Item #: CS511GL

Available in gallons and 4x1 gallon cases

Compare to:

- Jon-Don Matrix® Royale Mist
- Prochem® Yellow RX for Browning
- Chemspec® Browning Treat

Liquid Browning/Coffee Free Browning Treatment and Coffee Stain Remover is specially formulated to effectively deal with two of the most problematic and common carpet issues – browning and coffee stains. This solution works extremely effectively on removing or preventing cellulosic and other types of browning that may occur on carpet or upholstery due to over-wetting, inappropriate use of high pH alkaline chemicals, improper drying, and cellulosic soiling. Liquid Browning/Coffee Free removes or reduces browning due to over wetting and bleed through of jute backing in carpets.

Coffee and tea are two of the most common spots or stains on carpet and upholstery. Liquid Browning/Coffee Free was especially formulated to make the removal job easier for the professional. It will attack both coffee and other tannin stains quickly and effectively. Tannin is naturally found in tea, and sometimes added to inks and dyes. This solution is effective on new or old stains.

- Ideal for large commercial accounts with lots of spilled coffee
- Prevents browning and traffic lane yellowing
- Spray on, extract out
- Effective on coffee, tea and other tannin spots

## DIRECTIONS

Always pretest fabric or carpet for color-fastness in an inconspicuous area.

For browning treatment and removal:

- Use solution straight. Do not dilute.
- Apply Liquid Browning/Coffee Free using a sprayer. DO NOT MIST. Apply uniformly to affected area.
- Brush in with pile brush, Grandi-Groom® or Grandi-Brush®. (if using on carpet).
- Allow solution to dwell until browning is reduced or disappears.
- Extract with portable or truck-mounted system with fresh water.
- There is a slight odor associated with the application of this product. This odor dissipates rapidly.

For Coffee, tea, and tannin stain removal:

- On smaller spots, apply solution straight (Do not dilute) to a clean white cloth. Then

thoroughly wet stain with the saturated cloth.

- On large areas, product may be applied with a sprayer.
- Allow to work until stain is lightened or removed. Then blot with a clean, dry, white cloth to remove excess moisture if desired.
- Follow by extraction cleaning, using an alkaline detergent extraction solution.
