

CARPET SKIDDERS

No longer is strenuous lifting needed to move furniture.

- This new device moves furniture with little effort! Now it takes only one person to move heavy furniture.
- Skidders are to be used on carpeted areas. Simply place one skidder under each leg of furniture then slide furniture with skidders.
- It's like magic! No back injuries from lifting. No more broken furniture legs. - **Just slide it with skidders.**
- Carpet cleaners use several sets of skidders. Leave skidders under furniture, replace with blocks or carpet protectors after cleaning.

FLORGUARD FLOOR PROTECTORS

Use Florguards when moving major appliances. Florguards will prevent damage to your floors from sharp edges and even the weight of the appliance. A heavy refrigerator can leave indentations in some floors - but not with Florguard!

Strong and durable for use time and again. Set of two.
