

Product Specifications

ZipWall Tape (1 inch) Item # T160

ZipWall tape makes it easy to enclose or cover anything at the jobsite with plastic sheeting. Double sided, it's like traditional painter's tape on one side, while the other side has an adhesive specially designed to hold plastic sheeting. In addition, it is made with a paper carrier rather than cloth, so it's easy to tear. No knife or scissors needed.

ZipWall tape is forgiving. The plastic-side adhesive gives you about an hour to adjust

or reposition the plastic sheeting. After that the adhesive sets up and holds the sheeting until the job is done.

ZipWall tape is rated for 14 days and like all tapes, we recommend testing before using.

Features:

- 1" x 60' roll
- 14 day rating
- Lets you reposition plastic for up to 1 hour
