

REGENERATE

STONE CLEANER & FINISH REVITALIZER

Multi-Purpose Cleaner, Refresher and Finish Revitalizer Protector

CST04GL

RTU pH=8.0-8.5

Spinerge Regenerate is the ideal periodic maintenance product for cleaning everyday messes and spills while simultaneously refreshing, revitalizing and rejuvenating the fine finish, spill repellency, and appearance of your stone surface investment. Formulated specifically for cleaning stone surfaces, Spinerge Regenerate does not contain harmful mineral dissolving agents contained in most surface cleaners. It has a safe, gentle formula for your fine stone, while still tackling common everyday soil and grime that can build up from normal usage. The built-in sealer refreshes the finish of your stone investment. This product can be safely and effectively used on stone floors, granite countertops and virtually any fine stone surface, including marble, limestone, slate, terrazzo, travertine, and sandstone. It can also effectively be used on ceramic and porcelain tile surfaces.

- Keep protected stone surfaces looking great while enhancing sealer and protection
- Built in sealer refreshes and revitalizes the seal and finish of stone investment
- Contains no harmful conditioning or chelating agents that can harm stone surfaces like most hard surface cleaning agents

CLEAN & PROTECT

Directions:

Universal Precautions

1. Always pretest for colorfastness and appearance change in an inconspicuous area of the surface you are going to clean prior to application.

Stone Floors

1. For normal soiling, mix one part solution with four parts water (for best results, mix with soft water). For heavy soiling, mix one part solution with two parts water (for best results, mix with soft water).

2. Apply an even, light mist using overlapping strokes. Use electric, battery, or pump up sprayer.

3. For best results and finish rejuvenation, allow mixed solution to dwell on surface for 1-2 minutes before wiping.

4. Wipe with clean, dry, absorbent cloth or towel. There is no need to rinse.

5. Repeat if necessary on heavily soiled areas.

6. If repellency and finish are not restored using Spinerge Regenerate, it may be time to reapply a sealant. For best results, use Solidrock Premium Stone, Tile, & Grout Sealer or Duraprotect Impregnating Solvent Stone & Grout Sealer (After complete drying).

Countertops, Walls, Mantles, Vertical Surfaces

1. For normal soiling, mix one part solution with two parts water. For heavy soiling, use product straight.

2. Apply an even, light mist using overlapping strokes. Use electric, battery, pump up sprayer, or trigger sprayer.

3. For best results, allow mixed solution to dwell on surface for 1-2 minutes.

4. Wipe with clean, dry, absorbent cloth or towel. There is no need to rinse.

5. Repeat if necessary on heavily soiled areas.

6. If finish and repellency is not restored using Spinerge Regenerate, it may be time to reapply a sealant. For best results, use Solidrock Premium Stone, Tile, & Grout Sealer or Duraprotect Impregnating Solvent Stone & Grout Sealer (After complete drying).
