

The same great quality as the Hydro-Force sprayer but this one's adjustable on the fly!

Revolution Injection Sprayers

Apply any chemical in your truck with the Revolution. Get ratios of 1:4 up to 1:64 with a simple turn of a knob. When you come to that grimy area in front of the couch, turn the knob for higher concentrations of cleaner, turn it lower for light soils.

Now you, the professional, decide your mix ratio on prespray; heavy for heavy soil, light for light soil. You won't need constant high concentrations when only a small portion of the job requires it

- *Stainless steel metering stem*
- *Large knob with big numbers*
- *Can recalibrate draw ratios in the field*
- *More accurate and reliable*

AS08R

Adjust solution on the fly with the adjustable metering tip!
