## ENCAPSULATION CLEANER/CARPET PRESPRAY

5 in 1 Carpet Cleaning Solution

CC503GL

### APPLICATION CHART

Synthetic Carpet	★
Natural Fiber Carpet	★
Synthetic Upholstery	✓
Natural Delicate Upholstery	★

★ = Recommended    ✓ = Acceptable

**RTU pH**

**5.5**

Item #: CC503GL

Available in gallons & 4 x 1 gallon cases

Compare to:

- Jon-Don Matrix® Super Encapsulant
- Release-it® Encap-Hydrox
- Vacaway® Hot Knife

Peroxicap is a 5 in 1 multi purpose hydrogen peroxide activated and encapsulating polymer fortified carpet cleaning agent. It combines a synergistic hydrogen peroxide detergent blend with a special encapsulating polymer. The special peroxide blend oxygenates and activates the cleaning power of the polymers and surfactants, and also helps effectively remove many spills and spots (coffee, wine, blood, urine caused discoloration, and more) during the cleaning process.

- Low moisture encapsulation cleaner
- Extraction Traffic Lane Cleaner/ Carpet Prespray
- Extraction Rinse Detergent
- Carpet Spotter
- Bonnet cleaner

### DIRECTIONS

Always pretest surface being cleaned for colorfastness with solution before proceeding.

**For use as a low moisture encapsulation cleaner:** Mix 1 part Peroxicap solution with 12 parts water (10 ounces to a gallon) for normal cleaning. Mix 1 to 8 (14 ounces) for heavy soil. Apply with a pump up pressure sprayer, electric sprayer, or battery sprayer in an even, overlapping pattern across the area to be cleaned. Apply just enough solution for the carpet to be moist to the touch. Agitate the solution into the carpet thoroughly with a counter-rotating cylindrical brush machine, a shampoo brush, a triple-planetary rotary brush machine, or an orbital or oscillating pad machine. Allow the cleaning solution to dry completely. Vacuum the carpet at the next scheduled vacuuming interval.

**For use as a bonnet cleaner:** Mix 1 part Peroxicap with 12 parts water (10 ounces to a gallon) for normal cleaning. Mix 1 to 8 (14 ounces) for heavy soil. Apply to bonnet pad and to carpet with a pump up pressure sprayer, electric sprayer, or battery sprayer in an even, overlapping pattern across the area to be cleaned. Apply just enough solution for the carpet to be moist to the touch and provide lubrication for the bonnet to run smoothly over the carpet. Agitate the solution into the carpet with your bonnet pad. Allow the cleaning solution to dry completely. Vacuum the carpet at the next scheduled vacuuming interval.

**For use as a traffic lane cleaner:** (carpet prespray or preconditioner)

Mix 1 part Peroxicap with 12 parts water (10 ounces to a gallon) for normal cleaning. Mix 1 to 8 (14 ounces) for heavy soil. Apply with a pump up pressure sprayer, electric sprayer, or battery sprayer in an even, overlapping pattern across the area to be cleaned. Apply a heavier amount in more soiled areas. Allow 5-10 minutes of dwell time. Work into carpet pile with Grandi-Groomer or Grandi-Brush. Extract the carpet and applied prespray solution with a compatible extraction rinse solution like Refreshsoft Neutralizing Rinse.

**For use as a hot water extraction rinse detergent:**

- For portable extractors or walk behind extractors, mix 2 ounces of cleaning solution per five gallons of water in solution tank
- For truck mounts or metered portable extractors, mix one quart of solution (32 ounces) with five gallons of water. Set solution flow meter to equipment manufacturers recommended setting.

**For use as a carpet spotter:** Mix 1 part Peroxicap with three parts water (3:1). Dampen the spot being treated with the mixed solution. Let the solution dwell for 2-3 minutes. Blot with a towel. Extraction is not normally required.

**For use as an upholstery cleaning agent:** Mix one part Peroxicap with 12 parts water (10 ounces to a gallon) in a trigger, pump up pressure, electric, or battery sprayer. Apply the solution evenly across the fiber. Agitate and brush the fabric gently with a (hand bonnet mitt or horse hair brush or equivalent SOFT bristled brush). For low moisture cleaning, simply allow the solution to dry and vacuum off. For extraction cleaning, extract with fresh water rinse.
