

Pocket Microscope

Stone, Carpet and Upholstery Examination

The most cost-effective marketing tool you'll ever use!

Use a pocket microscope to examine your customer's carpet, stone and upholstery on every new job. You'll be able to identify stains, upholstery weave, stone type, abrasion on carpet and more.

Your customer will be amazed by your professionalism and display of industry knowledge.

Use it once, and you can bet your customer will expect every cleaner after you to do the same.
