

Effective and Safe for Fine Stone Surfaces

CST03GL

RTU pH = 7.0-7.5

Spinergy Vivid Stone and Tile Cleaner is the perfect solution for maintenance cleaning of stone and tile floors, countertops and more. It is formulated to be effective and safe on virtually all fine stone surfaces. It cleans up everyday messes, soiling, and spots and spills with a gentle, yet effective neutral formula. Unlike most floor cleaning agents, Vivid Stone and Tile Cleaner does not contain chelating agents which can damage the mineral content of many stone surfaces.

Vivid Stone and Tile Cleaner can be used on natural stone such as marble, granite, limestone, travertine, slate, sandstone, and flagstone. It is also perfect for maintenance cleaning of ceramic and porcelain tile and grout. Whether you are cleaning a stone floor, countertop, fireplace mantle, or shower, Vivid Stone and Tile Cleaner is your perfect choice.

Vivid Stone & Tile Cleaner is also a neutral cleaning solution which can be used as a final neutralizing rinse in the stone, tile, & grout cleaning process.

- A perfect neutral cleaner and rinse for stone, tile, and other hard surfaces
- Contains no water conditioning or chelating agents which can harm natural stone surfaces
- Ideal for maintenance cleaning
- Can be used as prespray or to neutralize alkaline or acid prespray
- Perfect cleaner for stone countertops
- Effective and safe

CLEAN

Directions:

Read entire label before using. Use only as directed. Be sure surfaces to be cleaned are swept or vacuumed to remove loose debris before cleaning. Always pretest surface with cleaning solution for colorfastness prior to cleaning.

1. For normal soiling, mix two ounces of solution with gallon of warm or hot water (1:64) into a professional spray applicator. For heavy soiling, mix 4 four ounces of solution with a gallon of warm or hot water (1:32) into a professional spray applicator. For application through a Hydroforce Inline Injection Sprayer, mix 1 quart of solution with a gallon of water in sprayer bottle. Use standard metering tip for application.

2. Apply mixed solution with sprayer evenly and liberally across surface to be cleaned. If preferred, you can apply mixed solution with a damp mop, sponge, or other appropriate professional equipment. If using a mop for solution application and surface cleaning, change your mop water often to make sure that soil is not redeposited.

3. For best results, agitate and extract cleaning solution using warm or hot water and a rotary agitation surface cleaner such as a Hydroforce SX-12 or Hydroforce SX-7. On sensitive surfaces such as soft marble, make sure the floor has been thoroughly vacuumed or swept to remove pebbles, sand or other abrasive material prior to cleaning. For especially sensitive finishes, use the Hydroforce Gekko tool with brush head instead for extraction, or simply mop to rinse with clean warm or hot water.

4. Accelerate drying with airmover like the Hydroforce Air King or OmniPro Omnidry 33.

5. To protect stone surfaces from future stains and spills, apply Spinergy Solidrock Premium Stone and Grout Sealer, or Spinergy Duraprotect Impregnating Solvent Stone and Grout Sealer.

For use as a neutral cleaning rinse:

Dilute 1 oz./gallon with hot water for portable units. Mix concentrate in a truckmount unit at one quart per 5 gallons of water. Meter as usual. Damp Mopping: 2 oz./gallon hot water.
