- Hydramaster® O.J.
- Prochem® Citrus Gel
- Pros Choice® Pro Solve Gel

Gum Break is a gel based spotter designed to remove gum from carpet, upholstery and hard surfaces. Ideal for oil, grease, tar, ink, gum, etc. Always pre-test in a small inconspicuous area for safety and fabric compatibility.

GumBreak is applied as a liquid gel. Shake it very well before using. Apply it to surface of the gum and it begins to break down the spot without penetrating deep into the backing.

A special surfactant/polymer blend helps speed up the gum removal process, while also protecting the carpet from re-soiling associated with conventional citrus gel spotters.

- Gel based spotter removes gum, prevents delamination
- Effective on many grease, oil, and ink based stains
- Special surfactant/polymer blend helps speed up the gum removal process, while also protecting the carpet from re-soiling associated with conventional gel spotters.
- Shake well before using

DIRECTIONS

Oil Based Soil

1. Remove loose or excess residue.
2. Apply GUM BREAK full strength to the soiled area. Avoid over-application.
3. Work GUM BREAK into area with a GUM-GETTER or tamping brush.
4. Allow to dwell for 2-5 minutes.
5. Blot or scrape up excess GUM BREAK. Repeat steps 2-5 if necessary.
6. Blot and rinse the area thoroughly, using extraction equipment and clean water, then brush fabric to align fibers.

Gum Removal

1. Puncture or break surface of gum to aid penetration into and under the gum.
2. Apply GUM BREAK full strength to the

gum and allow to dwell for 5 to 10 minutes.

3. Scrape up gum with GUM BREAK. Repeat steps 2 & 3 if necessary.
4. Blot and rinse the area thoroughly, using extraction equipment and clean water.
