**Oil, Ink & Grease
Multi-Purpose Solvent Spotter**

OINK is multi-purpose solvent formulated for use on carpet and fabric that is designed to remove ballpoint pen, stamp pad, duplicating, marking, writing, felt tip and colored art inks. It also works effectively on latex, spray, and other types of paints. It can also be used to remove shoe polish, cosmetics and adhesives. It has been specially formulated to be in compliance with the latest emission regulations.

- Versatile— OINK is both water soluble and solvent soluble.
- Effective— Ink stains that were previously thought to be permanent can now be removed.
- Free-Rinsing— OINK will rinse free from the fabric with either water or volatile solvent.

OINK can also often be effectively used on many oil stains simply by applying the solution to the stain, agitating with a spotting spatula, waiting a minute or two and then extracting. No blot and rub over and over again. No tamping into towels.

- Multi-purpose solvent spotter designed primarily for use on all types of inks
- Cost effective cutting edge formula
- Uses special dye dispersant to help removal of ink and grease stains
- Water soluble or miscible ingredients for easy rinsing

DIRECTIONS:

1. Always pretest for colorfastness and fiber distortion in an inconspicuous area. Do not apply to color sensitive fibers, leather, satin, silk, suede, velvet, non-colorfast wool, or any fabric that can be damaged by water based solutions. Do not use on acetate as fabric will dissolve on contact.
2. Remove as much of the spilled material as possible prior to solution application. If particle or powder spill, dry vacuum. If liquid spill, blot with colorfast, absorbent towel. If sticky material, use spotting spatula or dull knife to remove as much of the material as possible.
3. Apply a small amount of spotting solution to towel and blot the stain. Agitate into spot with spotting spatula, tamp area with spotting brush, or blot spot with colorfast absorbent towel. Repeat this process until the great majority of colored pigment is removed from the fabric. Apply solution lightly, directly to the remaining stain. Agitate lightly. Allow solution to dwell for 2-3 minutes.
4. Where appropriate, add a small amount of water or Avenge Neutral Spotter, agitate and extract with water. Repeat this process until stain is removed. If fabric is not water compatible, use a volatile solvent (SOLVENT CLEAN) to flush OINK and the stain from the fabric.
5. Note: When using multi-purpose solvents such as OINK., always consider the possible negative effects on backing materials such as latex, foam cushion, and other stabilizing material.

RTU pH: N/A

Dilution Ratios: RTU

Available in Pints and 12 x 1 pint cases

Part # CS08PT
