectors.
- 6 System Status** – alerts user to alarm, warning or fault within a particular system.
- 7 Action Buttons** – allow user to select address, cycle units, acknowledge alarms and enable or disable units from the system.

Threat	Technology	Benefit
Chemical warfare agents	Surface acoustic wave (SAW)	Low false positives and false alarms, differentiates nerve & blister agents
Gamma radiation	Cadmium zinc telluride (CZT)	Sensitive with adjustable threshold and 2 ranges. (0-100 mR/hr, 0.1 mR/hr resolution & 0-1000 mR/hr, 1 mR/hr resolution)
Volatile organic compounds	Photo-ionization (PID)	10.6 eV lamp provides ppm readings for broadband toxics and VOC detection
Toxic industrial chemicals	Electrochemical	Detects many specific toxic gases such as chlorine, ammonia, hydrogen cyanide and hydrogen chloride
Oxygen deficiency/enrichment	Electrochemical	Oxygen monitoring for confined space
Combustible gas	Catalytic bead	Wide range detection for hydrocarbons

BIOSENSOR™ 2200R Biological Agent Detector

The new BIOSENSOR 2200R Biological Agent Detector from MSA is a handheld, portable, on-site instrument for rapid detection, analysis, and identification of biological agents. Unique bioassay technology offers excellent sensitivity and low false positives while offering ease of use during white powder response calls. This highly accurate detection method provides rapid measurement of biohazards such as anthrax, ricin, botulism, SEB, and plague.

Exclusive five minute time-to-answer allows first responders to make informed critical decisions more rapidly than any other biological agent detector. The BIOSENSOR 2200R employs dynamic surface generation, a patent pending type of immunoassay detection technology. This technology offers significant advantages over other field-based assay methods by combining the benefits of both the free solution and lateral flow types. The result is more rapid analysis, a user-friendly format, and detector stability within a wide range of climates.

Both wet and dry samples may be tested and results are displayed with a simple red (target present) or green (no target present) indication. As tests are nondestructive, samples may be retained as evidence. Single-test, disposable cartridges with on-board reagents have a 12-month shelf life. This instrument is permanently housed in a sturdy, lightweight Pelican case.

Instrument Features and Benefits

- 5 minute time-to-answer
- Uses positive and negative control cartridges
- Battery-operated with ability to run 50 tests on a single charge
- Fully deconable housing; IP67 rated
- Visual and audible alarms provide clear indication of status
- Extremely easy to use with a training time of one hour
- Integrated RFID (radio frequency identification) for automatic cartridge recognition

Targets

- Anthrax/ricin duplex—one test, two agents
- Anthrax
- Ricin
- SEB (staphylococcal enterotoxin B)
- Botulism*
- Plague*
- Smallpox*
- Tularemia*
- Cholera*
- West Nile virus*

*additional agents in development

BIOSENSOR 2200R Biological Agent Detector

10084834	MSA BIOSENSOR 2200R Biological Agent Detector Kit*, includes carry case, charger, cartridge starter kit (10084758), instruction manual, and quick start guide.
BIOSENSOR Cartridge Plans	
10084758	MSA BIOSENSOR cartridge starter kit includes 3 Anthrax/Ricin dual kits**, 1 Anthrax, 1 Ricin, 3 positive control, 2 negative control cartridges, and 2 wet sample kits
10084753	MSA BIOSENSOR Low volume cartridge plan includes 6 Anthrax/Ricin dual kits**, 2 Anthrax, 2 Ricin, 6 positive control, 2 negative control cartridges, and 2 wet sample kits
10084754	MSA BIOSENSOR Medium volume cartridge plan includes 24 Anthrax/Ricin dual kits**, 6 Anthrax, 6 Ricin, 24 positive control, 6 negative control cartridges, and 4 wet sample kits
10084755	MSA BIOSENSOR High volume cartridge plan includes 60 Anthrax/Ricin dual kits**, 8 Anthrax, 8 Ricin, 60 positive control, 8 negative control cartridges, and 6 wet sample kits.

* Extended warranties available.

** Each biohazard cartridge test kit includes a dry sample kit. Please contact your local MSA rep for more information.

Instrumentation

Escort ELF® and Escort® LC Sampling Pumps

Escort ELF Sampling Pumps

The patented Escort ELF Sampling Pump can be used for personal and area sampling. The state-of-the-art electronic laminar flow sensor, consisting of a laminar flow element and pressure sensor, provides constant flow (volume) control, with $\pm 2.5\%$ regulation of flow rate (from 1 to 3 lpm) and automatic compensation for changes in battery voltage, temperature, altitude, and sample load.

An internal secondary standard calibrates the pump continuously and needs to be checked against a primary standard only once a month (or every 200 hours for coal mine dust sampling).

Approvals

Escort ELF Sampling Pumps are UL approved as intrinsically safe for use in hazardous locations—Class I, Groups A, B, C, D; Class II, Groups E, F, and G; and Class III, Division I locations. NIOSH-certified for coal mine dust sampling (TC-74-030). MSHA certified as intrinsically safe for underground use (Approval No. 2G-3924-1).

Escort LC Sampling Pumps

The Escort LC Sampling Pump can be used with a variety of personal and area sampling devices to collect such airborne contaminants as asbestos fibers, toxic gases, vapors, particulates, fumes, and mists. It can also be used to sample silica dust, coal dust, and organic vapors.

The Escort pump is exceptionally compact, lightweight, and quiet in operation. Engineered for use in "hostile" environments, the unit can be sprayed with water while it is operating without being damaged.

Approvals

Escort LC Sampling Pumps are UL approved as intrinsically safe for use in hazardous locations—Class I, Groups A, B, C, D; Class II, Groups E, F, and G; and Class III, Division I locations.

MSA Sampling Pump Accessories

MSA sampling pump accessories and air sampling equipment allow monitoring of many different contaminants in various applications. Sampling pump accessories can be used in personal and area sampling for a wide variety of airborne contaminants such as asbestos fibers, toxic gases, vapors, particulates, mists, and fumes.

Accessories for MSA sampling pumps include filter media, a cyclone assembly, preweighed filter cassettes, filter holder assemblies, impingers, the Gemini® Twin-Port Sampler, sorbent tubes, and calibrators.

For more information, see Data Sheet 08-09-01.

Assemble-to-Order (ATO) System: You Make the Choices

The ATO System makes it easy to "custom-order" Escort Pumps, configured exactly the way you want them.

You can choose from an extensive line of base instrument components and accessories. See the ATO Chart on the following page.

To obtain a copy of the ATO via FAX, call MSA QuickLit Information Service at 1-800-672-9010. At the prompt, request QuickLit Document #2346 (ATO for Escort and Escort ELF and Escort LC Sampling Pumps).

Escort ELF® and Escort® LC Sampling Pump Assemble-to-Order (ATO) Options

- To create your instrument configuration, select the instrument option code and mark them in the boxes to the right.

A. Number of Pumps	It's your choice: You can order one pump at a time, or the convenient "5-Pump Kit," which includes a durable PVC carrying case and bonus training video. NOTE: When you order the 5-Pump Kit through this ATO Ordering Selection Matrix, any accessories (such as single-unit chargers, Gemini Twin-Port Samplers, cyclones or instrument jackets) you order will also be provided in five-packs.	Number of Pumps	Code	Selection
		One	1	
		Five	5	
B. Pump Type	No matter whether you choose the Single-Pump Option or the 5-Pump Kit Option in Section A, you have a choice of three different types of pumps: • The Escort ELF Pump with 90-second Flow-Fault Indicator. In the event that a flow blockage occurs, the Flow-Fault Indicator circuitry illuminates an LED to alert the user. Within 90 seconds, the pump automatically shuts off, but the cumulative elapsed time remains on the display. To select this option, write "ELF1" in the box at right. • The Escort ELF Pump without Flow-Fault Indicator. To select this option, write "ELF2" in the box at right. • The Escort LC Pump. To select this option, mark "ESLC" at right.	Pump Type	Code	Selection
		Escort ELF Pump with 90-second Flow-Fault Indicator	ELF1	
		Escort ELF Pump without 90-second Flow-Fault Indicator	ELF2	
		Escort LC Pump	ELFLC	
C. Battery Chargers	Which type of battery charger do you want? Select from the following choices and mark your selection in the box at right (all operate from 50/60 Hz): "0" for no battery charger, "1" for 120-Volt charger, "2" for 220-Volt charger, or "5" for the 5-Unit charger.	Battery Chargers	Code	Selection
		No battery charger	0	
		120-Volt charger 50/60 Hz	1	
		220-Volt charger 50/60 Hz	2	
		5-Unit charger 120/240 V, 50/60 Hz	5	
D. Sampling Accessories	Sampling Accessories include the following: • Sample Line • 10 mm Cyclone Assembly, which separates respirable dust particles from non-respirable particles • The Gemini® Twin-Port Sampler, which streamlines sampling with sorbent tubes by enabling collection of two or more samples simultaneously from a single sampling pump.	Sampling Accessories	Code	Selection
		Sample Line only	1	
		10 mm Cyclone Assembly* (P/N 456243)	2	
		Gemini Twin-Port Sampler	3	
		No Sampling Line	4	
		10 mm Cyclone Assembly IH* (P/N 10044015)	5	
E. Protective Jackets	A protective leather jacket is offered as an option to protect the instrument from everyday wear, tear and scuff marks. To select the jacket, mark "1" in the box at right.	Protective Leather Jacket	Code	Selection

42 CFR Oil-Mist Sampling Kits

The NIOSH respirator certification standard, 42 CFR Part 84, has introduced new ways to select non-powered air-purifying particulate filter respirators. One of the primary concerns of the standard is oil-mist exposure. According to this NIOSH standard, there are 3 levels of respiratory protection: N = Not resistant to oil; R = Resistant to oil; P = Oil-Proof. But how do you know whether oil mist is present in the workplace? MSA's 42 CFR Sampling Pump Kits can help you answer this question by providing convenience and flexibility in oil-mist sampling.

42 CFR Oil-Mist Sampling Kits

Escort ELF 42 CFR Sampling Pump Kit	711585
Escort LC 42 CFR Sampling Pump Kit	711586

Kit includes:

- Sampling Pump (Escort ELF or LC)
- 3-piece 37-mm MCE filter cassette, 0.8 micron pore size, 10 filters per kit
- 110V charger
- Sampling line
- Garment clip
- Instruction manual

Escort ELF® Kit

General-Purpose Cassette

The general-purpose cassette is a 5-µ pore size PVC sample cassette that can be used for silica sampling. This cassette can also be used for all airborne particulate collection not limited to quartz or silica.

This cassette is individually packaged in a sealed plastic bag. Each cassette is weighed by a robot to .01 mg at 70°F +/- 5° and 45 RH +/- 10%. Each cassette is attached to a Dust Data Card which includes the cassette serial number and actual weight. The cassette inlet contains a tamper-proof deflector plate, and the outlet contains an anti-blow-back check valve. Both the inlet and outlet openings are capped (sealed) to ensure cleanliness. The perimeter of the cassette housing is sealed with tamper-proof sealing tape.

Because of the extreme accuracy of the MSA weighing process, users of this cassette can sample the atmosphere for dust particulate and have the analytical analysis performed with complete confidence in its accuracy.

Sampling Pump Accessories

Gemini® Twin-Port Sampler

For low-flow control when sorbent tubes are used, the patented Gemini Twin-Port Sampler is a valved mechanism that allows flow adjustment down to 1 mlpm (0.001 lpm to 500 mlpm total between both tubes). U.S. Patent No. 5,370,004.

As an added benefit, the Gemini accessory permits simultaneous sampling from sorbent tubes, with independently controlled flow rates of each. Dual sampling means two like sorbent tubes can be attached for simultaneous sampling at different flow rates, or two different tubes can be used to sample two types of substances at once.

Supplementary Parts Kit—including 3 stainless steel support screens, small brush, tweezers, and press/pry tool	456246
All-Glass Impinger Assembly—including fritted-glass flask, inlet cap, nozzle, and cap	10008396
Bubbler for Fritted-glass Flask	10008397
Flask Holster	10008398
Tubing for Flask	93495

Sampling Pump Calibration Check Devices

A primary calibration device, the DigiCal™ Calibrator provides instantaneous calibration for instruments like the MSA Escort LC or the secondary flow standard inside the Escort ELF Sampling Pumps. Just press the plunger and the DigiCal Calibrator does the work. Its unique flow cell replaces conventional bubble tubes and makes calibration easier.

The DigiCal Calibrator achieves extreme accuracy by utilizing a computerized flow meter that provides instantaneous flow readouts on a digital display. Accurate measurements are possible within ± 0.5 percent at any altitude.

For more complete information, see Bulletin 0810-34-MC.

The DigiCal Calibrator makes sampling pump calibration a stress-free, one-step procedure.

Flowmeter for use with Flow-Lite and Escort Sampling Pump with Gemini Twin-Port Sampler, 30 to 370 mlpm	490198

Ventilation Smoke Tube Kits

MSA's Ventilation Smoke Tube Kits are for use where controlled generation of a visible smoke is desired in order to determine the velocity of slow-moving air currents and establish their direction and flow patterns in shafts, mines and tunnels. They can also be used in commercial buildings and industrial processing plants to determine velocity and flow patterns of heating, ventilating, and air-conditioning systems.

For more complete information, see Data Sheet 08-00-20.

Ventilation Smoke Tube Kits

Instrumentation

Calibration

Galaxy® Automated Test System

Extremely Easy to Use

- Standard web browser accessibility for data retrieval and reporting
- Industry-standard memory card available for simple data retention
- System does not require a computer or network interface
- Works without the touch of a single button
- Minimal training needed

Versatile and Expandable

- Up to 10 systems can be interconnected
- Instrument charging option available
- Optional battery pack available for remote use

Durable, Innovative Design

- Wireless- or wired-network interface available
- Inventive system door also functions as dust cover
- Guaranteed to work in the harshest environments
- In-line gas cylinder holster available; keeps the work area clean and orderly

Value-Driven Performance

- All-inclusive, 2-year warranty
- High quality, cost-effective solution
- Very low total cost of ownership

For Assemble-to-Order information, see the Galaxy ATO Chart on p. 99.

Assemble-to-Order (ATO) System: You Make the Choices

The ATO System makes it easy to “custom order” the Galaxy Automated Test System, configured exactly the way you want it. You can choose from an extensive line of base components and accessories. See the ATO chart below to make your selections.

Galaxy Automated Test System Assemble-to-Order (ATO) Options													
A. Test Stand Instrument Type Each Galaxy test stand has a dedicated instrument type. Up to 10 specific systems can be mixed and matched; however, different instruments types will not work in the same test stand. The Solaris® and Orion® Instruments must have datalogging installed to operate with the Galaxy test stand. Note: The Altair Galaxy test stand should only be used with CO, H ₂ S and O ₂ versions of the Altair and Altair Pro Single-Gas Detectors.	<table> <tr> <th>Test Stand Options</th><th>Code</th></tr> <tr> <td>Solaris, Solaris with ALkaline Battery</td><td>A</td></tr> <tr> <td>Sirius</td><td>B</td></tr> <tr> <td>Orion</td><td>C</td></tr> <tr> <td>Altair/Altair Pro</td><td>D</td></tr> <tr> <td>Orion^{plus}</td><td>E</td></tr> </table>	Test Stand Options	Code	Solaris, Solaris with ALkaline Battery	A	Sirius	B	Orion	C	Altair/Altair Pro	D	Orion ^{plus}	E
Test Stand Options	Code												
Solaris, Solaris with ALkaline Battery	A												
Sirius	B												
Orion	C												
Altair/Altair Pro	D												
Orion ^{plus}	E												
B. Calibration Cylinders The Solaris, Orion and Altair Galaxy test stand, by default will operate with 1 calibration gas cylinder. The Sirius Galaxy test stand, by default, will operate with 2 calibration gas cylinders. If your system configuration requires 3 cylinders for calibration, select option "1". Note: If ordering the Orion ^{plus} test stand, option 1 must be selected.	<table> <tr> <th>Calibration Cylinder Options</th><th>Code</th></tr> <tr> <td>No</td><td>0</td></tr> <tr> <td>Yes</td><td>1</td></tr> </table>	Calibration Cylinder Options	Code	No	0	Yes	1						
Calibration Cylinder Options	Code												
No	0												
Yes	1												
C. Regulator At least 1 demand flow regulator is required for either the Solaris, Orion or Altair Galaxy Test Stands. At least 2 demand flow regulators are required for the Sirius Galaxy Test Stand. The number of regulators you need equals the number of gas cylinders required for an instruments calibration.	<table> <tr> <th>Regulator Options</th><th>Code</th></tr> <tr> <td>1 Regulator</td><td>1</td></tr> <tr> <td>2 Regulators</td><td>2</td></tr> <tr> <td>3 Regulators</td><td>3</td></tr> <tr> <td>None</td><td>0</td></tr> </table>	Regulator Options	Code	1 Regulator	1	2 Regulators	2	3 Regulators	3	None	0		
Regulator Options	Code												
1 Regulator	1												
2 Regulators	2												
3 Regulators	3												
None	0												
D. Cylinder Holder The number of cylinder holders should match the number of gas cylinders required for an instruments calibration. Included in this option is the ability to order either 1, 2, or 3 cylinder holders.	<table> <tr> <th>Cylinder Holder Options</th><th>Code</th></tr> <tr> <td>1 Cylinder Holder</td><td>1</td></tr> <tr> <td>2 Cylinder Holders</td><td>2</td></tr> <tr> <td>3 Cylinder Holders</td><td>3</td></tr> <tr> <td>None</td><td>0</td></tr> </table>	Cylinder Holder Options	Code	1 Cylinder Holder	1	2 Cylinder Holders	2	3 Cylinder Holders	3	None	0		
Cylinder Holder Options	Code												
1 Cylinder Holder	1												
2 Cylinder Holders	2												
3 Cylinder Holders	3												
None	0												
E. Instrument Charging If you'd like to have your new Galaxy system installed with the ability to charge your instrument, select "1" for this option. (Requires instrument with rechargeable batteries). Not compatible with Solaris with alkaline batteries, ALTAIR, and ALTAIR Pro instruments.	<table> <tr> <th>Charging Options</th><th>Code</th></tr> <tr> <td>No</td><td>0</td></tr> <tr> <td>Yes</td><td>1</td></tr> </table>	Charging Options	Code	No	0	Yes	1						
Charging Options	Code												
No	0												
Yes	1												
F. Power Supply A power supply is required to power each Galaxy test stand. The global power supply comes with several international plug outlet configurations for countries outside of North America, for this option select "G". Select the battery pack option "B" for locations (includes North American supply) where AC power may not be easily accessible. If you choose the instrument charging option, the battery pack option is not available.	<table> <tr> <th>Power Supply Options</th><th>Code</th></tr> <tr> <td>North American Supply</td><td>N</td></tr> <tr> <td>Global Supply</td><td>G</td></tr> <tr> <td>Battery Pack & North American</td><td>B</td></tr> <tr> <td>Battery Pack & Global Supply</td><td>X</td></tr> </table>	Power Supply Options	Code	North American Supply	N	Global Supply	G	Battery Pack & North American	B	Battery Pack & Global Supply	X		
Power Supply Options	Code												
North American Supply	N												
Global Supply	G												
Battery Pack & North American	B												
Battery Pack & Global Supply	X												
G. Memory Card If you'd like to have a removable memory card installed in your new Galaxy System, select option "1". A memory card reading device is required to read the memory card, this must be entered as a different line item on your order. Only 1 memory card is needed per Galaxy System.	<table> <tr> <th>Memory Card Options</th><th>Code</th></tr> <tr> <td>No</td><td>0</td></tr> <tr> <td>Yes</td><td>1</td></tr> </table>	Memory Card Options	Code	No	0	Yes	1						
Memory Card Options	Code												
No	0												
Yes	1												
H. Network Interface Module For wired (ethernet) connectivity to your internal network, select option "A". For wireless (802.11b) connectivity to your internal network, select option "B". The location where the Galaxy will be installed must have the capability for this option to operate properly. Only 1 network interface module is needed per Galaxy system.	<table> <tr> <th>Network Interface Module Options</th><th>Code</th></tr> <tr> <td>None</td><td>0</td></tr> <tr> <td>Wired Web Interface</td><td>A</td></tr> </table>	Network Interface Module Options	Code	None	0	Wired Web Interface	A						
Network Interface Module Options	Code												
None	0												
Wired Web Interface	A

Instrumentation

Regulators

Gas Miser® Demand Regulator: The Intelligent Regulator

The Gas Miser Regulator is the most advanced, yet simple-to-use calibration gas delivery system available. Made of nickel-plated brass and polished aluminum (especially important for reactive gases), the Gas Miser Regulator can supply gas flow from 0.1 lpm to 3.0 lpm. But that's only the beginning. Designed for use with any MSA Model RP Calibration Cylinder except chlorine and ammonia*, the Gas Miser Regulator features an automatic ON/OFF valve that releases gas only on demand. So only the amount of gas needed to calibrate your MSA instrument is delivered accurately. When the calibration is complete, the Gas Miser Regulator shuts off automatically. And, for user convenience, the regulator can stay connected to the cylinder where it remains in a ready state—making it ideal for such fixed installations as work benches and calibration stations.

The Gas Miser Regulator also eliminates the need to change regulators to accommodate different instruments or flow rates. It's not only intelligent, it's cost-efficient. Supplied with calibration tubing and special fitting.

* A Gas Miser Regulator for chlorine and ammonia is available for Model RP cylinders —P/N 10034391

Gas Miser®
Model RP

Gas Miser®
Model BD-20

Natural Gas Demand Regulator

This low-pressure Demand Regulator is designed to be used with MSA Instrument Calibration Systems to supply 100% natural gas. The Demand Regulator will automatically supply 100% natural gas to the calibrator as required. No adjustments are necessary or provided. Like the Gas Miser Regulator, the Natural Gas Regulator features an automatic ON/OFF valve that releases gas only on demand. Comes complete with (barb type) outlet fitting and easily connects to natural gas supply with W" NPT thread. Recommended for use with pressure of 0.3 to 5.0 psig.

Model RP Combination Regulators

Two regulators in one. Trigger activation allows a bump test or calibration check in the "SQUEEZE" mode or fixed-flow calibration in the up or "LOCKED" position. Designed for use with all Model RP and Econo-Cal calibration cylinders. Supplied with calibration tubing and special fitting.

Gas Miser® Manifold

The Gas Miser Manifold is not only a cylinder holder but it also incorporates a 4-station "bump test" or calibration manifold. It works with Model RP and Econo-Cal cylinders and Gas Miser regulator on any pumped or aspirated instrument. The manifold will supply the correct amount of gas required and will bump test or calibrate up to four instruments simultaneously. Gas Miser regulator sold separately.

.25/1.5 LPM Flow Control Model RP

Model RP Calibration Check Kits

Model RP Check Kits consist of a regulating valve which includes a gauge to measure container pressure, an adapter hose, sensor adapter (where applicable), instructions, and a case fitted with room for two Model RP cylinders of calibration check gas.

Calibration Gas

Each MSA Calibration Gas Cylinder is shipped with an individual copy of a material safety data sheet (MSDS) and an individual copy of a certificate of analysis.

MSA certifies that the gas mixture in calibration gas cylinders was prepared gravimetrically, using NIST traceable weights. The lot number and nominal value of the gas constituents in percent by volume, percent by mass, PPM, or volume are specified on the cylinder. The uncertainty statement of the specified nominal value is also listed.

Note: Reactive gases have an expiration date listed on each cylinder. This is to ensure the highest quality and accuracy for instrument calibration. Most cylinders have an expiration date of 12 months. Check with MSA Customer Service for the exact shelf life of a particular calibration cylinder.

Model RP Calibration Cylinder—Steel, 100% Methane

Contents:	Pressure 1000 psig; approximately 58 liters of pure methane with odorant added to smell like natural gas in all commercial gas lines		
Size: 8-1/2" x 3"	Weight: 1 lb 13 oz	Material: Steel	
Gas Fill	Gas Mixture	Part No.	
Methane	100% Methane	711014	

Model BD-20 Calibration Cylinders

Contents:	Pressure 2200 psig; approximately 552 liters (20 cu ft) of gas at atmospheric pressure		
Size: 25" x 4-1/4"	Weight: 10 lb 9 oz	Material: Steel	
Gas Fill	Gas Mixture	Background	Part No.
Methane	2.5% Methane, 15% Oxygen, 60 ppm Carbon Monoxide,	Nitrogen	710566
	1.45% Methane, 15% Oxygen, 60 ppm Carbon Monoxide	Nitrogen	710565
Air, zero	Air, zero, THC<1 ppm	—	710776

Cylinder Holders

Single Portable Cylinder Holder

The Single Portable Cylinder Holder is designed for use with all MSA Model R and Model RP cylinders. It fits neatly on a workbench or shelf, and its unique design ensures that the calibration cylinder (with the regulator attached) always stays where you put it.

Double Cylinder Holder, Wall-Mounted

The Wall-Mounted Double Cylinder-Holder holds all MSA Model R and Model RP cylinders. A molded base and holding straps keep the cylinders securely in position, yet both cylinders and/or regulators can be easily changed. The holder is ideal for field station calibrations and can be easily mounted for workbench applications.

Cylinder Holders

Single Cylinder Holder, 6" wide x 13" long x 4" high	710386
Double Cylinder Holder, 17" high, 10" wide, 3V" deep at base	710483

Calibration Cylinders Are Recyclable!

MSA has affiliated with the Association of Retarded Citizens, Butler County—a nonprofit organization that employs mentally retarded citizens—and established a Cylinder Recycling Center. The calibration cylinders are not refilled, but salvaged for scrap. All money generated from selling the scrap cylinders is placed in the ARC operating fund for salaries and operating costs.

Calibration cylinders are considered hazardous unless the cylinders are empty. MSA has developed special devalving tools that will ensure the cylinder is empty and render the cylinder non-fillable. For your convenience, MSA also offers a specially pre-addressed shipping box (also recyclable) which helps you pay the lowest shipping costs available.

The MSA Recycling Center limits the return of calibration cylinders to MSA-logoed cylinders only. Non-MSA cylinders will be rejected. Contact the Customer Service Center for additional details at 1-800-MSA-2222.

Head, Eye, Face and Hearing Protection

Head, Eye, Face and Hearing Protection

Your job is burdened with personal hazards. Within a few minutes on the job site, a falling object can split your head open or a piece of grit can destroy your eye, if you aren't wearing a protective helmet and eyewear. What may appear to be bearable loud noise can gradually destroy your hearing—if it repeats many times during your work day. It's smart to outfit yourself automatically before any job begins.

Especially if you work in construction, dust and gritty particles can be projected into your eyes. Falling building materials and projectiles can cause serious injuries or even death.

Maybe you don't think your job is that dangerous. But why take chances when a single accident can change your life?

What do you need?

Protective industrial helmets, or hard hats, are always visible on the job site, particularly where falling hazards exist. Other personal protection can easily be attached to the hard hat to protect the face and ears.

Head protection in the U.S. commonly takes the form of protective helmets, Type I (top impact) or Type II (lateral impact) that meet the requirements of ANSI Z89.1-1997. Type I helmets are designed to protect from top impact and penetration, while the Type II helmets give lateral impact and penetration protection.

At MSA, customization is our specialty. We can decorate your head protection with any company logo or design or even photographic images. V-Gard® Caps featuring your favorite NFL team or Nascar Racing Team drivers/teams or Freedom Series make you stand out in a crowd while protecting your head.

Faceshield frames are designed so that various lightweight plastic and wire-screen faceshields can be quickly snapped into place. MSA's vented Advance® Caps have air ventilation slots in the crown and ratchet suspensions for a secure, comfortable fit. Helmets come in all colors and sizes, with different suspension styles. They are easily personalized with customized logo imprinting and available in special designs, such as your favorite NFL team.

Today's protective eyewear comes in stylish colors, with wraparound lenses that resist fogging and protect from the sun's harmful UV rays. Safety glasses are lightweight and have more flexible temples, more comfortable nose bridges, and side shields. Lenses can be yellow, blue, green, or even reflective-mirrored.

Up-to-date hearing protection—in the form of electronic ear muffs—can add new dimensions in communication and listening to your favorite music while protecting your hearing. Passive ear muffs can be fastened to the hard hat, and raised or lowered on demand. Disposable ear plugs on cords offer an alternative to helmet-mounted ear muffs, because they provide convenience, comfort, and low cost as well as high noise-reduction ratings.

What do you want?

Workers want personal protective equipment that's so reliable, comfortable, and easy to work in that they hardly notice they are wearing it.

Employers, of course, want reliable protection that employees will wear—at economical prices.

To keep employees safe and comply with various government standards, starting with OSHA regulations, employers must be knowledgeable about both the range of potential hazards and the types of safety equipment needed. Fortunately, along with continuous technological improvements in materials and design, every year brings new safety products that are lighter and more comfortable, reliable, and stylish!

Scope of Z89.1 - 2003

American National Standard for Head Protection

The most recent standard was approved in July 2003 and continues to cover requirements for two types of impact-resistant helmets:

1. TYPE I (Top Impact)

Helmets intended to reduce the force of an impact to the top of a wearer's head.

2. TYPE II (Top and Lateral Impact)

Helmets intended to reduce the force of an impact resulting from a blow received off-center or to the top of a wearer's head.

The new standard's performance requirements for Type I and Type II Helmets are equivalent to those specified in the 1998 revision.

Electrical Performance

1. CLASS E (Electrical)

Helmets intended to reduce the danger of exposure to high-voltage electrical conductors, proof-tested at 20,000 volts.

2. CLASS G (General)

Helmets intended to reduce the danger of exposure to low-voltage electrical conductors, proof-tested at 2,200 volts.

3. CLASS C (Conductive)

Helmets not intended to provide protection from electrical conductors.

The electrical performance requirements in the 2003 standard are identical to those in the 1997 standard.

Head, Eye, Face and Hearing Protection

V-Gard® Protective Caps and Hats

Third-party
certified by

SAFETY
EQUIPMENT
INSTITUTE

V-Gard Protective Caps and Hats from MSA consist of a polyethylene shell and suspension system working together as a protection system. V-Gard headwear features advanced styling in either cap or hat styles, with the cap available in three sizes: small (6–71/8), standard (61/2–8) and large (7–81/2).

V-Gard Caps and Hats meet or exceed the applicable requirements for a Type I helmet (top impact) as outlined in ANSI Z89.1-2003, Class E, and also as outlined in CSA Z94.1-2005 (Class E) with 1-Touch® and Fas-Trac® suspensions.

V-Gard Caps and Hats are not specifically designed to protect against lateral blows from the front, side, or rear. MSA's Vanguard™ II Protective Helmets are so designed and must be used if lateral protection is desired. For more information, contact your MSA distributor.

V-Gard®
Protective Cap

V-Gard®
Protective Hat

⚠ WARNING

Do not mix suspension and helmet sizes. Make sure the sizes match (example: standard-size suspension with standard-size helmet). Use only MSA suspensions on an MSA helmet. Failure to comply with the above will reduce the energy-absorbing ability of the protective helmet, which can result in serious injury or death.

Head, Eye, Face and Hearing Protection

Accessories for V-Gard® Caps and Hats

Defender® + Faceshield Frame for Slotted Caps

The Defender + Faceshield Frame for slotted caps is available in three versions (see details in ordering information below). Features of the Defender + Frame include:

- Front-drip-edge splash protection.
- Unlimited number of lift stop positions.
- Long-lasting O-ring pivot-joint design.
- Snap-in ear muff option.
- Easy in, easy out visor replacement.
- Optional cap lockdown clip (V-Gard, Topgard and SmoothDome cap models only).

Defender + Frame

Defender + Frame ,
Sound Blocker 26 Muff Assembly

Defender + Foldback Faceshield Frames (Plastic and Metal)

Plastic Defender + Foldback Faceshield Frames (Cap on Left, Hat on Right)

Metal Defender + Foldback Faceshield Frames (Cap on Left, Hat on Right)

FoldbackFaceshield Frames come in plastic (dielectric) and metal. Both plastic and metal frames come in cap and hat models. These frames can be used with slotted or non-slotted helmets. All frames come without visors.

Defender + Faceshield Frames for Slotted Caps (Less Visor)

Head, Eye, Face and Hearing Protection

Accessories for V-Gard® Caps and Hats

Visors

Choose from a wide variety of visors that fit easily on MSA faceshield frames. **MSA visors are manufactured for use on ONLY MSA frames and assemblies for compliance with ANSI Z87.1 2003.**

Visors should always be worn with primary eye protection such as MSA high impact-resistant spectacles or goggles. Visors should be inspected frequently and replaced immediately if worn, scratched, or damaged in any way. Selection of proper models for specific hazards and communication of all instructions, precautions, and limitations to the wearer is the responsibility of user safety specialists, who are also responsible to see that they are strictly observed. Failure to comply with any of the above could result in serious injury or death.

Approvals

All MSA Visors meet or exceed applicable requirements of ANSI Z87.1 2003.

⚠ WARNING

Do not use MSA visors for welding, elevated temperature applications, or for protection against other infrared radiation sources unless the MSA visor is approved for such applications. Never use any MSA visor for sports, simulated war games, paintball games, or similar activities. A pitted or scratched lens reduces eye protection and vision. Inspect routinely and replace worn or damaged parts immediately. Do not alter or modify this product. Do not use near open flame. Failure to follow these warnings can result in permanent impairment of sight, other serious personal injury, or death.

⚠ CAUTION

Maintenance: clean visor with mild soap and water. Cleaning dry or with coarse cloth will scratch the visor.

Freedom Series™ Helmets

Let Freedom Shine!

Hardhat wearers can express their patriotism and protect their heads by wearing one of MSA's new special series of Freedom caps and hats. The bright designs are exceptionally attractive, with a superior shiny finish, on the V-Gard Cap and Hat shell.

The Freedom Series Caps, which come with MSA's Fas-Trac suspension are lightweight, durable, and comfortable. They meet all applicable requirements of a Type I helmet as outlined in ANSI Z89.1-2003 and CSA Z94.1-2005 (Class E). The helmet's accessory slots accept all MSA V-Gard accessories. Also, your logo can be custom-imprinted on top of the design, if desired.

MSA Sports Logo Helmets

NFL V-Gard® Helmets

Wear them at work, at home, or even at the game. The NFL line of V-Gard Caps with the comfortable strap-adjustable, 1-Touch® suspension offers superior quality, comfort, and protection. NFL V-Gard Caps meet or exceed all applicable requirements for a Type I helmet as outlined in ANSI Z89.1-2003 (Class E) and CSA Z94.1-2005 (Class E). Safety directors will appreciate how NFL V-Gard Caps complement a safety program and improve wearer acceptance.

See our NFL line of spectacles on p. 129.

College V-Gard® Helmets

New!

The College line of V-Gard Caps with the comfortable strap-adjustable 1-Touch® Suspension offers superior quality, comfort, and protection. College V-Gard Caps meet or exceed all applicable requirements for ANSI Z89.1-2003 for a Type I helmet and CSA Z94.1-2005 (Class E).

Safety directors appreciate how College V-Gard Caps complement their safety programs. When more workers are inclined to wear them, wearer acceptance is improved.

Display your loyalty to your favorite college team with MSA's new officially licensed College line of V-Gard Caps.

Head, Eye, Face and Hearing Protection

SmoothDome™ Slotted Cap

*Available in
early 2008!*

MSA's SmoothDome Slotted Cap is a tough, lightweight polyethylene helmet with smooth crown and suspension system working together as a protective system. Its smooth silhouette is welcomed by welders, especially those in shipbuilding and general construction—and some workers simply prefer wearing a smooth-crowned hard hat.

SmoothDome Caps meet or exceed applicable requirements for a Type I (top-impact) helmet as outlined in ANSI Z89.1-2003, Class E (electrical high voltage).

SmoothDome Caps are not specifically designed to protect against lateral blows from the front, side or rear. MSA's Vanguard Type II protective helmets are so designed and must be used if lateral protection is desired. For more information, contact your local MSA distributor.

Custom-Imprinting and Striping Logo Express® Service for MSA Helmets

A variety of MSA helmets are available with your logo, slogan or striping imprinted on the headwear. You can select the colors and the areas to be imprinted. MSA uses both single and multi-color imprinting techniques to provide a choice of up to four colors.

Image 2000SM

MSA offers the Image 2000 Service, which uses a photographic process to reproduce images on white MSA helmets only.

Striping

Ordering Information

A minimum quantity of 20 custom-imprinted caps or hats (of the same size or model) is required for initial and repeat orders.

If you have any questions, please call your local MSA distributor or MSA Logo Express 1-800-MSA-LOGO (1-800-672-5646).

More details are also on our LogoExpress Web site:
www.MSAnet.com/logoexpress

Ceremonial Gold Helmet

New!

MSA's new ceremonial gold helmet allows you to commemorate any special occasion with a treasured keepsake.

- Honor a special employee
- Commemorate a groundbreaking ceremony
- Present as a safety award

MSA's ceremonial gold helmet can be kept as a thoughtful remembrance of any celebration.

Does Not Meet Any Standards

Although this simulated shiny gold plastic hard hat comes with MSA's Fas-Trac Suspension, this helmet does not meet any standards for head protection, and cannot be used as an individual safety helmet. It is for show purposes only.

Head, Eye, Face and Hearing Protection

Advance® Cap: Vented and Non-Vented Styles

Vented Advance Caps provide cooling vents for improved air circulation and comfort, while the **Non-Vented Advance Caps** are appealing to users who want both the new Advance styling AND dielectric head protection. **Advance Caps** from MSA feature a combination of advanced features and styling:

- Vented version for improved air circulation
- Optional 4- or 6-point Fas-Trac suspension system
- Lightweight design for added comfort
- Lateral contours above the ear for easy integration of hearing protection
- Glaregard™ underbrim to reduce reflective glare
- Custom printing available
- Sun Shield available—extends the brim all the way around

Advance Caps consist of a polyethylene shell and 4-or 6-point or Fas-Trac® ratchet suspension that work together as a protective system.

Advance Caps meet or exceed the applicable requirements for a Type I helmet (top impact) as outlined in ANSI Z89.1-2003.

Non-Vented meet Class E and **Vented meet Class C.**

Topgard® Protective Caps and Hats

Topgard®
Protective Cap

Topgard®
Protective Hat

Lightweight, durable Topgard slotted Caps and non-slotted Hats are built for use by utilities and other industries where head protection from falling objects is necessary, along with good dielectric properties (non-conduction of electrical current). Limited resistance to top impact or penetration is retained through a wide range of temperatures.

Topgard Caps and Hats meet or exceed the applicable requirements for a Type I helmet (top impact) as outlined in ANSI Z89.1-2003 and CSA Z94.1-2005, Class E (electrical—high voltage).

Topgard Caps and Hats are not specifically designed to protect against lateral blows from the front, side or rear. MSA's Vanguard Type II protective helmets are so designed and must be used if lateral protection is desired. For more information, contact your local MSA distributor.

For more complete information, see Data Sheet 06-00-02.

For Cap and Hat Accessories, see pp. 118–123.

Thermalgard® Protective Caps

Thermalgard®
Protective Cap

Thermalgard with swing-ratchet suspension

Thermalgard Slotted Caps are lightweight, high-strength helmets intended for use where workers may need a helmet with elevated temperature capability. The injection-molded, rivetless shell of glass-reinforced nylon has a beaded edge for improved rigidity. Slots in the cap provide for mounting hearing protection muffs, welding shields, and faceshields. Thermalgard Caps meet or exceed the applicable requirements for a Type I helmet (top impact) as outlined in ANSI Z89.1-2003, Class G (electrical—low voltage). The Thermalgard Cap also meets CSA Z94.1-2005 (Class G).

Thermalgard Caps are not specifically designed to protect against lateral blows from the front, side or rear. MSA's Vanguard Type II protective helmets are so designed and must be used if lateral protection is desired. For more information, contact your local MSA distributor.

Use only MSA's Fas-Trac Suspension designed for Vanguard II Helmets. Use of any other suspension will reduce the energy-absorbing ability of the protective helmet, which can result in serious personal injury or death.

Canadian Super-V™ Helmets for Lateral Protection

Canadian Super-V Helmets consist of a shell, foam liner, and suspension system working together to provide limited impact and penetration protection in the event of a top or lateral blow to the head, as well as limited protection against contact with high-voltage conductors. Representing the latest generation of protective headwear, Canadian Super-V Helmets are tested for both top and lateral blows. The Super-V Helmet is certified to the CAN/CSA Z94.1-2005 standard, Class E for Type II helmets and meets all applicable requirements of ANSI Z89.1-2003 for a Type I helmet (Class E.)

Head, Eye, Face and Hearing Protection

Comfo-Cap® Protective Headwear

Designed for work in low-ceiling areas

The Comfo-Cap Protective Cap is widely used in the mining industry for head protection. Made of lightweight, tough polycarbonate plastic, the shell helps resist top impacts. Molded cross ridges on the crown provide increased strength and rigidity.

Comfo-Cap Protective Headwear meets or exceeds the applicable requirements for a Type I helmet (top impact) as outlined in ANSI Z89.1-2003, Class G (electrical—low voltage).

Note: The Comfo Cap is not specifically designed to protect against lateral blows from the front, side or rear. MSA's lateral protective helmets are so designed and must be used if lateral protection is desired. For more information, contact your MSA distributor.

Bump Caps

The bump cap is designed for applications in workplaces such as meat packing, food processing, pest control, meter reading, and automotive repair. It protects the scalp by reducing exposure to abrasions and lacerations caused by minor bumps to the head. The key word is “minor” bumps. Bump caps are appropriate **ONLY** for work situations which do **NOT** require ANSI-compliant head protection. Contact MSA if ANSI-compliant head protection is needed.

Features & Benefits

- Plastic cap: Provides scalp covering to reduce exposure to abrasions and lacerations due to minor bumps
- Molded from high-density polyethylene: Durable
- Perforated sides: Allows cross ventilation for better air circulation
- Adjustable sizing 6½ to 8: Accommodates different head sizes, easy to use
- Cool and lightweight: Comfortable
- Smooth surface: Easy to clean
- No replacement parts

Custom Imprinting

- One-color imprinting available

Applications

- Designed for work in areas such as pest control, meter reading, food/beverage processing, meat packing, auto repair.

⚠ WARNING

These bump caps are **NOT** safety helmets and do **NOT** meet OSHA nor ANSI requirements for head protection. **DO NOT USE** as sport safety helmet. **DO NOT USE** when ANSI-compliant head protection is required or needed.

Hat, less visor	10005383*

Metal Defender + Universal Foldback Faceshield Frames

Cap, less visor	488160
Hat, less visor (works with all MSA helmets except Topgard)	488159
Cap, special frame for Skullgard cap ONLY	10079072

*Meets CSA Z94.3.

⚠ WARNING

Do not use metal Foldback Faceshield Frame in electrical applications. Failure to follow this warning can result in serious injury or death.

Approvals

All MSA Faceshield Assemblies and Visors meet the applicable requirements of ANSI Z87.1-2003.

⚠ CAUTION

All faceshield assemblies must be worn with Z87.1 high impact eye protection such as spectacles or goggles.

Head, Eye, Face and Hearing Protection

New!

Defender + Easy Release Faceshield Frame

- To be used only with MSA slotted cap muffs
- Front drip-edge splash protection
- Unlimited number of stop positions
- Long-lasting, O-ring, pivot-joint design
- Easy-in, easy-out visor replacement
- Optional cap lockdown clip (V-Gard, Topgard and SmoothDome Cap models only).

Easy Release Frame with XLS Hearing Protection

Chip Arrester (Optional)

Wearers can choose the optional bright orange stretch nylon Chip Arrester with elastic. The Chip Arrester attaches to the frame on five points and helps to keep debris from falling behind the frame when the frame is raised over the hardhat.

Chip Arrester

Defender + Easy Release Faceshield Frames (Less Visor)

Defender+ Easy Release Frame for standard V-Gard cap, with lockdown clip, Black	10080783
Defender+ Easy Release Frame for Topgard cap with lockdown clip, Black	10080784
Non-locking Defender+ Easy Release Frame, Black	10080785
Defender+ Easy Release Frame for standard V-Gard cap with lockdown clip, Hi-Viz Orange	10080786

Chip Arrester (Optional)

Chip Arrester, Hi-Viz orange	10080794
------------------------------	----------

Easy Release Frame with HPE Hearing Protection and Chip Arrester

Approvals

All MSA Faceshield Assemblies and Visors meet the applicable requirements of ANSI Z87.1-2003.

⚠ CAUTION

All faceshield assemblies must be worn with Z87.1 high impact eye protection such as spectacles or goggles.

Defender + Faceshield Assemblies

No Hardhat Required – Meet Z87.1-2003

Defender + Assembly with Visor and Chinguard (Nitrometer)

Defender + Assembly with Ratchet and Extended High-Temp Sparkgard

Use where no hard hat is required. They are available in three versions and all adjust to head sizes 6 1/2 to 8. The extended high-temp Sparkgard is for use in temperatures up to 250°F.

Defender + Faceshield Assemblies (Less Visor)

Defender + Faceshield Assembly, standard Sparkgard, pin-lock suspension, less visor	10021610
Defender + Faceshield Assembly, standard Sparkgard, ratchet suspension, less visor	10021611*
Defender + Faceshield Assembly, extended Polycarbonate Sparkgard [for Elevated-Temp], ratchet suspension, less visor	10021612

*Meets CSA Z94.3.

Approvals

All MSA Faceshield Assemblies and Visors meet the applicable requirements of ANSI Z87.1-2003.

⚠ CAUTION

All faceshield assemblies must be worn with Z87.1 high impact eye protection such as spectacles or goggles.

Head, Eye, Face and Hearing Protection

MSA Visors

Choose from a wide variety of visors that fit easily on MSA faceshield frames.

Visors should always be worn with primary eye protection such as high impact-resistant spectacles or goggles. Visors should be inspected frequently and replaced immediately if worn, scratched, or damaged in any way. Selection of proper models for specific hazards and communication of all instructions, precautions, and limitations to the wearer is the responsibility of user safety specialists, who are also responsible to see that they are strictly observed. Failure to comply with any of the above could result in serious injury or death.

Approvals

Most MSA Visors meet or exceed applicable requirements of ANSI Z87+ (high impact).

⚠ CAUTION

Maintenance: clean visor with mild soap and water. Cleaning dry or with coarse cloth will scratch the visor.

⚠ WARNING

Do not use MSA visors for welding, elevated temperature applications, or for protection against other infrared radiation sources unless the MSA visor is approved for such applications. Do not use for sports, simulated war games, paintball games, or similar activities. A pitted or scratched visor reduces eye protection and vision. Inspect routinely and replace worn or damaged parts immediately. Do not alter or modify this product. Do not use near open flame. Failure to follow these warnings can result in permanent impairment of sight, other serious personal injury, or death.

Head, Eye, Face and Hearing Protection

Cap and Hat Accessories

Hearing Protection—Sound Control™ Cap and Hat Models

EXC cap model

HPE cap model

XLS cap model

Soprano Muff for hats

Sound Control Cap Models are designed for easy attachment to slotted MSA Caps and help to reduce the effects of excessive noise. **HPE, EXC, XLS Noise Reduction Rating may vary depending on MSA helmet used.**

Sound Control Cap and Hat Models

For use with Slotted Caps Only

HPE cap model complete with brackets	10061272
EXC cap model complete with brackets	10061230
XLS cap model, complete with brackets	10061535

For use with Non-Slotted Caps Only (Comfo/Skullgard Caps)

Sound Blocker 26 cap model (NRR 26)	10022021
-------------------------------------	----------

For use with all Full-Brimmed Hats

Soprano Muff Kit for Full Hats (NRR 25)	10034487
---	----------

For use with Defender + Faceshield Frame

Sound Blocker 26 cap model (NRR 26)	10026398
-------------------------------------	----------

Sun Shields

V-Gard Sun Shield

Topgard Sun Shield

Sun Shield extends the brim all the way around to help protect wearer's ears and neck from sun's rays. Made of polyurethane (front portion is Lexan, smoke tint).

Sun Shields

Sun Shields for V-Gard Caps and Hats

Sun Shield for Standard V-Gard Cap only	697290
Sun Shield for V-Gard Hat only	697410

Sun Shield for Advance Cap

Sun Shield for Advance Caps only	10039114
----------------------------------	----------

Sun Shields for Topgard Caps and Hats

Sun Shield for Topgard Cap only	697373
Sun Shield for Topgard Hat only	697410

Sun Shields for Vanguard II Caps

Designed for Vanguard II only	10005886
-------------------------------	----------

Goggle Retainers

MSA's Goggle Retainers are designed for applications where goggles must be worn with helmets. The non-metallic retainer can be worn on most MSA protective headwear meeting ANSI Z89.1 requirements without changing the headwear's dielectric qualifications (protection against electric shock) as long as goggle used is dielectric.

Chinstraps

Custom Terri-Band Sweatband

Custom design fits all MSA helmets. Washable and has plastic snaps.

Helmet Lights and Slot Adapters

Stealthlite & Light Holder for Slotted Caps

VersaBrite II Light

MSA offers three helmet lights that fit into our special cap or hat adapters. All of the lights are FM and CSA-approved for intrinsic safety, and are non-incendive.

Helmet Lights and Slot Adapters

VersaLite Helmet Light with 2 AA alkaline batteries	697259
Stealthlite Helmet Light (batteries not included)	697261
VersaBrite II Helmet Light with 2 AA alkaline batteries	697417
Light holder for slotted Cap—no metal parts	814322
Light holder for non-slotted Hat —May reduce the dielectric properties when bracket is attached.	814323

Helmet Light Replacement Parts

Standard lamp module for the Versalite	697357
Standard lamp module for the Stealthlite	697356
Hi-Performance lamp module for the VersaBrite II	697418

Other Cap and Hat Accessories

Custom Terri-Band Sweatband (single)	10068911
Custom Terri-Band Sweatband (pkg of 10)	696688
Goggle Retainer for protective caps, less goggles	459458
Goggle Retainer for protective hats, less goggles	449895
Chinstrap, plastic (attaches to the shell)	88128
Chinstrap, elastic (attaches to the suspension)	81391
Two-point chinstrap (for Vanguard II only)	804630
Three-point chinstrap (for Vanguard II only)	804629
Hard hat rack for back of car seat	696389

Head, Eye, Face and Hearing Protection

Adapter Kits for Welding Shields and Defender® + (Plus) Assembly

Plastic Instant-Release for Welding Helmet

Defender + Faceshield Frame with Instant-Release

Kits permit the easy attachment of Welding Shields and SparkGard Faceshields with visors to MSA's helmets.

EC Adapter (left) and Sparkgard (right)—use plastic or metal Instant-Release with Sparkgard

Metal Instant-Release Attachment

Welding Adapter Kits

Standard Adapter for Welding Helmets and Sparkgards	488525
EC Adapter Kit (positive positioning type)	806211
Sparkgard only	456568

Plastic Instant-Release Attachment*

Instant-Release and lugs for slotted caps	10036456
Instant-Release, less lugs, for slotted caps	10039111

*Note: Cannot be used on Vented Advance Caps.

Defender+ Frame with Instant-Release Attachment

Defender + frame for slotted cap, without lock-down	10037098
---	----------

Metal Instant-Release Attachment

Instant-Release and lugs for slotted caps (A, B, C, D, E, F, H)	485460
Lugs only, for instant-release slotted caps (H)	468771
Instant-Release and lugs for non-slotted caps, with stop (A, B, C, D, E, F, G)	91385
Lugs only, for instant-release non-slotted caps (G)	48733
Instant-release, less lugs, with stop (A, B, C, D, E, F)	456667
Friction joints, pair (A, D, E, F)	93631

Instant-Release Attachment

Welding Shields, Goggles and Accessories

MSA's thermal plastic welding shields protect a worker's eyes and face from infrared burns, flying sparks, hot metal spatter and chips encountered in welding operations. The nylon welding shields come in a variety of styles. When protection from overhead hazards is required.

For shade 5 welding visors, see p. 120.

For shade 5 welding spectacles, see p. 128.

Sightgard Welding Plates

Polycarbonate Plates

Meet ANSI Z87.1 2003 (high impact).

Plate Size (in.)	Shade	Part No.
2 x 4 1/4	5	791923
2 x 4 1/4	10	791928

Coated silver, slim-line, coated lift front	695941
Coated silver, full-curved, lift front	695889
Plate Size 4 1/2" x 5 1/4"	Part No.
Coated silver, slim-line, fixed front	695888

Head, Eye, Face and Hearing Protection

ClearCommand® HCS Helmet Communication System

For ordering information, see p. 55.

The Helmet Communication System from MSA is a state-of-the-art radio interface device which significantly improves the user's ability to receive and send messages even in loud ambient-noise environments. It goes wherever you go. The system consists of a helmet-mounted microphone and ear speaker assembly that weighs 5.3 ounces and easily snaps onto the user's industrial-style helmet's ratchet suspension.

Features and Benefits

- Easily snaps onto the ratchet suspension of industrial-style helmets. The unit can be easily transferred to other users, and no tools are required for removal.
- The bone-conduction microphone is made of soft silicone material, which makes it comfortable to wear, with no pressure points.
- The helmet microphone assembly can be reversed on the helmet suspension to position the ear speaker on either ear.
- The helmet mic system, when used with the lapel mic or PTT, is powered by the battery from the radio. No need to replace or re-charge dry cells.

Winter Liners

Standard Winter Liners

Regular One-piece, two-ply Zero Hood® Liner

Standard—Velcro adjustable chinstrap and no metal parts	86092
---	-------

Extended-neck Zero Hood Liner

One-piece, two-ply winter liner; extended neck tucks into coat or jacket collar; nonmetallic Velcro-adjustable chinstrap	88587
--	-------

Flame-retardant Zero Hood Liner

Standard—For use in high-heat areas or around flames; durable flame-retardant cotton with Nomex binding and chinstrap; does not contain any metal parts. Meets Fed Spec #191 Method 5903	802439
--	--------

Flame-resistant two-piece Velcro closure Zero Hood Liner

No metal parts; the two pieces are joined by non-metallic Velcro closures; knit ear lugs with Velcro closure	696473
--	--------

Zipper-type Zero Hood Liner with knit lugs to fit over ear muffs

Two-button front, ribbed-knit neckpiece attaches by metal zipper to crown-piece; knit ear lugs will fit over noise-attenuating ear muffs. [Caution: Liners that contain metal parts will have an effect on electric classifications.]	10087241*
---	-----------

Knit Cap Liner

No chinstrap or other attachment; made of Orlon material [Caution: Should not be used around open flames, sparks or molten metal.]	34929
--	-------

Stretch Winter Liner

Mounts over the brim of a hard hat but can be adjusted to cover the neck and ears; made of Orlon material. [Caution: Should not be used around open flames, sparks or molten metal.]	695350
--	--------

EC Winter Liners

Economy Liner

Flame-retardant shell w/soft-napped interior; adjustable Velcro chinstrap; and three-button loop straps	697116
---	--------

Standard Winter Liner

Universal size. Two-ply liner w/flame-retardant shell; soft lining; adjustable Velcro chinstrap; and three-button loop straps	697117
---	--------

Extended-Neck Liner

Extended-neck; two-ply liner w/flame-retardant shell; soft lining; adjustable Velcro chinstrap; and three-button loop straps	697118
--	--------

Extra Warm Quilted Fleece Liner

Green nylon tricot shell; quilted w/foam; soft fleece lining	697119
--	--------

Head, Eye, Face and Hearing Protection

Sightgard® Single Lens Goggles

Softframe Single Lens Goggles

Softframe Perforated Single Lens Goggles

Softframe 4-Vent Single Lens Goggles

Softframe Goggles effectively fit most facial contours. Large, one-piece, .060-inch-thick polycarbonate lens provides wide, undistorted field of vision. Optional Anti-Fog Coated Lenses are available for work involving high humidity, temperature changes or greater worker exertion. The scratch-resistant coating is unaffected by most organic solvents, ammoniacal and alkaline detergents.

Approvals

Softframe, Clearvue, Respirator, and Rubber Frame Goggles by MSA meet all applicable requirements of ANSI Z87.1-2003—high impact (except Wire Screen Goggles).

Goggle Retainers

Sturdy neoprene-rubber accessory can be used with any protective cap or hat. Retains goggle on headwear when not in use and holds goggle securely when worn for eye protection.

Goggle Retainer only, for Protective Hats	449895

*Meets CSA Z94.3.

Respirator Goggles

Softframe 4-vent Respirator Goggles by MSA are specially constructed to wear with MSA respirators and have a .060-inch-thick anti-fog clear lens.

Wire-Screen Goggles

Wire Screen Goggles feature a clear nonvented frame, wire lens, and elastic headband.

Clearvue® 200 Goggles

These goggles feature an integrated-frame design and a flexible, rolled-in cushion at the temples which provides comfort without tension or pressure points.

Rubber Frame Goggles

For use where fine dust in high-velocity concentration is a problem and where minor impact hazards exist.

Head, Eye, Face and Hearing Protection

The Sightgard® Line of Protective Eyewear

Sightgard Industrial Protective Eyewear is designed for protection against impact hazards and/or flying particles, dust, sparks, and glare. Sightgard Industrial Protective Eyewear provides excellent side- and front-impact protection while still being comfortable to wear. For more information, see Bulletin 0305-22-MC.

Approvals

All Sightgard Industrial Protective Eyewear meets ANSI Z87.1 – high impact. Selected eyewear meets CSA Z94.3 (indicated by *).

Easy-Flex™ Protective Eyewear

Flex for a Comfortable Fit

- 99% UV protection

Head, Eye, Face and Hearing Protection

Passive Hearing Protection

Guarding workers against the daily hazards of noise is of paramount concern in countless industries. The challenge is to balance personal attenuation devices with comfort. A worker who takes off hearing protection to rub sore ears is a worker at risk. MSA provides a wide selection of hearing protection designed for the most demanding applications, offers protection with a variety of Noise Reduction Ratings, and does it with the benefits of style and comfort. Noise Reduction Rating (NRR) is third-party certified in accordance with ANSI S3.19-1974, EN352 and meets CSA Class A. Cap Model Noise Reduction Ratings listed below are for medium V-Gard helmets only. Noise Reduction Rating and Attenuation Values for MSA Topgard, Advance, Thermalgard, Vanguard II, Wildland T and Super-V slotted helmets may vary. Contact MSA for more information.

Passive Hearing Protection

HPE—headband model	10061271

HPE Muff (NRR – 26dB) HPE Cap Model (NRR – 27dB)

Designed specifically for very high noise levels, the powerful Muff/Cap Model is ideal for airfields, power plants and other areas with intense noise. The HPE Muff/Cap Model provides the highest-rated protection available for low-frequency environments. A padded headband and super-soft ear cushions guarantee all-day comfort while ensuring full-time protection.

EXC Muff (NRR – 24dB) EXC Cap Model (NRR – 25dB)

The ear muff is so comfortable that you always want to wear it. Unique injection molded inserts provide excellent attenuation and maximum space for the ears inside the cap. Headband model offers force adjustment for individual fit. The helmet-mounted version has a spring design that offers low pressure tension and a high level of comfort.

XLS Cap Model (NRR – 23dB)

Designed to fit comfortably under safety hardhats and faceshields, it features easy-to-remove ear cushions for quick cleaning and replacement. The XLS Muff offers aggressive protection in low-moderate noise environments.

Head, Eye, Face and Hearing Protection

Soprano™ Muff (NRR-25dB) for Hats

Designed to fit all full brim hats, the Soprano Muff provides high-level hearing protection. (The Muff reduces helmet class to **Class "C"**.)

Economuff™ Line

Economuff Earmuff (NRR – 20dB)

The Economuff Earmuff comes with the features you expect from MSA hearing protection. Comfortable ear pads ensure all-day wearing without fatigue, and the durable design provides protection in tough, dirty environments. Lightweight at just 8.0 ounces.

Economuff Multi-Position Earmuff Over-the-Head (NRR – 24dB)

Behind-the-Head and Under-the-Chin (NRR – 23dB)

The Economuff Multi-Position Earmuff comes with comfortable ear pads and padded headband to ensure all-day wearing without fatigue, and the durable design provides protection in tough, dirty environments.

- Extremely lightweight
- Multi-position (over head/under chin/behind head)
- Includes crown strap

Comfort Band™ Hearing Protector (NRR – 23dB)

Designed to be worn under the chin, the MSA Comfort Band Hearing Protector is made with soft, easily cleanable pods and a durable plastic neck band. While not in use, the Comfort Band Hearing Protector can be left resting around your neck.

Sound Blocker™ 26 Hearing Protection (NRR – 26dB)

Designed for high noise areas such as industrial plants and construction sites, the Sound Blocker 26 comes in two models, one for use with the Defender faceshield frame and a non-slotted cap model.

FormFit Disposable Molded Urethane Foam Ear Plugs (corded) Dispenser Box of 200 individually packaged pairs	10051347

* Tested on Comfo and Skullgard Helmets.

Reusable Ear Plugs

Tri-Seal™ Reusable Silicone Ear Plugs (NRR – 25dB)

Ruggedly designed, made of soft, comfortable silicone, these reusable ear plugs are easy to insert in the ear and economical. They offer protection comparable to many MSA earmuffs. Tri-Seal corded plugs are available in dispenser boxes of 100 individually packaged pairs.

Disposable Ear Plugs

FormFit™ Disposable Foam Ear Plugs

For users who prefer to dispose of their plugs after each use, the FormFit plug is the answer. Easy to use and affordable, FormFit ear plugs offer very aggressive noise reduction while being very comfortable to wear. Available in corded and uncorded versions, in dispenser boxes of 200 pair.

Head, Eye, Face and Hearing Protection

Electronic Hearing Protection

Guarding people against the daily hazards of noise is of paramount concern in countless industries. The challenge is to balance personal attenuation devices with comfort and the ability of communication and listening to music, so that workers will wear their hearing protectors all the time. With over 40 years of experience, MSA now offers a new wide range of hearing protectors with built-in electronics—from basic functions to high-specification communication devices. You have the choice between headband and helmet-mounted versions. All products are comfortable hearing protectors, designed to prevent you from feeling isolated, thereby encouraging you to use them and so protecting your hearing for the rest of your life. Noise Reduction Rating (NRR) is third-party certified in accordance with ANSI S3.19-1974 and EN352-3. Also meets CSA Z94.2.

Basic and Pro Line

The line features standard and advanced electronics with a very good price-to-performance ratio. Built-in features, such as FM and CutOff are optional.

CutOff Slotted Cap Model on Advance Cap

ListenOnly Basic Headband Model

ListenOnly Basic Headband Model (NRR – 24dB) ListenOnly Basic Slotted Cap Model (NRR – 22dB)

External connection to CD, MP3-player or scanner

- Connection lead with 3.5 mm stereo jack included (fits most CD and MP3-players, etc.)
- The cable can be removed easily when not needed

FM Pro Headband Model

FM Pro Headband Model (NRR – 24dB) FM Pro Slotted Cap Model (NRR – 22dB)

Built-in radio receiver—stereo

- Scan stations automatically
- Memory for last selected station and volume
- Automatically switches off to save batteries
- Battery life of 120–140 hours

CutOff Pro Headband Model

CutOff Pro Headband Model (NRR – 24dB) CutOff Pro Slotted Cap Model (NRR – 22dB)

Built-in level dependent function protects without your feeling isolated

- Lets through speech and other harmless sounds while protecting you from harmful noise
- Battery life of 1000 hours
- Amplification of weak sounds
- Auxilliary input for connection of external devices

Head, Eye, Face and Hearing Protection

Protection and communication with the Connect by Cable Series

Effective noise attenuation and amplification at the same time

Connect By Cable

A comfortable hearing protector equipped with a hard-wired lead (3.5 mm) and boom microphone.

- The standard Connect by Cable model comes with a hard-wired cable for connection to an MSA Push-To-Talk, or lapel microphone (No noise cancelling)
- Noise-cancelling boom microphone permits two-way communication with minimal interference from background noise
- Headband version comes with padded headband with adjustable pressure
- Muffs come with a hard-wired 3.5 mm cable adapter
- All MSA Helmet Communication System adapters will work with these muffs

Safety Vests, Cones and First Aid

MSA's new first aid products and safety gear are made of the best materials. Our reflective safety vests offer high-end reflective materials that make a big difference in visibility on the road. Our superior line of products now includes safety cones that have undergone extensive environmental, solvent and stability testing. They will stand up to harsh winter weather on the highway as well as the high heat and UV exposure of a bright summer day. Our First Aid Kits are made to withstand the rigors of your job site.

Class II Safety Vest

- Meets ANSI Class II Vest requirements for traffic up to 50 MPH
- Unique integral back pocket storage for when vest is not in use
- Horizontal and vertical stripes for excellent visibility even when bending
- Popular high-viz lime green color stands out better around orange traffic barriers

Class II Safety Vest

High Visibility Safety Vest

- One size fits all to accommodate most wearers
- Hook and loop closures keep vest closed
- Elastic straps automatically adjust to waistline

High Visibility Safety Vest

Reflective Safety Vest

- Reflective stripes provide increased visibility
- Hook and loop closures keep vest closed
- Elastic straps automatically adjust to waistline

Reflective Safety Vest

Safety Cones

- Available in 12", 18" or 28" sizes
- One-piece molded to help prevent cracking

62-Piece First Aid Kit

- Small, and yet content-rich kit
- Ideal for job, home or workshop use
- 10-person kit contains 62 pieces of first aid supplies
- Latex-free kit contents
- Includes instant cold compress
- Sturdy plastic, compact carrying case with handle

160-Piece First Aid Kit

62-Piece First Aid Kit

160-Piece First Aid Kit

- Exceeds ANSI Z308.1-2003 Standard requirements for Type II First Aid Kit
- Dispenser tray helps keep contents organized
- Includes major wound bandage and instant cold pack in an attractive translucent carrying case

MSA Paraclete® Tactical Body Armor

NEW!

MSA Paraclete Releasable Modular Vest

The Releasable Modular Vest (RMV) with patented release feature was designed for specialized military applications and is now available for your tactical teams. Activating the release feature allows the armor to be removed immediately for quick escape or administration of medical care. Law enforcement personnel benefit from the following features:

- Patented single-point release feature can be mounted on either side of the vest.
- Full Molle-style grid webbing compatible with our pockets, and military issue Molle / Spear pockets.
- 07 version includes low-profile flat-front Molle grid with no closure hardware
- The drag strap is sewn the full length of the vest.
- Integrated drink tube and communication channels located on each shoulder.
- The zip-off back panel allows the user to easily change the configuration of the back of the vest.
- Hook & loop closure allows rapid access to the internal armor plate pockets and the soft armor package.
- 10" x 12" rifle plate pockets
- Built-in side plate pockets for 6" X 6" hard plates.
- Mil. Spec. materials

MSA Paraclete Modular Vest Light

The Modular Vest Light (MVL) is designed for the professional that wants the lightest weight vest carrier possible, yet still offers unsurpassed quality and reliability.

Modular Expandability

Modular Pouches and Accessories

The MSA Paraclete line of pockets ensures that you will have flexibility at the team, individual, and mission- specific level. Our modular pockets and pouches includes a patented attachment system that negates the need for clips, snaps, plastic tie downs, and cordage. The attachment device is permanently affixed to the equipment assembly, so it cannot be lost or otherwise separated from the pocket, pouch, or holster. This system will not rust or become unserviceable even under the most extreme environmental conditions, and it maintains its flexibility in frigid climates. It's as easy to use as simple basket-weaving. No other tactical modular attachment system in the world today can compare with its simplicity, durability, and flexibility.

ForceField® Tango Tactical Armor

ForceField Tango Tactical Armor

Your tactical applications demand the same reliability and flexibility that's demanded of you.

You get flexibility and durability and more from MSA's ForceField Tango Tactical Armor. This side-opening modular tactical platform integrates key features to satisfy your needs for protection, versatility, and comfort.

Safety and protection:

- Side-opening ballistics panel with a "no-hardware" clamshell-style front closure for fast, easy donning and doffing
- Overlapping ballistic shoulders for better comfort and length flexibility
- Removable ballistic upper arm and collar, removable front yoke throat protection, and pull-down ballistic groin protection

Versatility and comfort:

- Rugged Cordura Nylon construction
- A full array of webbed Molle-style pocket-type attachments for ammunition, side arms, protective equipment and supplies to meet the needs of your mission
- Internal cummerbund (belly band) for added comfort and stability
- Integrated routing for communication cables and hydration tubes
- Rubberized textured shoulders for weapon stability

ForceField® Alpha Concealable Body Armor

You can rely on MSA's concealable body armor—the ForceField Alpha Concealable Vest—for maximum comfort without sacrificing ballistic coverage. Our sizing, style, and inventive design features will raise your expectations of what a ballistic vest can—and should—be.

The Armor-Latch™ Closure enhances body coverage and boosts your confidence while contributing significantly to the comfort of your full-wrap body armor.

Your one-handed “forward pull” adjustment easily secures a front-to-back panel overlap, automatically aligning front and back panels for proper side coverage and comfort. The aligned solid closure also permits independent movement of the front and back armor panels, so you have greater mobility.

Available Colors: Black, Blue, White and Olive Green

See the ATO (Assemble-to-Order) chart on p. 141 for more ordering options.

ForceField® Bravo Concealable Body Armor

The ForceField Bravo Concealable Carrier Assembly is your choice for traditional styling, low profile comfort and protection. The ForceField Bravo incorporates MSA's unique Flex Panel Sizing for optimal coverage and full panel convertibility with the MSA Alpha Vest.

- Poly/cotton outer shell for durability, a low profile and concealability.
- Woven nylon, mesh liner to provide the officer with comfort and moisture management over a wide range of temperatures.
- Four- or six-point flexible adjustment.
- Fully removable straps.
- Flex Panel Sizing.
- Fully hidden hook and loop closure for easy panel removal and insertion.

Available Colors: Black, Blue, White, Olive Green and Tan

ForceField® Echo Armor System

NEW!

The ForceField Echo Armor System is a concealable ballistic vest with exclusive side closure to ensure front-overback panel overlap. Built for comfort and safety, it offers extra-wide shoulder straps and a choice of ballistic packages.

MSA's ForceField Echo Carrier features:

- MSA's exclusive, patent-pending Armor-Latch side closure
 - Improves user safety by ensuring that the front panel overlaps the back panel
 - Quickly and comfortably adjusts, with a natural forward-pull motion
 - Secures panels in place while maintaining independent movement of front and back panels
- Advanced Microfiber rip-stop outer-shell material
- Very wide removable shoulder straps to enhance load-bearing comfort
- Easy accommodation of male and female sizing and vest panels
- Standard colors: black, white, navy blue, and tan

MSA ForceField Echo Armor System			
Part No.	Size	Color	Vest Description (sample carriers only, no ballistics)
10083542	Small	Black	ForceField Echo, Male
10083543	Medium	Black	ForceField Echo, Male
10083544	Large	Black	ForceField Echo, Male
10083545	X-Large	Black	ForceField Echo, Male
10083546	Standard	Black	ForceField Echo, Female

IMPORTANT: Order your customized configuration with ballistics using MSA's exclusive Assemble-to-Order (ATO) matrix on p. 141. Please provide color, sizes, and ballistic information on order.

Lightweight Outer Carriers

NEW!

- The **OPC-100 (Outer Patrol Carrier)**, a general-duty external carrier with multiple sewn-in utility pockets and pouches. Large utility pockets include elastic to hold utility items. Includes handcuff pouch, flashlight loop, and small utility pockets.
 - The **EMS (Emergency Medical Services) Carrier**, similar to the OPC-100 Carrier but provides larger utility pockets, reflective trim and color variations to accommodate emergency medical services and other specialty applications.
 - The **Delta LTC (Lightweight Tactical Carrier)**, a similar externally worn carrier with front and back pockets accommodating rifle plate sizes of up to 10" x 12". Also included is an integrated webbed MOLLE-style grid.
- Lightweight outer carriers allow the use of MSA Concealable Armor panels in an externally worn vest
 - Adjustable shoulder harnesses loop to rear panel with pull-down adjustment
 - Side closure via overlapping hook-and-loop ensures front-over-back panel position
 - Internal cummerbund-style elastic closure provides stability and comfort
 - Front and rear hook-and-loop fields and badge holder provides for identification placement

Lightweight Outer Carriers					
	Color	Small	Medium	Large	X-Large
OPC-100 (Outer Patrol Carrier)	Black	10078711	10078712	10078713	10078714

Delta LTC (Lightweight Tactical Carrier)	Black	10078719	10078720	10078722	10078722

See the ATO (Assemble -to-Order) chart on p. 141 for more ordering options.

Ballistic Packages

All ForceField ballistic packages are certified to NIJ 0101.04. In addition to ballistic certification requirements conducted at independent laboratories, MSA's advanced R&D center conducts our own materials testing, accelerated aging, and conditioning as well as ballistics testing at our in-house state-of-the-art ballistics laboratories.

ForceField XTG Series

Materials: Kevlar XLT and Goldflex

MSA's XTG Series features KEVLAR® Comfort XLT™ Fabric, the latest ballistic technology from DuPont™ Kevlar®. This technology provides lightweight protection and comfort. Honeywell's GoldFlex Aramid laminate provides excellent mobility and stopping power.

ForceField K129 Series

Materials: 100% Woven Kevlar® 129 Fabric

The K129 Ballistic series provides confidence you need on the job. Consisting of 100% woven Kevlar® 129 Aramid Fabric, the ForceField K129 Series fits most budgets with outstanding ballistic performance.

See specifications for details.

ForceField® ACH Advanced Combat Helmet

Superior ballistic and high-speed frag protection plus comfort

The MSA Advanced Combat Helmet was originally developed for the U.S. Military Special Operations Command, meeting stringent requirements and unprecedented demands, and setting new performance standards. The ACH has been credited with "taking the bullet" and saving several soldiers' lives during combat, and was named one of the 10 Best Inventions of 2002 by the US Army Material Command.

Now MSA's ACH, battle-tested in Iraq and Afghanistan, is available for YOU in Law Enforcement, enhanced to meet your advanced handgun specification. MSA's ForceField Advanced Combat Helmet delivers the best impact protection, stability, and comfort available.

ForceField ACH Specifications

Supreme Pro™ High Noise Communication Systems

The Supreme Pro Communication System integrates with ballistic helmets providing unobtrusive communications and hearing protection in areas of loud impulsive sounds, such as areas where weapons may be fired. The system protects your hearing while enabling clear radio communications. Cup-mounted microphones enhance user situational awareness, allowing

the user to hear ambient sounds within the environment while protecting your hearing. The communication system is used as either as a stand-alone headset or with MSA's ForceField ACH, Millennium CBRN Gas Mask and eyewear. This noise-canceling boom microphone-based system interfaces with various police radio transceivers and intercom systems.

- Hands-free monitoring
- Functional with gloved hands
- Connects to communication radios via MSA's TacPTT
- Two-way communication with minimal background noise interference
- Lightweight, comfortable, and easy to use
- Superior hearing protection and amplification

NEW!

Supreme Pro Neckband Style

TacPTT

A Push-To-Talk assembly is made available for integration with the upper headset assembly. Methods of affixing the PTT assembly to BDUs or protective vests will include military spec hook and loop fastener materials, a mil-spec steel alligator-style clip or velcro. Other options and accessories will be made available including both water-resistant headset inline quick disconnects and remote finger PTTs.

Making Safety as Easy as 1, 2, 3...

1 HARNESS

What do I want?

Comfort. You want the perfect fit. To ensure a perfect fit, harnesses are available in different sizes. A standard size will fit most workers. See sizing selection chart to determine the best size for you.

Ease of Use. You want a harness that is easy for you to get into and adjust. Harnesses are available in primarily two styles:

- **Vesttype (vest style).** A Vesttype harness is put on like a jacket.
- **Pullover (cross-chest).** A pullover harness is put on over the head, similar to putting on a sweater.

The choice on style is a matter of personal preference.

There are also different types of **leg strap connections** available on a harness:

- **Qwik-Fit** (mating buckle)
- **Tongue Buckle**

Both styles offer fast and easy connection and adjustment. *The choice of leg strap connections is a matter of personal preference.*

You also have a choice of **D-Ring configurations** on a harness: Back D-rings (required on every harness), hip (or side) D-rings, or chest D-rings. General D-ring usage is as follows:

- **Back D-Ring.** This is the attachment point for your lanyard. It can also be used as a rescue attachment.
- **Hip (or side) D-rings.** Typically used for workpositioning activities to allow the worker to have their hands free to perform work, or for travel restriction applications.
- **Chest D-ring.** Typically used for ladder climbing systems, rescue operations, or personnel riding applications.

2 LANYARD

How do I know which to choose?

There are two primary types of lanyards:

- **Shock-absorbing lanyards** used when the free fall distance (fall hazard) can exceed 2 feet
- **Restraint or positioning lanyards** used only when free fall distance (fall hazard) can be limited to 2 feet or less

In choosing the correct lanyard, you must **keep the application in mind.**

- Make certain the lanyard is the proper length to allow the necessary worker movement/positioning.
- Make certain that the right material type is chosen (depending on your work environment).
 - Cable works best in high heat environments or around sharp edges.
 - Webbing works best in most other applications.
- Make certain you have **calculated your total fall distance.** See diagram for more information.

You also need to consider the compatibility of the system components. Components produced by different manufacturers may not be interchangeable. The best way to ensure compatibility is to purchase all components from the same manufacturer.

3 CONNECTOR

How do I know which to choose?

Connector selection is **driven primarily by application.** You will need to carefully consider your work environment, in particular the type of structure where the connector will be attached.

Examples include:

- Roof
- Scaffold
- Steel Beam
- Concrete Column
- Rail

Weight should also be a consideration if a worker will need to carry the connector around during the work day.

You will also need to **consider the number of workers** required to attach to the connector. Most connectors are rated for 1 person with a 5,000 pound minimum breaking strength. Connectors are required, by OSHA, to have a minimum breaking strength of 5,000 pounds per person attached. For example, if you are going to attach 2 people to a connector, the connector must be rated to 10,000 pounds.

Fall Protection

Approvals and Standards

What is OSHA?

OSHA (Occupational Safety and Health Administration) rules and regulations are enforceable by law. Non-compliance with OSHA rules and regulations can result in stiff penalties and abatement periods.

What is ANSI?

ANSI (American National Standards Institute) is a voluntary standardization system and does not possess the ability to enforce its standards. ANSI facilitates development of national standards by establishing consensus among manufacturers and consumers. Many of OSHA's regulations are adopted from ANSI standards.

GENERAL FALL ARREST REQUIREMENTS

OSHA 29 CFR 1926.502 requires (but is not limited to):

- Body belts are not acceptable as part of a personal fall arrest system
- Only locking type snaphooks shall be used
- Anchorages used for attachment of personal fall arrest systems must be capable of supporting at least 5,000 lbs per employee attached
- Personal Fall Arrest systems shall be rigged such that an employee can neither free fall more than 6' nor contact any lower level

ANSI Z359.1 requires (but is not limited to):

- Snaphooks and carabiners shall be self-closing and self-locking
- Equipment shall be inspected by the user before each use and, additionally, by a competent person other than the user at intervals of no more than 1 year
- Prior to selecting a personal fall arrest system, the user shall make an assessment of workspace conditions where the equipment is required

Standards Update

STANDARDS UPDATE

Notice of Revision to the ANSI Z359 Standard for Personal Fall Arrest

New Standard to be Issued

The ANSI Z359 Accredited Standards Committee has completed work on a new series of fall protection standards to be published in August 2007, with an effective date of October 15, 2007. The new standards will replace the current ANSI Z359.1-1992(R1999). The current standard will be replaced by a series of five new standards:

- ANSI Z359.0-2007 Definitions
- ANSI Z359.1-2007 Fall Arrest Systems, Subsystems and Components
- ANSI Z359.2-2007 Minimum Requirements for a Comprehensive, Managed Fall Protection Program
- ANSI Z359.3-2007 Work Positioning and Travel Restriction Systems, Subsystems and Components
- ANSI Z359.4-2007 Assisted-Rescue and Self-Rescue Systems, Subsystems and Components

ANSI Z359.1-2007 includes two new requirements specific to lanyards:

- Snaphook and carabiner gate strength will increase to 3,600 pounds
- Twin-leg fall arrest lanyards will be tested to 5,000 pounds at the junction point where the lanyard legs come together.

The lanyards in this catalog on pages 157–162 comply with ANSI Z359.1-1992 (R1999). By the effective date of the new ANSI Z 359 family of standards MSA will have a new line of lanyards compliant to ANSI Z359.1-2007. Please check our website for a complete list of lanyards compliant to the new ANSI Z359.1-2007 standard and to learn more about the new ANSI Z359 family of standards.

1 HARNESS

OSHA 29 CFR 1926.502 requires (but is not limited to):

- D-Rings shall have a minimum breaking strength of 5,000 lbs
- D-Rings shall be proof tested to 3,600 lbs
- The attachment point of the harness shall be located in the center of the wearer's back near shoulder level
- Harnesses shall be used only for employee protection
- Harnesses subjected to impact loading must be removed from service

ANSI Z359.1 requires (but is not limited to):

- D-Rings, O-Rings, and oval rings shall be capable of withstanding a tensile load of 5,000 lbs
- Adjusters shall be capable of withstanding a tensile load of 4,000 lbs
- All D-Rings and O-Rings shall be subjected to proof load testing to 3,600 lbs
- The fall arrest attachment shall be located at the back (dorsal) position
- Harnesses subjected to impact loading must be removed from service

2 LANYARD

OSHA 29 CFR 1926.502 requires (but is not limited to):

- Lanyards shall have a minimum breaking strength of 5,000 lbs
- Snaphooks shall be sized to be compatible with the member to which they are connected to prevent unintentional disengagement of the snaphook
- Shock-Absorbing lanyards shall limit the maximum arresting force on an employee to 1,800 lbs when used with a body harness
- Shock-Absorbing Lanyards shall limit maximum deceleration distance to 3.5 feet.
- Lanyards subjected to impact loading must be removed from service

ANSI Z359.1 requires (but is not limited to):

- Lanyards shall have a minimum breaking strength of 5,000 lbs
- Snaphooks shall be sized to be compatible with the member to which they are connected to prevent unintentional disengagement of the snaphook
- Shock-Absorbing lanyards shall limit the maximum arresting force to 900 pounds
- Shock-Absorbing Lanyards shall limit maximum deceleration distance to 3.5 feet.
- Lanyards subjected to impact loading must be removed from service

3 CONNECTOR

OSHA 29 CFR 1926.502 requires (but is not limited to):

- D-Rings shall have a minimum breaking strength of 5,000 lbs
- D-Rings shall be proof tested to 3,600 lbs
- Connectors subjected to impact loading must be removed from service

ANSI Z359.1 requires (but is not limited to):

- Anchorage connectors shall be capable of withstanding a 5,000 lb load multiplied by the maximum number of personal fall arrest systems that may be attached to the anchorage connector
- An anchorage connector shall be attached to no more than one fall arrest system unless certified for such purpose.
- Connectors subjected to impact loading must be removed from service
- D-Rings, O-Rings, and oval rings shall be capable of withstanding a tensile load of 5,000 lbs

Fall Protection

Harnesses

TechnaCurv™ Full Body Harness

The TechnaCurv Full Body Harness throws a curve to the ordinary harness with many new features never before seen in a full body harness:

- Curvilinear Comfort System
- Visco-Elastic Shoulder padding
- Innovative web design
- Secure-Fit buckles
- Sorbtek fabric on shoulder and sub-pelvic pads
- Meets ANSI Z359.1, A10.32, all applicable OSHA regulations, and is CSA certified

In addition to the features above, the TechnaCurv harness is designed with downward adjusting torso straps on most models to ease adjustment. This is also the first harness on the market that allows you to order exactly the options you want, and only the options you want, through our Assemble-to-Order process. All these features combine to provide you with the most comfortable, versatile, unique, and safe harness available today.

And now, we're making a great harness even better! You will notice a few changes on your TechnaCurv Harness that will improve the functionality and comfort of the harness. These improvements include:

- + Addition of two Lanyard Clips on every harness, at no additional cost.
- + Addition of webbing length to the torso and leg strap portions of the harness to give you a wider range of adjustment. These additions will provide you with the perfect, most comfortable fit every time you put on your harness.

the CURVILINEAR COMFORT SYSTEM features:

Curvilinear Torso Webbing

- This patent-pending process curves the webbing around the neck area to help prevent chafing and discomfort on the neck that can be caused by some standard harnesses.

COMBINED WITH

Adjustable Y Back D-Locator Pad

- Allows complete adjustment of the back D-ring to provide proper harness fit
- Assists in moving the shoulder webbing away from the neck, providing additional comfort to the user.
- Ribbed web slots in back pad allow for easy back D Ring adjustment.
- A special polymer blend allows for optimal strength and minimal weight, giving you a lighter, more durable harness.

TO PROVIDE YOU WITH TOTAL COMFORT!

Webbing

- Soft, Flexible webbing allows the harness to move with you as you work for increased comfort.
- An innovative pattern design offers a cool, sporty appearance.

Shoulder Pads & Sub-pelvic Pad

Sorbtek™ Fabric:

- A highly breathable, lightweight material designed to wick moisture away from the body.

Visco-Elastic Shoulder Padding:

- Developed by NASA, Visco-elastic padding is more comfortable than traditional foam padding.
- Does not have memory and will not break down over time, offering superior comfort throughout the life of the harness.
- Automatically adjusts to every curve of your body

Secure-Fit™ Buckle

- Designed to ease donning, doffing, and adjustment.
- Single hand operation.
- Buckle release tabs move in opposite directions and are recessed inside the outer buckle dimensions to prevent accidental disengagement.
- Positive engagement windows allow you to see that the buckle is properly engaged. No need to try and listen for a "click" on a noisy job site.

**Positive
Engagement
Window**

Variable Width Webbing

- Width varies from 1-5/8" to 2-5/8".
- Distributes weight over a wider surface area to increase comfort during suspension/work positioning.

TechnaCurv Tower Harness

In addition to the exciting features of the TechnaCurv Harness, the TechnaCurv Tower Harness:

- Utilizes variable width webbing in the sub-pelvic area to increase comfort and support when work positioning
- Incorporates an integral body belt and a removable saddle
 - Body Belt and saddle are constructed using a dual durometer pad and Sorbtek fabric for ultimate comfort
 - Body Belt includes two side D-rings and two accessory rings
 - Removable Saddle includes two side D-rings
 - ❖ Saddle height is adjustable
- D-ring position is adjustable

TechnaCurv Tower Harnesses include body belt and saddle.

TechnaCurv “No Metal Above the Waist” Harnesses

This harness was designed to keep all metal below the waist to reduce the potential for arc flashes. This potential is further reduced by adding the plastic covers over the metal components of the harness. In addition to the many features of the TechnaCurv Full Body Harness, the No Metal Above the Waist TechnaCurv Harness adds the following features:

- Fabric dorsal connector
- Fabric positioning loops
- Hardware covers on metal components
- Approximate weight is just 3.5 lbs
- Meets or exceeds OSHA, ANSI Z359.1, and is CSA certified

Technacurv® Hi-Viz Construction Harness

This harness features:

- Curvilinear Comfort System combines curvilinear torso webbing with an adjustable Y back D-locator pad to keep the shoulder webbing away from the neck to prevent chaffing and to provide greater comfort
- Bright green webbing for greater visibility
- Visco Elastic Shoulder Padding automatically adjusts to every curve of your body, offering superior comfort throughout the life of the harness
- Sorbtek fabric on the shoulder padding wicks moisture away from the body
- Integral belt with Dual-Durometer back pad for superior comfort and back support
- Designed with downward adjusting torso straps to ease adjustments
- Soft, flexible webbing allows the harness to move with you as you work for increased comfort
- Utilizes variable-width webbing in the sub-pelvic area to increase comfort and support during suspension/work positioning
- Additional webbing length to the torso and leg straps provides a wider range of adjustments for the perfect fit
- Two integral Lanyard Clips
- Meets or exceeds OSHA regulations, ANSI Z359.1 and is CSA certified.

*Webbing does not meet the requirements for high-visibility clothing as defined in OSHA and ANSI.

Fall Protection

Workman™ Harness

The Workman Harness provides comfortable protection, due to its lightweight components and durable webbing. The vest-style harness, with optional hip D-Rings for work positioning, fits a wide range of body types and sizes. Color-contrasting thigh and torso straps simplify donning.

- Optimum quality at an economical price
- Comfortable
- Abrasion-resistant, strong, durable webbing
- Yellow polyester webbing for high visibility
- Web retainer collars to keep excess webbing neat
- Easy to don and adjust
- Choice of Qwik-Fit™ or Tongue-Buckle leg straps for easy adjustment
- Instructions in English, Spanish, and French
- Meets OSHA regulations, ANSI A10.32 & ANSI Z359.1, and is certified to CSA Z259.10-M90

Gravity Vest Style
Harness
Part No. SSH30420060

Gravity™ Vest Style Harness

The Gravity Vest Style Harness design is the traditional choice for confined space rescue and fall arrest. The back D-ring ensures the user is in an up-right position, eliminating the need for shoulder D-rings and a spreader bar for confined space applications. Available in nylon, polyester, and reflective nylon. Tongue buckle leg straps available upon request. Meets ANSI Z 359.1 and OSHA standards, and is CSA certified.

Gravity Harness with
Reflective Nylon
Part No. SSH80920006

Gravity™ Cross-Over Harness

The Gravity Cross-Over Harness is a multi-purpose full body harness. The unique cross-over design allows for adjustment of both the back and chest D-rings. The harness is suitable for controlled descent, positioning, ladder climbing, rescue, and fall arrest. Available in nylon, polyester, and reflective nylon. Meets ANSI Z 359.1 and OSHA standards, and is CSA certified.

Nylon Harnesses are constructed with red/blue webbing, and polyester harnesses are constructed with red/black webbing. All harnesses listed above are Standard (STD) size. Additional sizes available. All harnesses listed above have Qwik-Fit chest straps.

Derrick™ Harness

The Derrick harness was created with the derrick worker in mind. This harness incorporates an integral shock absorber that also serves as a back D-ring extension to allow for easy lanyard connection. The integral belt consists of a 4" wide web support strap and a rear D-ring for positioning/restraint applications. The harness also includes a comfortable saddle for positioning and climb assist. Meets ANSI Z359.1, ANSI A10.14, and OSHA standards, and is CSA certified.

All harnesses listed above are Standard (STD) size. Additional sizes available.

BUCKLE INFORMATION

Friction Buckle

Tongue Buckle

Qwik-Fit™ (Mating) Buckle

ArcSafe™ Harness

The ArcSafe harness is SEI-certified to the requirements of the ASTM F887-05 standard for arc flash protection up to 40 cal/cm2 and is designed to meet the needs of utility and maintenance workers.

Additional features

For safety:

- Nylon web loop attachment points
- Reduce overall harness weight
- Reduce metallic components
- Meets all applicable OSHA regulations and ANSI Z359.1 & A10.32 standards
- Certified to CSA Z259.10-M90 classes A, D, L, P

For versatility & comfort:

- Y-shaped back web loop locator pad
- Allows for effortless adjustment of the back web loop
- Provides comfort by moving the webbing away from the wearer's neck
- Color-coded torso straps to simplify donning
- Downward-adjusting torso straps to ease adjustment
- Optional integral shock-absorber
- Choice of Vest or Cross-Chest harness style
- Choice of Qwik-Fit or Tongue Buckle leg straps
- Optional front attachment loops for climbing, personnel riding, or rescue applications

Fall Protection

Thermatek™ Harness

The Thermatek Harness is a Vest Style harness with many features, including:

- High visibility green webbing
- Kevlar (60%) / Nomex (40%) blend webbing that is resistant to chemicals, weld splatter, and other high heat applications
- Bright, contrasting colors of webbing and stitching allows for easier inspection
- Qwik-Fit Leg Straps for easy connection
- Meets ANSI A10.14 and OSHA standards
- CSA certified
- SEI certified

Part No.	CSA Part No.	Description	Back	Hip
10020062	10020068	Standard size, Qwik-Fit (mating) leg straps	1	2
10020066	10020070	X-Large size, Qwik-Fit (mating) leg straps	1	2

Thermatek Harness
Part No. 10020062

"No Metal Above the Waist" Harness

The "No Metal Above the Waist" Harness is a pullover style harness specifically designed with the utility industry worker in mind. This comfortable pullover style harness provides easy donning and doffing and one-point adjustment. In order to maintain a "No Metal Above the Waist" configuration, this harness has the adjustment point below the waist and an Integral Dyna-Brake Shock Absorber at the back D-ring location eliminating metal at the dorsal connection point.

"No Metal Above the Waist" Harness is available with side positioning loops for work positioning and travel restriction applications. All variations of the "No Metal Above the Waist" Harness meet ANSI Z359.1, ANSI A10.14, and OSHA regulations.

Part No.	Description	Back	Hip
501390	Standard size, nylon, Integral Dyna-Brake Shock Absorber, tongue buckle leg straps	1	2
415211	X-Large size, nylon, Integral Dyna-Brake Shock Absorber, tongue buckle leg straps	1	2

Additional sizes available.

"No Metal Above the Waist"
Harness
Part No. 501390

Harness Accessories

Miscellaneous Harness Accessories

A Back Pad (P/N 507144) snaps into the hip D-rings of Pullover and Vesttype Harnesses and adds additional lower lumbar support while work positioning. Shoulder pad (P/N 10028444) may be snapped around the shoulder straps and under the back D-ring pad of the harness to add comfort.

Double D-ring Extension

505318	Lanyard Connector Adapter, nylon, 1 D-ring, 18" (Back D-Ring Extension)
507144	Economic Back Support Pad, nylon
10028444	Shoulder pad
10043147	Double D-ring Extension

Body Belts

MSA lightweight body belts are used for travel restriction or work positioning. Body belts are available in nylon or polyester webbing. Unique single pass friction buckles allow for a wide range of waist adjustment while tongue buckles adjust to a specific waist size. A 3 or 4 inch wide body pad is available on most models for additional comfort while work positioning. D-rings are available on the back of the belt for travel restriction and on the hips for work positioning. Multi-purpose body belts include a 3-inch wide body pad and seat strap which provides for additional comfort while work positioning for long periods of time.

Part No.	Size	Description
415275	Large	Nylon, tongue buckle, 3" body pad, 2 fixed D-rings
415276	Medium	Nylon, tongue buckle, 3" body pad, 2 fixed D-rings

415290	Medium	Nylon, tongue buckle, 3" body pad, 1 fixed D-ring

Part No. 415276

- Tongue buckle nylon belt
- 2 fixed D-rings
- 3" body pad

Shock-Absorbing Lanyards

Energy absorbing lanyards are a component of a personal fall arrest system. They provide a means of connection between the back (dorsal) D-ring of MSA full body harnesses and a qualified anchorage and anchorage connector. The energy absorber keeps fall arrest forces below ANSI and OSHA limits and deceleration distance is controlled to a maximum of 42 inches. The lanyard is available in strap, rope, and wire rope configurations with a variety of snaphooks.

Workman™ Energy-Absorbing Lanyards

Workman energy-absorbing lanyards are lightweight with a low-profile body. The shock absorber includes a clear, durable protective cover over the labels to increase service life and allow for easy inspection.

Features

- Tear-tape design to keep fall arrest forces below 900 lbf.
- Choice of single or twin-leg configurations
- Choice of adjustable or tie-back configurations
- Meets ANSI Z359.1-1992 (R1999), ANSI A10.32, applicable OSHA regulations, and is certified to CSA Z259.11-05 E4

Fall Protection

FP5K™ Tie-Back Shock-Absorbing Lanyard

- Uses the FP5K Carabiner, a new Tie-back lanyard connector
 - 5000-pound gate strength in any direction allows the FP5K Carabiner to be tied back directly to the lanyard
 - Unique carabiner body shape helps avoid confusion with standard connectors not designed for tie-back applications
 - FP5K carabiner design allows for maximum clearance inside the body of the carabiner (1" Gate Opening)
- Available in web or cable version
- Web version utilizes Monster-Edge™ Webbing with 12,000-pound minimum breaking strength
 - Monster-Edge webbing is designed for increased abrasion resistance
 - Internal wear indicator consists of two yellow threads that, when visible, alert a user as to when the lanyard should be removed from service due to severe abrasion
- Utilizes the Sure-Stop Shock Absorber to keep fall arrest forces below 900 lbf
- Available in both single and twin-leg configurations
- Meets OSHA regulations, ANSI Z359.1-1992 (R1999), ANSI A10.32 and is CSA certified.

Section of Monster Edge Webbing

Internal wear indicator

Specially designed safety recess inside the body of the carabiner provides a place for the lanyard to rest when tied back.

5000-pound gate strength in any direction.

FP5K Carabiner

The outer side of the gate has a knurled surface to provide a secure grip on the gate when opening. The inner side of the gate has flattened edges to keep lanyard/gate contact at a minimum.

FP Diamond™ Shock-Absorbing Lanyard

The FP Diamond Shock-Absorbing Lanyard raises the standard for shock-absorbing lanyards with these exciting features:

- Durable polyester sheath for increased abrasion and UV resistance
- Keeps fall arrest forces below 900 lbf
- Available in a single or twin-leg configuration
- Highly visible deployment tag
- Pouchless design
 - More comfortable to wear
 - Lighter weight
- ATO ordering flexibility allows you to order the exact options, and only the options, you want
- Meets OSHA regulations, ANSI Z359.1-1992 (R1999), ANSI A10.32, and is CSA certified 

Teflon® fabric protector provides water, stain, and mildew resistance.

Strong & durable polyester sheath for increased abrasion and UV resistance

Part No. 10023932

Lightweight, streamlined design

Part No. 10045936

FP Diamond Expanyard

In addition to the exciting features of the FP Diamond Lanyard, the FP Diamond Expanyard features:

- Elastic design reduces trip hazards and snag hazards
- 6' Diamond Expanyard contracts to 4.5'

FP Diamond with Integral D-ring Extension

In addition to the exciting features of the FP Diamond Lanyard, the FP Diamond with Integral D-ring Extension features:

- 100% tie-off while transitioning from the use of the shock-absorbing lanyard to the use of a self-retracting lanyard and vice-versa
- 4-1/2' length
- GL3100 snaphooks on anchor end of the shock-absorbing legs are compatible with most concrete forms allowing for a variety of applications
- Dorsal D-ring attachment on short leg allows easy access to back D-ring when connecting to a self-retracting lanyard

Diamond Lanyard with Integral D-ring Extension

Tie-Back™ Shock-Absorbing Lanyard

The integral adjustable D-ring of the MSA Tie-Back lanyard allows for a compatible means of connection, minimizes the potential for roll-out, and eliminates the necessity of a separate anchorage connector. The integral adjustable D-ring allows the MSA Tie-Back Lanyard to accommodate a wide variety of anchorage point shapes and sizes.

The MSA Tie-Back Lanyard features:

- Integral Dyna-Might shock absorber or Dyna-Brake shock absorber
- Available in Twin-Leg configuration for 100% tie-off
- Maximum arrest force of 900 lbf

Restraint Lanyards

Restraint lanyards are primarily used for travel restriction and work positioning. Lanyards for travel restriction are used to restrain a worker from reaching a fall hazard. Lanyards for work positioning are used for stabilizing a worker at an elevation. They can be ordered in fixed or adjustable lengths. Each lanyard comes with a forged steel, zinc-plated self-locking snaphook attached to each end. Meets ANSI and OSHA standards. Models with CSA part numbers are CSA certified.

Suretyman™ Anchorage Sling

- 1" nylon tube webbing sewn into an endless loop
- Available in 2', 4', and 6' lengths
- Can be hitched to an anchorage point using various configurations

ManSafe Freestanding Constant Force Post

- Does not attach to the working surface
- Installer will never have to lift more than 55 lbs (25 kg) at any time
- Used on nominally flat roofs up to a maximum pitch of 5 degrees
- Tested and approved for use on concrete, single-ply membrane, asphalt-sanded, asphalt-stone chipped, and steel roof profiles
- Post is omni-directional

ManSafe Freestanding
Post*
Part No. 10055719

* Post D-ring (Part No. 10038363) must be purchased separately.

PointGuard™ Anchorage Connector Strap

The PointGuard Anchorage Connector provides a secure point of attachment for residential and concrete construction applications. When the anchorage connector is no longer needed a worker can simply cut the protruding strap and throw it away. The PointGuard Anchorage Connector is:

- Quick and easy to install
- Economical
- Available in 2 models -
 - Residential Construction
 - ❖ A standard length of 3'
 - ❖ Meets all applicable OSHA regulations as well as ANSI A10.14 and ANSI Z359.1
 - Concrete Construction
 - ❖ A standard length of 4'
 - ❖ Includes protective sheath
 - ❖ Meets all applicable OSHA regulations as well as ANSI A10.14
- Durable Polyester Webbing with 5,000-pound minimum breaking strength
- 400-pound (182 kg) capacity

Anchorage Cable Sling

- Standard lengths of 2', 4', and 6', custom lengths available
- Vinyl Coated
- 1/4" Galvanized Cable

Anchorage Cable Sling
Part No. SFP3267504

Part No.	Description
505282	Anchorage connector strap, nylon, 5'
505298	Anchorage connector strap, polyester, 5'
10003206	Anchorage connector chain
10023490	Double D-ring anchorage connector strap with D-ring on each end
10042792	PointGuard residential anchorage connector strap, 3' with D-ring
10042794	PointGuard concrete anchorage connector strap, 4' with D-ring
SFP2267404	Suretyman anchorage sling, 4' length
SFP2267503	Double D-ring Anchorage Connector Strap, 3' length
SFP2267506	Double D-ring Anchorage Connector Strap, 6' length
SFP3267504	Anchorage cable sling, 4' length
SFP6000	Rail-Slider, steel, galvanized, for 80 - 136 # rail, used on train/crane type rail, [carabiner required - sold separately (see page 167)]
10030608	Rail-Slider, steel, galvanized, for 141 # rail, used on train/crane type rail, [carabiner required - sold separately (see page 167)]
10055717	ManSafe Freestanding Constant Force Post, 440 lbs (200 kg)
10055718	ManSafe Freestanding Constant Force Post, 660 lbs (300 kg)
10055719	ManSafe Freestanding Constant Force Post, 880 lbs (400 kg)
10055716	220 lb (100 kg) Upgrade kit
10038363	Post D-ring
SFP3267506	Anchorage Cable Sling, 6' length

Fall Protection

BeamGrip™

- Attaches to I-beam flange - no tools required
- Optional D-ring insert (P/N 506643) and/or swivel D-ring (P/N 506673) can provide anchorage connection for one or two persons (D-rings sold separately)

BeamGrip
Part No. 506682

Pictured with Optional
D-ring insert and
Swivel D-ring

BeamGlide Trolley Removable Model
Part No. 506266

BeamGlide™ Trolley

- Provides horizontal mobility - keeps anchorage connector directly overhead
- Sizing to fit all beams

Anchorage Connector
Extension
Part No. 505233

Anchorage Connector Extension

- Vinyl coated
- 1/4" galvanized cable
- Standard 5' length

D-Plate
Part No. 506632

D-Plate Anchorage Connector

- Provides permanent anchorage point
- Bolts to beams or columns
- Also available with 8"x 8" back-plate made of black anodized aluminum, galvanized steel, or stainless steel for attachment to concrete walls

FP Stryder™ Anchorage Connector

- Easy, single-hand installation
- Low friction wear pads with Teflon allow the FP Stryder Anchorage Connector to glide effortlessly along the beam flange
- Lightweight - only 4.5 pounds!
- Integral load indicator alerts user if unit has been exposed to a fall
- Versatile design allows for mounting overhead or at worker's feet
- Vernier adjustability allows for a secure fit and 1/4" adjustment increments
- Easy to use, push button adjustment - No Pins to be lost!
- 2 models available to fit most beam sizes
 - Standard version fits beam flange widths from 4" to 14"
 - XL version fits beam flange widths from 14" to 24"
- 400-pound working capacity
- Field serviceable

FP Stryder
Part No. 10051455

Bolt D-ring with Hole
Part No. 10003213

Bolt D-ring with Hole

- Permanent anchorage connector
- Attaches to bottom of I-beam flange, user supplies bolt
- Designed for horizontal installation

Permanent Roof Anchor
Part No. 10016468

Permanent Roof Anchor

- All steel construction
- Fits all pitches of roof trusses or rafters
- Easy to install without special tools

5K Removable Concrete Anchor
Part No. 10081594

10K Removable Concrete Anchor
Part No. 10081570

Removable Concrete Anchors

- Quickly and easily removed and reinstalled in another location
- Compact and lightweight
- Durable stainless steel and aluminum construction
- 400 lb capacity
- 2 models: 5,000 lb version (5K) and 10,000 lb (10K) version

New!

Part No.	Description
505233	1/4" wire rope, vinyl coated, fixed length, 5', RL20 snaphook one end, 3" O-ring on other end
506632	D-plate anchorage connector, zinc-plated steel
10003213	Bolt D-ring with hole only
506682	BeamGrip for beams with flange width: 3.94" to 5.64" flange thickness: .205" to .659"
415171	flange width: 5.525" to 8.07" flange thickness: .36" to 1.09"
415173	flange width: 10.265" to 12.8" flange thickness: .605" to 1.25"
10003210	Adjustable beam grip
10016468	Permanent roof anchor - 2"x 4"
10051455	FP Stryder Anchorage Connector, Standard version, fits beam flange widths from 4" - 14"
10051456	FP Stryder XL Anchorage Connector, XL version, fits beam flange widths from 14" - 24"
10051457	FP Stryder Anchorage Connector Kit, containing one complete Standard version FP Stryder, one XL adjustment bar, one carrying case, and one adjuster button replacement kit
10081594	5K Removable Concrete Anchor
10081570	10K Removable Concrete Anchor

Carabiners

MSA offers a wide variety of carabiners for almost every application. All carabiners have a minimum breaking strength of 5,000 lbs.

- Part No. 506259

Locking and Unlocking Carabiners

ALWAYS CHECK THAT GATE IS SECURELY LOCKED BEFORE USE.

1. Rotate gate 90° to unlock

2. Depress gate to pivot open

3. Release gate to close and lock

Part No.	Description
506259	Carabiner, 7/8" (22 mm) gate, twist lock, aluminum
50657	Carabiner, 7/8" (22 mm) gate, twist lock, steel
506308	Carabiner, 2" (50 mm) gate, twist lock, steel, with captive eye
SRCC643	Carabiner, 1" (25 mm) gate (large), autolocking, steel, with captive eye
SRCC734G	Carabiner, 2.1" (52 mm) gate (extra large), autolocking, steel, with captive eye
SRCC642	Carabiner, large D design, 1.2" (32 mm) gate, auto-locking, steel

Fall Protection Kits

Thermatek™ Kit

Includes:

- Thermatek Harness, standard size, made of a Kevlar/Nomex blend webbing that is resistant to chemicals, weld splatter, and other high heat exposures.
- Thermatek Shock-Absorbing Lanyard features a burn-resistant Tuffweld protective cover that is superior to Nomex. The Thermatek 12 lanyard model is designed to arrest a freefall up to 12' and keep fall arrest forces below OSHA limits.
- Thermatek Anchorage Connector Strap with Kevlar webbing and stitching has a replaceable wear pad to protect webbing from abrasion.
- Carrying Bag for convenience.

Part No.	Description
10026061	Thermatek Kit with Thermatek 6 lanyard (HL2000 Snaphooks)

Thermatek Kit in use

Fall Protection

Anthron Descent Device System

The Anthron Descent Controller is a manually operated descent device. It is most commonly used for suspended work positioning, self evacuation, or rescue operations. Other features include:

- Proper roping/rigging diagrams on the side of the Anthron Descender
- Device can be installed/removed at any point on rope
- Working load of 300 lbs (136 kg)
- System consists of a 7/16" (11mm) rope, Anthron Descender, and two carabiners

Part No.	Description
SDC726050	Anthron system includes: Anthron descender, 2 carabiners, 50 ft rope
SDC726100	Anthron system includes: Anthron descender, 2 carabiners, 100 ft rope
SDC726150	Anthron system includes: Anthron descender, 2 carabiners, 150 ft rope

Anthron systems and replacement ropes available in lengths of 25-ft increments from 50 ft up to 600 ft

Roofers' Kits

Includes:

- Vest-Style Harness -- a lightweight, durable, abrasion-resistant harness.
- Lifeline with Locking Carabiner or Snaphook permits safety and ease of mind while working.
- Rope Grab is a lightweight and affordable fall arrest device.
- Roof Anchors & Woodscrews (on some kits) are disposable Roof Anchors constructed from heavy-gauge steel with a galvanized finish. Each comes with 8 galvanized flathead woodscrews.

All FP Pro products are fully compliant with applicable OSHA regulations and ANSI A10.14.

Part No.	Description
416067	FP Pro Roofers' Kit including: FP Pro Vest-Style Harness, Lifeline with Locking Carabiner, Rope Grab fall arrester, roof anchors & woodscrews, and Tote Bag
10049751	Roofers' Kit including: FP Pro Vest-Style Harness, Shock-Absorber with LS Snaphook attached to 25' polysteel 5/8" rope, Rope Grab fall arrester (p/n 10054077), one disposable roof anchor, all packaged in a handy 6 gallon bucket.
10054971	Roofers' Kit including: FP Pro Vest-Style Harness, 50' Lifeline with Locking Carabiner, Rope Grab fall arrester (p/n 10054077), roof anchors & woodscrews, and Tote Bag
SVL1013050	Roofers' kit including: Gravity harness (p/n SSH304200), Shock-Absorber with LS Snaphook attached to 50' polyester 5/8" rope, Rope Grab fall arrester (p/n SVLR537R018LS), all packaged in a handy 6 gallon bucket.
10063412	Roofers' Kit, 50' lifeline with shock-absorber, FP Pro Harness, Rope Grab fall arrester (SVLR537R018LS), roof anchor and Storage Bag
10057104	Roofers' Kit, 50' lifeline, FP Pro Harness, Roof Anchor, 6-Gallon Bucket

FP Pro Harnesses/Diamond™ Lanyard Kits

Two great products in one easy to order kit! These kits are available with your choice of a Cross-Chest or Vest-Style FP Pro Harness with or without hip D-rings, and with a single or twin-leg FP Diamond Shock-Absorbing Lanyard. All kits include carrying bag.

Part No.	Description
10062329	FP Pro Cross-Chest Harness, STD size, Qwik-fit leg straps, back D-ring, Diamond Lanyard
10062316	FP Pro Vest-Style Harness, STD size, Qwik-fit leg straps, back D-ring, Diamond Lanyard
10062411	FP Pro Cross-Chest Harness, STD size, Tongue Buckle leg straps, back D-ring, Diamond Lanyard
10062405	FP Pro Vest-Style Harness, STD size, Qwik-fit chest strap and Tongue Buckle leg straps, back D-ring, Diamond Lanyard

Additional sizes available. Contact MSA Customer Service Center for details.

10054077	Rope Grab fall arrester
415869	50 ft - 5/8" rope, polyester with RL20 snaphook on one end
415871	100 ft - 5/8" rope, polyester with RL20 snaphook on one end
415873	200 ft - 5/8" rope, polyester with RL20 snaphook on one end

Sure-Grab™ Rope Grab

The SVLR78 Sure-Grab device and lifeline is used to provide temporary fall protection on ladders or when climbing vertical structures. This system can also be used to provide a secondary lifeline for suspended positioning systems used by building/structure inspectors, window cleaners, and maintenance personnel. The Sure-Grab device moves freely up or down an approved 5/8" (16 mm) diameter lifeline. When sudden downward movement occurs, a camming lever is activated arresting the fall. The device can be installed or removed from the lifeline at any point along its length.

Sure-Grab rope grabs are CSA certified.

Part No.	Description
SVLR78LS	Rope grab fall arrester, automatic/manual, open body, c/w 1-3/4" x 12" web lanyard, LS snaphook
10030433	CSA rope grab kit #1. Includes: Sure-Grab (SVLR78LS) and 60' Vertical Lifeline (SLLPB672-060/LS)
SRIW1000	5/8" Termination Plate
SLLNL672060LS	Lifeline, nylon, white 3-strand, 5/8" x 60-ft (16mm x 20m) with LS snap on one end
SLLNL672100LS	Lifeline, nylon, white 3-strand, 5/8" x 100-ft (16mm x 30.5m) with LS snap on one end
SLLNL672200LS	Lifeline, nylon, white 3-strand, 5/8" x 200-ft (16mm x 61m) with LS snap on one end

Fall Protection

Self-Retracting Lanyards

Aptura® SRL

MSA has set a new standard in the mechanical fall protection market with the Aptura LT12 and Aptura LT30 Self-Retracting Lanyard (SRL). Never before has the market seen such a state-of-the-art device with so many standard features. With its solid design and fast-acting brake mechanism, you can be confident that the Aptura LT12 and the Aptura LT30 SRL will be there for you when you need it most. All Aptura SRL's feature:

- A durable, engineered thermoplastic housing to increase service life.
- Rugged, impact-absorbing protective bumpers for added durability.
- A field-replaceable lifeline option. In the event that the webbing should become damaged, this option provides a field-replaceable web lifeline, eliminating costly returns to the manufacturer. The Aptura is the first SRL to offer this feature.
- A 400-pound working capacity as a standard feature.
- No annual factory recertification required due to high-quality construction. This not only reduces the cost of ownership, but also eliminates down time.
- An integral load indicator lets you know when it is time to remove the product from service.
- SRL connector with integral swivel.
- Meets ANSI Z359.1-1992 (R1999), ANSI A10.32 and all applicable OSHA standards, and is CSA certified.
- ATO ordering flexibility allows you to order the exact options, and only the options you want.

All these features and more combine to deliver the most versatile SRL available on the market today, the APTURA self-retracting lanyard.

Restrictions from local governing authorities still apply. Consult with your Safety Director regarding applicable restrictions, regulations, and standards in your area.

Aptura® LT12 SRL

In addition to the exciting features of all Aptura SRL's, the Aptura LT12 SRL features:

- A lightweight design starting at 2.4 pounds
- A standard lifeline length of 12'. Available in lengths from 6' to 12'
- A constant lock-up rate to prevent the erratic, "jerky" lock-up (like a seat belt) found on some types of personal fall limiters.

Aptura® LT30 SRL

In addition to the exciting features of all Aptura SRL's, the Aptura LT30 SRL features:

- A lightweight design starting at 7.5 pounds
- A standard lifeline length of 30'. Available in lengths from 13' to 30' in 1 foot increments

Dyna-Lock® SRL's

The MSA Dyna-Lock Self-Retracting Lanyards (SRL) are fast-acting fall arresters that limit free-fall distance, deceleration distance, and fall arrest forces while allowing user freedom of movement. The Dyna-Lock SRL is ideal for climbing applications where vertical mobility is needed.

The Dyna-Lock SRL has a 4.5-feet-per-second locking speed. A built-in shock absorber limits fall arrest forces to under 900 lbf. Three continuously moving independent braking mechanisms prevent freezing in icy or corrosive conditions. Available with 3/16-inch galvanized or stainless steel wire rope, or 1-inch wide nylon webbing. A forged steel, zinc-plated, self-locking swivel snaphook is present on each unit with a load indicator that activates and alerts the user when the Dyna-Lock SRL has been impact loaded. The Roughneck model incorporates a black corrosion-resistant coating designed for severe environmental conditions. Meets ANSI Z359.1-1992 (R1999), ANSI A10.32, and applicable OSHA standards. Models with CSA part numbers are CSA certified.

NOTE: This "no re-certification" policy does not mean that routine inspections do not need to be performed on MSA mechanical units. All users of MSA mechanical products are still required to perform a pre-use inspection and a formal inspection of each mechanical unit in accordance with the user instructions, and as outlined in OSHA regulations, ANSI standards, and CSA standards. CSA standards require an annual re-certification for mechanical products two years from date of manufacture.

Capacity (working load)

For 20' web, 30', 50', 70', and 95' cable Dyna-Lock Models:

- Maximum: 400 lbs (181 kg)
- Minimum: 75 lbs (34 kg)

*Now rated
to a capacity of

Fall Protection

Confined Space Equipment

MSA confined space entry/retrieval systems are designed for fall arrest, lifting and lowering, rescue, and work positioning applications. They incorporate an anchorage connector, fall arrest component (Dyna-Lock, Dynevac II, Lynx Rescuer), a personnel and materials handling hoist (Lynx Hoist), and associated hardware to rig the system for use. The systems can be used for leading edge work, maintenance and entry/retrieval from manholes, tank cars, silos, tanks, vaults, pits, vats, and other confined space applications.

Lynx® Rescuer, Field Resettable Model with Lockout

- Self-Retracting Lanyard with emergency retrieval capabilities
- User is able to reset device from retrieval mode to fall arrest mode
- The easiest, quickest field-reset mechanism on the market
- Same unit can be used in the field and for training situations
- Lock feature with key allows more control over who can reset unit to fall arrest mode
- Confined space entry provides fall arrest and emergency lifting and lowering
- Meets ANSI Z359.1-1992 (R1999), and all applicable OSHA standards, and is CSA certified

Part No.	CSA Part No.	Description
10011744	10023016	50-ft (16m) Self-Retracting Lanyard with Emergency Rescuer, 3/16" diameter stainless steel line. With proper inspection, system may be reused after fall arrest and/or retrieval.

Lynx Rescuer
Part No. 10011744

Lynx® Personnel/Material Hoist

- Designed for lifting, lowering, and positioning of personnel and materials
- Maximum work load of 310 lbs for personnel and 620 lbs for materials
- Anti-backlash crank handle with a lifting/lowering speed of 25-ft per minute
- Integral shock absorber
- Load-limiting clutch prevents overloading of hoist
- Emergency drive allows manual bypass of load-limiting clutch for extra lifting capacity in an emergency
- Primary gear backed up by two independent secondary brakes
- Air drive adapter enables powered lifting/lowering with optional air-powered drive assembly
- Meets ANSI Z359.1-1992 (R1999), and all applicable OSHA standards

Part No.	Description

Confined Space Entry Kits

Confined Space Entry Kits make it easy for you to order the Confined Space System which best suits your needs.

The Confined Space Entry Kits feature:

- 3 Tripod Kits and 2 Folding Davit Kits
- Single part number for simplified ordering
- Confined Space Kits with Lynx Rescuer allow for non-entry rescue of a confined space entrant
- Tripod and Davit Kits allow for great portability
- Training Video and Tripod Carrying Strap included within each kit

Lynx® Tripod Confined Space Entry Kit #1

(P/N 10023966)

- Split Mount Pulley (P/N 506222)
- Lynx Rescuer Mounting Bracket for Tripod (P/N 506232)
- Lynx Rescuer 16 m (P/N 10011744)
- Lynx 8' Tripod (P/N 10022050)
- Includes Carry Bags for Tripod & Lynx Rescuer

Fall Protection

Folding Davit and Base

The Folding Davit and Base is a portable and economical anchorage connector used where a tripod will not work. Available with a zinc-plated alloy-steel Davit Arm and your choice of zinc-plated carbon steel or stainless steel Davit Base. This lightweight device provides a 24-inch reach and 77-inches of head clearance. It pivots 360-degrees and can readily maneuver personnel and materials between spaces below the deck where it is mounted. The Folding Davit may be carried from base to base and installed in minutes. Meets or exceeds ANSI Z359.1, ANSI A10.32, and applicable OSHA requirements. Mounting brackets and pulleys sold separately.

Column Davit and Base

The Column Davit and Base are used for more permanent conditions where a tripod will not work. Available with a zinc-plated alloy-steel Davit Arm and zinc-plated carbon steel or stainless steel bases. Provides a 30-inch reach and 77-inches of head clearance. May be mounted to horizontal, vertical, and subsurface appropriate anchor points. Pivots 360-degrees. Meets or exceeds applicable OSHA requirements. Mounting brackets and pulleys sold separately.

Part No.	Description
506613	Folding davit arm, 24" reach, 77" working height, swivels to extend over work area, folds for ease of transport and storage
506614	Folding davit base
506622	Bracket for mounting 10m (30 ft)/ 16m (50 ft) Dyna-Lock, Dynevac, and Lynx Rescuer to Folding davit
506362	Bracket (same as above), except for 22m (70 ft)/ 30m (95 ft) Dyna-Lock
506568	Column davit arm, 30" reach, 77" working height, boom arm swivels to extend over work area
506492	Surface mounting receptacle for Column davit arm
506232	Bracket for mounting 10m (30 ft)/ 16m (50 ft) Dyna-Lock, Dynevac, and Lynx Rescuer to Column davit, aluminum (requires part no. 506590)
506216	Bracket (same as above), except for 22m (70 ft)/ 30m (95 ft) Dyna-Lock
506590	Bracket for mounting Dyna-Lock or Dynevac to Column davit (requires part no. 506216 or 506232)
506603	Holster to store Boom Mount Hoist when not in use
506668	Vertical davit arm - Ladder Mount
506667	Receptacle for Vertical davit arm - Ladder Mount (bolts to ladder)
415837	Push-Pull davit - Ladder Mount, bolts to ladder and retracts to allow hatch cover to close, extends 60" above hatch when extended

Vertical Davit -

Bosun Chair

The Bosun Chair is the best method to sit suspended for long durations. The padded seat ensures your comfort during use. The adjustable web assembly ensures security. Designed to be used in conjunction with our Full Body Harnesses, the Bosun Chair, attached to the chest D-ring, will keep the user in the upright position.

Part No.	Description
SSH3505017	Bosun Chair, 5" x 16-1/2" padded seat, black nylon straps, 2 carabiners

Sure-Climb System with Integral Shock Absorber
Part No. SFPLS353050

Ladder Climbing Equipment

Sure-Climb™ Temporary Cable System

The Sure-Climb Temporary Ladder Cable System is designed to provide fall protection when climbing or descending ladders or vertical structures up to 300' in height. Applications include telecommunications towers, light poles, water towers, hydroelectric towers, stacks, and any other climbable structure. The Sure-Climb temporary system:

- Is available in 2 versions; with an integral shock absorber, or with an energy-absorbing top mounting bracket
- Allows for quick and easy attachment to approved ladder or structure
- Includes an integral, adjustable line weight
- Uses a stainless steel fall arrester (ordered separately)
- Uses a 5/16" galvanized steel cable
- Meets all applicable OSHA regulations and ANSI standards
- CSA certified

All Sure-Climb systems include: anchor bracket, anchor shackle, cable guides, wire rope clips, turnbuckle, and cable.

Fall Arrester must be ordered separately.

Part No.	Description
SFPLS353050	Sure-Climb System with integral shock absorber, 50 ft (16 m)
SFPLS353100	Sure-Climb System with integral shock absorber, 100 ft (30 m)
10040010	Sure-Climb Slider (fall arrester) with carabiner

Additional Lengths available from 50 ft. up to 200 ft. in fifty foot increments

Sure-Climb™ Permanent Cable System

The Sure-Climb Permanent Ladder Cable System is designed to provide fall protection when climbing or descending ladders or vertical structures up to 300' in height. Applications include telecommunications towers, light poles, water towers, hydroelectric towers, stacks, and any other climbable structure. The Sure-Climb permanent system:

- Includes energy-absorbing, galvanized steel top and bottom mounting brackets
- Uses a 5/16" galvanized steel cable
- Incorporates cable guides to minimize cable vibration and wear
- Uses a stainless steel fall arrester (ordered separately)
- Meets all applicable OSHA regulations and ANSI standards
- CSA certified

Part No.	Description
SFPLS350050	Sure-Climb System 50 ft (16 m)
SFPLS350100	Sure-Climb System 100 ft (30 m)
10040010	Sure-Climb Slider (fall arrester) with carabiner

Additional Lengths available from 20 ft. up to 300 ft. in 10 ft. increments

Sure-Climb Slider
Part No. 10040010

Sure-Climb Slider can be attached and removed anywhere along the length of cable

Fall Protection

Dyna-Glide® Climbing Protection System

The Dyna-Glide Climbing Protection Systems are used to prevent and/or arrest falls from heights and also enhance the way a climber is able to perform the necessary work. Our systems can be mounted to already-installed ladders, to corners of lattice towers, and to almost any other suitably strong structure your crew needs to climb.

Whatever configuration works for you, the Dyna-Glide System:

- Limits total fall distance to inches
- Offers components for complete rescue systems
- Allows for vertical and horizontal mobility
- Uses galvanized or stainless steel for corrosion resistance
- Offers your choice of Ladder Rail Combination (LRC) or Rail only
- Provides smooth travel – there's no binding of the fall arrester inside the rail
- Uses detachable, lightweight, stainless steel and aluminum mechanism for hands-free ascent and descent
- Is CSA certified

Taken together, the Dyna-Glide System is designed to be installed without modification to the structure and can be assembled with simple hand tools.

Dyna-Glide LRC in use.

LRC Combination
Part No. 506390

- Rungs incorporate skid resistant surface
- Can be curved or bent for your specific application
- Constructed of galvanized steel
- Standard length: 7' 4-3/16"
- Standard width: 18"

Fall Arrester
Part No. 506277

- Mechanical locking mechanism to reduce fall distance
- Permits hands-free ascent and descent
- Constructed of aluminum and stainless steel
- Carabiner not included

Part No.	CSA Part No.	Description
506270	—	Straight Notched Rail, galvanized, standard length 7' 4-3/16"
506273	—	Rung Mount Assembly, galvanized
506274	—	Gated top end stop, stainless steel
506275	—	Gated bottom end stop, stainless steel
506277	415752	Fall arrester
506282	—	Mounting base angle corner, galvanized
506283	—	Mounting angle corner, galvanized
506312	—	Ungated top end stop, stainless steel
506329	—	Rail connector, galvanized
506388	—	Ladder/Rail Combination (LRC) standoff bracket, galvanized, standard length 7' 4-3/16"
506389	—	LRC standoff bracket, bottom, galvanized
506390	10006461	LRC, galvanized
506391	—	LRC side rail connector, galvanized

For more complete information on the Dyna-Glide System, see the Dyna-Glide Catalog (Bulletin 2300-22-MC).

Temporary Horizontal Lifelines

Temporary Synthetic Horizontal Lifelines

Designed for easy installation and removal, these temporary horizontal lifeline systems were created for a wide range of applications. The system may be mounted to any suitable 5,000 lb-rated anchorage. Both systems can be rigged using many standard components, reducing the need for special or "engineered" equipment.

Dyna-Line® HLL

- Highly visible 12-strand red rope will not hackle and minimizes fall distance due to its low stretch properties.
- Available in a Single-Worker or Two-Worker system.
- Available in lengths up to 200 ft. System comes in a handy bucket for lengths up to 60 ft.
- Meets all OSHA requirements and ANSI A10.32 standards.

Sure-Line™ HLL

- Includes integral energy absorber
- 5/8" black nylon kernmantle rope
- Available in lengths up to 60 ft
- Rated for two workers
- Includes 2 cable anchor slings
- Includes storage bag

Dyna-Line Temporary Horizontal Lifeline for Two Workers Part No. 10013152

Temporary Cable Horizontal Lifeline

Sure-Line™ Temporary Horizontal Lifelines

The Sure-Line temporary Horizontal Lifeline is a lightweight cable system that is suspended between two approved anchor points to provide worker fall protection during horizontal movement. Designed for quick and easy installation at temporary work sites, the Sure-Line system:

- Includes an integral shock absorber
- Available in 20-ft, 40-ft, or 60-ft lengths
- Uses a 3/8", 6x36 galvanized cable
- Available in 2 models, with or without turnbuckle
- Rated for up to 2 people
- Incorporates a combination clamp/thimble that allows for effortless tensioning of lifeline

Part No.	Description
SHL2009040	Steel Cable Horizontal Lifeline System with turnbuckle, 40 ft (12 m)
SHL2009060	Steel Cable Horizontal Lifeline System with turnbuckle, 60 ft (18 m)
SHL2009040IW	Iron Worker Cable Horizontal Lifeline System without turnbuckle, 40 ft (12 m)

Fall Protection

Permanent Horizontal Lifelines

SkyLink™ HLL STANCHION

- Economical
- Accommodates two workers per system
- Lightweight - weighs only 21 pounds, making it easily installed, removed, and handled by 1 person
- Only a 24-hour cure time required for pour-in-place Pigtail anchor (min. 3,000 psi concrete), so you won't hold up a job or slow down your crew.
- No tools required for installation when using pour-in-place anchor, making it easy to install - sets up in minutes!
- Can be used as single point anchor attachment, providing fall protection for workers while installing horizontal lifelines
- Offers two installation methods to concrete, a pour-in-place anchor for new construction or concrete expansion bolts for existing construction, providing versatility to meet the requirements of your application
- Aluminum and steel construction increases durability to ensure long service life
- Folding leg stanchion design makes the stanchion easy to carry and convenient to store
- No tie-back line required reduces trip hazards
- Meets ANSI A10.32 and OSHA requirements

Designed to support horizontal lifelines in two directions (in-line with D-ring head)

Can be used as single point anchor while connecting lifeline

Standard Model
Part No. 10055659

SL Model
Part No.
10055660

Two possible methods of securing stanchion feet to concrete

Can be attached to concrete using concrete expansion bolts

Can be attached to concrete using integral Speed Nut and Pig-tail anchor

Part No.	Description
10055659	Skylink Stanchion, Standard model - 44" height (pour-in-place Pigtail or concrete expansion anchors must be ordered separately)
10055660	Skylink Stanchion, SL model - 23" height (pour-in-place Pigtail or concrete expansion anchors must be ordered separately)
10055721	3.25" concrete expansion anchor with nut and washer
10059805	0.5" x 12" pour in place "Pigtail" anchor with washer and vinyl cap
10059806	Skylink Stanchion Kit including 2 - Standard stanchions with 60' 2- worker Dyna-Line 10013151 (without anchor straps) and 4 Pigtail anchors
10059807	Skylink Stanchion Kit including 2 - Standard stanchions with 60' Sure-Line for Iron Workers (p/n SHL2009060IW), and 4 Pigtail anchors
10059808	Skylink Stanchion Kit including 2 - SL stanchions with 60' 2- worker Dyna-Line (p/n 10013153 - without anchor straps) and 4 Pigtail anchors
10059809	Skylink Stanchion Kit including 2 - SL stanchions with 60' Sure-Line for Iron Workers (p/n SHL2009060IW), and 4 Pigtail anchors

D6 HLL STANCHION

The D6 HLL Stanchion is an anchorage connector used for the installation of horizontal lifeline systems. Designed with a jaw clamp screw, D6 HLL Stanchions are easily installed on steel girders or base plates fitted to bridge rail ties to provide a strong stable connection point for the approved horizontal lifeline system. The D6 HLL Stanchions can be used as the end or intermediate connection points for either a single or multi-span horizontal lifeline system.

Anchorage Bracket Also Features:

- Engineered A-frame design
- Constructed of galvanized steel
- Jaw clamp screw allows for quick & easy installation
- Collapsible A-frame for easy transport & storage
- Meets all applicable OSHA regulations & ANSI standards

HLL quickly connects to Stanchion

Jaw clamp screw easily attaches to I-beam flange

SINGLE-SPAN

MULTI-SPAN

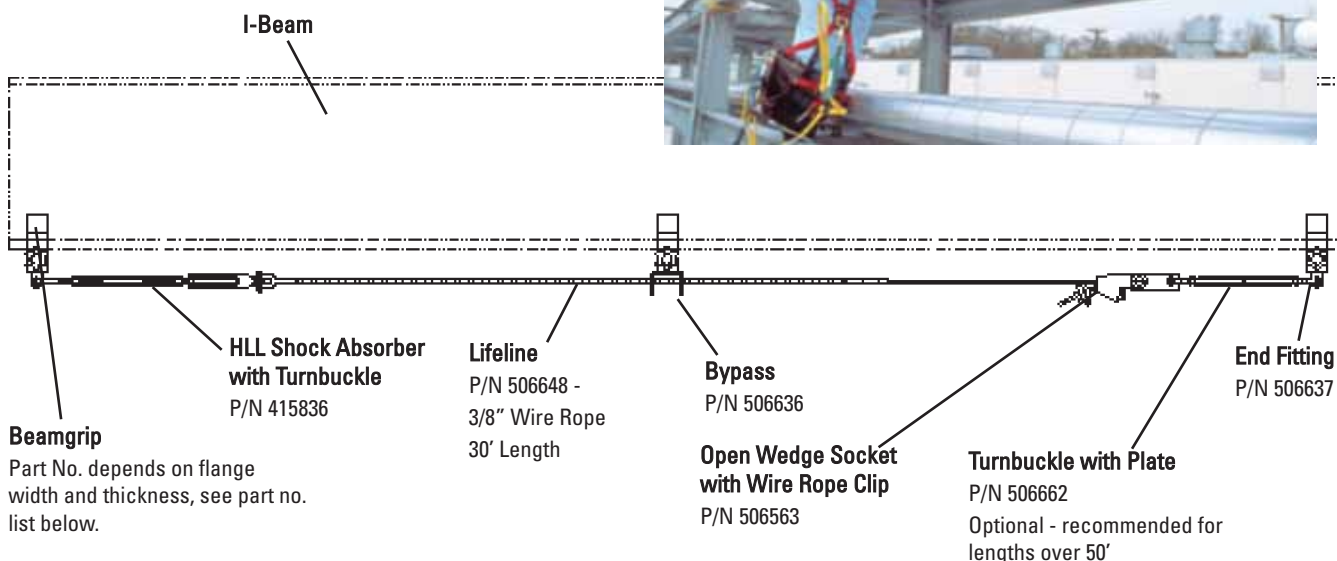

Part No.	Description
SHLARD6A	D6 HLL Stanchion A-frame design, galvanized steel

Horizon® Horizontal Lifeline

The MSA Horizon Horizontal Lifeline anchorage connecting system is designed for portability, versatility, ease of installation, and ease of use. The system may be mounted to existing overhead steel beams or to newly constructed steel structure where overhead anchorage points are not available. Horizontal travel through intermediate supports is achieved without disconnection of the worker's personal fall arrest system. The system may accommodate up to five persons. The unique shock absorber reduces dynamic forces transmitted to the anchorage points. Stanchion system may be installed on the top or bottom flange of an I-beam. Typical applications include new construction (steel erection), inspection and maintenance operations, loading bays, bridges, overpasses, aircraft hangars, manufacturing, petrochemical, chemical, and food processing plants. Meets OSHA requirements.

Basic Below Beam Mount Sub-System

Parts required for this system: 3 Beamgrips (Part No. depends on size of beam flange); 1 - 415836; 1 - 506648 (30'); 1 - 506636; 1 - 506563; 1 - 506662; 2 - 506637

Part No.	Description
506682	Beamgrip for beams with flange width: 3.94" to 5.64", flange thickness: .205" to .659"
415171	Beamgrip for beams with flange width: 5.525" to 8.07", flange thickness: .36" to 1.09"
415172	Beamgrip for beams with flange width: 8.06" to 10.475", flange thickness: .56" to .935"
415173	Beamgrip for beams with flange width: 10.265" to 12.8", flange thickness: .605" to 1.25"
415836	Horizontal lifeline shock absorber
506563	3/8" open wedge socket
506636	Beamgrip bypass fitting
506637	Beamgrip end fitting
506648	3/8" wire rope, galvanized, length must be specified at the time of order
506662	12" turn buckle with plate
506663	Snatch block pulley for 3/8" wire rope
506254	for 1/2" wire rope
506255	for 5/8" wire rope

⚠ WARNING

OSHA regulations state "Horizontal Lifeline Systems shall be designed, installed and used under supervision of a qualified person, as part of a complete fall arrest system, which maintains a safety factor of at least two." A qualified person is defined as "one with a recognized degree or professional certificate and/or extensive knowledge and experience in the subject field, who is capable of design, analysis, evaluation and specifications in the subject work, project or product." MSA can provide a qualified person to design and install a Horizontal Lifeline System. Contact the MSA Engineering Service Department.

FP Rescue™ Pulleys & Components

Suretyman™ Pulleys

Designed to meet the rigorous standards of the professional rescuer. Built with high grade aluminum side plates and sheaves, oilite bearings, stainless steel bolts, washers, and lock nuts make these some of the best pulleys available. The aluminum side plates swivel and rotate to allow the pulley to be attached anywhere along the rope. The top holes of the side plates are large enough to accept three carabiners. Contain Prusik design (squared corners of the side plates) to provide rope security with a Prusik hitch. Pulleys accept 3/8" (1cm) to 1/2" (1.3 cm) static kernmantle ropes. Side plates are powder coated. Strength: 2" (5 cm) Double 8,100 lb (36 kN), 4" Double 11,200 lb (49 kN).

Suretyman™ Mini Knot Passing Pulley

The Suretyman Mini Knot Passing Pulley was designed for the professional rescue team concerned with size and weight. The Suretyman Mini Knot Passing Pulley features:

- Ample room for the passing of knots
- Size: 9-1/2" (24 cm) tall, 4" (10 cm) wide, 3" (7.6 cm) deep
- Aluminum sheave (that will not score like some of the plastic sheaves)
- Locking pin
- Weight: 1.9 lb (.89 kg)
- Half the size and weight of some of the larger, bulkier knot passing pulleys

Suretyman™ Edge Roller

The best way to protect your rope from sharp edges and reduce rope friction. High quality construction. The 6" x 10" (15.3 cm x 24.4 cm) base is rubber covered to reduce slippage. The bottom and side plate feature attachment holes for ease of security in any situation. Added slots in the base plate accept tube webbing for security. Two edge rollers are required (sold separately). Two quick links are required (sold separately). Edge roller is 4" (10 cm) tall. Weight: 2.8 lb (1.3 kg).

SuretyMan™ Q-Eight

- Ears/cleat are positioned to make tie off very easy and safe
- Ears/cleat still prevent larks footing (girth hitch)
- Designed for 7/16" (11 mm) diameter rope (will work with 1/2" (12 mm) diameter rope)
- Aluminum, anodized gold
- Strength 13,000 lbs (58 kN)
- Weight 8 oz (.24 kg)

SuretyMan™ Rescue Eight

- Designed for rope diameters from 7/16" (11 mm) to 5/8" (16 mm)
- Strength 6,720 lb (30 kN)
- Designed for the fire service, rescue, and police tactical operations
- Available in aluminum or steel
- Weight 1.5 lb (675 g)

Suretyman™ Rigging Plates

Stealth Riggig Plate: Anchor on the point and the wings will rotate toward the load for a straighter line of pull. Material aluminum. Weight: .46 lb (250g). Strength: 11,000 lb (48 kN). Color: Teal

Stretcher Rigging Plate: Designed to unclutter and organize litter rigging points, reducing the chance of error. Material aluminum. Weight: .74 lb (330g). Strength: 12,200 lb (54 kN). Color: Teal

Rescue Carabiner

- Traditional large "D" design
- Developed for fire and rescue communities
- Manual locking
- Certified to meet NFPA 1993-1995, Class "G"
- Carbon steel, zinc-plated
- Strength 12,364 lbs (55 kN)
- Weight 11 oz (311g)
- Gate opening 1.2" (32mm)

Part No.	Description
SPPPU8708	Suretyman Pulley, 2" (5 cm) double, Std/Prusik, orange, aluminum, weight: .83 lb (375 g)
SPPPU8717	Suretyman Pulley, 4" (10 cm) double, Std/Prusik, orange, aluminum, weight: 1.8 lb (840 g)
SPPPU8720	Suretyman Mini Knot Passing Pulley, yellow, weight: 1.9 lb (.89 kg)
SPPRL4000	Suretyman Edge Roller, aluminum, weight: 2.8 lb (1.3 kg) - [two required]
SMI420560	Quick Link 5/16" (8 mm) for use with Suretyman Edge Roller - [two required]
SRSF5077	Suretyman Rescue Eight, aluminum
SRSFFE2120	Suretyman Q-Eight

FP Rescue Ropes

Static Kernmantle Ropes

These ropes are 100% permanent solution dyed color with contrasting marker stripe. Superior flexibility and knotability, provided by a unique double-twist cable core construction, gives superior resistance to abrasion that is up to four times greater than other static kernmantle ropes. These ropes are designed with load absorbing capabilities to provide additional safety in the event a dynamic force is applied.

Part No.	Description
SRP508760	7/16" (11 mm), nylon, 6,500 lb (2,948 kg), black
SRP504860SL	1/2" (12 mm), nylon, 9,100 lb (4,128 kg), white/orange tracer
SRP508960	5/8" (16 mm), nylon, 11,400 lb (5,171 kg), black

All ropes are ordered by the foot.

Prusik & Accessory Cords

Prusik cords have the same high quality and long wear design as rescue ropes. Size selection should be based upon diameter of the main line. The flexible cord is both strong and highly resistant to abrasion. Prusik cords and accessory cords are identical.

Part No.	Description
SRP500860	8 mm Accessory Cord, nylon. Use with 1/2"-5/8" (1.3cm-1.6cm) main line, black, 3,100 lb (1,406 kg)
SRP500900	9 mm Accessory Cord, nylon. Use with 1/2"-5/8" (1.3cm-1.6cm) main line, 3,600 lb (1,632 kg)

Rope Storage Bags

Rope Storage Bags are made of tough Cordura nylon fabric. Features include a drawstring top, handle/shoulder strap, and carabiner loops at top and bottom. In the bottom of the bag there is an inside loop for the end of the rope, or it can pass through the bottom grommet. Available in orange and black colors.

Part No.	Description
SRB430101	Rope Bag #1, orange, holds 120-ft / 1/2" (36.6m / 12 mm) rope
SRB430105	Rope Bag #1, black, holds 120-ft / 1/2" (36.6m / 12 mm) rope
SRB430201	Rope Bag #2, orange, holds 200-ft / 1/2" (60.1m / 12 mm) rope

Rope Bag #1
Part No. SRB430105

Rope Bag #2
Part No. SRB430201

FP Rescue TRIPOD

Sure-Strong™ Tripods

Sure-Strong Tripods feature:

- Adjustable aluminum legs
- Two forged steel anchor eyes in head assembly
- Head assembly prevents unintentional collapse of tripod
- Legs adjust and lock individually to accommodate variable anchor heights, uneven ground, and compact storage
- Leg security strap prevents legs from spreading in the event of excessive loading
- Available with a cordura nylon storage bag
- Rated for 2 people with a working load of 1,100 lbs

Part No.	Description
SCE107007	Sure-Strong 7-ft (2m) tripod, aluminum, 10,752 lb (48 kN)
SCE1074411200	Sure-Strong work winch, 200-ft (61m) galvanized wire rope, with bracket (compatible with Lynx Tripod and Sure-Strong Tripod)

FP Rescue Kits

Bucket Truck Evacuation Kit

The Bucket Truck Evacuation Kit was created to provide all necessary equipment to allow a worker to safely evacuate an aerial bucket that has become inoperative. The kit includes:

- #2 Rope Bag (P/N - SRB430205)
- 10-ft Synthetic Ladder with Swivel Snaphook (P/N - SCE405010)
- Boom Anchor Strap (P/N - SSB22040)
- Anthron system (P/N - SDC726075) which includes Anthron device, Carabiners (2), 75-ft (22m) 7/16" rope

Part No.	Description
SKITSMT001	Bucket Truck Evacuation Kit

Fall Protection

Suretyman™ Rescue Utility System

The Suretyman Rescue Utility System incorporates all the features professionals have come to expect from a first class rescue system. The system is primarily used for raising and lowering people or equipment in rescue and industrial work access and is ideal for confined space applications.

The Suretyman Rescue Utility System features:

- Pulleys equipped with a built-in anti-reversing lock
- Only a 10 lb force is all that is required to hold a 220-lb (90 kg) load
- Suretyman ascender attached to both the operating rope and the user via a securing rope - if the operating rope accidentally releases, the ascender automatically stops the descent
- Rapid deployment
- Virtually maintenance free
- Rated for 2-person load
- Compact and light weight with a standard system weight of 17 lb (7.7 kg)
- Versatile for rescue & access
- Multi-purpose ascent or descent
- Rated capacity of 600 lb (272 kg) for personnel and materials
- Standard rope length of 200 ft (66m) with a maximum rope length of 800 ft (267m)

Part No.	Description
SRS15200	Suretyman Rescue Utility System (200' length)

PLEASE NOTE:

Due to a 4:1 mechanical advantage, the user should order the Rescue Utility System with 4 times the length of rope necessary for their application. For example, the 200' system listed above provides a 50' working length. A 800' system provides a 200' working length.

Suretyman Rescue Utility System can be used in conjunction with the Sure-Strong Tripod (p.183)

Suretyman Rescue Utility System
Part No. SRS15200

Storage Bag

Basic High Angle Rescue Kits

The Basic High Angle Rescue Kits were designed for the Fire Department planning to assemble a high angle rescue team. A complete high angle rescue system consists of two kits: a Belay System Kit, and a Raising/Lowering System Kit.

The Belay system kit includes:

- 3 large "D" shaped rescue carabiners (P/N SRCC641) - NFPA approved Class G
- 200-ft (61m) 1/2" rope, orange and white (P/N - SRP504860SL) - NFPA approved
- 33-ft (10m) 9mm accessory cord (P/N - SRP500900) for making load-release hitch
- 65" (1.65m) 8mm accessory cord & 53" (1.35m) accessory cord (P/N - SRP500860) make-up the tandem Prusiks
- 6-ft (1.8m) Suretyman anchorage sling (P/N - SFP2267406)
- #3 rope bag, orange (P/N - SRB430301)

The Raising/Lowering System includes:

- 6 large "D" shaped rescue carabiners (P/N - SRCA641) - NFPA approved Class G
- Stealth rigging plate (P/N - SRSPR5990)
- 200-ft (61m) 1/2" rope, red (P/N - SRP504863SL) - NFPA approved
- 33-ft (10m) 9mm accessory cord (P/N - SRP500900) for making load-release hitch
- 65" (1.65m) 8mm accessory cord & 53" (1.35m) accessory cord (P/N - SRP500860) make-up the tandem Prusiks
- 53" (1.35m) 8mm accessory cord (P/N - SRP500860) for creating the Prusik for connecting the raising system
- 2 Single Pulleys, 4" (100mm) (P/N - SPPPU8710) - Prusik minding pulleys
- Brake Bar Rack (P/N SRS14001) - lowering device is NFPA approved
- 6-ft (1.8m) Suretyman anchorage sling (P/N - SFP2267406)
- #3 rope bag, black (P/N - SRB430305)

Part No.	Description
10030023	Belay System Kit
10030024	Raising/Lowering System Kit

Fall Protection

Emergency Rescue Bag System

The Emergency Rescue Bag System is designed for rescue on electrical and communication towers. Developed for use in restrictive environments, this extremely lightweight system was primarily designed for tower rescue; however, the system can be used to perform rescues on almost any vertical structure. The Emergency Rescue Bag System consists of a pre-rigged lowering system that comes in a variety of lengths. The users of this product must receive training by an approved trainer.

Part No.	Description
SRS323150	Emergency Rescue Bag System, 150-ft (45 m) working length
SRS323300	Emergency Rescue Bag System, 300-ft (90 m) working length

PLEASE NOTE:

Due to a 2:1 mechanical advantage, the user should order the Emergency Rescue Bag System with twice the length of rope necessary for their application. For example, the SRS323150 uses 300' of rope to achieve a 150' working length. The maximum system available provides a 400' working length with 800' of rope.

General Accessories

Hands-off™ Chisel Grip

The Hands-Off Chisel Grip keeps hands away from the point of contact. The Hands-Off Chisel Grip is ergonomically designed to match the specific shape of the human hand for a comfortable and firm grip. Additional features of this modern design include:

- Permits faster, safer, more accurate work.
- Easy adjustment to hold a variety of chisels and stakes up to 1" in diameter.
- Vibration-absorbing handle.
- Eases awkward hand positioning.
- Economical.
- Spark resistant.

Part No.	Description
10040018	Hands-Off Chisel Grip

Ergonomic Tool Holders

- Holds wrenches, chisels, etc.
- Vibration-absorbing design
- Attach to broom handles and mops for better grip
- Eases awkward hand positioning

Part No.	Description
507005	Tool Holder, 18"
507006	Tool Holder, spark resistant, 18"

MSA Custom Solutions

Every business is unique, and MSA recognizes that YOUR Fall Protection systems need to be custom-designed and installed to meet YOUR needs. To help you, we have carefully selected and trained specially qualified contractors, who can personally work with YOU to deliver exactly the services your hazardous situations demand.

These MSA Fall Protection System Integrators are independent organizations throughout North America whose local specialists can provide one or more customized MSA Fall Protection solutions for your business. Your MSA System Integrators will combine their experience and knowledge of practical applications with MSA Fall Protection products to meet your specific needs for any industry, including forestry, construction, oil & gas, petrochemical, mining, manufacturing, utilities, entertainment, and transportation.

Whether you choose complete turnkey services or individual services, you'll receive experienced application and design, fabrication, and installation of whatever MSA Fall Protection systems you need.

Engineering Services

Registered professional engineers will visit your site to analyze and determine the scope of work. Then they will design and draft engineering drawings, and later, follow up with a construction site review to ensure that your Fall Protection system has been installed as designed.

Fabrication

Knowledgeable fabricators will build whatever structural components are required to support your primary MSA Fall Protection system, from simply connecting brackets that attach to your building columns or beams, to assembling complete free-standing support structures. You can trust that your fabricated components will comply with all applicable governing codes and standards.

Installation

Factory-trained and certified installation technicians will execute the design specifications and carry out the manufacturer's instructions. Technicians can also inspect and re-certify an existing MSA Fall Protection system.

Training

High-quality training programs at a reasonable cost will be tailored to the unique issues of your industry and installation. MSA's commitment to increasing demands for technical training in Fall Protection, post-fall retrieval, and rescue will be fulfilled at your facility.

Why Choose MSA Custom Solutions?

- You get the broadest product range, to ensure the best possible fall hazard solution for your specific application.
- MSA System Integrators work directly for you and are responsive to your project requirements.
- MSA System Integrators offer cost-effective services direct to you, the MSA customer.
- You will benefit from dedicated regional System Integrators as well as nationally prominent organizations that specialize in particular industry applications.

How?

It's easy! To receive your quotation from MSA CUSTOM SOLUTIONS:

1. Contact your local MSA distributor, MSA Sales Associate, or call our MSA Customer Service at 1-800-672-2222.
2. Your request will be forwarded to the MSA System Integrator, who will contact you about your project's specific requirements.
3. You will receive a written estimate for your system.

For more information call MSA Customer Service Center at 1-800-672-2222 and request the Custom Solutions Catalog (Bulletin #2300-100)

Fall Protection

Sure-Rail™ Horizontal Lifeline

The Sure-Rail system is a rigid rail horizontal lifeline system typically used in areas when there is limited clearance below the working surface. The Sure-Rail system is available in many standard configurations, but can also be customized to fit your application. The Sure-Rail system provides:

- Ease of movement (smooth trolley action)
- Little or no deflection in the rail limits fall distance and fall arrest forces on the body
- Support for up to 4 workers on the system simultaneously.
- Meets all applicable OSHA regulations

Latchways Mansafe® Horizontal Lifeline

The Latchways ManSafe Horizontal Lifeline systems are designed to operate horizontally, around corners, and up or down inclines to offer continuous worker protection regardless of the building type or structure.

ManSafe Horizontal Lifeline features include:

- Unsurpassed system flexibility
- Ability to support up to 6 workers per lifeline
- Unique Latchways Transfastener rotates freely through intermediate supports to enable hands-free operation

SafeRidge section with traveling eyebolt and endstop.

Saferidge™ System

The patented SafeRidge system is designed to provide fall protection on sloped roofs. This unique product combines a fall protection system with the waterproof and venting characteristics of a traditional roof ridge section. Its low profile and unobtrusive appearance can accommodate a wide variety of roof profiles. Advantages of the SafeRidge system are:

- Can be installed on new or existing buildings
- Can be installed quickly and easily by your personnel
- Cost-effective – provides a safety system and apex weather proofing in one product
- Accommodates up to 4 workers per system

A complete system consists of the saferidge section, endstops, traveling eyebolt, a full body harness, and a rope grab.

Please call 1-800-672-2222 and let us help you specify the system that will meet your needs.

Learn from the Experts

MSA offers the following Fall Protection training courses:

Fundamentals of Safety At Heights

Topics include:

- Fall hazard recognition
- Basic fall prevention and protection principles
- Selection, application, and use of fall protection systems
- Review of applicable, industry-related standards

Competent Person for Equipment Inspection

Topics include:

- Proper equipment cleaning & storage
- Formal inspection procedure & documentation process
- Review of applicable, industry-related standards

Safety At Heights Program Management & Rescue Planning

Topics include:

- Round-table discussion of fall protection issues
- Writing or reviewing of a current, up-to-date fall protection program or policy
- Planning for an effective and swift rescue
- Selection and use of manufactured rescue systems

Competent Person for Safety At Heights

Topics include:

- Combines Fundamentals, Equipment Inspection, and Management & Rescue courses

Tower Climbing Safety & Rescue

Topics include:

- Selection & application of fall protection systems
- Basic fall protection principles
- Review of applicable, industry-related standards
- Meets both Bechtel and American Tower's current training requirements for tower climbers

New!

Industrial Rescue

Topics include:

- Review of applicable, industry-related standards
- High angle rescue techniques
- Selection, application, and use of rescue systems; such as Raising/Lowering
- Manufactured rescue systems versus rope access rescue systems
- NFPA-approved rope access courses available

New!

Additional Courses

- Confined Space Entry and Retrieval
- Fall Protection & Rescue for Railway Bridges
- Competent Person Refresher
- Competent Person Train-The-Trainer

MSA has also designed many types of custom training courses and interactive training programs for a wide range of industries including:

- Mining Industry
- Utilities Industry
- Automotive Industry
- Telecommunications Industry
- Railroad Industry

With MSA, you have the experts to help you find the best solution for your Safety At Heights training needs.

Registration Information

We invite you to attend our next training session, which will prove to be a comprehensive and valuable experience. For registration information, please contact the MSA Customer Service Center by phone (1-800-672-2222) or by fax (1-800-967-0398), or log onto our web site at www.MSAnet.com.

Mining and Specialty Equipment

Ultralight™ Cap Lamp System

The state-of-the-art Ultralight Cap Lamp System has the brightest prefocused spotlight available (tungsten halogen) and provides exceptionally brilliant illumination of the work site. It has a long-life Luminator battery and a variety of battery charging equipment available.

The two-inch diameter, state-of-the-art Ultralight Cap Lamp headpiece is made of high-impact polycarbonate and consists of only five major parts:

- A one-piece polycarbonate bezel/lens (glass-laminated lens optional).
- A computer-designed, prefocused bulb/reflector assembly, featuring a high output, tungsten-halogen bulb, accurately positioned in the focal point of the reflector to assure a good spot.
- A plug-in tungsten-halogen bulb emergency escape light.
- A main housing with a printed circuit board for bulb and battery cable connections.
- A three-position switch.

A wire spring keeps the bulb/ reflector assembly properly resting against the lens to reduce vibration and mechanical shock.

The prefocused bulb/reflector assembly eliminates the need for a focusing mechanism. Both the on/off switch and the charging contact are located in the headpiece housing. With only four major parts, inventory, replacement stocks and downtime are minimized.

The tungsten-halogen bulb provides a white, bright light, achieved with little battery power consumption, because tungsten-halogen bulbs are extremely efficient. In fact, more light output is achieved without reduction in bulb life. The light is also softer to miner's eyes.

In addition, the light output is more consistent, providing 85 to 95% of its initial light output, even at 70% of life expectancy. The bulb has a 1.0 amp rating at 4 volts. This lower amperage allows for longer cap lamp use between charges.

The prefocused bulb/reflector assembly efficiently concentrates over 90% of the light into a highly concentrated beam for exceptionally bright illumination of the work site.

Ultralight Specifications

Operating voltage: 4.2 to 3.8

Operating Time: Up to 14 hours (Luminator Plus)

Battery Dimensions: 7¼" x 5¼" x 1½"

Weight: 4 lb 12 oz

Light Intensity: @ 10 feet (using standard bulb with fully charged battery) = 1450 LUX

Bulb Amperage: 1.0 (nominal)

MineSpot® Luminator® Battery

The MineSpot Luminator Battery is assembled as a complete sealed unit that requires nothing more than routine charging and periodic watering. The battery case is impact-resistant polycarbonate with reinforced bottom corners and molded-in belt loops. The Luminator Battery was designed for low maintenance and long life. Watering is required only every 4–6 weeks. The MineSpot Luminator Battery must be charged after each use.

Approvals and Standards

All MSA Cap Lamps have Mine Safety and Health Administration Certifications (MSHA certification) for use in an atmosphere of methane and air only.

--	--------

CAUTION: Do not mix cap lamp components from different manufacturer for use in applications where MSHA approval is required.

Service and Repairs

For service on all MSA lighting equipment, call 1-800-MSA-2222 or your local MSA distributor.

Power Builder® Charger Stations

MSA offers a variety of charging stations, including an AC single-unit and a 10-unit station. The 10-unit charger can be tabletop mounted, wall mounted, or stacked to convert into a multi-station charger for up to 60 stations.

The Power Builder Charger uses a microprocessor control that is efficient and never needs recalibration. It uses constant current and constant potential charging. No adjustments are required. LED colored lights let you know the condition of the battery at all times. No rectifier is required. The charger is self-contained. All AC chargers can run on 110 or 220 current.

See Bulletin 02-00-01-MC for details on all MSA Cap Lamp Systems and Accessories.

Power Builder 10-Unit Charging Station

Power Builder 10-Unit Charging Stations are stackable. Front only or back-to back. Leg kit shown.

Miscellaneous Mining Equipment

Miner's Support System and Multipurpose Pouch

The Miner's Support System from MSA is a lightweight but sturdy miner's belt that offers comfort, lumbar support, versatility and durability. It enables the miner to carry the cap lamp battery pack, filter self-rescuer, SCSR, tools, etc., on the job. A one-inch reflective strip sewn over a two-inch nylon strap makes the support system highly visible.

For more complete information, see Bulletin 0115-03.

Mining and Specialty Equipment

W65 Self-Rescuer Respirator

Provides emergency protection against carbon monoxide

The W65 Self-Rescuer Respirator provides emergency respiratory protection against carbon monoxide gas resulting from underground fires or explosions. A one-time-use device for escape purposes only, it provides respiratory protection against carbon monoxide in otherwise respirable air; it should not be used in atmospheres containing less than 19.5 percent oxygen or in atmospheres containing other toxic gases and vapors. Protected by a rugged stainless steel case, it weighs only 2.2 pounds.

Approvals

The W65 Self-Rescuer Respirator is approved by the Mine Safety and Health Administration (MSHA) and the National Institute of Occupational Safety and Health (NIOSH) (Approval No. TC-14G-82) for self-rescue from carbon monoxide. (Previously assigned Bureau of Mines Approval No. 14F-76.)

For more complete information, see Data Sheet 10-00-10.

Escort ELF® Sampling Pump

The Escort ELF Sampling Pump can be used for personal and area sampling. The state-of-the-art electronic laminar flow sensor, consisting of a laminar flow element and pressure sensor, provides constant flow (volume) control, with $\pm 2.5\%$ regulation of flow rate (from 1 to 3 lpm) and automatic compensation for changes in battery voltage, temperature, altitude, and sample load.

An internal secondary standard calibrates the pump continuously and needs to be checked against a primary standard only once a month (or every 200 hours for coal mine dust sampling). U.S. Patent No. 5,295,790.

Approvals

Escort ELF Sampling Pumps are NIOSH-certified for coal mine dust sampling (TC-74-030). They are MSHA-certified as intrinsically safe for underground use (Approval No. 2G-3924-1). The Escort ELF pump has been approved for intrinsic safety by UL for use in Class 1, Groups A, B, C, D; Class II, Groups E, F, and G; and Class III, Division I locations.

Assemble-to Order (ATO) System: You Make the Choices

The ATO System makes it easy to custom order Escort ELF pumps, configured exactly the way you want them. Choose from an extensive line of base instrument components and accessories. See pages 94-95 or Bulletin 0810-33 ATO System and Price Information for the Escort ELF Sampling Pumps for more information.

MSA Cassettes

General-Purpose Cassette

The general-purpose cassette is a sample cassette that can be used for silica sampling. This cassette can also be used for all airborne particulate collection not limited to quartz or silica.

This cassette is individually packaged in a sealed plastic bag. Each cassette is weighed by a robot to .01 mg at 70°F \pm 5° and 45% RH \pm 10%. Each cassette is attached to a Dust Data Card which includes the cassette serial number and actual weight. The cassette inlet contains a tamper-proof deflector plate, and the outlet contains an anti-blow-back check valve. Both the inlet and outlet openings are capped to ensure cleanliness. The perimeter of the cassette housing is sealed with tamper-proof sealing tape.

Because of the extreme accuracy of the MSA weighing process, users of this cassette can sample the atmosphere for dust particulate and have the analytical analysis performed with complete confidence in its accuracy.

General Purpose Cassette

Coal-Dust Sampling

MSA's preweighed filter cassettes consist of a sealed outer plastic capsule and an inner preweighed filter capsule. Each cassette is supplied with a mine data card for the weight of the filter capsule to be recorded and sent in a mailing carton addressed to MSHA.

Mining Detector Tube Set

The Mining Detector Tube Set is a variety pack of various detector tubes, designed specifically for the mining industry. The set, conveniently packaged in boxes of 12 tubes, contains:

- 3 Carbon monoxide tubes
- 2 Nitrogen dioxide tubes
- 3 Nitrous fumes tubes
- 4 Natural gas/methane tubes

Mining Detector Tube Set

Mining Detector Tube Set	65586
--------------------------	-------

Note: For information about Detector Tube Pumps, see p. 85.

Cyclone Assembly

For mine atmosphere sampling, the MSA preweighed filter cassettes must be used with a Cyclone Assembly to collect the respirable dust fraction. The 10mm diameter assembly is used to separate respirable dust particles from non-respirable dust particles.

Solaris® Multigas Detector with Nitrogen Dioxide Detection

The Solaris Multigas Detector is an economical monitor providing simultaneous detection of up to 4 of the following gases: CH₄, CO, O₂, and NO₂. One of the smallest, lightest four-gas monitors on the market, the Solaris Detector is ergonomically designed and provides the best value in its class. Weighing less than 8 ounces, it is comfortable enough to be worn all day and provides reliable protection without interfering with the user's range of motion.

Encased in a rubberized armor that absorbs impact, the Solaris Multigas Detector is designed for the harshest industrial environments, with an IP 6/5 rating for superior protection against liquid and dust ingress. Easily configured to detect up to 4 gases simultaneously, the detector features a world-class triple alarm system with high-intensity, high-visibility alarm lights, an audible alarm of over 100 dB, and a strong vibrating alarm.

The versatile display features backlighting, providing exceptional contrast for easy reading in low-light conditions and from a variety of angles. An alphanumeric message bar displays commands in "plain English", easily guiding users through various instrument functions. Simple, intuitive calibration is accomplished with the push of a single button.

The Solaris Multigas Detector is powered with a rechargeable lithium ion battery that offers 14+ hours of continuous run time and outperforms other batteries in extreme environmental conditions. The battery fully recharges in under 4 hours and maintains over 80% of its original capacity after 500 recharge cycles. A charging cradle and power cord are included.

An optional powered sampling pump is contained within the sampling probe accessory. It can be used with up to 50 feet of tubing for remote sampling and includes an extensive filtering system to keep out liquid and particulate contaminants. The Solaris Multigas Detector also features an outstanding, 2-year all-inclusive warranty.

Solaris Multigas Detector with Nitrogen Dioxide Detection

MSHA-Approved Solaris Kits

Solaris® MSHA Assemble-to-Order (ATO) Options

- To create your instrument configuration, select the instrument option code and mark them in the boxes to the right.

A. Datalog Options	The datalog option enables the Solaris Multigas Detector to store exposure data for easy retrieval at a later time. To download the Solaris data the MSA datalog kit (p/n 710946) must also be purchased. Datalog option is now standard.	Datalog Options Standard rechargeable instrument (includes Datalogging) Standard Alkaline instrument (includes Datalogging)	Code D B	Selection <input type="text"/> <input type="text"/>
B. Combustible Sensor Options	If a combustible gas sensor is desired, choose option "M".	Combustible Sensor Options None 0-5% CH ₄	Code 0 M	Selection <input type="text"/> <input type="text"/>
C. Oxygen Sensor Options	To choose to have an oxygen sensor installed in your new Solaris Multigas Detector, choose selection 1. For no oxygen sensor, enter a "0".	Oxygen Sensor Options None O ₂ Sensor	Code 0 1	Selection <input type="text"/> <input type="text"/>
D. Toxic Sensor 1 Options	To choose to have an carbon monoxide sensor installed in your new Solaris Multigas Detector, choose selection 1. For no oxygen sensor, enter a "0".	Toxic Sensor 1 Options None CO Sensor	Code 0 1	Selection <input type="text"/> <input type="text"/>
E. Toxic Sensor 2 Options	To choose to have a hydrogen sulfide sensor installed in your new Solaris Multigas Detector, choose selection 1. For no hydrogen sulfide sensor, enter a "0". To choose to have a NO ₂ sensor installed, choose 3. For no NO ₂ sensor, choose 2.	Toxic Sensor 2 Options None (H ₂ S Sensor not installed) H ₂ S Sensor None (NO ₂ Sensor not installed) NO ₂ Sensor	Code 0 1 2 3	Selection <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/>
F. Battery Charging Options	A Solaris-specific battery charger must be used to recharge the batteries in the Solaris unit.	Battery Charging Options None North American outlet-compatible	Code 0 N	Selection <input type="text"/> <input type="text"/>
G. Sampling Pump	It is now possible to combine the sampling pump and probe for the Solaris unit into one easy-to-use accessory. The pump probe is very versatile and can be attached to the Solaris instrument in seconds. The built-in Water Stop filter helps to ensure the sampling system is not contaminated with dirt and debris during use.	Sampling Pump None Universal pump probe	Code 0 1	Selection <input type="text"/> <input type="text"/>
H. Calibration Kits	MSA provides two options for performing instrument calibration. The cost-effective Econo-Cal (34 liter) cylinder and fixed flow regulator provides an economical means to calibrate the Solaris instrument. The Model RP calibration kit also has a fixed flow 0.25 lpm regulator and provides the user with a larger capacity (58 liter) calibration gas cylinder.	Calibration Kit Options None Econo-Cal Calibration Kit Model RP Calibration Kit	Code 0 1 2	Selection <input type="text"/> <input type="text"/> <input type="text"/>

Abrasi-Blast Supplied-Air Respirator	36
Accountability System for Fire Service	51
ACH (Advanced Combat Helmet)	143-144
Adapter for Comfo Cartridges	8
Adapter Kits for Welding Shields & Defender Assemblies	122
Adapter, SCBA to APR	57
Advance Cap, vented and non-vented	113
Advantage Respirator Cartridges	11-12
Advantage Respirators	
Advantage 1000 Respirators	11
Advantage 1000 Riot Control Gas Mask	25
Advantage 200 LS Respirators	8
Advantage 3000 Respirators	9
Advantage 4000 Respirators	11-12
Advantage Cartridges	10
Advantage Fit Test Adapter	18
Advantage Tech CD	8-9
Air Cylinders	40, 50, 101-103
Air Masks (SCBA) and Accessories	45-57
Air-Line Adapter Kit for Duo-Flo & Duo-Twin Respirators	35
Air-Line Filter	43
Air-Line Respirators	30-44
Accessories	42-44
Air-Line Systems	41
Air-Line Systems Pocket Guide	44
Guide to Air-Line Systems	30
Air-Purifying Respirators	8-29
Accessories	15-16
Air-Supply Hose	43, 57
Airborne Compounds Sampling Chart	97
Airframe Carrier and Harness Assembly for SCBA	50
AirHawk MMR Air Mask	48, 54
Alpha Concealable Vest (ForceField)	139
Alpine Protective Eyewear	127
ALTAIR 4 Multigas Detector	76-77
ALTAIR Pro Single-Gas Detector	82
ALTAIR Quick-Check Station	83
ALTAIR Single Gas Detector	83
Anchorage Connectors	165-166
Anthron Descender	168
APR	see "Air-Purifying Respirators"
APR Adapter for SCBA	57
Aptura LT12 Self-Retracting Lanyard	170
Aptura LT30 Self-Retracting Lanyard	170
ArcSafe Harness	155
ArcSafe Lanyards	157
Arc Shield Visors	109, 119
Arctic Elite Protective Eyewear	125
Arctic Protective Eyewear	126
Assemble-To-Order (ATO) System	
for AirHawk MMR SCBA	54
for ALTAIR 4 Multigas Detector	77
for BlackHawk MMR SCBA	54
for FireHawk Air M7 Mask	53
for Escort ELF and Escort LC Sampling Pumps	95
for ForceField Body Armor	141-142
for Galaxy Automated Test System	99
for Orion Multigas Detectors	73
for Orion Plus Multigas Detector	75
for the PremAire Cadet Escape Combination SAR	34
for the PremAire Supplied-Air Respirator System	32
for Sirius PID Multigas Detector	71
for Solaris Multigas Detector	69, 194
for Watchman Multigas Monitors	79
Audi-Larm Warning Device for Air-Line Respirators	41
Aurora Protective Eyewear	126
AutoChange Electronic Welding Lens	16
Automated Test System for Portable Instruments (Galaxy)	98-99

B

Bags for FP Equipment	See appropriate FP equipment page
Ballistic Packages	141
Banana Oil Fit Test Kit	17
Basic High Angle Rescue Kits	185
Basic Line of Hearing Protection	132
Battery, Luminator for Cap Lamps	190

Batteries and

Battery Chargers	See specific product accessories page
BeamGrip	166
Belts, Body	156
Belts, Respirator	20, 23, 44
BIOSENSOR 2200R Biological Agent Detector	93
Bitrex Qualitative Fit Test Kit	17
BlackHawk Tactical Air Mask	48, 54

Bump Caps	117

C

C420 PAPR Kits	27
C.A.R.E. Program	58
Cairns Fire Helmets	58-60
Calibration for Instruments	98-103
Calibration Check Gas Cylinders	101-103
Calibration Check Kit, Model RP	100
Calibration for Sampling Pumps	97
Canadian Super-V Helmets	116
Canisters for Gas Masks	See specific gas mask page
Cap Lamp Lighting Systems & Accessories	190-191
Caps and Hats and Accessories	105-123
Carabiners	158, 167, 181
Carriers, Lightweight Outer (ForceField)	140
Carrier and Harness Assembly for SCBA	50
Carrying Pouch for Air-Purifying Respirators	15
Carrying/Storage Case for Respirators	15
Cartridge Adapter	15
Cartridges	
for Comfo Respirators	14
for Advantage Respirators	12
for OptimAir MM 2K and 6A PAPRs	21-23
Cartridge Life Expectancy Calculator	18
Cascade System Accessories	43
Cassette Sampling	95-96, 192
CBRN SCBA	45-57
CBRN Ultra Elite Gas Mask	26
CD-ROM for Advantage Respirator Information	8-9
Chargers	See specific product/accessories page
Chemical Warfare Agent Detector Tubes	86
Chinstraps for Protective Caps and Hats	109, 121
Chin-Type Gas Masks	23
Chisel Grip	186
Cleaner	
for Facepieces	16, 44
for Eyewear	129
ClearCommand Communications System	
for Helmets	55, 123
for Ultra Elite Facepieces	56
Clearview Protective Eyewear	128
Clearvue 200 Goggles	124
Climbing Equipment	175-176
College V-Gard Helmets	111
Combustible Gas Indicators	84
Combat Helmets (ACH)	143-144
Comfo Cartridge Adapter for Advantage Respirators	8
Comfo Classic Respirators	13
Comfo Elite Respirators	13
Comfo Filters/Cartridges	14
Comfo-Cap (mining headwear)	117
Comfort Band Hearing Protector	131
Communications for Advantage 1000 & Millennium Gas Masks	25
Communication System for Combat Helmets (Supreme Pro)	144
Communication System for Fire Helmets	55
Communication System for Industrial Helmets	55
Communication System for Ultra Elite Facepieces	56
Cones, Safety	134
Confidence Plus Germicidal Cleaner	16, 44
Confined Space Equipment	172-174
Connected By Cable Hearing Protection	133
Constant Flow Air-Line Respirator	37
Cover Lens	

for Advantage 1000 Respirators	15
for Advantage 3000 Respirators	9
for Advantage 4000 Respirators	10
for Air-Line Respirator Facepieces	44
for Full-Facepiece Respirators	15
Cradle Headband Conversion Kit	15
Crash Fire Rescue Proximity System	60
Custom Air V Escape Respirator	40
Custom Imprinting, for Caps and Hats	112
Custom Solutions for Fall Protection	187
CutOff Pro Hearing Protection	132
Cyclone Assembly for Mine Atmosphere Sampling	193
Cylinder Holders, for Check Gas Calibration	103
Cylinders	
Calibration Check Gas	101-103
for PortAire System and TransportAire System	40
for SCBA	50
Recycling (Calibration Cylinders)	103

D

Data Logging	See specific product accessories page
Davits	174
Defender + Faceshield Frames	107, 118-119
Defender + Faceshield Assemblies	119
Derrick Harness	154
Descent Devices	168, 170-171
Detector Tube Handbook	85
Detector Tube Pumps	85
Detector Tubes, Industrial	86-90
Detector Tubes, Chemical Warfare Agent	86
Detector Tubes, Industry Action Sets	86
Detector Tubes, Mining Set	86, 193
DigiCal Calibrator	97

E

Ear Muffs	127-130
Ear Plugs	131
Echo Body Armor (ForceField)	140
Economuff	131
Economuff Multi-Position Muff	131
Elevated-Temperature Visors	108, 120
Emergency Egress System for SCBA (Rescue Belt)	50
Emergency Rescue Bag System	186
Engineering Services for Fall Protection	187-188
Equipment Bags for FP Products	See appropriate FP equipment page
Escape Hoods/Respirators	29, 40, 192
Escort ELF Sampling Pump	94-95, 192
Escort LC Sampling Pump	94-95
ESP II Communications System for APR	11, 25
Evolution 5000 Series Video Capture System	64
Evolution 5200 Thermal Imaging Camera	62
Evolution 5200 HD ² Thermal Imaging Camera	63
Evolution 5600 Thermal Imaging Camera	64
EXC Cap Models	106, 121, 130
EXC Muffs	130
Expanyard Shock-Absorbing Lanyards	161
Explosimeter Combustible Gas Indicator	84
ExtendAire System	52
Eye Protection and Accessories	124-129
Eyewear Cleaning Accessories	129
Eyewear Display Unit	129
Eyewear Lanyards	129
Eyewear Pouch	129

F

Facepiece Fit-Test Accessories	18
Facepiece Fit-Test Kit	18

Facepieces	
for APRs	8–11, 13, 15
for PAPRs	20–21
for PremAire	33
for SCBA	49
Probed	17
Faceshield Frames	
for ACH helmets	144
for individual helmets	<i>See appropriate Helmet page</i>
for most MSA helmets	118–119
for V-Gard	107
Fall Protection Systems	145–189
Fas-Trac Suspensions	<i>See appropriate Helmet page</i>
Field Maintenance for SCBA	56
Filters/Cartridges	<i>See specific product accessories page</i>
Fire Helmets	58–60
Firehawk M7 Air Mask	45–53
Firehawk MMR Regulators for SCBA	49
FireSaver Gear	57
First Aid Kits	134
Fit Testing for Respiratory Products	17–18
Fixed-Crown Suspension	<i>See appropriate Helmet page</i>
Flexi-Filter Pads for Advantage Respirators	11
Flow-Check Devices for PAPRs	22, 28
FM Pro Hearing Protection	132
Fogpruf Cleaner	129
Foldback Faceshield Frame for Caps and Hats	107, 118
ForceField Body Armor and Combat Helmets	138–144
FormFit Disposable Ear Plugs	131
42 CFR Oil-Mist Sampling Kits	95
FP Diamond Expanyard	159
FP Diamond Shock-Absorbing Lanyard	159
FP Pro Construction Harness	153
FP Pro Harness	153
FP Pro Harness/Diamond Lanyard Kits	168
FP Pro Rope Grab	169
FP Rescue Components	181
FP Rescue Kits	183–186
FP Rescue Ropes	182
FP Stryder Anchorage Connector	166
FP5K Carabiner	158
FP5K Shock-Absorbing Lanyard	158
Freedom Series Helmets	110

G

Galaxy Automated Test System for Instruments	98–99
Gas Masks	23–26
Gas Miser Demand Regulator	100
Gas Miser Manifold	100
Gas Sampling Bags	96
Gas-Tester II H Detector Tube Pump	85
Gascope Combustible Gas Indicator	84
Gemini Twin-Port Sampler	96
Goggle Retainers	109, 121
Goggles	124
Gold Helmet, ceremonial	112
Gravity Harnesses	154

H

Hands-Off Chisel Grip	176
Hard Hats and Accessories	105–123
Harness and Carrier Assemblies for SCBA	50
Harnesses and Accessories	148–156
Hats and Caps and Accessories	105–123
HazMat Response Kit	91
HAZMATCAD and HAZMATCAD Plus Hazardous Material	
Chemical Agent Detectors	91
Head Protection and Accessories	105–123
Heads Up Display	49
Hearing Protection and Accessories	130–133
Helmet Communication System	55, 144
Helmet Lights	109, 121
Helmets, for industry	105–23
Helmets, for fire service	58–60
High Angle Rescue Kits	185
High-Pressure Filling Hose Assembly for SCBA	57

Hoist	172
Hoods, Air-Supplied	9, 57
Horizon Horizontal Lifeline	180
Horizontal Lifelines	177–180
Hose, Air-Supply	39, 57
Hose, High-Pressure for SCBA Systems	57
Hoses, Quick-Fill for SCBA	52
HPE Cap Models	106, 121, 130
HPE Muffs	130
HUD	49

I

Image 2000 Service for Imprinting Caps and Hats	112
Impression II Protective Eyewear	128
Imprinting for Caps and Hats	112
Industrial-Size Gas Mask	24
Industry Action Sets (Detector Tubes)	86
Instant Release Attachments for Welding Shields	106, 122
Inlet Pressure Gauge	43
Instrumentation	66–103

Tri-Seal Reusable Ear Plugs	131
Tubes, Detector	86–90
Twin-Cartridge Adapter for Ultra Elite/Ultravue Facepieces	13, 15
Twin-Cartridge Respirators	13
Type N Canister for Gas Masks	24
Typical Air-Line Systems	41

U

Ultra Elite CBRN Gas Mask	26
Ultra Elite M7 Facepiece	49
Ultra Elite Twin-Cartridge Respirator	13
Ultra Filter Respirators	15
Ultra-Twin Respirators	13
Ultralight Cap Lamp System	190–191
UniPro Suspension	106

V

V-Gard Protective Caps and Hats and Accessories	105–109
Vanguard Helmets for Lateral Protection	116
Vented Advance Cap	113
Ventilation Smoke Tube Kit	97
Versa-Hood Air-Supplied Hood	38
Vests	
Body Armor	135–142
Safety	131
Video Capture System for Evolution 5000 Series TICS	64
Videotape Programs on MSA Products	195
Visors	108, 120
Vista Protective Eyewear	127
Voyager Protective Eyewear	126

W

W65 Self-Rescuer	192
Watchman Multigas Monitor and Accessories	78–79, 81
Welder's Adapters for Respirators	16, 44
Welder's Hood for Air-Line Respirators	44
Welder's Plates	16, 44
Welding Shield Attachments for V-Gard Helmets	106
Welding Shields, Goggles, and Accessories	122
Window-Cator Canister (Type N) for Gas Mask	24
Winter Liners for Caps and Hats	123
Wire Screen Goggles	124
Wire Screen Visors	108, 120
Workman Construction Harness	152
Workman Harness	152
Workman Shock-Absorbing Lanyards	157

X

XLS Cap Models	106, 121, 130
