

DUFF'S DOORSTOPPERS

Save Your Aching Back!

The Duff Doorstopper allows you to prop doors open without the pain of bending down over and over again throughout the day.

The Duff Doorstopper uses a powerful magnet attached to a small telescoping handle to quickly and easily collect your doorstops without the hassle of bending over.

Prevent back injury with Duff's Doorstop!

The **AD20** comes with a telescopic magnetic handle and two magnetic rubber bases for when more than one door needs to be propped open. You can add bases as needed.

The **AD22** features a telescoping aluminum handle that friction fits and locks into one 6" rubber base. Patented Doorstoppers are lightweight, comply to most interior door building codes with handles made of sturdy aluminum with rubber grip.
