- Weight: 1.5 lbs each
- 1 year warranty
- Patented

Each SLP2 Item contains:

- 2 12' spring-loaded poles
- Parts (head, plate, tether and GripDisks™)

Product Specifications

ZipWall® SLP Spring-Loaded Poles Item #SLP2

The SLP 12' aluminum pole is our most popular pole for commercial and residential contractors. This product is strong, lightweight, compact, and cost-effective.

ZipWall SLP poles let contractors set up a barrier fast. They eliminate the need for tape, ladders or staples, so there is no damage to finished surfaces when installing a temporary dust barrier. It offers all the patented features contractors expect from ZipWall.

The height ranges from 4' 7" to 12'. It is construct-

ed of durable aluminum tubing. The head assembly is made of durable polycarbonate with non-skid plastic on the top plate of the pole. This helps to secure the barrier at the ceiling. Our non-skid GripDisk™ anchors the pole at the floor. The head can also be removed and replaced with the Foam Rail™ cross bar to create a dust tight seal at the ceiling.

The head accepts plastic or cloth sheeting up to 8 mils thick. product will work with our Foam Rail and Side Pack accessories, as well as our Standard and Heavy Duty Zippers.
