Item #: CC512PT

Available in pints and 12x1 pint cases

Compare to:

- Jon-Don Matrix® Inkaway
- Prochem® Solvink
- Pros Choice® Ink-Out

LIFT INK is a multi-purpose solvent formulated for use on carpet and fabric that is designed to remove ballpoint pen, stamp pad, duplicating, marking, writing, felt tip and colored art inks. It also works effectively on latex, spray, and other types of paints. It can also be used to remove shoe polish, cosmetics and adhesives. It has been specially formulated to be in compliance with the latest emission regulations.

- Versatile— LIFT INK is both water soluble and solvent soluble. Most often stains can be removed by applying LIFT INK, water and extracting. Where solvents are more appropriate, LIFT INK can be flushed with CITRUS BURST® SPOTTER. Last traces of some color from problematic oil based stains may need to be treated with TRIPLEPHASE STAIN REMOVER.
- Effective— Ink stains that were previously thought to be permanent can now be removed. Used in combination with PERKY PLUS® as the rinsing agent, LIFT INK has removed heavy deposits of ink on upholstery where other products failed.
- Free-Rinsing— LIFT INK will rinse free from the fabric with either water or volatile solvent. This means no re-soiling problems.

- Emulsifying solvent spotter
- extract away many ink-base spots and dyes

- Ballpoint pen, stamp pad, ink duplicating and marking, inks, paint and much more

DIRECTIONS

1. Always pretest for colorfastness and fiber distortion in an inconspicuous area. Do not apply to color sensitive fibers, leather, satin, silk, suede, velvet, non-colorfast wool, or any fabric that can be damaged by water based solutions. Do not use on acetate as fabric will dissolve on contact.
2. Remove as much of the spilled material as possible prior to solution application. If particle or powder spill, dry vacuum. If liquid spill, blot with colorfast, absorbent towel. If sticky material, use spotting spatula or dull knife to remove as much of the material as possible.
3. Apply a small amount of spotting solution to towel and blot the stain. Agitate into spot with spotting spatula, tamp area with spotting brush, or blot spot with colorfast absorbent towel. Repeat this process until the great majority of colored pigment is removed from the fabric. Apply solution lightly, directly to the remaining stain. Agitate lightly. Allow solution to dwell for 2-3 minutes.

4. Where appropriate, add a small amount of water or PERKY PLUS, agitate and extract with water. Repeat this process until stain is removed. If fabric is not water compatible, use a volatile solvent to flush LIFT INK and the stain from the fabric.
5. Note: When using multi-purpose solvents such as LIFT INK., always consider the possible negative effects on backing materials such as latex, foam cushion, and other stabilizing material.
