Available in pints and 12x1 pint cases

Compare to:

- Hydramaster® O.J.
- Prochem® Citrus Gel
- Pros Choice® Pro Solve Gel

GUM GEL ADHESIVE REMOVER is gel based, designed to remove gum, epoxy glue, urethane tape residue, and other contaminants that adhere to carpet, upholstery and hard surfaces. Always pre-test in a small inconspicuous area for safety and compatibility with the fabric or surface. Shake well before using.

- Gel limits spread of product, but allows penetration into surface of gum or adhesive.
- Works on the worst adhesives like epoxy glue, urethane, etc.

### Directions:

1. Remove loose or excess residue.
2. Apply Gum Gel Adhesive Remover full strength to the adhesive or gum. Avoid over-application.
3. Agitate Gum Gel Adhesive Remover into area with any hand held implements like GUM-GETTER or bone scraper. Poke into the contaminant surface to allow the Gum Gel to penetrate.
4. Allow to dwell for 3-5 minutes.
5. Blot or scrape up excess Gum Gel Adhesive Remover along with any adhesive or gum that has been loosened. Repeat steps 2-5 if necessary.
6. Blot and rinse the area thoroughly, using extraction equipment and clean water, then brush fabric to align fibers.
