**RTU pH**  
7.5

Item #: CC33GL

Available in gallons & 4 x 1 gallon cases

Compare to:

- Jon-Don Matrix® Super Encapsulant
- Excellent Supply Release-it®
- Scot's Tuff Foam Dry

Brush N' Vac employs the latest technology in green surfactants and encapsulating polymers as it suspends and releases soils from carpet during cleaning. The polymer attaches to carpet soils and fibers and then dries to a very hard soil resisting agent. When vacuumed, the dry brittle polymer fractures away, taking the attached soils with it.

Carpets cleaned with Brush N' Vac dry in less than an hour preventing the wicking, yellowing, and recurring stains that often plague commercial carpets. Subsequent vacuuming performance is enhanced with carpets actually getting cleaner with each vacuuming.

Brush N' Vac has been formulated in accordance with the latest environmental guidelines for green cleaning chemistry with the very latest in surfactant and encapsulating technology.

Brush N' Vac can be safely effectively used with cylindrical counter rotating brush, rotary brush or bonnet, oscillating, triple planetary rotary brush, or orbital agitation machines for high performance low moisture cleaning.

- **Fastest cleaning, flash drying**
- **Enhances carpet soil resistance**
- **Prevents soil and spill wicking and streaking**
- **Formulated in conjunction with green formulating guidelines**
- **The ideal low moisture encapsulation carpet cleaner**
- **Works well with all types of low moisture agitation equipment**

### DIRECTIONS

Dilute 1 to 16 (8 oz. per gallon hot water). Dilute 1 to 8 (16 oz. per gallon of hot water) for extra-heavy soiling conditions.

Application for brush and vacuum (encapsulation cleaning)

Spray solution consistently over section of carpet and brush with rotary and carpet brush or counter rotating brush machine. Allow to dry and then extract with vacuum. Effective on all soil conditions.

**Brush Pro Cleaning**

**Bonnet Cleaning**

**Duplex Cleaning**

**Cimex Cleaning**

Application for bonnet cleaning

Spray mixture lightly over an absorbent bonnet and over a section of the floor to be cleaned. Place bonnet under rotary machine and move over area until clean. Change bonnets frequently and place in plastic bag to keep moist until laundered. For use with medium to heavy soil.
