

OCTI-DRY®

WALL DRYING SYSTEM

Goes around corners

Able to get sub-floor and inside walls

1" diameter ports

FAST DRYING

When water damage occurs and saturates the wall structure, fast drying is essential. OCTI-DRY forces warm air through the wall structure, directing it where it is needed most. This results in more thorough structural drying.

QUICK RESPONSE

Octi-Dry works so quickly that in most cases you can avoid major disruption of the customer's home or business. QUICK RESPONSE and proper drying helps to limit the effects of secondary damage, which can meet or exceed that of the original water intrusion.

Adjustable

The AC511 Octi-Dry can be used with almost all air movers. The ports are 1" in diameter. Insert them into a wall cavity, baseboard, or wood floor. Octi-Dry will handle them all.

Octi-Dry is designed (notice the Velcro on the ends) to be used in series. You can put four or more units on a single air mover. One VERY nice feature is the fabric material. You can fold it into a small package for storage (about the size of a one-gallon box).

If you've already seen Octi-Dry, it may be time to take another look. The Octi-Dry has been continuously fine-tuned over the years. It has become the finest wall drying accessory on the market.

sets up fast

"We use the Octi-Dry in every HydroLab water loss class we do. It performs very well. We've been using Octi-Dry effectively for seven years now."

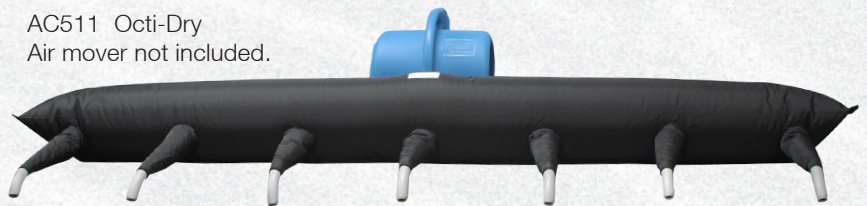

-Kurt Bolden, HydroLab

OCTI-DRY Dries Walls Faster

- 7 air outlets allow you to direct air flow into pre-drilled 1 3/8" or 1 1/2" holes that can be covered by baseboard.
- Constructed of durable marine fabric with a mildew-resistant coating on the inside.
- 10' long with Velcro ends to facilitate stringing together up to four units with one air mover.
- Simple set up.
- Simple removal and storage. Folds up small.
- Goes around corners.
- Great for use on suspended/cushioned hardwood floors (gym floors).
- Attaches to almost any air mover.

Octi-Dry is THE MOST economic and efficient way to dry wall voids and under floors.

AC511 Octi-Dry
Air mover not included.
