

ULTRAVIOLET

RECHARGEABLE LANTERN

Ultimate Urine
Inspection Tool!

FEATURES:

- Reliable solid-state UV emission from seven xLamp LEDs
- NEW 390-395nm peak emission, 2200mW total emission
- Rechargeable sealed lead acid battery
- Convenient On/Off trigger switch
- Lockable trigger switch for continuous use
- LED charge indicator
- 10,000 hours LED lifetime
- 15 beam angle
- Most powerful solid-state UV light

#AX132

Includes UV lantern, hard case, yellow glasses, AC plug, cigarette lighter plug and wrist strap.

Seven high-flux UV emitters. Shown with wrist strap attached.

INSTRUCTIONS AND CAUTIONS:

- Charge for 18-24 hours before first use
- 4 hours of charging may be required after extended non-use
- Red LED charge indicator glows during charging
- 120VAC or 12VDC vehicle charging supported
- Splash resistant
- Do not dismantle head
- 5 minute of cooling recommended after 20 minutes of continuous use
- Use provided yellow or amber glasses

12V DC port for rechargeable battery.

CAUTION Device emits intense UV radiation. Avoid direct or strongly reflected exposure. Standard clear "UV Blocking" safety glasses offer little or no protection. Use appropriate approved eye wear.
