Extra-Strength Acid Cleaner

Part # CH42GL

VIPER 2 is an acid pre-treatment cleaner for man-made ceramic, porcelain and quarry tile. Use for floors or walls with mineral scale and soap scum residue or to remove embedded stains from grout.

- Amazing advances in high tech surfactant technology help Viper 2 cut grease on the acid side of the cleaning spectrum and do it without the addition of solvents.
- Viper 2 has a low-vapor formula designed to reduce irritation resulting from breathing fumes.

- Safer acid cleaning for tile, grout, terrazzo, vinyl and resilient tile floors, and other hard surfaces
- Effective against soap scum, lime, hard water deposit build-up and efflorescence
- Low vapor formula
- Excellent porcelain tile cleaner for restrooms

DIRECTIONS:

Do not use on acid-sensitive materials like marble or limestone. Test first in an inconspicuous area for surface compatibility. Dilute 1 to 4 with hot water for pump up sprayers. Meter through Hydro-Force or Revolution at 1 to 4. Spray grout lines thoroughly and mist over tile. Allow to dwell for 10 to 15 minutes and extract with Gekko or SX-12 tools using Viper 7 as extraction rinse. Scrubbing grout lines with a brush before extraction may be necessary in extreme situations.

RTU ph - 1.8 - 2.2

Available in Gallons and 4 x 1 gallon cases
