

BRIDGEPOINT WOOD PRODUCTS AND THE BRIDGEPOINT WOOD SYSTEM

Bridgepoint Wood Products are formulated to repair, clean and refinish any hardwood surface. By far the main use for the system will be for hardwood floors but the system works on any hardwood surface. In homes and businesses look for cabinets, desks, tables and other hardwood surfaces. Each provides an income opportunity.

The system is completely dust free and can be done with equipment that you probably already have. The only major equipment required is a low speed (175 rpm) floor machine and a shop-vac. Add a few inexpensive tools and you are in business.

BRIDGEPOINT WOOD PRODUCTS

Bridgepoint™ Wood Finish

This quality finish is non-toxic, water-based and self-leveling. When directions are followed it is difficult to make a mistake. In most cases, two coats will be ample coverage on floors and furnishings. You will find the product to be economical in light of the amount of income it provides.

Bridgepoint™ Wood Finish is used full-strength. It comes in two versions, Semi-gloss for the customer who desires a shinier finish, and Matte (satin) finish if the customer likes a little duller finish.

This versatile repair material makes you a true professional in the eyes of your customer.

For complete instructions on the use of these materials see the training materials available from your distributor.

Bridgepoint™ Wood Cleaner

This one step cleaner is used in our system with the rotary floor machine to remove the surface soil and the embedded dirt. It will also remove scuff marks and other imperfections. Wood Cleaner is a concentrate. Mix one part Wood Cleaner with 8 parts water in a spray bottle and apply to the floor before scrubbing. It is also used to remove residue during the rinsing phases. It is the ideal cleaner to prepare the floor for the application of Bridgepoint Wood Finish.

Bridgepoint™ Wood Cleaner is also the ideal

cleaner for daily maintenance of the floor. It can be used by the homeowner to take care of her floor as often as needed.

Bridgepoint Wood Patch

This easy to use product comes in eight colors. Choose a color to match the back-ground wood (not the darker grain). If a single color does not match then two or three colors may be mixed to create the perfect match for the wood. You can even use the darker colors to simulate grain lines in background color.
